

THE WORLD'S MOST ACCLAIMED SPEAKER, REGARDLESS OF SIZE OR PRICE.

WITH THE FIRST 901 SPEAKER IN 1968, Bose® defined a new standard in home audio – sound rich with the spaciousness, as well as the clarity, of a live performance. Today, over thirty years and more than 1,000 improvements later, the 901 speaker bridges the gap between concert halls and living rooms more closely than any other speaker.

AS THE WORLD'S MOST ACCLAIMED SPEAKER, the Bose 901® Direct/Reflecting® speaker system stands alone as a unique achievement – the result of continuous research, advanced technology and passion for excellence. You hear lifelike, spacious music. And you enjoy Stereo Everywhere® speaker performance – with balanced sound throughout your entire listening area, instead of in one small “sweet spot” between the speakers. Its impressive performance makes the 901 speaker the finest available from Bose, and a legend among music lovers around the world.

BRINGING THE CONCERT HOME.

The 901 speaker builds on a key fact uncovered by Bose research. During a live performance, most of the sound you hear – about 89% – is reflected. But conventional speakers deliver almost 100% of their sound directly. Inside each 901 speaker, eight precisely angled drivers face the back to reflect music off the walls of the room, and one driver faces the front. The result is a concert-like blend of sound, with lifelike spaciousness and imaging.

FROM ENGINEERS WHO SHARE YOUR PASSION FOR MUSIC.

Nearly 40 years of research are responsible for the 901 Series VI speakers of today. You can easily see some of the advanced features: like the free-standing active equalizer, which compensates for driver sensitivity, enclosure characteristics, speaker placement, boundary reflections – even absorption of sound by the grille material. Still other features are hidden inside the speakers. For example, there's the patented Acoustic Matrix™ speaker enclosure, which deftly handles internal air flows of up to 60 mph for impressive bass. And the flat, edge wound aluminum wire of the Helical Voice Coil drivers, which helps explain the 901 speaker's efficient power handling. It all adds up to renowned performance. Hearing is believing!

Key Features

Direct/Reflecting® speaker technology for music with concert-like spaciousness and clarity

Stereo Everywhere® speaker performance for rich stereo almost anywhere in the room, instead of in one small “sweet spot” between the speakers

Patented Acoustic Matrix™ enclosure that manages air flow, and helps re-create powerful bass without audible distortion

Active equalizer integrates seamlessly with the system's requirements for enhanced performance

Proprietary Helical Voice Coil (HVC) drivers for increased efficiency and reliability

Available in hardwood veneer with walnut finish, or black ash finish

Optional accessories: PS-6 pedestals

DRIVER COMPLEMENT:

Nine full-range 4 1/2" Helical Voice Coil drivers

COMPATIBILITY:

Compatible with amplifiers and receivers rated from 10 to 450 watts per channel/rated 8 ohms

DIMENSIONS/WEIGHT:

Speakers:

32.4 cms H x 53.3cms W x 32.4 cms D

Equalizer:

6.4 x 33 x 12.6 cm

6.4 cms H x 33cms W x 12.6 cms D
