

The Secret Garden Collection

All Jakcured timber is guaranteed for 25 years

Jacksons Pergola Systems

Shown here are some striking examples of pergolas that have been created by our customers. It is surprising to see how many varied uses people dream up for them.

Some favour single Pergolas as dividing screens to separate patio areas from the rest of the garden, creating extra privacy for dining areas.

Also, double Pergolas creating delightful feature areas for sunbathing and relaxing, made all the more exotic when clothed with climbing plants.

Making features of paths, walkways and even flights of steps in the garden is another favourite use for a double pergola. An added bonus if scented climbing plants are twined through the structure making your stroll even more pleasant.

And who wouldn't be proud to have an entrance to their home that looked as good as the one below? The stained pergola looks wonderful with the colourful roses, very inviting.

Jacksons Pergola Systems

Double Pergola natural Jakkured finish

NEW improved shaped rail ends

- All timber used throughout is superior quality Jakkured softwood guaranteed for 25 years
- Superior planed finish
- **NEW** improved shaped rail ends
- Ideal for climbing plants to grow up
- **NEW** easy to calculate pricing

Create your own dream Pergola with the Jacksons system. It will become a natural focal point in your garden, as an attractive walkway, ideal for climbing plants or as an airy, decorative screen.

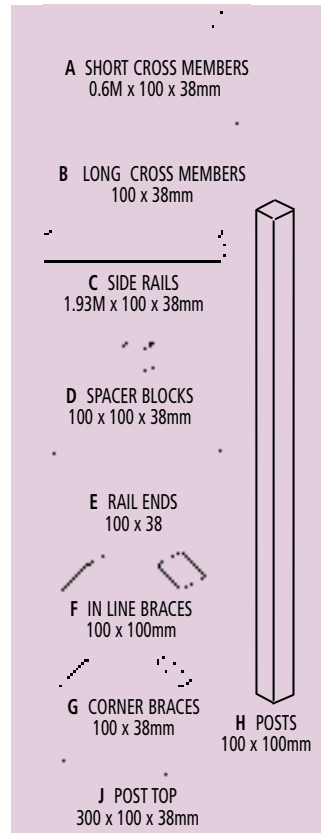

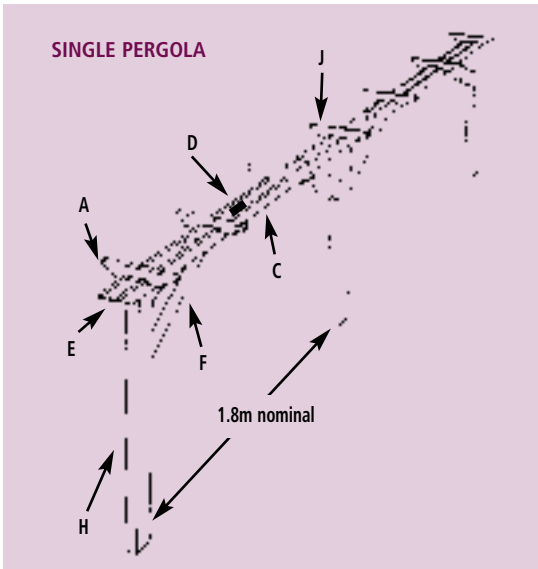

Single Pergola

We reserve the right alter specifications in line with our policy of continuous improvement

FREEphone Helpline 0800 41 43 43 Mon - Sat 8.00am - 5.30pm

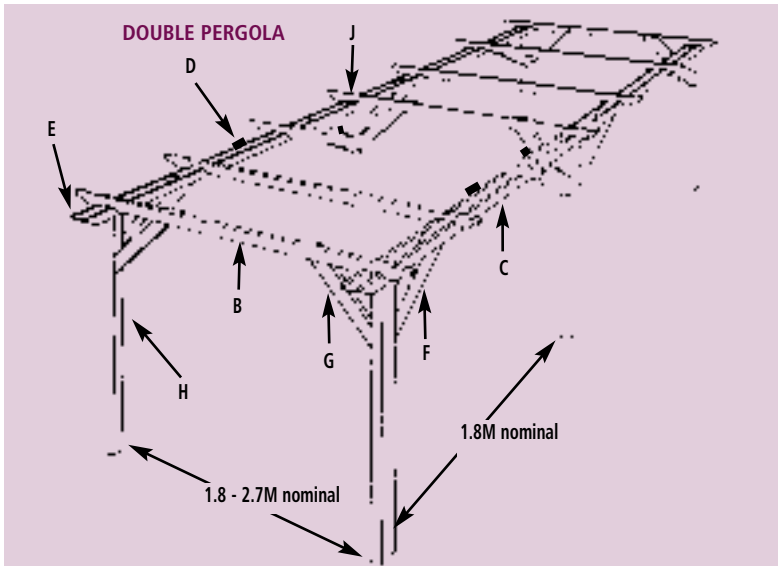

We recommend that the pergola is installed so that the underside of the side rails are 2.0m above ground level.

When using nails to join two timber parts we recommend drilling a hole in the first part to insert the nail through, this enables the nail to be driven easily into the other part of the structure.

Full installation instructions are available or ask for details about Jacksons installation service.

All sizes are nominal

For metric/imperial conversion chart see page 115

Decking and Balustrade

- All timber used throughout is superior quality Jakcured softwood guaranteed for 25 years
- Two board sizes available - standard or heavy duty
- Jakcured grooved boards for extra safe non-slip surface
- Spaces between the boards to aid drainage
- Non rust fastenings for extra long life

"Al fresco" living is here to stay. More and more of us are spending our leisure time outside, enjoying a lifestyle that seems much more continental than that we've been used to. And where better to enjoy a convivial meal, with friends and family, than on the deck? We've put together a variety of examples of decking and balustrade over the next few pages (some of them are thanks to our customers) that hopefully will inspire you to try creating your own room outside to enjoy.

Decking is the perfect solution to sloping sites or for terracing. A customised and comfortable area that is neither house nor garden, but an enjoyable combination of both.

FREEfone Helpline 0800 41 43 43 Mon - Sat 8.00am - 5.30pm

Decking and Balustrade

An ideal non slip surface to surround a swimming pool. All our decking boards are Jakcured, which means they are protected from rot and insect attack for **25 years**. By avoiding rot your deck will be less slippery and unsightly. Another benefit is our boards are grooved, which will make them safer and being wood it will be much warmer and more comfortable to walk on with bare feet.

How about a veranda outside your caravan, a very original use for deck and balustrade.

The plain clean boards make an ideal setting for showing colourful plants to great effect.

And an impressive walkway that joins the garden with house is another novel use for deck and balustrade.

Decking and Balustrade

Close up showing decking boards used as edging for a neat and professional looking finish.

Detail of decking board profile showing the anti-slip grooves on top surface and the stress relief cuts on the bottom surface of boards to help avoid warping as boards expand and contract with the weather conditions.

We have outlined here the steps you will need to take to build a raised timber deck. However, if you already have a level patio area which you would like to give a 'face lift' try covering the paving with decking boards. This is easily achieved by constructing a supporting frame to hold the decking boards in place.

Spur Posts: To add extra strength to your balustrade, spur posts and packers can be used. They are supplied in 1.5m long x 100 x 100mm and are drilled for 10mm studding. Spur posts should be fitted to every other post.

Galvanized shoe for Intermediate posts ref 7560

Galvanized shoe for End or Corner ref 75601

FULL INSTALLATION INSTRUCTIONS ARE AVAILABLE

For metric/imperial conversion chart see page 115

Balustrade is available in the following three styles, all come pre-assembled with a finished height of 1.06m in four standard widths: 0.9, 1.2, 1.5 and 1.8m:

Style 1: The vertical pales 75 x 20mm are 100mm apart, which complies with building regulations; fitted with 2 pairs of horizontal rails 75 x 20mm which fit to either side of the pales, and fixed into position with timber dowels. These stylish panels are ideal for going up slopes, as they rake to suit any angle of incline.

Style 2: This system comprises of turned vertical spindles 40 x 40mm, which fit between 2 horizontal rails 70 x 55mm, spaced 100mm apart with specially formed 40 x 30mm T section spacers.

Style 3: Waisted pales of 100mm nominal wide. Sandwiched between two horizontal rails 75 x 20mm and fixed into position with timber dowels.

All systems slot neatly into Jakposts, either 1.06m high for normal balustrade, or 2.1m if a pergola is to be installed above the deck. (See pages 8 & 9 for Jakposts or for pergola topping see pages 38 - 41).

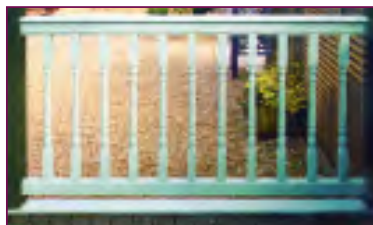

The posts are fitted into galvanized shoes and bolted through base boards into the deck.

In addition, a capping rail 120 x 21mm is supplied.

Matching gates are available, please ask for details.
