Carbide Interchangeable Pilot Chamber Reamer

Made to SAAMI specifications from C4 carbide, these reamers last up to 4 times longer than a standard reamer. Reamers include a removable pilot for use with the GTR Chamber Flushing System (sold separately). A roughing reamer is used to make the initial cut in an unchambered barrel, while a finishing reamer is used for final cutting and headspacing. 3/8" square drive shank is for use with a tap wrench (not included).

Pull Through Finish Reamer with Bushing and Drive Rod

This finish reamer is designed to remove the last few thousandths from a short chambered barrel to properly headspace the rifle. The reamer is inserted into the chamber, allowing the bolt to push on the back of the reamer. A drive rod is threaded into the reamer, inserted from the muzzle and turned from the muzzle end. Finish ream the chamber until the bolt lugs drop in for perfect headspace.

Pilot Bushing Set

Any gunsmith who does a great deal of work on a specific caliber needs a pilot set. This nine-piece set is specially sized over and under the nominal bore dimension in 0.0002" increments to create benchrest-accurate rifle chambers. Fits all of the ECT/PTG tooling and reamers that use removable pilots.

Headspace Gage

This headspace gage is used to accurately measure the headspace dimension of the chamber. Necessary when cutting a chamber or when checking the chamber of a used gun to be sure the headspace dimensions are within safe limits. All gages are made to SAAMI specs. If a the bolt closes on a Field gage, the chamber is very close to or already over SAAMI specified maximum chamber size.

Match Headspace Gage Set

This complete set of Headspace Gages provides more accurate headspacing than is possible with a single Go and No-Go Gage. Perfect for competition shooters, or for anyone trying to get the most accuracy possible out of their rifle. Set of 10 in 0.001" increments.

Complete Match Headspace Gage Set

A set of 11 headspace gages for a specific cartridge. Each gage is clearly marked in 0.001" increments.

Throat Erosion Gage

Quickly and easily check the wear of a service rifle throat with this simple tool. The gage simply slides into the chamber and a reading is taken at the rear of the barrel. New barrels should register at zero, while a barrel that would be too worn for service use would register past the last mark. Spacers are also available for the .308/30-06 gage to allow long-action 30-caliber bolt action rifles to be checked as well.

Cool Tool

Cutting and Tapping Fluid

Prolong life in cutting tools by keeping them cool during use with this Cutting and Tapping Fluid. Can be easily applied and removed from all metal surfaces and features a low toxicity. 16 oz Liquid.

145-632\$10.99

Cerrosafe

Chamber Casting Alloy

Cerrosafe alloy is the gunsmithing standard for doing casts of barrel chambers, dovetails and other hard to measure areas. Cerrosafe melts at a low 170°F. The casting should be removed as soon as solidified and cool to touch. During this time, the casting shrinks to allow extraction from the cavity. Sixty minutes after solidifying the casting will have expanded to precisely the "as cast" dimension. Can be melted and reused. 1/2 lb ingot.

462-291\$19.99

BTS Chamber Flushing System

This attachment creates a constant flow of cutting fluid from the muzzle to the chamber of a barrel being reamed on a lathe. The pilot and reamer are constantly lubricated, and sharp metal chips are flushed back out of the chamber. This system creates a cooler cutting environment, reduces stresses on the tooling and barrel and eliminates possible bore damage from sharp metal chips. Fits barrels from 1/4" to 1.3" in diameter at the muzzle.

128-016\$116.99

Reamer Stop

The PTG Reamer Stop is a collar that slips over the shank of a chamber reamer. It is then locked into place using the included set screws, preventing the operator from cutting too deep.

249-610\$21.49

T-Handle Reamer Extension

12" Handle Extension fits any PTG reamer and allows a reamer to be used when a standard tap handle would not work.

775-160\$37.99

Uni Throater Tool

This hand throating tool allows the gunsmith to accurately lengthen the throat in the rifle chamber, clean up throat erosion or increase freebore. Fully adjustable for precise setting of desired freebore depth.

Neck and Throat Reamer

This piloted steel reamer features 6 sharp cutting flutes. They can be used with either a lathe or by hand with a T handle and can even be used for bolt action rifles without removing the action from the barrel. This reamer not only cuts the neck area of the chamber, but will cut the barrel throat to proper dimensions as well.

Remington 700 Switch Barrel Drilling Fixture

This drilling fixture allows the recoil lug of a Remington 700 Series rifle to be pinned to the gun's receiver, creating a flexible "switch barrel" feature and opening up many different options in terms of new calibers and barrel styles that can be fitted to the rifle. Steel fixture measures 8-3/4" x 2-1/2".

294-074\$159.99

Remington 700 Firing Pin Removal Tool

Removes the firing pin from the bolt in a matter of seconds without damaging the bolt face. Works with all models of Remington 700, 600, 40X, 7, XP-100, 722, 721.

225-312\$29.99

Remington 700 Extractor Rivet Anvil

Hardened steel block supports the back side of the extractor rivet when peening the rivet into place. May be used with a vise for stability. 2-1/4" x 1-3/4" x 1/2".

385-664\$57.99

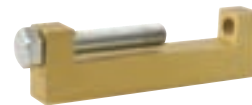

Firing Pin Disassembly Tool

The double end design accepts either a Remington 700 firing pin assembly or a Ruger M77 firing pin assembly. This tool compresses the firing pin spring to allow the cocking piece cross pin to be driven out and then the spring tension can be safely released.

993-248\$24.99

Kleinendorst Remington 700 Firing Pin Tool

Compresses the mainspring on a Remington 700 until the cross pin that holds the firing pin head to the firing pin can be safely removed. The tool body is anodized aluminum, the compression screw is steel.

521-936\$27.99

Nightowl

Remington 700 Sako and AR-15 Extractor Installation Fixture

Securely holds a Remington 700 Bolt on a milling machine for making the necessary cuts to install a Sako-style or AR-15 style extractor. Steel and aluminum.

295-966\$129.99

Remington 700 Mainspring Changing Tool

This tool compresses the firing pin to allow access to the firing pin retaining pin so the cocking piece can be easily removed. Perfect for replacing springs or putting on aftermarket bolt shrouds. It will work on any Remington 700 (Long or Short Action), 600, 40X, 7, XP-100, 721 and 722.

286-410\$23.49

Kleinendorst

Remington 700 Recoil Lug Alignment Tool

Attaches to the front guard screw hole in a Remington 700 receiver to support the factory recoil lug, allowing the gunsmith to snug the receiver down tight. Use to get the barrel "hand tight" and follow-up with a Wheeler Action Wrench (sold separately) to complete the job.

AR-15 Upper Receiver Holding Fixture

This Delrin fixture provides a clamping point to attach an AR-15 upper to any standard bench vise without risk of damage. Perfect for cleaning, repair or barrel installation.

292-126\$38.49

AR-15, AR-10 Vise Blocks

The AR-15 takedown pin and picatinny block will hold an upper receiver by the lugs on bottom or the rail on top. The block can then be clamped into a vise allowing numerous tasks to be easily accomplished. Also useful for aligning a railed forend to the upper receiver during installation. The AR-15 and AR-10 combo block will hold either an AR-15 or an AR-10 by the takedown pins. Matte aluminum.

Application.....	Product #.....	Price
AR-15 Takedown Pin and Picatinny Block.....	878-754.....	\$49.99
AR-15, AR-10 Takedown Pin Block.....	760-543.....	\$49.99

AR-15 Vise Block

This block slides into the magazine well and may then be clamped in a vise. Black.

711-128.....\$18.79

AR-15 Picatinny Rail Vise Jaws

Hard anodized flat top aluminum upper receiver. Vise blocks hold an upper receiver and picatinny forend perfectly aligned while torquing the jam nut.

425-110.....\$78.99

Dave's Metal Works

AR-15 Barrel Tool

This barrel tool holds AR-15 receivers from the inside and allows for turning or threading of the end of the barrel in a lathe without removing the receiver, gas tube, handguard or sight base. The tool extends out the rear of the receiver and can be used on a lathe chuck, vise or even held with a 5/8" wrench.

114-883.....\$64.99

CROSS TAC X AR-15 Armorer's Action Block & Hammer Block

Reversible action block inserts into an AR-15 upper or lower receiver and clamps into a vise, firmly positioning the part for any gunsmithing task. Precision machined from polyethylene, this action block is impervious to all oils and solvents. The Action Block Kit also includes a hammer block for checking a trigger job, and stainless steel roll pin driver.

Description.....	Product #.....	Price
Action Block Kit.....	698-333.....	\$49.99
Action Block Only.....	453-530.....	\$37.99
Hammer Block Only.....	385-159.....	\$15.99

EGW AR-10, AR-15 Flattop Upper Receiver Block

Perfect for removing or installing barrels, handguards or accessories on a flattop upper receiver. This block provides a secure mounting point for a padded vice. For flattop receivers only; sights and carry handles must be removed for use.

292-454.....\$29.99

Strap Wrench

Ideal for use on delicate, decorative finishes or irregular shapes. Adjustable strap is extremely durable, but thin enough to be used in tight spots, even when a soft touch isn't needed.

AR-Stoner™

AR-15 Upper Receiver Milling Fixture

Securely hold an upper receiver to a vise with this aluminum, non-marring jig. Receiver bar fits perfectly into the bolt carrier recess, then two 1/4-20, socket head screws thread into the bar pulling the vise block against the bottom of the receiver frame. Receiver may be secured with or without the barrel installed. Works perfect for milling, machining and drilling by preventing the assembly from shifting.

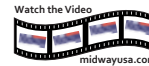

819-480.....\$26.99

AR-15 Upper Receiver Lapping Tool

Use this lapping tool in combination with a 3/8" electric drill and lapping compound to square the upper receiver face of an AR-15. Includes a pilot that fits into the bolt carrier tunnel for perfect alignment while facing.

810-457.....\$21.49

BAKER™ JIGS & FIXTURES

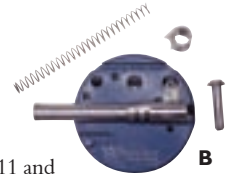

Bench Block

The Bench Block has basic grooves, notches and holes on both sides. It is ideally suited for the 1911 and can be carved and drilled for custom applications.

Description.....	Prod #.....	Price
Baker (A).....	692-743.....	\$34.99

Wheeler™ Engineering

Lapping Compound

A high quality silicon carbide abrasive paste that is used for lapping the bore of a firearm, the bolt face, bolt lugs and a hundred other uses where a perfect final fit or a lapped smooth surface is needed. When lapping a bore, pressure will likely increase with grit impregnated bullets. Due to the likely increase of pressure, light loads are recommended. Five shot strings up to a maximum of twenty shots of each grit are recommended. Repeating the process using progressively finer grits will produce a significantly smoother bore.

M1 Garand Operating Rod Spring Gage

This Gage checks to see if the operating rod spring is weak or out of tolerance. Requires a trigger pull gage (sold separately) that can read at least 18 lbs.

661-373\$22.99

M1 Garand Bolt Timing Block

For use with the M1 rifle. Used to gage bolt release timing. Exact duplicate of the U.S. Army WWII issue gage.

129-701\$97.99

M1 Garand Gas Cylinder Gage

Gage determines if the gas cylinder is performing properly. The marking on the gage will protrude if the cylinder is in good condition. For use with the M1, M1C, M1D and M1 Garand. Made from steel and hardened to 60 RC.

294-389\$119.99

M1 Garand Gas Cylinder Plug Valve Fixture

Used to hold valve open for cleaning or refinishing.

358-557\$21.99

M1 Garand Throat Erosion Gage

Hardened to 60 HRC steel and made to military specs, this gage reveals any wear on the rifle's throat.

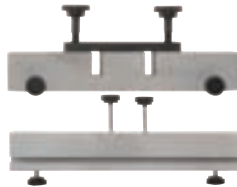

114-934\$74.99

M1, M1A Receiver and Barrel Timing Gage

Gage the alignment of the receiver to the barrel. Requires two 12" or longer steel rules or a precision level (not included).

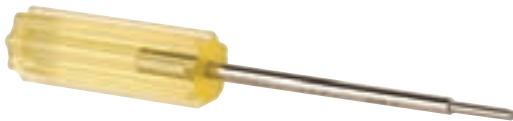

872-304\$70.99

M1A Gas Cylinder Alignment Gage

Used to check alignment of gas cylinder to gas port in the barrel.

990-526\$18.99

M1A National Match Spring Guide

Fluted to create a more smooth operation. Made from 4142 ordnance steel.

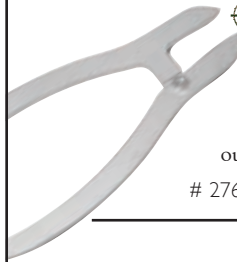

149-652\$42.99

M1 Handguard Clip Pliers

The easiest way to remove or install the rear handguard band (clip) on M1 and M1A rifles without breaking the handguard.

276-034\$23.99

M1 Garand, M1A Bolt Disassembly Tool

Aluminum jig securely holds entire bolt and saves time and frustration.

569-667\$49.99

Accuracy Speaks

M1A Gas Piston Drill

Remove carbon build up in the gas cylinder plug and piston using this steel drill with aluminum handles.

Description **Product #**..... **Price**

Firing Pin Stop Gage (A).....767-317.....\$26.49
 Precisely fit the firing pin stop to the slide by measuring the width of the stop notch with this tool. Gage measures from 0.474" to 0.480" in 0.002" increments and is clearly marked for quick measurements. Constructed of heat treated tool steel.

Gunsmith Plate (B).....138-584.....\$119.99
 This aluminum plate features 2 steel clamps that allow you to secure a 1911 slide in almost any position. Perfect for gunsmithing tasks that require the slide to be held firmly in place including milling, welding, cutting, etc. Works with standard 1911 frames and Para-Ordnance P14 and P16 frames. Instructions are included. 8" x 6" x 1".

Hood Length Gage (C).....244-445.....\$24.99
 Measures inside the slide from the rear lug to the bolt face. Made from heat-treated tool steel.

Lock Up Gage (D).....478-623.....\$20.49
 A necessity to ensure proper lock-up when fitting a barrel to a slide. Aluminum.

Power Custom

1911 Checkering Guide

Use for 60 to 90° checkering on the front strap, mainspring housing or the lower part of the grip safety.

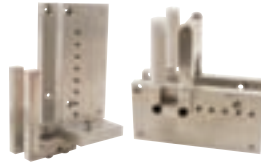

233-273\$22.99

Marvel

1911 Checkering Fixture

Creates professional results when checkering a 1911 front strap. Adjustable for any width checkering file, with polymer bushings to protect delicate finishes. Anodized aluminum with a bead-blasted finish.

436-061\$209.99

Extractor Tension Gage Set

Properly tune the extractor on a favorite semi-auto. Simply insert the machined brass gage between the extractor and the breech face and measure the resistance required to pull the gage free of the breech face with a trigger pull scale (sold separately). The trigger pull scale shows the exact amount of rim tension and clearly shows when your extractor needs adjustment. Double ended gages work for 9mm/38 Super and 40 Caliber/45 ACP. This set works for most semi-auto handguns with exposed extractors and open breech faces.

733-842\$14.49

1911 Barrel Holder

Holder locks the slide and barrel together for a perfect pin to lug fit. Simply slide through the bushing below the barrel and clamp in the full lock position with the set screw. Fits 45 ACP, 9mm and 38 Super barrels and is 5-3/4" long x 5/8" in diameter.

492-155\$18.99

1911 Barrel Alignment Block

Solid steel block fits between the slide rails and prevents barrel twist when installing a new barrel to a 1911. Milled slot holds the barrel in the slide so the hood can be fitted to the bolt face.

722-244\$28.99

1911 Barrel Alignment Gage

This alignment gage is useful for indicating if a barrel has been fitted correctly. The 8-1/2" long steel rod is inserted into the barrel, and its centered tip will drop into the slide's firing pin hole when the barrel is properly fitted.

1911 Barrel Bushing Fitting Mandrel

Bushing installs between 2 halves of the mandrel and can be easily turned down in a drill press or lathe.

749-359\$58.99

Hower Custom

1911 Slide Spreader

Designed to spread open over-tightened 1911 slide rails without fear of twisting the slide.

292-228\$23.49

1911 Frame Support System

Eliminates possible frame damage while working on the firearm. The magazine well supports prevent the magazine well from crushing. The hardened steel side plates index off the grip bushings on each side and take the pressure of the vise jaws. Also serves as a handy straight edge guide for support when stippling the front strap. For single stack frames only.

127-002\$73.99

1911 Rail Slide Clamp

Designed to be used in conjunction with a heavy-duty vise, this clamp prevents over-tightening the slide rails when adjusting the slide on the 1911.

273-991\$109.99

1911 Beavertail Grip Safety Fitting Fixture

The perfect fitting fixture for installing the Wilson Beavertail Grip Safety with its unique compound radius. The fixture attaches to the hammer and thumb safety holes for perfect indexing. The fixture guides the gunsmith as to how much and where the metal has to be removed from the frame for a perfect fit. Not for use when installing grip safeties that specify a 0.250" radius.

298-932\$23.99

1911 Beavertail Grip Safety Installation Fixture

Used as a guide for altering the frame for fitting of the beavertail grip safety, this heat-treated tool slips into the frame through the thumb safety hole and allows you to perfectly make the 0.250" radius cut on each side of the frame the first time. Instructions included. Not for use with Wilson grip safeties that require frame modification.

226-177\$22.49

1911 Hammer Stop Block

Block slides onto rails to facilitate testing of the hammer and trigger without the slide in place. Avoids damage that otherwise might result from dropping the hammer without the slide in place.

#936-014\$33.99

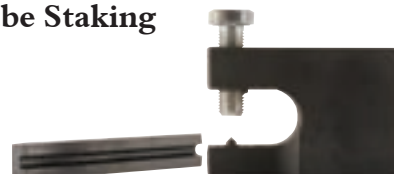

Strobel

1911 Plunger Tube Staking Tool

This tool uses a hardened point to flare the plunger tube legs into the recesses in the frame. Works with most 1911 Gov't, Commander and Officer frames. Requires a crescent wrench for use (not included).

137-021\$29.99

1911 Ramped Barrel Cutter

High speed steel cutter allows a 1911 frame to be cut to accept a Nowlin-Wilson ramped barrel.

478-953\$99.99

SDM

1911 Frame Holding Fixture

This aluminum fixture was designed to hold a single stack 1911 frame in your bench vise. It can be used for many hand operations and was originally developed for hand checkering. It keeps the frame out and away from the vise to protect it from being damaged from the vise jaws. The twelve sided body offers many angles to position the frame so virtually any gunsmithing operation can be performed on the frame.

411-823\$65.99

Marvel

1911 Slide Lapping Tool

Lapping the slide on your 1911 can be a tedious task. This tool makes the process less difficult.

913-543\$38.99

1911 Barrel Alignment Gage

Solid steel block fits between the slide rails and prevents barrel twist when installing a new barrel to a 1911. Milled slot holds the barrel in the slide so the hood can be fitted to the bolt face.

722-244\$28.99

1911 Barrel Holder

Holder locks the slide and barrel together for a perfect pin to lug fit. Simply slide through the bushing below the barrel and clamp in the full lock position with the set screw. Fits 45 ACP, 9mm and 38 Super barrels and is 5-3/4" long x 5/8" in diameter.

492-155\$18.99

SWENSON™ 1911 Barrel Alignment Gage

This alignment gage is useful for indicating if a barrel has been fitted correctly. The 8-1/2" long steel rod is inserted into the barrel, and its centered tip will drop into the slide's firing pin hole when the barrel is properly fitted.

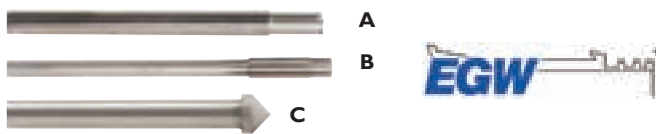

Description	Product #	Price
40 S&W and 10mm Auto	349-484	\$38.99
45 ACP	238-242	\$38.99
9mm Luger	452-738	\$38.99

1911 Taps

Swenson taps are made of solid steel and designed for use with 1911s. Grip tap is for re-boring stripped or misaligned bushing holes, while the screw tap uses 10-48 threads for re-cutting.

Description	Product #	Price
Grip Bushing Tap	941-293	\$19.99
Grip Screw Tap	560-549	\$19.99

Sear Pin Reamer	Product #	Price
0.110" Dia	188-347	\$12.99

1911 Barrel Fitting Fixture

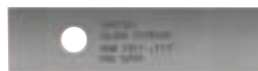

This heavy steel jig clamps in a machine vise for accurate barrel milling. Serves as a jig and "V" block that offers an adjustable index to fit barrels to frames that are slightly out of spec. Barrels can be removed from the jig to check fit without losing zero. Requires 3/16" 4-flute carbide end mill (not included). Instructions included.

180-902\$178.99

SWENSON™

1911 Slide Fitting Bar

Hardened, tool steel bar is used as an anvil inside the frame rails on a 1911. To use, measure the rail thickness on the slide. Then, insert the fitting bar with the same thickness into the frame rails and tap the frame rail gap until it is the correct width to accept the slide. 1" wide x 4" long. Number listed is the thickness of the bar.

1911 Slide Milling Fixture

Milling jig secures slides firmly in place for all types of milling projects.

327-842\$119.99

1911 Frame Holding Fixture

Aluminum vise jaws grip and hold a single stack 1911 frame without damage. Provides an extra margin of safety during frame peening and machining operations. Indexes off of the grip screw bushings and clamps with a single cap screw located in the center of the jaws. Relief cuts on the side and the bottom won't interfere with integral magazine wells and the plunger tube. CNC-machined aluminum, 4" square.

794-901\$63.99

1911 Extractor Adjusting Tool

Extractor tension is critical on a 1911 for proper extraction and ejection. With this tool the extractor can be precisely tuned by simply adjusting the stop.

931-460\$28.99

BAKER™ JIGS & FIXTURES

Adjustable Extractor Support Removal Tool for 44 and 45 Calibers

Eliminate the need for different tools to fit different guns with this tool. Brass support rod fits in the rear of the cylinder and supports the extractor guide pin and star when the ejector rod is unscrewed. Body is solid, carbon steel.

297-893\$28.99

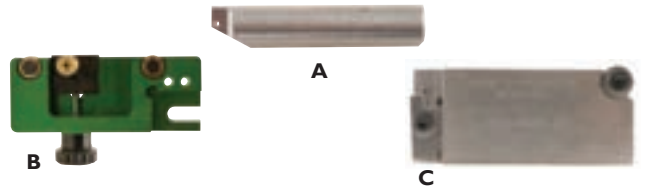

Kreb's Custom Guns

1911 Grip Safety Milling Jig

For use when working on a 1911 frame. The pivot pin allows an evenly cut tang to accept any grip safety that uses a 0.250" radius. Works with a 3/8" diameter end mill.

939-288\$84.99

Sear Fixtures

This jig allows a gunsmith to lock a sear firmly in place at a desired angle. This makes sear stoning much easier and more precise for a better trigger job. Aluminum construction.

Gunsmithing Tools

1911 Scope Mounting Drill Fixture

This steel jig accurately locates hole positions on a 1911 frame for the Weiland hole pattern.

967-597\$39.99

SDM 1911 Firing Pin Stop Removal Tool

This tool was designed to install and remove extremely tight Firing Pin Stops. A tight Firing Pin Stop helps prevent extractor clocking which can cause poor ejection and jamming. The head of the tool is offset to clear most rear sights. Fully machined from heat treated 4140 steel.

670-906\$18.99

1911 Widget Assembly Tool

Designed to depress the 1911 slide stop and safety lock plungers, simplify assembly and disassembly. Also helps avoid scratching the frame when installing a slide stop. Blue polymer.

581-547\$3.59

1911 Safety Plunger Tool

This tool makes installation of a thumb safety on a 1911 much easier by depressing the safety lock plunger. Perfect for the home or professional gunsmith.

869-935\$9.49

1911 Pocketsmith

Caspian has created a handy pocket tool specifically for working on 1911 handguns. The 4" tool unfolds to reveal screwdrivers for the magazine release, grip screws and adjustable sights, Allen wrenches for grip screws and guide rods, a utility knife, file, barrel bushing wrench, pliers with spring cutter and a mainspring punch pin. Nylon belt pouch included.

884-803\$34.99

Glock Disassembly Tool

Designed to help remove the pins from all models of Glock handguns. Polymer handle with a steel tip. Black.

181-144\$9.79

TACRAC Glock Armorer's Tool

Lightweight and stored in the grip recess, this tool protects the inside of the firearm from dirt and debris while doubling as a Glock universal pin punch. Steel punches with a delrin body.

129-851\$22.99

Ultimate Armorer's Glock Tool

The Ultimate Armorer's Tool is the size of fountain pen yet contains virtually all the tools required to service the Glock. Includes a 3/32" pin punch for removing all Glock pins, a small flat head screwdriver for connector removal, a nut driver for installation and removal of aftermarket front sights and small nylon parts brush for easy clean up.

916-190\$20.49

Armorer's Tool Kit

Tool Kit includes an armorer's combination tool, a selection of punches, safety tip hammer, safety glasses and hemostats. Comes in a durable carrying case with foam cut outs.

295-867\$148.99

Pistol Combination Tool

Screwdriver-type tool with combination bits specifically sized to fit fasteners on all Sig Sauer pistols.

340-881\$29.99

Ruger Takedown Tools

Takedown tools make disassembly simple and easy, helping avoid damage to firearm or user.

Power Custom Series 2 Stoning Jig and Adapter

An updated version of the Series 1 jig, this model is easier to use and more precise. Jig makes it simple and easy to stone triggers and sears for a perfect trigger pull. Adapter sold separately.

918-073\$15.49

Ruger, S&W Extractor Rod and Yoke Alignment Fixture

Jig allows the yoke alignment to be quickly tested and straightened on a S&W K, L, and N-Frame, and Ruger Six Series revolvers. Dial indicator is sold separately.

465-787\$124.99

Ruger Single Action Front Sight Fixture

This steel jig clamps to the top strap of a Ruger revolver. The front of the jig features another clamp to hold the front sight blade in perfect alignment during soldering. Perfect for Cowboy Action shooters or any amateur or professional gunsmith.

824-174\$87.99

Yoke Facing Reamer

This piloted hand reamer is used to square the face of the yoke. Used in conjunction with yoke endshake bearings. Works with S&W K, L, N-Frame, Ruger Speed Six and Security Six.

762-245\$45.99

Series 1 Stoning Fixture and Adapter

This fixture allows positioning of the sear or hammer at a precise angle for custom trigger pull adjustments. Once the part is in position, an Arkansas or India stone is set on top of the roller guide (included) to stone the mating surfaces on the hammer or sear. Fixture is drilled to hold six of the most common hammer and sear pins in the same alignment as they are in the gun, allowing the gunsmith to check sear engagement outside of the firearm. This fixture requires a different adapter for each firearm (sold separately). For best results, a small clamp can be used to hold the part against the fixture.

Rosewood Handle.....	662-435.....	\$59.99

Choke Gage Key Ring

Check the choke of 20 and 12 gauge guns using this handy one-piece brass gage. Gage comes with a key ring and easy to read choke markings. 3-1/2" long. 3 oz.

546-552\$19.99

Brass Choke Gage

One-piece brass gage that accurately measures the choke of 410 Bore, 28, 20, 16 and 12 gauge guns. Precision brass construction with bore choking clearly indicated for each gauge. 5" long. 3-1/2 oz.

985-226\$39.99

Chamber Length Gage

Gage is marked from 410 Bore to 10 gauge. Compact, accurate and a must for every shotgun owner. Perfect for a trip to the gun show. Length 4-1/2", width 7/8". Brass.

274-574\$39.99

Chamber Length and Choke Gage

Includes chamber length gages from 410 Bore to 10 gauge. Compact, accurate and a must for every shotgun owner. Perfect for a trip to the gun show. Length 4-1/2", width 7/8". Brass. The Choke Gage will measure the choke of any 12, 16, 20, 28 or .410. The brass gage is 5" long and weighs 6-1/2 oz.

834-592\$44.99

Chamber Length Gage

This chamber length gage set precisely measures chamber length for 10, 12, 16, 20, 28 gauge and .410 bore shotguns. Comes with a French fitted and gold embossed case that will easily fit in your back pocket.

614-634\$124.99

Shotgun Drop Gage

Used to precisely measure drop at heel and toe as well as the amount of cast, the all-aluminum shotgun drop gage is the perfect addition to the tools of any stock maker or stock fitter.

725-470\$359.99

Shotgun Wall Thickness Gage

This instrument is used to accurately measure barrel wall thickness. Dial indicator measures in 0.001" increments and can be used on 12, 16, 20 and 28 gauge shotguns. The instrument is constructed of steel with brass fittings and a blued base.

452-560\$549.99

L.C. Smith Hammer Spring Tool

Used for cocking and de-cocking the hammers of a hammerless L.C. Smith with the forend removed. Also used for removal and installation of the main spring from the lock plate. This heavy duty tool will provide years of service and value to any L.C. Smith owner. Matte steel.

397-314.....\$34.99

Shotgun Choke and Barrel Micrometer

Measures choke, bore diameter, chamber and forcing cone dimensions. Accurate to 0.001". Comes with instructions and extensive information for American and foreign guns. The 4 Gauge set includes 12, 20, 28 and 410 and comes packaged in a solid oak case.

Interchangeable Pilot Screw In Choke Reamer and Tap

Reamers feature an integral stop. Taps have ground threads. May be used by hand but a lathe will give best results. Tru-Choke for use with barrels that are too thin for WinChoke. Tru-Choke Thinwall for over and under, lightweight single shot, side by side with thin barrels. 0.020" thinner than standard Tru-Choke tubes. WinChoke for threading barrels to accept original equipment tubes from WinChoke, Mossberg AccuChoke, Weatherby, Browning Invector. Rem Choke will accept Remington Rem Choke factory tubes.

MENCK Shotgun Forend Wrench (C)	Product #	Price
Mark 3	616-835	\$46.99

Steel forend wrench provides easy forend installation and removal without damage. Fits the Remington 870, Mossberg 500, Winchester 1200, 1300 and Browning BPS.

Remington 870, 11-87 Magazine Dimple Removal Tool

This high quality reamer is used to remove the dimples found in many Remington 870 magazine tubes. Removal of the magazine tube dimples allows the installation of a magazine extension for increased capacity. By turning both of the adjusting nuts the same direction, the reamer can be made larger and smaller. For best results, material should be incrementally removed until the final adjustment is the inside diameter of the magazine tube. Working slowly and using cutting oil and a good tap handle will prevent damaging the magazine tube.

# 154-173	\$39.99
-----------	---------

Remington 870 Rivet Cutter

This hardened steel cutter fits into a drill press; spot faces the front rivet for broken ejector removal. Eliminates rebluing the receiver by letting the existing rivet be re-peened. Tool is 2-1/2" long, shaft is 0.31" in diameter and cutter is 0.143" in diameter.

# 639-314	\$24.99
-----------	---------

Remington 870/1100/11-87

This handy tool easily removes and installs trigger pins. Stepped on the opposite end for alignment of the pivot tube.

WISDOM

Titanium Nitride Coated Drill Bit Set

Set features industrial-quality roll-forged M2 high speed steel bits that are coated with titanium nitride for a 102 Rockwell hardness. Larger bits may not fit in a standard 3/8" hand-drill chuck. Storage case included.

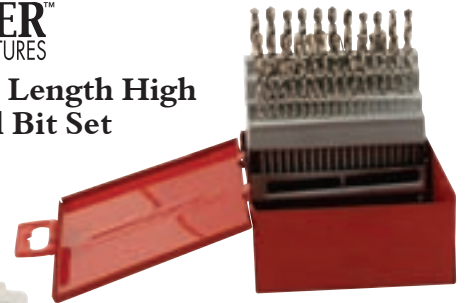

Description	Product #	Price
13-Piece Includes 1/16", 5/64", 7/64", 1/8", 9/64", 5/32", 11/64", 3/16", 13/64", 7/32", 15/64" and 1/4" bits in a plastic case.	473-076	\$5.99
29-Piece Includes all fractional bits from 1/16" to 1/2" in a steel case.	485-462	\$45.99
115-Piece (Pictured) Includes 60 wire gage bits (numbered 1 through 60), 26 lettered bits (A through Z), and 29 fractional bits (1/16" through 1/2" in 1/64" increments) in a steel case.	502-405	\$99.99

Barrel Threading Lathe Bit

Pre-shaped threading lathe bit ready to use. The 55° cutter is designed to cut the true threads of the 98 Mauser, the 60° cutter duplicates most aftermarket Mauser thread patterns, the square bit cuts a true 10 threads per inch square thread for 03 Springfields and Enfields and the lever action cutter cuts 12 threads per inch for Marlin lever guns and Remington rolling blocks.

Hanson Steel Taps

The Bottom Tap features a taper on the end that is one to two threads long. Plug tap has a chamfer that is 3 to 5 threads long and is the most common chamfer. Taper tap, also known as a starter tap, features a 7 to 10 thread chamfer. This allows for easier starting and requires less tapping torque. Each tap is carbon steel with a square drive head.

FA Enterprises

Barrel Threading Dies

These finely made stainless steel dies are used for cutting new threads or straightening existing threads, and are often the choice for threading a rifle barrel to attach sound suppressors, flash hidiers or compensators. Thread alignment tools are available to ensure that dies are properly located on the barrel before the thread cutting process begins (sold separately).

Die 1-1/2" Dia.	Threads	Product #	Price
AK-47 (A)	14mm-1.0 Left Hand	915-882	\$59.99
FN FAL (B)	9/16"-24 Left Hand	640-825	\$59.99

FA Enterprises Thread Alignment Tool

Before threading a rifle's barrel, it is often wise to properly align the cutting die with the barrel's exterior. These thread alignment tools will keep the die perfectly positioned during the entire cutting process. Tools are specific to a certain thread pitch and bore diameter, and are available for most of today's popular military-style rifles.

Square

The combination set is complete with a square head, center head, and non-reversible protractor head with a 12" hardened steel, machine-divided blade. Features reversible lock bolts, scribe, spirit level in both square head and protractor head and a direct reading double 180° protractor scale. Heads are cast iron with a black wrinkle finish.

226-604\$174.99

BAKER™ JIGS & FIXTURES

Caliper Center Line Gage Attachment

Designed to be used with 4", 6" and 8" calipers, these probes slide on to the calipers jaws to measure centerline distances between two holes. Each probe has a conical end, cut at a 60° angle, eliminating the guess work of finding the center of the hole by centering itself. Can be used with dial and vernier calipers.

380-233\$36.99

Caliper T-Bar Base Attachment

T-bar attachment is 3" wide and allows measuring depth in areas where the hole is too big for the caliper to be positioned or in situations where the base of the hole is not an even surface. T-bar fits on the base of 4", 6" and 8" calipers and features a clamping screw to securely attach it.

Thickness Gages

A great tool for setting up jigs and fixtures when precision is the key.

General	Product #	Price
Inch and Metric (Pictured)	951-087	\$18.49
26 gage leaves from 0.0015" to 0.025" thick. Leaves measure 3" long x 1/2" wide.		
Mitutoyo	Product #	Price
Inch	164-074	\$26.99
26 gage leaves from 0.0015" to 0.0150" thick. Leaves measure 3" long x 1/2" wide.		
Starrett	Product #	Price
Inch	634-439	\$45.99
26 tempered steel 1/2" x 3-1/32" straight leaves. The leaves range in thickness from 0.0015" to 0.0250" and are plainly marked for use.		
Metric	121-076	\$48.99
20 Leaves Ranging from 0.05mm to 1.0mm		

Center Gage

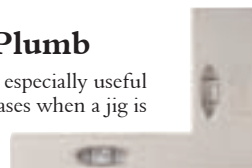

This gage is invaluable for determining the number of threads per inch through graduations in 14ths, 20ths, 24ths and 32nds. Made of spring-tempered steel with a satin chrome finish.

Description	Product #	Price
Whitworth-English 55°	392-618	\$24.99
American 60°	727-156	\$22.99

Cross Test Level and Plumb

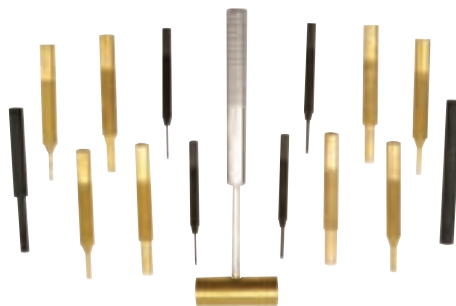

Measuring only 2" x 3", this level and plumb is especially useful for squaring and leveling work such as scope bases when a jig is not available. The level has two vials at right angles for cross test leveling without moving the tool and a plumb level at the top for checking squareness.

# 112-757	\$38.99

Brass Hammer and Steel Punch Set

Description	Product #	Price
Lyman	761-422	\$40.99
Set includes brass tapper hammer with three interchangeable heads (brass, steel and nylon), 6 steel pin punches and one brass drift punch. Comes in a custom wood tray for easy storage.		
ProMag (Pictured)	973-259	\$37.50
Hammer with an 8 oz brass head, plated metal handle, 4 steel pin punches, 2 Delrin pin punches, 8 brass pin punches, all in a molded plastic case.		

Hammer and Punch Set

The Wheeler Hammer and Punch Set combines a three face hammer; brass, steel and polymer with a brass drift and 6 steel punches. It comes in a plastic carrying box. Great tool for upgrading parts and detail stripping your firearms.

# 410-835	\$29.99
-----------	---------

Scratch Awl

The 3-1/2" long, alloy steel blade is securely fastened through the hardwood handle to both the plated steel ferrule and the cap for rigid construction. Contoured handle for comfortable grip makes this scratch awl one of the finest.

# 354-329	\$5.29
-----------	--------

Adjustable Trammel Set

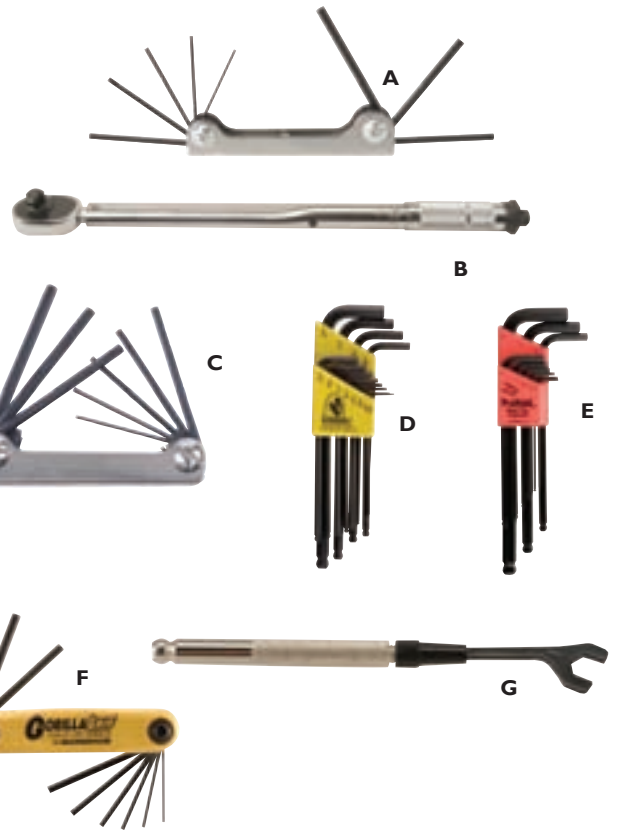

Draw large circles, mark templates, and measure distances that are too big for conventional compasses and dividers with this easy to use Trammel Set. Clamps onto any surface 5/8" to 1-1/2" thick and any length. Replaceable points can be substituted with a pencil, ballpoint pen or soapstone stick depending on the materials surface.

WISDOM		
Torque Wrench (B)	119-975	\$42.99
<i>A Torque Wrench allows the perfect amount of force to be applied to a nut, bolt or action without the risk of damage. This steel wrench measures up to 150 foot-pounds of torque.</i>		
LYMAN	Product #.....	Price
Fold-Up Hex Key Wrench Set (C)	555-836	\$4.99
<i>Contains 8 of the most common hex keys found on reloading equipment. Includes sizes .050", 1/16", 5/64", 3/32", 7/64", 1/8", 9/64" and 5/32". Steel.</i>		
BONDHUS	Product #.....	Price
Ball End Hex Wrench Set (D)	632-327	\$12.99
<i>Set of 12 from 0.05" to 5/16"</i>		
<i>Set of 14 from 1.5mm to 10mm</i>		
<i>Made from specially formulated steel, these ball end hex keys are more efficient than a regular hex blade because they allow quick insertion from a variety of angles into hard-to-reach places. Work great in wide open spaces as well. Corrosion resistant and includes an organizing case that can be used for added torque.</i>		
Pro Hold Ball End Hex Wrench Set (E)	832-366	\$20.99
<i>Metric - Set of 9 from 1.5mm to 10mm</i>		
<i>Standard - Set of 13 from 0.050" to 3/8"</i>		
<i>Specially designed to hold fasteners and screws during insertion or removal from hard to reach areas without taking away from the strength of the wrench. Insert screws and turn a full 360° at up to a 25° angle.</i>		
Fold Up Wrench Set (F)	455-104	\$5.49
<i>Metric Hex Head - Set of 9 from 1.5mm to 6mm</i>		
<i>Standard Hex Head - Set of 9 from 0.05" to 3/16"</i>		
<i>Standard Hex Head - Set of 9 from 5/64" to 1/4"</i>		
<i>Torx Head - Set of 8 from T6 to T25</i>		
<i>A range of blade sizes in one easy to carry package. Open a blade to the 180° position for spinning a fastener in or out. Open to 90° for more torque and screwdriver action. Steel construction.</i>		
MOODY	Product #.....	Price
Trigger Wrench (G)	656-025	\$5.39
<i>1/4" 4" long wrench has a compact design to reach into tight places for adjustment. Perfect for trigger work.</i>		
<i>5/16" 456-544 \$5.39</i>		
<i>8-Piece Set 516-439 \$26.99</i>		
<i>Each steel wrench is 4" long. Sizes: 5/64, 3/32, 7/64, 5/32, 1/8, 3/16, 1/4, 5/16</i>		

Gunsmithing Tools

Hand Reamer

Deburs plastic, copper, iron-pipe and sheet metal but also countersinks wood, plastic formica and sheetrock. Features a fluted steel cutter, plastic handle and measures 5-1/8" long.

542-543\$8.09

T-Handle Reamer

Reamer measures 1/2" at its largest diameter and tapers steadily to a minimum diameter of 1/8", and can be used on most common materials including steel, brass, aluminum, plastic and wood. T-handle design provides for plenty of leverage to get the job done.

121-288\$13.79

Magnetic Pickup

Pickup features a powerful magnet encased in an aluminum holder with a convenient pocket clip.

516-661\$4.79

Kleenscribe Blue Layout Dye

This deep blue dye is ideal for making scribed lines stand out sharp and clear when laying out dies, patterns, templates, jigs, etc. Once dried, the dye will not rub off, is not affected by cutting lubricants or machining heat, but can be removed with denatured alcohol. 4 oz liquid.

383-761\$9.49

Scribe

Mark materials such as hardened steel, ceramics and glass. Carbide scribe features a permanent magnet that is perfect for picking up small parts or steel chips. 6" long.

Encore Barrel Removal Tool

T-handle shaped tool has a large screwdriver for the forend screw and a smaller screwdriver for the extractor screw. Makes changing barrels even easier.

157-813.....\$7.69

Stainless Steel Gunsmithing Picks

Set of four picks, each with a different shaped tool at each end to get into those tight, hard-to-reach places.

938-388\$11.79

Xcelite

Light and Medium-Duty Knife Set

This set features a light, 5-13/16" handle and a medium, 5-3/4" long handle. Also includes 10 assorted blades for a wide range of cutting operations.

492-749\$11.99

Threadlocker

For years, gunsmiths have turned to Loctite for securing screws and other threaded parts on their projects. Each formula has unique features that make it perfect for various applications around the shop.

10 ml Liquid **Color Product #.... Price**

222.....Purple.....445-105.....\$16.99

For screws with 1/4" diameter or smaller. Low strength formula. Parts can be removed with hand tools.

242.....Blue.....613-078.....\$12.99

For screws with 1/4" to 3/4" diameters. Medium strength formula. Hand tools required for removal.

271.....Red.....121-875.....\$12.99

For screws up to 1" diameter. High strength formula for permanent applications.

290.....Green.....717-951.....\$12.99

For securing screws after they have been set. Medium strength penetrating formula will penetrate up to 1/2" of threads. Also seals welds and prevents corrosion.

19 gm Stick **Color Product #.... Price**

248.....Blue.....165-694.....\$29.49

Medium strength threadlocker in stick form. Heating and hand tools are required for removal.

C5-A Copper Anti-Seize Grease

A unique combination of copper and graphite in a petroleum base gives this anti-seize lubricant outstanding performance at temperatures up to 1800° F. Lubricant also seals metals and protects from heat and corrosion. 1 oz.

723-099.....\$5.79

Silver Anti-Seize Grease

A petroleum lubricant with graphite additive, designed to reduce metal on metal friction and prevent seizing. Effective to almost 1600° F. 20 gm.

240-390\$6.09

Retaining Compound

Retaining compound is used when press or slip fitting cylindrical components that are not threaded. It fills the gaps between parts, creating a rock solid connection.

609..... **Product #.... Price**

All-purpose, quick curing compound perfect for general press fit applications for gaps up to 0.005". Not for use near excessive heat.

10 ml667-024.....\$12.79

620..... **Product #.... Price**

High heat, slip fit formula that withstands temperatures of up to 450° Fahrenheit. Fills gaps up to 0.015" while sealing metal and preventing corrosion.

10 ml171-860.....\$19.29

638..... **Product #.... Price**

Heavy duty compound for use in high stress applications. For slip fit applications of up to 0.010".

10 ml220-112.....\$17.79

Dykem Layout Fluid Blue

Fast-drying layout fluid creates a thin, translucent film that cuts glare and allows precise scribe lines to be laid out on steel parts. 4 oz liquid.

725-574\$8.99

Dave's Metal Works

Shake & Blast Sandblasting Canister

This sandblasting canister is constructed of aluminum, rubber and steel. It allows small items to be sandblasted without fear of loss and is much easier than trying to hold a small item in a vise for sandblasting. The canister is 3" wide and 6" tall.

863-907.....\$44.99

King

Combination Tabletop Sandblast/Beadblast Cabinet

Strip paint, polish or clean material using glass beads or silica sand without all the mess. Great for removing rust or preparing surfaces before Parkerizing. Cabinet features a built-in work light and rubber gloves. Includes Blasting Gun with ceramic tips, a dust collector port and a clear viewing window. Functions at 80 psi, air compressor not included. Dimensions of work area are 18" x 22" x 11-1/2".

714-003\$64.99

Fine Cut Hobby Files

This 6 file set includes 1 each of equaling, half round, flat, round, three square and square files. Great for the delicate work near the end of a gunsmithing project. Each file is 5-1/2" long.

104-706\$26.99

12-Piece Professional File Set

Set features 6" round, slim taper and extra slim taper files, 8" flat, half round and mill saw files, 8" half round, round and 4 way shoe rasps and a 10" 2 way file. 2 wood handles are also included.

336-007\$13.99

BAKER™ JIGS & FIXTURES

Screw Slot File

This file is generally used to clean up or repair screw slots and screw heads but have many other uses. Each is Swiss #2 cut (a fine tooth pattern). An Equaling file has teeth on both flat surfaces and on both edges. A Joint file has teeth on the edges only, the flat surfaces are smooth. Measures 5-1/2" long.

Equaling File	Diameter	Product #	Price
#1	.0012"	718-996	\$35.49
#2	.0016"	519-854	\$26.49

BAKER™ JIGS & FIXTURES

Diamond Needle File Set

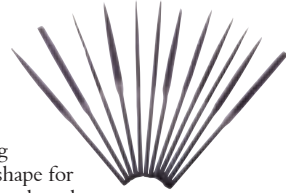

This 5-piece set includes round, half round, square, flat and triangle medium cut files that are 5-3/4" x 1-5/8".

894-734\$23.49

B SQUARE

Die Maker's Extra Fine Cut Needle File 12-Piece Set

These files provide great value for the beginning gunsmith. Each of the 12 files is of a different shape for thousands of different uses. All are 5-1/2" long and made from hardened steel. Includes wraparound carrying case.

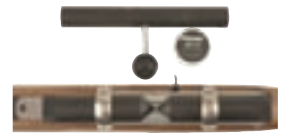

192-545\$13.79

Scope Ring Alignment and Lapping Kit

- Alignment tool creates perfect ring alignment
- Lapping shaft and compound laps rings smooth to avoid scratches and maximize contact
- This process removes stresses that may damage scope bodies and maximizes the holding strength of rings

Kit	Product #	Price
1"	227-261	\$49.99
1" and 30mm Combo Kit	187-492	\$69.99

File Handle

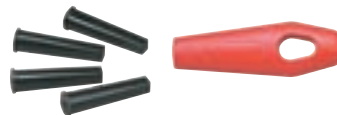

Handle features parallel steel jaws to grip the entire length of the tang for a secure hold. Knurled adjustment knob lets you adjust or switch files quickly.

583-514\$5.59

Nicholson

File Handle and Inserts

Polymer handle includes four interchangeable inserts designed to fit the most popular files. Contoured to comfortably fit the hand for straight, lathe and draw filing.

409-554\$3.39

Ergonomic File Handle

Features a rubber-coated, ergonomic shape for better comfort and control while the rear taper, wide middle and flared neck increase push force. Includes 2 interchangeable cushion inserts that are designed to fit most popular files.

156-473\$3.99

File Cleaner

Combination card/brush is designed especially to remove metal particles from files. Synthetic and steel wire bristles.

586-938\$12.99

Markal

File Chalk

White, tapered 4" stick of file chalk, 1" diameter. Package of 12.

664-268\$7.39

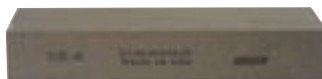

Gunsmithing Tools

Stones

2-Sided Bench Sharpening Stone (E)	6" x 2" x 1"	Coarse/Extra Fine	245-477	\$45.49

Coarse grit India backed with extra fine grit soft Arkansas for start to finish sharpening. India side is brown, Arkansas side is off-white.

Multi-Oilstone Sharpening Station	Size	Grit	Product #	Price
3 Crystolon Stones (F)	11-1/2" x 2-1/2" x 1/2"	Coarse/Medium/Fine	180-815	\$227.99

Coarse and medium Crystolon stones allow fast stock removal and a fine India stone hones to a sharp edge. Includes a heavy base with a non-skid bottom which acts as an oil reservoir, a cover and a pint of Norton oil.

SWENSON	Size	Product #	Price
1911 Stones			
This India stone is sized to fit inside the 1911 hammer slot. Designed specifically to remove burrs and machining marks from a 1911 trigger track.			
B42 Stone	3/4" x 1/2"	918-982	\$3.99
B51 Stone (G)	5/32" x 1/8"	860-181	\$3.99

This aluminum oxide grinding stone is specially designed to fit the ejection port roll-over notch on 1911 slides. The B51 stone can be used for either the short or long style notch, while the B42 is used to bring the long style notch to full depth. Fast cutting design will not gouge or tear into the metal. Stone can be reground and reshaped for years of use and employs a 1-1/2" hardened steel, nickel plated shaft.

Starrett® Pin Vise Set

Set contains 4 vises to handle stock from 0-0.187" in diameter. A hole extends through the full length of the handles so wire of any length and any diameter up to the full size of the tool can be held.

418-670\$61.99

DREMEL Lite

Made with a high-intensity LED light, this Lite attaches easily and provides hours of light for many projects. Works with all corded tools.

895-676\$13.49

Scope Mount Ring Alignment Reamer

When installing rings and they are not in perfect alignment, metal is removed from the inside of the rings until both align with each other. One end of the cutter is turned to 1/2" diameter for use in a drill press/lathe or may be turned by hand with a 7/8 inch wrench. Will ream rings with a nominal spacing of 2-3/8" or greater. Wrench not included. Steel.

100 STRAIGHT CSP Shotgun Chamber and Choke Hone

Replacement Hone	Grit	Product #	Price
(A)	220 Grit	617-444	\$2.99
	320 Grit	865-434	\$2.99
	400 Grit	753-912	\$2.99
	600 Grit	339-536	\$2.99

This replacement hone will work for shotgun barrel hones for 28 gauge and up. Package of 2.

GENERAL Chisel and Plane Blade Honing Guide

30° Angle (B)\$20.99
 Fiberglass jig accepts blades up to 2-5/8" wide, maintaining a proper 30° angle for honing. Can be used with an oil stone or any other flat, abrasive surface.

FLEX-HONE

1911 Mainspring Housing Hones	Grit	Length	Product #	Price
	400 Grit	4"	256-792	\$18.79
	800 Grit	4"	920-477	\$18.79
Slide Hone	800 Grit	8"	913-294	\$24.99

This hone reduces the metal on metal wear of the moving parts, and reduces corrosion because the treated surfaces are better able to hold oil and lubricant. Honing the mainspring housing also improves the ability to cock the hammer by hand.

Handgun Cylinder Hone

Handgun Cylinder Hone	Grit	Length	Product #	Price
38 Spl, 357 Mag (C)	400 Grit	3"	732-171	\$21.99
38 Spl, 357 Mag	800 Grit	3"	375-236	\$21.99
41 Mag	400 Grit	3"	149-999	\$21.99
41 Mag	800 Grit	3"	614-649	\$21.99
44 Rem Mag	400 Grit	3"	956-410	\$21.99
44 Rem Mag	800 Grit	3"	876-051	\$21.99
45 ACP	400 Grit	3"	645-489	\$21.99
45 ACP	800 Grit	3"	771-455	\$21.99
45 Colt (LC)	400 Grit	3"	559-500	\$21.99
45 Colt (LC)	800 Grit	3"	475-394	\$21.99

Honing the handgun cylinder will result in a smoother, cleaner surface that is free from machining imperfections and less prone to fouling and corrosion. Honing also speeds ejecting and reloading of cartridges. The surface will be more regular, hold oil and lubricants better and have a beautiful finish. Hone features a 1-5/8" abrasive surface and a 3" overall length.

Bolt Polishing Hone

Bolt Polishing Hone	Grit	Length	Product #	Price
Remington 700	240 Grit	8"	176-944	\$15.79

This hone features a 240 grit boron carbide polishing compound that creates a uniform surface with high wear resistance. It smooths out folded or drawn metal, creating a surface that holds oil and reduces friction. 0.473" in diameter, 8" long.

Rifle and Shotgun Chamber Hone

Chamber Hone	Grit	Length	Product #	Price
38 Spl, 357 Mag	800 Grit	14"	336-847	\$25.99
44 Cal (D)	400 Grit	6"	115-667	\$25.99

50 BMG	400 Grit	8"	188-677	\$49.99

FLEX-HONE (continued) Rifle and Shotgun Chamber Hone

Chamber Hone	Grit	Length	Product #	Price
50 BMG	800 Grit	8"	159-673	\$49.99
410 Bore	800 Grit	12"	826-048	\$33.99
20 Ga.	800 Grit	12"	892-956	\$33.99
16 Ga.	800 Grit	12"	541-898	\$33.99
12 Ga.	800 Grit	12"	147-884	\$33.99
10 Ga.	800 Grit	12"	464-229	\$33.99

Honing your chamber leaves a beautiful finish that is wear and corrosion resistant. It removes machining marks and irregularities in the metal, leaving a more uniform surface for faster ejection.

Inside of Slide Hone

Inside of Slide Hone	Grit	Length	Product #	Price
S&W, Beretta, SIG Sauer (E)	800 Grit	8"	466-854	\$22.99

By honing this critical part of the handgun, a smoother surface is created, reducing friction and wear. The treated surface will be more corrosion resistant because the treatment actually increases the metal's ability to hold oil and lubricants. 800 grit, 8" overall length.

Shotgun Bore Hone

Shotgun Bore Hone	Grit	Length	Product #	Price
410 Bore (F)	180 Grit	34"	125-648	\$34.99
410 Bore	800 Grit	34"	918-943	\$45.99
20 Ga.	180 Grit	34"	117-478	\$34.99
20 Ga.	800 Grit	34"	249-741	\$45.99
16 Ga.	180 Grit	34"	723-344	\$34.99
16 Ga.	800 Grit	34"	357-629	\$45.99
12 Ga.	180 Grit	34"	193-946	\$34.99
12 Ga.	800 Grit	34"	323-326	\$45.99
10 Ga.	180 Grit	34"	562-433	\$34.99
10 Ga.	800 Grit	34"	238-928	\$45.99

The unique fingers smooth the metal, creating a more uniform surface that resists wear, corrosion and reduces fouling. A stem coating protects the gun from being scratched during the honing process. The end result is a more polished bore. For smoothbores only.

Shotgun Forcing Cone Hone

Forcing Cone Hone	Grit	Length	Product #	Price
20 Ga (G)	180 Grit	10"	413-897	\$29.99
20 Ga.	800 Grit	10"	420-349	\$44.99
16 Ga.	180 Grit	10"	712-509	\$29.99
16 Ga.	800 Grit	10"	931-005	\$44.99
12 Ga.	180 Grit	10"	943-802	\$29.99
12 Ga.	800 Grit	10"	319-553	\$44.99

This forcing cone hone features a 1-5/8" length abrasive and a 10" overall length. The 800 grit model features an aluminum oxide abrasive, while the 180 grit model is made from silicon carbide. Honing the forcing cone will result in smoother shot constrictor with less barrel fouling.

Oil

Oil	Product #	Price
8 oz Liquid (H)	661-733	\$11.99
32 oz Liquid	330-288	\$18.99

Flex-Hone Oil is specially formulated for use with any of the Flex-Hone tools and provides a bearing surface to reduce friction and temperature. The oil suspends removed particles, allowing for easy removal after the job is complete.
