

NEW! 151™ SE Environmental Speaker System

Our most popular outdoor speaker is now even better, with enhanced sound quality and a sleeker design. *Stereo Everywhere*® speaker performance widens the sound field, so listeners can experience balanced stereo over a larger area as they move around outdoors. Slot-port tuning extends low-frequency performance for deep, clean lows, even at high volumes. Speakers can be mounted horizontally or vertically. Either way, their new contoured styling blends unobtrusively with porches, decks and eaves.

251™ Environmental Speaker System

Our best wall-mountable outdoor speakers deliver sound quality typically reserved for indoor listening. An *Articulated Array*™ speaker design delivers lifelike stereo music over a wide listening area, while a patented multi-chamber enclosure delivers full, rich low-frequency tones. The result: Voices and instruments consistently sound clear and precise – even as listeners move from place to place – while music’s lower tones come through with depth and impact. And, like all Bose® outdoor speakers, 251 speakers stand up to harsh weather extremes and are backed by a five-year limited warranty.

Free Space™ 51 Environmental Speaker System

Our premium in-ground speakers let you experience the pleasures of your favorite music practically anywhere in your yard. Their unique design and enclosure deliver sound evenly in all directions with a level of quality unusual for a landscape speaker. Ideal for setting among shrubs, in the garden or by the pool, these versatile speakers can also be mounted onto hard surfaces such as decks or patios. Use them as primary outdoor speakers, or to extend existing coverage into areas beyond the deck or patio.

Features

- *Stereo Everywhere*® speaker performance delivers balanced stereo sound over a wide area. Sleek, compact cabinet provides a neat, low-profile appearance – either horizontally or vertically.
 - Exceptionally rugged, durable construction delivers year-round dependability.
