

A different kind of home theatre system

If you've been looking for a surround sound solution that doesn't require hours of setup and creative ways to hide the wires, **the search is over.**

Introducing a revolutionary advancement in home entertainment, designed to provide performance and simplicity unmatched by conventional component or all-in-one solutions, this system delights the ears *and* the eyes.

The first thing you notice about the system is what you *don't notice.*

Bose speakers in the front. Bose sound all around.

Think of the feeling you get from lifelike special effects or a powerful soundtrack. The emotions they evoke, enhancing the experience. Usually, that experience comes from a five-speaker system.

Now two speakers (instead of five) and a hideaway Acoustimass® Module deliver the same experience. A home theatre with fewer wires that makes enjoying movies at home easy.

The sleek media centre puts sources in one compact package, experience (DVD/CD player, AM/FM tuner and inputs for three additional sources).

A new universal IR remote lets you control your system and most attached devices. Hear the roar of a train from left to right from just two visible speakers positioned in the front of your room. Enjoy a spacious soundstage and lifelike surround effects whether you're watching the game, listening to a favourite CD or enjoying the latest on DVD.

Technology that makes a difference

TrueSpace™ surround digital processing circuitry allows the two small speakers and Acoustimass® module to

deliver much of the home theatre experience that other systems use five speakers to create.

Bose Link allows seamless hookup to a Lifestyle® system so your 3·2·1 Series II system becomes

part of a multi-room expansion solution that lets you enjoy sound throughout your home.

Bose Videostage™ 5 decoding circuitry

delivers a home theater experience from almost any source.
