## About the Spy Centre...

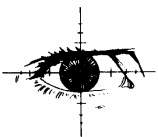

We at the Spy Centre appreciate the opportunity to discuss your security needs. Spy Centre specializes in sales and installation of custom camera systems with digital recording. Our mission is to provide the highest quality surveillance equipment with exceptional customer service to you. Our customers include retail stores, commercial businesses, government, school agencies, custom residences, and our wholesale dealers. We believe in maintaining our competitive advantage by offering more **experience, service, and quality** than our competitors.

**Experience** -The Spy Centre began retail operations in 1990 under our Private Corporation, Private Eye Enterprise, Inc. Owner and President, Michael Dear, brings 15 years of expertise as a private investigator. (Texas c-class license #C09375) Our specialized staff members receive continuous training and certification and Spy Centre is affiliated with ASIS, the American Society of Industrial Security, and also the Better Business Bureau of Dallas. Please ask us for a list of our past customers as well as our many letters of recommendation. We can also provide pictures of previous work. The Spy Centre guarantees we have the experience needed to get your job done.

**Customer Service**- Our experienced Spy Centre personnel will demonstrate how every product is setup and how it operates. Please come visit one of our retail stores in the DFW area. We are centrally located off the Tollway in Addison Texas or off I35 in Lewisville. Stores are open Monday thru Saturday, 10 A.M. until 6 P.M.. You can also order products off our web site [www.spycentre.com](http://www.spycentre.com), view pictures and product descriptions of our most popular items from the retail store, E-mail us your questions, or place an order 24 hours a day at [www.spycentre.com](http://www.spycentre.com). Our Internet business provides a level of convenience and complete discretion for total privacy. The Spy Centre offers installation services at all times of the day (rates vary based on time of day). Installation of your camera system always comes with full service and training on your system. Service work is available on products whether still under warranty or not. Our goal is to complete your job conveniently and to support our customers before, during, and after the sale.

**Quality**-The Spy Centre prides ourselves in listening carefully to our customer's needs and suggesting the very best equipment for the job. Spy Centre quality is maintained by spending dozens of hours a month researching new products and testing them in our controlled conditions at our headquarters in Addison, TX. Our employees get to know exactly how each product performs, by hands on use and quality control. Spy Centre is a business centered on quality of merchandise and we back that with a one year manufactures warranty on all parts. Thank you in advance for the opportunity to earn your business. We hope you choose the **experience, service and quality** you deserve.

### Soft Call USB Recorder - #142

Because the Soft Call Recorder automatically records every telephone call, you can be certain to have any recording available whenever you need it. If there is a delay in delivery, the price is higher than agreed, or the color wrong, you have indisputable proof of your case. You can be assured that in the long run, the Soft Call Recorder will pay for itself many times over. Records telephone calls onto the hard disk of your PC, 240 hours of recording on 1 Gigabyte, Fully automatic, Delivered complete with hardware, software and cables, The Soft Call Recorder has been especially developed as a less expensive alternative to the standard Call Recorder. **Fully automatic recording:** All calls are recorded; later on you decide which calls should be deleted. **High capacity:** Thanks to powerful compression, hundreds of hours of telephone conversations can be effortlessly stored; in actual practice this means all your calls. **High quality of recording:** Adjustable amplifiers in the Soft Call Recorder produce a superior sound quality for virtually all types of telephone installations. The software shipped with the SCR is Windows 95/ 98/ NT/ 2000 / XP compatible. A unique feature is the combination of very high recording quality with equally high compression. Every gigabyte on a PC hard disk can store 240 hours of recorded conversations; about twelve times as much as any rival product. Given the high capacity drives available on computers today, the drive space used to store recordings is relatively small. Multiple Archive folders can be created on any local or shared network drive to aid in organizing recordings. Additionally, the SCR software supports creating folders automatically that have the selected calls for archiving split up into CD size images with an adjusted database to match each folder's recordings. This allows each folder to be copied to a CD-RW with a database on each CD that matches the calls copied to each CD

### 2600 Hour Telephone Recorder - #139

### 5200 Hour Telephone Recorder - #141

#### 4 and 8 line Digital Recorders also available

Record All of Your Phone Calls Automatically

If you depend on telephone calls for the success of your business, the Call Recorder is the tool for you! It records all your calls automatically - up to a maximum of 3,900 hours! Use the Call recorder to log all your appointments and business discussions ensuring accuracy and proper follow-up. This will greatly increase your telephone call efficiency. **The Monitor function:** The Call Recorder offers the ability to listen in to recordings via the net. This application is of special interest in training situations and Call Centers. The monitor function is present in every Call Recorder IP. There is optional PC software available that makes it possible to connect to the recorder via the LAN and listen in to recordings. **Important Meeting Recorder:** Another use of the Call Recorder is for recording your important meetings. By using an optional microphone connected to the Call Recorder instead of the headset, just start the recording at the beginning of the meeting and forget it. The Call Recorder captures the entire meeting automatically because of its huge capacity. No matter how long your meeting lasts, you'll never have to hold up proceedings while you fumble with changing cassette tapes. Transcribing your meetings with the simple search and find functions of the Call Recorder.

## Automatic Telephone Recorders

### 12 Hour Automatic Telephone Recorder #179

Modified long play Sony recorder - For single line phones - Line voltage activated

-Simplified automatic telephone recording in a long play format (6 hours per side of tape). This unit offers excellent durability, unsurpassed long play sound quality, and features not found on any other unit of its kind. Just plug into any standard telephone jack, place unit in "record" mode and it's ready to go. When any phone on line is picked up, the unit automatically starts recording both sides of the conversation. Upon hang up, the unit stops recording and awaits the next incoming or outgoing call. When using batteries, there is zero power drain while recorder is "waiting" for a conversation. A specially designed "audio enhance circuit" automatically increases the volume of the caller so the recording is clear even if the calling party is talking low. The unit features silent operation and auto-stop at the end of the tape.

-Two speed operation allows for "quick review" playback -AC/DC power-AC adapter included -Use as a standard long play recorder when disconnected from telephone \* 9.25" x 5.50" x 2.25"

For use with a single-line phone system.

**Line activated** - Starts recording when the phone is picked up.

No battery drain while "waiting" for a call.

Records "6 hours" on each side of the tape.

Uses D-140 long play cassettes.

### 12 Hour Two Line Telephone Recorder #172

The unit has the same specifications as the 12 hour Telephone Recorder except the unit has a built-in switching device. The recorder automatically switches from line to line recording whichever line is in use first or switches to user selected "Priority Line". \* 9.25" x 5.50" x 2.25"

For use with a single or dual-line phone system.

**Line Activated** - Starts recording when the phone is picked up.

No battery drain while "waiting" for a call.

Records "6 hours" on each side of the tape.

## 8 Hour Telephone Recorders

### Voice Activated 8 Hour Recorder #174

This unit plugs directly into a standard modular phone jack. It is voice-activated and only runs when conversation is present. It cannot be detected or de-activated on the telephone line. The 8 Hour (4 hours per side) has variable speed playback for fast review of recordings. It has excellent long play sound quality, 4 hours per side. The unit records all extensions on a single line and it records all lines on a single extension on multi-line phones. This unit includes: Modular connector cable, AC power adapter/charger, Rechargeable Ni-Cad batteries, C-140 High-Grade cassette. 9.25" x 5.50" x 2.25"

For use with a multi-line phone system.

**Voice activated** - starts recording when sound is transmitted through the line.

Records "4 hours" on each side of the tape.

Uses D-140 long play cassettes.

Comes with an AC-adaptor.

Manual tape flip.

Buttons do no snap out on the end of the tape.

Adjustable volume level

### Line Activated 8 Hour Recorder - #173

For single line phone - line voltage activated

This recorder has a built-in circuit that automatically starts and stops the recorder when the receiver is lifted and stops when the receiver is hung-up. The unit can record for 4 hours per side. The unit uses battery power there is no power consumption until the recorder starts. There is no battery drain in the stand-by mode. Unit includes: batteries, D-140 tape, duplex adapter, and cable. 9.25" x 5.50" x 2.25"

**Line Activated** - starts recording when the phone is picked up.

No battery drain while "waiting" for a call.

Records "4 hours" on each side of the tape.

Uses D-140 long play cassettes.

Manual tape flip.

Buttons do no snap out on the end of the tape.

### 5 Hour Automatic Telephone Recorder #176

The world's smallest fully automatic dual-speed long play micro cassette telephone recorder for single line phones - sine voltage activated

- 5 hours recording on micro cassette tape (included) - 2 1/2 hours per side of tape - Automatically starts when any extension phone receiver is lifted - Zero battery drain while waiting for conversation - Simple modular connection to the phone line - Total silent operation including when the tape stops at the end - Dual speed recording and playback - No tones, beeps or other noises - Operates on 2 "AA" batteries

Package includes the recorder, telephone connector cable, duplex adapter, cassette and batteries 4.5" x 2.5" x 1.0"

For use with a single-line phone system.  
**Line activated** - starts recording when the phone is picked up.

### Contact Microphone #202

The EAR-2000 (Bomb Detector) will listen to virtually any surface with the built-in contact element. Simply place the contact against the surface to be tested (metal, air ducts, plumbing, conduit, windows, etc.). The internal automatic gain control will deliver clear, undistorted sound. The EAR-2000 can be connected to any standard tape recorder. The recorder output can also be used with audio spectrum analyzers and other measurement equipment for detailed analysis.

### Professional Shotgun Microphone #697

This amazingly high-powered shotgun microphone offers 120-db gain to line of sight audio. This unit also has the added feature of a tape out jack already built into the unit. It comes with a set of headphones for private listening. Battery life on this unit is 85 hours.

This unit has a tape out slot for recording what you are hearing.

High 120 db gain microphone.

Adjustable volume level

3.5 mm Connections for tape out

### Super Ear #698

This small hand held shotgun microphone features a full 8x sound amplification and is only about 7 inches long. It comes with a set of headphones for private listening. Like all the rest of the shotgun microphones this unit only uses line of sight, it will not hear through walls.

50 db gain microphone

Adjustable volume level

Comes with binocular mount

180 degree swivel head

Uses 1 AAA battery

### Super Mini Directional Microphone #699

This is a highly directional sound-locating microphone, equipped with an internal high quality amplifier and earphone monitoring system.

#### Features:

High quality miniature electret condenser microphone

Supercardioid pick-up pattern, designed for frequencies of medium range, allows to isolate and pick up distant sounds such as human voices, birds, etc...

Small, lightweight compact

Power Supply uses standard UM-4 battery with easy replacement

Sound levels adjustable by volume knob

Mounting hardware for use with binoculars or video cameras

### Wireless Microphone kit for Camcorders #197

When a sound transmission needs to be recorded use our convenient plug and play wireless microphone set with recording device.

#### Specifications:

Transmitting frequency of F1 171.105MHz-F2 171.905Mhz (Transmitter)

FM band (Transmitter)

+/-2KHz maximum deviation (Transmitter)

DC 3V power (Transmitter)

Uses 2 AA batteries (not included) (Transmitter)

Power switch (Transmitter)

Channel selector switch (Transmitter)

LED power indicator (Transmitter)

Receiving frequency of F1 171.105MHz-F2 171.905Mhz (Receiver)

Sensitivity of 10dB uV for 20dB S/N (Receiver)

DC 3V power (Receiver)

Uses 3 AA (not included) (Receiver)

Power switch (Receiver)

Channel selector switch (Receiver)

LED power on (Receiver)

#### Size

31/4" x 2 1/2" x 1"

## Voice Changers

### Professional Voice Transformer #167

The user interface features four slider controls that allow for precise real-time adjustments. The convenient "hands free" headset/microphone allows you to concentrate on your conversation and not the operation of the unit. You can store the exact settings of a particular voice in one of eight memories so you can change voices instantly, even in the same conversation without the other party ever knowing. You can effectively portray eight different people instantly, even with gender changes!

**Specifications:** Vocal effector that independently controls basic pitch \* Memory Function, Preset memory and user voice \* High Quality Reverb \* Remote Jack

**Includes:** Professional Voice Changer \* AC adapter \* Owners manual \* Complete instructions \* Hands Free Head set \* Size: 7" x 6" x 1 3/4"

### Professional Voice Changer #152

This portable voice changer features a full 7 pitches up and 7 pitches down. It has an accompanying speaker that can be secured to most any phone using the Velcro strap. This is by far the most versatile voice changer we offer. Because of the speaker system that it uses, it will work on most any phone including most cellular phones. You simply speak into the microphone built into the unit and it projects the altered sounds directly to the speaker. It has both volume and pitch controls.

### Voice Changer II #160

This is the standard unit most people think of when they talk about voice changers. It hooks between the base and the handset of a standard desk phone. You can modify your voice up to 4 pitches up or down. It has a volume and pitch controls. Simply speak into the handset and the changer will automatically alter the sounds to your desired pitch.

### Mini Portable Voice Changer #149

This portable hand held unit has a speaker on one side and a microphone on the other. It will allow you to change your voice to sound more "robotic". Something very similar to this was used in the movie "Scream". Simply speak into it and the speaker will play your distorted robotic voice.

### Pretender Voice Changer #164

Similar to the Voice Changer II, this little product has an added feature of 4 background noises it can add the call. You can make the sounds of a doorbell ringing, a baby crying, a dark barking, or a phone ringing. This unit is great for ending unwanted phone calls early.

### Mini Portable Cell Phone Voice Changer #166

The cell phone voice changer is ideal if you need to make a phone call without the risk of being recognized. The product provides five different voice modes, including normal voice: A Robot voice, Change a young man's voice to an old man's voice or a female to sound like a male voice, A Child voice, A Duck voice. The VC2000 is compatible with virtually any cell phone

## Bug and Video Detectors

### SpyFinder #3917

#### Operating Principle

The SpyFinder hidden camera detector/locator is the most reliable and easy to use technology on the market for making sure that your private actions are not being watched. Its function is based on the principle of optical augmentation. This technical jargon refers to the phenomenon where light reflected from a focused optical system, such as a video camera, is reflected along the same path as the incident light. This means that if a hidden camera is illuminated and viewed with the SpyFinder technology, then a strong reflection from the target camera will reveal its position to the user.

The SpyFinder exploits this phenomenon by using a ring of ultra-bright LEDs arranged around a viewing port. When a user scans a room looking through the viewing port, a hidden camera appearing in the field of view will brightly reflect the light from the LEDs.

#### Operation

While the equivalent of rocket scientists thought up the SpyFinder technology, operating it is not rocket science. Simply look through the viewing port (see photo) and depress the button to activate the LEDs. Slowly scan areas where hidden cameras are suspected and look for bright reflected spots. Remember, most hidden video cameras use pinhole camera lenses, so the spot you are looking for could be small.

If you see a suspected camera, move your vantage point slightly. If the location of the reflection moves as you move, then this is not a camera. If the location of the reflection does not move, then it is highly likely that you have discovered the optics of a hidden camera.

For example, consider a wall clock that has a domed plastic cover and a pinhole camera concealed under the numeral six on the clock face. When the SpyFinder is used to scan the clock, a reflection will be noted where the camera is located beneath the six and a reflection will also be noted from the plastic cover. However if you move your vantage point just a little, you will notice that the location of the false positive reflection point from the plastic cover will move, while the reflection from the camera remains under the numeral six on the clock face.

### CMS Complete Countermeasures Set #236

The CMS-11 Countermeasures Set is designed for the person who wants to be able to perform the basic countermeasures checks either for his own security or as a business offering the service to others. The set is built around the TD-53 Advanced Transmitter Detector and consists of the following items:

TD-53 Advanced Transmitter Detector, P-01 Wideband RF Probe, P-02 Infrared Probe, P-03 Line Driver, P-04 Carrier Current/Video Camera Probe, TT-07 Tap Trap, Headphones, Padded Carrying Case, Instruction Manual, Various cords and adapters

### Frequency Counter #230

The RF Detector, JM-20F, is the latest technology in hand held radio frequency detection. It incorporates a sophisticated microprocessor circuitry, which makes sweeping for transmitters effective and efficient without complicated adjustments. It features a 10-digit liquid crystal frequency display, ultra sensitive 16-section bar graph. It also has a microprocessor filter circuitry, which prevents nuisance alarm from random noise frequency, battery low indicator, and built in NiCad battery. The frequency range is from 1 Mhz - 3Ghz with a battery life of 6 hours. This new state-of-the art countermeasures sweeper gives you two modes of detection. Aside from the ability to visually read the bar graph for bugs and knowing the frequency of what the unit locked onto, it also has a silent vibration mode so you can use it as a covert pocket detector. Size is 3.3" x 2.7" x 1.2".

### Personal RF Detector up to 6 ghz #217

This is our new generation Personal Radio Frequency Detector. It has all the great qualities of our old product along with several important improvements.

New more compact pocket size, Vibration motor and earphone for covert detection, 5 section RSSI bargraph to show relative RF signal strength, Low power consumption, Two antennas for improved sensitivity, Vibration switch for tone or vibration alert mode

The set include; Internal NiCd battery pack, AC wall charger, 7-section telescopic antenna, 2.4Ghz antenna and an ear-piece.

The unit can operate up to eight hours from a fully charged NiCd battery

**Specifications:** Frequency Range: 1Mhz - 3Ghz Impedance: 50 Ohms(BNC socket) Weight: 210 g Size: 83mm(H), 68mm(W), 31mm(D) Housing: Stamped aluminum with black anodized finish Power: Internal rechargeable NiCd battery pack Battery Life after full Charge: Average 8 hours Time to Fully Recharge Battery: 12 to 16 hours

### Micro Bug Detector #225

This small hand held detector will register frequencies between 50 MHz and 5.8 GHz. A LED light indicator on the left side and audible beeping quickly alerts you to the relative strength of the signal. The detector itself also has a secondary silent mode that will only use the LED meter. It also comes with a small ear bud style earpiece that will play the beeping alarms only to the operator. This extremely sensitive unit has been demonstrated to find not only transmitting audio signals, but also transmitting video signals within its range. This small detector is extremely easy to use. Just turn it on and go.

### Video Camera Detector #223

To detect even very small video cameras, move up to the VCD-43. This unit features a five-step solid-state meter that can help you zero in on those hidden video cameras.

The sensitive external antenna is specially designed to pick up the horizontal oscillator frequency radiated by video cameras. Once the video camera is detected, its location can be quickly determined by using the five-step LED meter and Sensitivity control. Tests with various cameras show a detection range of 2 to 15 feet, depending on the type of camera.

The unit can be factory tuned to frequencies other than the NTSC standard; such as PAL and SECAM. For special tuning, please specify when ordering.

The VCD-43 has a rugged aluminum housing, measures 4.25" x 2.25" x 1.25", weighs 10 oz., and is furnished with two 9 volt batteries, plug-in antenna and illustrated instructions.

### Mini Bug Tracer #229

The amazing Mini Bug Tracer RF detector is great for finding those hidden 2.4GHz wireless cameras. Outstanding performance in a small package. Keychain sized detector with telescopic antenna sniffs out hidden wireless cameras fast, assuring your privacy. Red light flashes faster as you get closer to the hidden camera. HI/LO buttons allow you to check out the entire room, then

1mhz to 3ghz with hi/lo detection range

## Phone Security and Detection

### Advanced Wiretap Detector TT-46 #252

The TT-46 is the only test set that lets you quickly and easily check both single and two line phone systems for series and parallel taps. This advanced unit tests every possible combination of wires in a four-wire cable. This lets you detect some of the more sophisticated taps that use split pairs. While not much can be done about down-line taps, the TT-46 will help you check your phone lines for on-premises series and parallel bugs and wiretaps. You can also check your telephone for the most common types of hook switch bypasses. (A hook switch bypass is a modification to the telephone instrument that causes the transmitter or receiver in the telephone handset to pick up room sounds and pass them down the phone line even with the phone hung up. This effectively turns the telephone into a room monitor. The TT-46 detects series devices with a resistance of 10 ohms or more. (Most series taps have a resistance of over 100 ohms.) It also detects parallel devices with a resistance of 65 mega Ohms or less. (Most parallel taps are under 30 mega Ohms.) It can also detect certain capacity coupled taps. Also included in the TT-46 is a line monitor that lets you check the wire pairs for the presence of room audio when the phones are hung up. (The presence of room audio on the phone line when the telephones are not being used is a sure sign of bugging.) A line driver is a part of the monitor function. The line driver is used to turn on (activate) any voltage-operated microphones, such as FET mics, that may be connected to a pair of wires. The unit weighs 9 oz. and measures 7" x 4.6" x 2.25" (with the cover closed). It is powered by one 9-volt alkaline battery (included). Also included are all necessary cord, plugs and adaptors along with an illustrated instruction manual.

### Teleguard #251

This unit has a privacy light that alerts you to the presence of voltage irregularity on your line. The main function of this unit is to regulate your phone line so local line based voltage devices never trip. In essence, the devices are turned off. It also has a secondary feature that, if you are on the phone, and you get a second voltage drop (receiver comes off the hook or a line based device turns on) it will automatically mute the line. It will not release the line until either the unit is turned off or the voltage returns to normal.

### SL-100 Safe Line Analyzer #253

This easy to use unit is by far the most versatile anti-phone bug system we have. It is actually 2 defense systems in one. It has a digital voltmeter that tells you the exact current voltage on your phone circuit. The unit will immediately alert you to line voltage irregularities caused by parasitic phone bugs. It will also transmit "white noise" over the phone circuit causing voice activated recording systems to run continuously and use up tape very quickly as they tape static. It will create a shift of frequencies in crystal line transmitters. It turns off voltage sensing recording / transmitting devices. It requires no batteries, in is powered by the phone line.

### Comsec C3i #254

While many products perform an efficient job of checking for "on premise" telephone recording devices, the patented Comsec C3i-II is the only unit designed specifically for detection of central station or "down line" taps. Line powered and easy to use, the Comsec C3i-II's rugged heavy duty metal case and long life LED assures years of product life. Comes with complete instructions and molded polyurethane carry case. *Note: This product alerts user to "down line" taps only. For complete protection we recommend the use of the SL-100 Telephone Analyzer or similar device in conjunction with the Comsec C3i-II.*

### Audio Jammer #215

Keep your private conversations private! The AJ-34 AUDIO JAMMER protects your sensitive room conversations by generating a random masking sound which desensitizes any near-by microphone Effective against any microphone based eavesdropping device including tape recorders, RF transmitters, Hard-wired microphones (including contact type) and shotgun microphones. It also protects against microwave or laser reflection pickups. Because the sound from the Jammer varies randomly in frequency and amplitude, it cannot be easily filtered and only the sound the eavesdropper will hear is the Jammer noise. The convenient end-mounted control lets you select the level of protection for your situation. One unit will protect up to 150 sq. ft. For protecting rooms larger than this, we recommend an additional Jammer for each 150 sq. ft. of area. The illustrated instructions show suggested Jammer placement for different types of rooms and situations so that you can use the AJ-34 effectively. The AJ-34 is powered by one 9-volt alkaline battery (included). The unit measures 4" x 2.5" x 1.5" and weighs 7 oz.

### ACOUSTIC NOISE GENERATOR #216

For your protection against listening devices that are not detectable by conventional methods, the engineers of R.E.I. have developed the ANG-2200 Acoustic Noise Generator. The ANG-2200 defeats such listening devices as wired microphones buried in a wall, contact or spike microphones, transmitters located in AC outlets and laser/ microwave reflection from windows. This is accomplished by producing a security blanket of generated noise completely covering your private conversations with unfilterable sound. The ANG-2200 is an excellent addition to high level countermeasures or can stand alone to provide perimeter protection. Various transducer adapters are included with the ANG-2200 for coupling walls, ceiling, air ducts, plumbing, windows, etc.

**Wireless and Wired Hidden Video Cameras**

The wireless video appliances have a video camera and a video transmitter mounted inside the unit. The video transmitter will transmit the signal on a frequency of 2.4 GHz. The signal is received on a video receiver that is supplied with the camera system. Simply plug the receiver into a VCR to record. Most of our units have a high powered transmitter rated at 700 ft. Line of Sight except where noted. All of these units can transmit through most walls and floors, although it will decrease the total range of the transmission. Note: other 2.4 GHz wireless cameras could interfere with the signal if they are both transmitting on the exact same frequency.

All B/W cameras have - 3.7 mm lens, 0.03 lux rating, 420 lines of resolution, 80 degree field of view, All Color cameras have- 3.7 mm lens, 0.6 lux rating, 380 lines of resolution, 80 degree field of view

**GE Mini Clock Radio**

Up to 700 ft transmission  
Fully functional unit!  
Ideal for homes!  
B/W wireless #1116  
Color wireless #1117

**Mini Wireless Air Purifier**

Up to 700 ft transmission  
Fully functional unit!  
Ideal for homes and offices!  
B/W wireless #890000  
Color wireless #890000

**Motion Detector**

Up to 700 ft transmission for wireless unit  
Ideal for homes and offices!  
Wired motion detectors are active motions  
Use this motion detector to trigger any of our time lapse recorders. Wireless motions are not active motions  
B/W wireless #890000  
Color wireless #890000  
B/W wired #825  
Color wired #826

**Smoke Detector**

Non-functional smoke detectors  
B/W wired, side view  
B/W wired, down view  
B/W wired, 2 camera side view  
B/W wired, 3 camera side view  
B/W wired, 4 camera side view  
B/W wireless, side view  
B/W wireless, down view  
Color wired, side view  
Color wired, down view  
Color wired, 2 cam side view  
Color wireless, side view  
Color wireless, down view

Down-view Smoke

**Mantle Clock**

Up to 700 ft transmission (wireless version)  
Fully functional unit!  
Ideal for homes!  
B/W wired #810044  
Color wired #810000  
B/W wireless #890000  
Color wireless #890000

**Wireless Boom Box**

Up to 700 ft transmission  
Fully functional unit!  
Ideal for homes and offices.  
B/W wireless #890000  
Color wireless #890000

Side-view Smoke

**VCR Camera**

Wireless model is a fully functioning VCR while in use. Hard wired model records on itself with a de-activated face plate and buttons to prevent accidental recording interruptions. Ideal for homes and offices!

B/W wireless #890052  
B/W wired #810021  
Color wireless #890000  
Color wired #810000

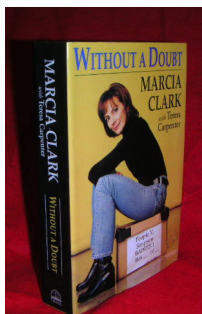

**Clock Radio #1075**

This is a truly plug and play system, simply plug the clock radio into any standard wall outlet. We've already integrated the camera and wireless transmitter into the radio. To videotape your subject or room, simply attach the included wireless receiver into your VCR. It's simply that easy! To view your subject just attach the wireless receiver into a cable-ready television or monitor. The range is approximately 300 feet line-of-sight (LOS). The AM/FM alarm clock radio is fully functional.

**Wireless Book Camera #4242**

This has a high grade color CCD camera with battery powered video transmitter. The receiver is included. The range is approximately 500ft.

**Large Wall Clock**

Fully functional unit!  
Ideal for offices or industrial buildings!

- B/W wireless* #890000
- B/W wired* #810000
- Color wireless* #890000
- Color wired* #810000

**Wireless Power Adapter Camera—#4240**

This unit is a has a mini ccd color camera and video transmitter inside a common power transformer. Comes with matching receiver

**Emergency Lights**

Fully functional unit!  
Ideal for offices and warehouses!

- B/W wired light* #810000
- B/W wireless light* #890000
- Color wired light* #810000
- Color wireless light* #890000

**Mini Wall Clock**

Fully functional unit!  
Ideal for homes and offices!

- B/W wireless* #890000
- B/W wired* #810000
- Color wireless* #890000
- Color wired* #810000

**Exit Sign**

Fully functional unit!  
Ideal for offices or industrial buildings!

- B/W wireless* #890000
- B/W wired* #810000
- Color wireless* #890000
- Color wired* #810000

**Sprinkler Head**

Non-functional unit!  
Ideal for offices and warehouses!

- B/W wired* #810000
- Color wired* #810000

**Wireless Baby Camera Set #1068**

This system is the most compact, portable and multi function Color handheld wireless monitoring system available. Designed specifically for easy mobility of both the camera & the receiver, the system can be moved to any location within the home. This system is not limited just to home use, the compact and light design can be transported anywhere and ready for use instantly. With a transmission range of 300 ft. and 2.4 GHz technology, security and peace of mind is always within sight.

**Wireless Teddy Bear Camera #748**

Built-in rechargeable battery in camera for portability, Built-In 3 position auto switcher, High-resolution color image, Video out for VCR recording

**Wall Plate Camera #750**

This is a color wired low light camera that has a 3.6mm wide angle lens. 380 lines of resolution with a .5lux rating

**Industrial Wall Plate Camera #4213**

This is a color wired low light camera that has a 3.6mm wide angle lens. 380 lines of resolution with a .5lux rating

**15" TV with hidden Wireless Camera— TV may vary**

This is a standard TV that has a hidden camera that shoots video out the front and transmits the picture to a remote recording location

- B/W wireless* #890000
- B/W wired* #810000
- Color wireless* #890000
- Color wired* #810000

**Speaker Grill**

Non-functional unit!  
Ideal for home or office!

- B/W wired* #810000
- Color wired* #810000

**Outdoor Digital Still Camera #738**

Game-Vu is designed as the ultimate tool for serious hunters who are more concerned with knowing what is out there rather starting a photo album. Game-Vu is designed to provide instant, in-the-field information. Like most 35-mm trail cameras the date and time is stamped on every Game-Vu image. While it is true that Game-Vu images are not as sharp and clear as photographs taken by a 35-mm camera-based system, they still offer enough resolution to identify individual animals and in the case of a buck determine the quality of his rack. With Game-Vu, all of this information can be gathered in the field, no waiting or paying for film to be developed. Traditional trail camera systems use a visible strobe flash that often spooks passing animals or alerts trespassers to the camera's presence. Game-Vu utilizes 16 non-visible infrared lights so it never spooks the animals you are trying to pattern and reduces the chance that a trespasser will spot your camera in the woods. Game-Vu's maximum nighttime range is approximately 15 feet. While this is shorter than some flash cameras, it is possible to get Game-Vu closer to your target area. Finally Game-Vu is 100 percent solid state, so it makes no noise. By nature, 35-mm cameras feature a noisy, gear-driven film advance system along with the click of the shutter. Never before have hunters had so many choices. Before choosing a trail camera it is important to understand the technology behind it and what it is designed to do. There will always be an application for 35-mm trail cameras, Game-Vu is offered as the stealthy alternative that delivers in-field information.

**Wireless Color Day / Night Outdoor Camera #1099**

This tiny powerhouse makes a great front door camera. It is color during the daytime, and B/W IR at night time. This camera also happens to have a built-in microphone. The IR light will produce a picture in near darkness up to about 6 feet out. Just mount the camera at your front door, give it power, plug the receiver into your TV and enjoy the piece of mind of seeing who is at the front door without actually having to go to the door. This great little unit uses what is know as a "flat-nose" pinhole lens. This camera has a 300 ft line of sight rating and is great for quick setups during the daytime. This particular camera uses CMOS technology and thus has an extremely low power consumption.

**Outdoor Camera and Decoder #808**

**Security just got easier!** This is a camera in a light bulb that screws into your outdoor/indoor light fixtures and sends video to your television or VCR. This PAR-38 style, outdoor weatherproof camera is disguised as a light bulb and comes with our exclusive companion decoder. There are no wires to run, no holes to drill, and no antennas required. Package contains camera in a bulb, decoder, and RCA cable. All you need is a TV or VCR and a light socket. monitors in total darkness, portable...take it anywhere

**Wireless Camera Kits**

**Wireless Video Transmitter and Receiver Set**

**Up to 700 ft transmission**  
Standard RCA input and output, 2.4 GHz  
This unit can transmit on a single or multi channel. This unit can convert most any hardwired camera into a wireless camera. TRX is 3.0" x 3.0" x 1.0". Comes with power supplies

- 1-channel Transmitter/receiver set #1114**
- 4-channel Transmitter/receiver set #1113**
- 4-channel Trans/rec. set w/audio #1123**
- 4-channel 1,500ft. set w/audio #1115**
- 8-channel Transmitter/receiver set #1132**

**Wireless Color Camera #1102**

This great little indoor camera is very popular with RC car enthusiasts. This camera has a 300 ft line of sight rating and is great for quick setups during the daytime. This particular camera uses CMOS technology and thus has an extremely low power consumption.

**Video Transmitter and Receiver System #4119**

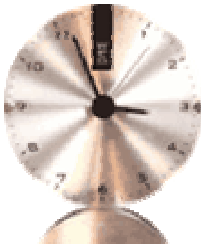

This Video Transmitter and Receiver System is perfect if you want to watch videos from your own video camera 'real-time'. Our patented circuitry transmits the video signal using the power lines in your home or office. Just plug your camera into the Transmitter box

and plug in the receiver and connect it to your television or VCR. That is all there is to it. You get quick and easy live video surveillance. No cables to run, no radio broadcast signals that can be intercepted. The Transmitter accepts B&C or RCA inputs from almost any video camera. You can even use your camcorder camera. The Receiver receives the signal from the power line and inputs it into your TV or VCR.

**B/W Powerline Hidden Camera #4218**

This unit has a hidden camera in the air purifier and it send the video signal through the power lines just like the unit above. This eliminates the problems sometimes associated with wireless cameras. This comes with the receiver that you simply plug into a power receptacle to receive the video

**Executive Clock  
#739**

**Clock Radio  
#747**

**Air Purifier  
#746**

## Hidden cameras with Digital Video Recorder Built-In

No Need to hassle with complicated camera and VCR wiring or wireless cameras that transmit your images all over the neighborhood! The new Hidden DVRs (digital video recorder) are completely self contained, totally secure, and easy to use. All functions work normally and the hidden B&W low light - high resolution camera is totally invisible.

The MemoCam is a stand alone DVR that combines digital recording capabilities with an Advanced Video Motion Detection (VMD).

The unit includes MemoCam Windows and pocket PC based applications that enables:

- Playback of recorded images at multiple speeds
- Fast searches by time or alarm events
- Search for images using a detailed list or thumbnails
- A Windows export utility that automatically exports the contents of the memory card onto a CD as:
- Backup
- An AVI file for playing on any Windows media player
- JPEG images

### Main features:

Simple Installation

You can choose between: Image Resolution, Frame Rate, Color or Black & White

A solid-state device that doesn't require day-to-day user intervention. No moving parts equals No maintenance. Eight selectable levels of video quality. Smart alarm activation, Integrated new Advanced Video, Motion Detection (VMD) Technology, Data storage utilizes SD/MMC removable memory cards (from 16MB up to 1GB)

Operating the unit is made easier using the IR remote control

System includes the Hidden DVR, MMC card reader with USB cable and software, complete easy to understand instruction book and MC/Radio cam software. Everything you need to plug unit in an start using instantly. This system also available in a personal air purifier and standard size motion detector.

**Motion Activated PIR  
#736**

**Mantle Clock  
#749**

**Large Wall Clock  
#4217**

**Mini DVR #  
#737**

**A palm-sized MemoCam DVR unit containing a digital video recorder and a removable multimedia card for local image storage.** Images sequences are recorded upon external dry contact activation as well as on video motion detection.

Evidence recording has never been so easy!

## Mobile Digital Camera #4071

Protect your vehicle or fleet with our Mobile Cam. The mobile cam can be activated by remote control or emergency switch. It can also be automatically activated with its motion sensor. Use this camera to create still photo documentation of vandalism, theft, and altercations.

### Specifications

- Able to take and store up to 680 digital images
- View playback on home TV and monitors
- Record images on any VCR
- Displays date and time
- Able to capture images at night or in very low light
- Easy to adjust and install—Plugs into cigarette lighter

Includes:

- Cigarette lighter adapter

Foot pedal Size

- 4 3/4" x 2 1/8" x 7/8"

### Digital Lighter Camera #1191

This digital camera is built in to a non-functioning cigarette lighter. This unit is equipped with a 64 MB SDRAM memory that stores 104 images (standard 640x480 resolution) or 30 images (High 1280x960 resolution). Images can be easily downloaded to your computer using the USB cable.

**Specifications:** CMOS sensor 300k pixels \* Image Resolution: 1280x960 pixels SVGA, 640x480 pixels VGA \* Built-In 64MB SDRAM \* Memory (Picture) Capacity: 30 SVGA, 104 VGA \* Built-In View Finder \* Shutter Speed: 1/6-1/15000 Seconds \* Single, Continuous or Automatic Shoot Modes \* Automatically Enters Energy Saving Mode After 30 Seconds \* Automatic Exposure, Automatic White Balance \* Power: Lithium Battery 4.2v \* USB Interface

**Includes:** Non functioning cigarette lighter digital camera \* USB Cable \* CD-Rom Software \* Complete Instructions \* Size 2 1/4" x 1 1/2" x 1/2"

### Digital Pen Snapshot Camera #4253

**Specifications:**

- \* Resolution: 160 x 120 pixels
- \* Battery: Button Cell AG13 x 2
- \* Power Manager: Shut off automatically
- \* Built in Memory: 2MB - 36 pictures
- \* Image Format: BMP
- \* Erase Function
- \* Power Indicator: LED Green
- \* Interface: Com interface
- \* Function instruction: Vocal Instruction

### Digital Camera with Solar Cell and Calculator #4254

**Key Specifications/Special Features:**

Image sensor: 0.1 mega pixels CMOS sensor \* Image resolution: 352 x 288 pixels (CIF), 176 x 144 pixels (QCIF) Lens: f = 3.6mm, F2.4 \* Shutter speed: 1/6 to 1/15000s \* Self-timer: 10-sec delay \* File format: jpeg, AVI \* Memory: internal 16MB \* Storage capability: about 19 (CIF), about 47 (QCIF) \* External 16MB SD card: (quality) about 38(CIF), about 152 (QCIF) \* Exposure: auto \* White balance: auto \* Optical viewfinder: yes \* Interface: USB1.1 \* Power: lithium battery 4.2V/USB 5V/button cell 1.5V/solar cell 1.5V (for calculator) Dimensions: 83.8 x 51.3 x 10.1mm \* Weight: 50g

### Personal Digital Video Capture Camera

This battery operated Home Guard Personal Digital Video Capture Camera has 64 MB ram for fast action snapshots when motion is detected. Simply place the unit in a desired location and turn it on. It is capable of capturing more than 8000 frames. Simple and discrete to use this new item is perfect for home, office or anywhere you need personal protection.

**Specifications**

1/4 Color CMOS Camera with 64Mb Flash RAM \* 90 Degree FOV \* Covert 3.7mm Pinhole Lens 0.80 LUX \* 640x480 or 320x240 Recording Modes \* High/Medium/Standard Recording Quality \* Selectable Motion Detection Sensitivity \* Record speed range from 1 frame every 10 seconds, or as fast as 15 frames per second @320x240 \* Records up to 8000 frames in 320x240 standard mode, or 2000+ frames in 640x480

HQ mode \* Time and Date Stamp \* Searchable Play-Back Playback via TV \* Uses four AA batteries (6 hour battery life) or may be powered via included AC wall adapter \* Can be mounted to a wall via the included tilt/ swivel bracket or just set on a desk or counter top. \* PAL or NTSC ready

**Includes:**

Home Guard Capture Camera \* AC Adapter \* Swivel Mount \* Video cable \*Users manual  
Size: 3 3/4" x 2 1/2" x 1 1/4"

### 680 Image Capture Camera

Our Cybereye Image Camera is the perfect digital camera security system for surveillance of homes, stores, banks, offices or anywhere that risks intrusion. The Cybereye features infrared technology that can capture images at night.

**Specifications:** Holds 680 images,\* 1/4 inch CMOS B/W Image sensor \* 0.5 LUX minimum illumination \* 8mm lens \* Pictures can be transferred to VHS tape \* Infrared capability \* 9V300mA power supply \* Year / Month / Day / Hour / Minute time display \* TV / Monitor image checking \* Remote control with emergency button

**Includes:** AC adapter \* Video cable \* Mounting screws and anchors \* Size 3" x 2 1/4" x 3"

**Body Worn Video**

**Wireless Cell Phone Camera**

Non-Functional unit!  
Ideal for mobile covert video!  
1.2 GHz wireless transmission up to 300 feet

*Color Cell phone wireless #767*

**Video Glasses**

Ideal for mobile covert video!  
CCD camera not a low cost CMOS like some competitors

*Color Video Glasses #766*

**Wireless Pen Camera**

Non-Functional Unit!  
2.4 Ghz wireless transmission up to 300 feet

*Color wireless pen #769*

**Wired Pen Camera**

**B/W #**

**Button Camera**

**The ultimate body worn camera!**  
Ideal for mobile covert video!  
Comes with its own battery pack.  
High quality Japanese optics with high resolution output.

*B/W wired Button Camera #858*  
*Color wired Button Camera #868*

**Eyeglass Case Camera**

Ideal for mobile covert video!  
Body worn camera capable of running on 8 AA batteries.

*B/W wired eyeglass case #810000*  
*B/W wireless eyeglass case #890000*  
*Color wired eyeglass case #810000*  
*Color wireless eyeglass case #890000*

**Pager Camera**

Ideal for mobile covert video!

*B/W wired pager camera #761*  
*Color wired pager camera #765*

**Pro Button Camera #4238**

This button is a high grade color CCD camera. It is perfect for body-worn video surveillance. Don't confuse this product with cheap CMOS imitations. It has 380 lines of resolution with a .5lux rating.

**Broach Camera #4241**

This broach is a high grade one of a kind color CCD camera. It is perfect for body-worn video surveillance for the females. Don't confuse this product with cheap CMOS imitations. It has 380 lines of resolution with a .5lux rating.

**Pro Button and Screw head Camera #4289**

This Button/Screw is a high grade one of a kind color CCD camera. It is perfect for body-worn video surveillance or room surveillance. It has a changeable head to convert from a button to a screw head camera. Don't confuse this product with cheap CMOS imitations. It has 380 lines of resolution with a .5lux rating.

**Pro Wireless Button #4239**

This button is a high grade one of a kind color CCD camera. It is perfect for body-worn video surveillance. It comes with a separate video transmitter and receiver to record at a different location. The transmitter has a built-in rechargeable battery. The range is approximately 500ft. Don't confuse this product with cheap CMOS imitations. It has 380 lines of resolution with a .5lux rating.

**Pro Handbag #4243**

This handbag is a high grade one of a kind color CCD camera. It is perfect for body-worn video surveillance for the females. There is plenty of room for one of our digital recorders on the next page. Don't confuse this product with cheap CMOS imitations. It has 380 lines of resolution with a .5lux rating.

**Pro Helmet Camera #4126**

This Helmet Camera comes in an indestructible case that is perfect for Point - Of-View shots. It comes with a rechargeable battery and a microphone. Helmet not included.

**Pocket DVR #1187**

Introducing the amazing new "pocket size" digital video recorder. Smaller than a standard "Walkman" type cassette player at an incredible 5.1" x 3.3" x 1.3" and weighing in at only 13 ounces makes this unit the perfect "body worn" surveillance recorder.

The dvr requires **no cumbersome adaptors** for RCA connection to camera. Simply plug in your RCA video and/or audio source to the supplied connector cable. The DVR features an internal 20Gb mini 2.5" hard drive that record 40 full hours of real time color video (Mpeg4) and audio. Recordings may be viewed by the built-in 3.5 inch full color TFT LCD or an external monitor or TV via RCA output jack. A full function "business card size" IR remote control is included for ease of viewing.

The DVR records for four hours per charge of the built-in rechargeable lithium ion battery pack. Unlike other units, the **rechargeable battery is easily removable**, so if you need addition record time in the field, a spare battery can be quickly installed for another 4 hours recording. The DVR can also be utilized as an external hard drive to store or read data or image files via USB interface.

Unit includes IR remote controller, AC adaptor/re-charger, RCA connector cables, mini USB 2.0 cable, earphone, user manual, Lithium ion battery and warranty.

**40 Hr. Pocket DVR #1187**

**80 Hr. Pocket DVR #1195**

**Extra Battery for Pocket DVR #1188**

**Belt Harness to hold our Pocket Recorder #770**

This is a durable multi-pocketed harness capable of holding an 8 mm recorder (such as the GVD's) and the battery packs of you cameras and microphones. "One Size fits All"

**RCA type Audio mic to plug into body Worn Video Recorders #183**  
6ft. Body mic.

**Super Slim 40 Hrs. Pocket DVR w/SD slot #4140**

Now **40 Hours** of quality video and audio recording on a unit that can actually fit into your shirt pocket. Only 5" x 3" x 3/4".

The **Mini DVR** also offers a convenient SD card slot so recording can be captured on the hard drive or SD card.

Extremely user friendly, the on screen menu guides you thru all functions. Battery will record for over 2 hours and is instantly replaceable. Video can be viewed on unit or played back on your computer or TV/ Monitor.

Built-in stereo speakers allow for audio playback.

Unit comes complete with re-charger, IR remote control, carry case, earphones, USB cable, RCA input/output cable and instruction manual.

**Features:**

20 Gb Internal Hard Drive, Time/Date Stamp, 3.5 Inch LCD, Built in Stereo Speakers, Secure Digital (SD) Card Slot, Rechargeable Li-ion Battery, IR Remote Control, OSD Menu, RealOne Player, MPEG-4, MP3 recorder/player

**Other Uses:**

**Cinema to go:** Record video up to 40 hours. Watch video on built-in 3.5 inch LCD screen, TV or Project.

**Photo Wallet:** Store over 100,000 photos.

**Music to go:** Holds up to 370 hours (6000 songs) of MP3 music. Transfer your Mp3 collections vial USB 2.0 to the device.

**Voice Recording:** Record voice up to 910 hours with built in microphone.

**USB 2.0 Portable Disk:** Use as an additional hard drive on your PC. Store any files, serve as an USB portable disk.

**Extra Battery for Pocket DVR #920133**

**Mini SD Card Recorder #4138**

**Product Function** Digital Video Player . Digital Video Recorder / Digital Photo Player / Digital Voice Recorder / MP3 Player / Language Learning Player / USB Portable Disk / SD/MMC Card Reader  
**Display** 2.5" TFT LCD

**Microphone** Built-in

**Speaker** Built-in

**TV System** NTSC / PAL

**DPS Support** Yes

**File Format** JPEG / ASF / / WAV

**Audio Effects** Bass / Rock / Jazz / Classic / POP

**Interface** USB / AV in / Earphone / DC-in

**Internal Memory** Built-in 32MB

**File Format** ASF / JPG / MP3 / WAV

**Power Source:** Li-ion Battery (Build-in charger through Power Adapter)

**Dimensions :** 96 X 77 X 20mm

**Weight :** 110 g (without Battery)

**Security Cameras**

**Color Day / Night with 12 IR #1275**  
1/4" Sharp CCD chip  
380 line of resolution  
6mm lens  
12 IR leds  
20ft. range

Iris Control: Automatic  
White Balance: Automatic Tracing White Balance (ATW)  
Image Quality Compensation: Vertical and Horizontal  
Horizontal Turning: 0 - 15° / s 360° Unlimited Positions  
Vertical Turning: 0 - 15° / s 0° - 90° Elevation Angle  
Preset Positions: 32 Positions

### Indoor High Speed Pan/Tilt Sony CCD 2x Digital Zoom Pelco D

Effective Pixels: 500(H) X 582(V)  
Scanning Area: 3.6mm(H) X 2.71mm(V); 1/4 Inch  
Video Output: 1.0Vp-p  
White Balance: f3.6mm  
Power Supply: DC 12V 1A  
Panning Range: 0° - 355°  
Communication: RS485  
Control: Pan/Tilt  
Operating Temperature: 0°C - 40°C (w/Outdoor Housing)  
Signal to Noise: > 48dB  
Sensitivity: 1 Lux  
Horizontal Resolution: More than 420TVL  
Focal Length: Manual  
Pan Speed: 0.45 - 45° / s  
Tilt Speed: 0.45 - 45° / s  
Preset: 16 Presets (Max)  
Auto Pan: On/Off  
Auto Tracking Mode: On/Off; 1 Cruising Tracks  
Dimensions: 160 X 115mm (H)  
Weight: 0.7kg

**High 18x Speed Dome SONY CCD #4040**  
 High Sensitivity 0.5 Lux  
 Weather Resistant  
 128 Presets  
 18X Optical and 12X Digital  
 Easy Installation  
 Multi Protocol Solutions  
 24V AC Powered  
 Heater/Blower Housing included

**Pickup Device:** 1/4" Super HAD SONY CCD  
**Active Pixels:** 786H X 494V (440000 pixels) NTSC  
**Video Output:** 1.0V p-p/75 Ohms  
**White Balance/Gain/AE Control** Auto/Manual  
**Power Supply:** AC 24V ± 10% 1.25A (with Fan/Heater)  
**Power Consumption:** 30W (with Fan/Heater) - 15W (Indoor)  
**Weight:** 2Kgs - 4Kgs (With Aluminum Alloy Ball)  
**Installation:** Indoor Ceiling Installation or Wall Mounting  
**Opposite Humidity:** 10-75%  
**Operating Temperature:** -10°C~50°C(w/Outdoor Housing)  
**Scan System:** 15.625 Khz(H) 50Hz(V)  
**Horizontal Resolution:** 520 TV Lines  
**Signal to Noise:** > 48dB  
**Shutter:** 1/3~1/10000sec  
**Sensitivity:** 0.5Lux (F1.6) - .01-.7 For Day/Night Model  
**Zoom Ratio:** 18X Optical f=4.1~73.8mm F1.4~F3.0  
 12X Digital (48° Wide/ 2.7° Tele)  
**Focus :** Auto/Manual  
**Iris:** Auto/Manual  
**Pan Speed:** 0~300°/s  
**Tilt Speed:** 0~60°/s  
**IP Rating:** IP67  
**Preset:** 128 Presets (Max)  
**Auto Cruise:** At best 6 cruises  
**Tour:** 40sec

**High 18x Speed Dome SONY CCD DAY & NIGHT #4177**  
 High Sensitivity 0.01 Lux  
 Weather Resistant  
 128 Presets  
 18X Optical and 12X Digital  
 Easy Installation  
 Multi Protocol Solutions  
 24V AC Powered  
 Heater/Blower Housing included

**Pan/Tilt/Zoom Controller #1150**

## Network Video

**Network Video Server #1175:**

What is a remote video server?  
 A remote video server is a device that allows you to broadcast video over the Internet. This technology is commonly confused with web cameras. There are significant technological differences. A "video server" is a completely self contained device. I.E., a PC is not required. All of the necessary circuitry and chipsets, including the Internet "NIC" card is built in. A server even has its own operating system. A webcam is merely a camera,

often a very low cost and low image quality cmos or (complimentary metal oxide semiconductor) device. There are no software installations necessary with our video server. The operating system is also built-in. Connect any type of video input and access it anywhere, even a home camcorder. You need only an Internet browser. Imagine the possibilities. The video server required two years of engineering and quality certifications. It combines a built-in 32-bit reduced RISC processor with a patented proprietary video compression chip-set to provide the highest quality imaging possible, without sacrificing speed and fluidity of motion. Some video servers have more features, but you will NOT find another video server that provides higher quality at 30 frames/sec. Currently, the video server supports up to 20 simultaneous users to be logged in to one server. The unit also features a built-in flash memory system which allows users to remotely and instantly receive future enhancements and features as they become available. In addition, the unit supports dynamic addressing support for users with DHCP addressing from Internet service providers. There is no longer the need to acquire the added expense of a static IP address from an Internet provider. We provide a FREE DDNS service that communicates with our video servers to allow any and all users to access their servers via a personal web address, such as johndoe.mybluenetvideo.com. It simply doesn't get any easier. Size: 65(w) x 30(h) x 100(d) mm

This fully functional software brings together all the features of the web-based monitoring viewer, plus provides a virtual digital video recording system. You can now use this software in conjunction with your BlueNet video server or network camera. Connect one or up to sixteen BlueNet video servers simultaneously. Best of all, you can now remotely record your video to any PC or laptop. The quality is excellent, the video is fluid, and the software loads in seconds. **I-PRO Recording Software—Easy to use—16 Simultaneous Video Streams—Remote Recording**

**Video Accessories**

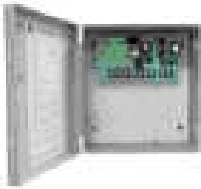

10" housing - no heater/blower - #1016

- 8 - 2.5 mm to 3.5 mm barrel adapter
- 3.5 mm to 3.5 mm dubbing cable  
(not pictured)

12vlt. DC Solar Cell with built-in rechargeable battery #118

**12V battery pack**

Use 8 AA batteries in this battery pack to run a portable camera. B/W cameras will run approx. 4-6 hours, Color camera will run approx. 2-4 hours. Using lithium or long life batteries will increase total battery time. Standard 9V battery clip output.

**Dummy Camera w/ Blinking Light**

#1025

An exact replica of the Remington outdoor camera, but this one does not work. With a few of these you can easily make a 4 camera system appear much larger than it really is.

**Outdoor Dummy Camera Set #1029**

Durable metal housing with a dummy camera with a blinking light, a mount and 3 ft. of cable.

This is the most realistic outdoor dummy camera on the market today

**CCTV Warning Sign #991**

Decent sized sign that warns all people that this site is monitored by a Closed Circuit Camera system. 10" x 10"

**CCTV Warning Sticker #990**

Small sticker that warns all people that this site is monitored by a Closed Circuit Camera system. 3" x 3"

**CCTV Warning Sign English/Spanish #1000**

**9 Hr Video Cassette #1211**

Recorders 9 hours in a standard VCR.

**Pro 160 Cassette #125**

8 hour triple density VCR tape for use with home VCRs or security grade VCRs

**Power Barrel Converters**

Converts standard power barrels to 9V clips. These come in handy when converting hardwired cameras to battery powered cameras or for use with the AA battery packs. No need to cut the ends and void the warranties of the camera.

- 9V battery clip with male power barrel
- 9V battery clip with female power barrel
- 9V battery clip with 2 male power barrels
- 9V battery clip with 2 female power barrels

The DVMS System is a PC based, multi-channel Digital Remote Management system that utilizes the most advance digital video compression technologies to bring you the highest picture quality and video performance. The DVMS product range starts from our entry level 20fps to the flagship 480fps. Up to 16 cameras can be connected and view live on a local monitor screen or thru TCP/IP network. Video can be recorded basing on specifiable schedules or motion detection. You can store video clips in HDD or any optical storage device by using Backup System.

**SAVE TIME & MONEY**

\* Eliminate old fashion tape management expense \* Video is recorded on the system's hard disk where you can burn a copy of the file onto a CD for later viewing or long term storage. \* No longer have to waste valuable time searching through hours of videotape. \* User can instantly locate a clip stored on the hard disk.

**INCREASE PRODUCTIVITY**

\* After the economy shakedown, replace unfilled employment with management monitoring \* Employees are assured of safety and work on schedule \* Regional managers can monitor local office/stores remotely \* Eliminate travel to remote site \* Able to view pre-recorded video remotely

**Major Features**

\* 640 X 480 recording and display resolution \* Mpeg 4 / Wavelet compression technology \* Alarm to E-mail (Jpeg or text message) \* Embedded I/O devices control \* Embedded PTZ control panel \* PTZ dome to a preset on alarm activation \* Samsung SCC-641 / 643 PTZ dome support \* Build-in web server \* Digital watermark authentication \* Multi level passwords protection \* Screen pop-up on motion or alarm activation \* Support dynamic IP address \* Video lost detection \* On screen video lost message \* Video de-interlace filter \* Video auto gain controller \* Video scaling filter \* Use Microsoft Remote Desktop Technology \* AVI repair utility \* Object counting \* Object search \* Thumbnail search \* Index search \* System log \* Twin DVR \* Dynamic DNS support \* Managing multiple servers in a WebCam \* Point of Sale (POS) Integration \* New MPEG4 \* Remote access log database over WebCam

**Optional Equipment**

- Synchronized Audio Board (Up to 16 channel)
- Real-Time Display Output
- I/O Alarm contact interface
- Pelco PTZ control interface
- Cash Register Interface available for most registers
- Rack mount cases available
- Micro footprint cases available (will fit inside most lockboxes)
- Modem Upgrade
- Additional Hard Drive(s)
- KVM Switch

**Recording Mode** \* Motion detection recording \* Round-the-clock recording \* Schedule recording \* Day-Night recording mode \* Pre alarm and post alarm recording \* Pre motion and post motion recording

**New Features:** \* Support up to 720x480 Video Resolution \* Support Screen Resolution 1280x1024 \* Support for more PTZ domes: Directed Perception PTU-D46, SAE DR-E588, Kenko DMP23H1, Pelco Spectra 3 (capable of Object Tracking)

**New features to ViewLog, including:** \* Continuous playback of set frames A to B \* Aspect ratio option of 4:3 and 16:9 \* AVI format export in multiple screens mode \* EXE format export, playable w/ 3rd-party players \* DVD format export for Hybrid Card-format files, playable with any DVD players \* Support for Windows XP burning software, directly burning files into CD media

**New features to Remote applications:** \* E-Mail alert from Center V2 \* Screen resolution up to 1280 x 1024 in Center V2 and Remote Playback Client Site \* Enhanced network security with RSA encryption \* Display of group subscribers hard disk capacities in VSM \* Remote monitoring via Windows and Symbian based Smartphone \* Object Index search from WebCam RPB

**1 Channel Mobile DVR w/30gig hard drive #1181**

Most compact size (175x220x44) WxDxH, Simultaneously recording while live view displaying, Motion detection recording, Various recording modes includes continuous, schedule & motion, Search for events by time and date, Anti-vibration and shock resistance function, Up to 15 fps recording and up to 30 frames per second video display, 1 channel audio recording

**One Channel USB interface box with software #1173**

Remotely view video from any internet connected PC, Compatible with any CCTV surveillance camera, Record live video directly to your computer, Motion detection alarm notification via e-mail/phone/PDA, Protect your home, office or business, Be better prepared to respond to emergencies, Verify alarm calls from your security monitoring company, Confirm your business is secure when closed, Turn lights or appliances on/off from any remote location (X-10 accessories sold separately), Record video evidence in the event of a crime, Monitor customer traffic, Video audit of business transactions, System Includes: Video Grabber with USB cable & Microsoft 2000/XP Certified DVS application software. PC or Laptop and Camera required. Not included.

**Video Recorders**

**Standard Time Lapse 960 hr. VCR—#1270**

**General Features**

3x High Density Recording, Perfect 3x high density field playback, Noiseless image at slow mode seeking, Best image quality at Real Time Recording & Playback, Real Time recording at 20fps in, 18H, 12fps in L30H mode, B/W : More than 350 lines, Color : More than 300 lines, Multiple OSD language (English, Spanish, French, German, Italian) , Low Energy consumption (approx.. 17w)  
Power Loss Memory, Repeat & Series Recording, Power Failure Recall, Alarm Recording, Search & Recall, Automatic Head Cleaning, Universal Power (No manual switching required), Field, Tape Remain Counter, Recording Check, Camera Switching Pulse (Trigger Out), Flexible Timer Recording

**Mobile Time Lapse VCR—#1267**

960 Hr. Time Lapse recording capacity, Real Time 30 hours (40 w/ T-160 tape), Dual mode on screen display, Linear audio (up to 30 hours), Wireless remote control, Camera switching pulse, 1 week battery backup option, DC 12 Volts operation, Flexible timer recording, Multiple OSD languages (English, French, Spanish), Alarm record, Link record, One, shot recording, Alarm scan, Alarm index search, Power fail recall, Microphone input

**Quads, Switchers, and Distribution**

**CCTV Four Camera Switch Box #951**

**CCTV Eight Camera Switch Box #952**

Allows any combination of cameras to be monitored by a single TV, monitor or VCR, Auto scan function allows sequential viewing of each camera, Variable timer, Includes 4 sets of video inputs, Red LED indicators for power and camera selection

**Quads**

The EverPlex quads represents the most unbeatable value of the processors for 4 or 8 camera inputs. Selectable single or dual-page quad display, super high resolution, practical features, and a remarkable price provide the real quality for the video processing.

- B/W Single Page Quad—4 cameras #947
- Color Single Page Quad—4 cameras #946

**6 Output Video Distribution Amp #969**

This unit can take 1 video input signal and output 6 balanced 75ohm 1 volt p/p outputs. It has an illuminated front panel on/off rocker switch, auto terminating bnc connections, 110 vac. Dinensions: 8"W x 1.9"H x 6"D

This the right product to split a camera signal out to six different monitors

Monitors

**Security Monitors**

Attractive black metal cabinet with recessed handle for portability. Easy to operate front panel controls, Looping input.

B/W 9" Monitor—#1248      B/W 12" Monitor- #1244      B/W 14" Monitor—#1245  
 9", 12" and 14" all 1000 lines of resolution

Color 10" Monitor—more than 350 lines of resolution #1258  
 Color 14" Monitor—more than 350 lines of resolution #1254  
 Color 14" Hi-Resolution Monitor—more than 550 lines of resolution #1257

**Color 5.6" TFT Set-up Monitor #1256**

Includes: case, rechargeable battery, and video inputs. Great for mobile video applications or temporary camera systems.

**5" B/W Action TV #1242**

This small TV also has an RCA monitor input in the rear. It also comes with a standard cigarette lighter adapter that can be used in most any car giving it even greater flexibility. It's portable size makes it easy to carry around and use in most mobile camera situations.

**Mini Hand-Held Set-Up Monitor**

The molded rubber eyepiece makes the GVM 100% daylight viewable, eliminating annoying glare on the viewing screen on bright, sunny days. The GVM represents the next generation of display technology that maximizes the resolution of stored

images viewed in the field. Powered by three AAA batteries, the GVM provides over 24 hours of continuous viewing time. An automatic shut-off switch prevents the GVM from being left on accidentally, so you won't have dead batteries the next time you go into the field.

**B/W #1252**  
**Color**

**Fiberoptic Inspection Scopes**

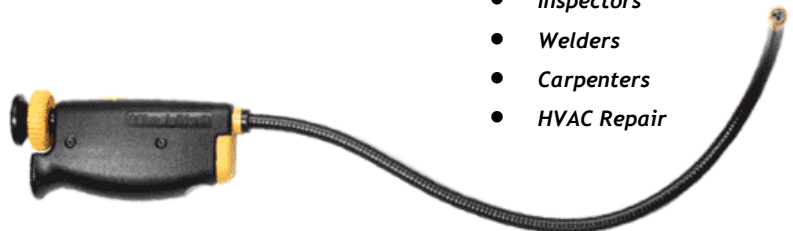

Based on new innovative (fiberoptic technology) the flexible cable of the ProVision fits into holes as small as 1/4 inch\* diameter - allowing you to look behind walls, down into drains, inside engines, or hundreds of places without costly demolition or disassembly!

The high resolution lens provides a clear image of objects as close as 3/4 inch and over one foot away while providing a wide 40 degree field of view. A powerful lamp illuminates dark crevices on demand with the push of a button conveniently located on the handle. The ergonomically designed handle is comfortable to hold and allows one-handed focusing and light activation. Rugged and water resistant, The unit is made of high impact ABS and flexible cable sheathing that obediently stays in a set position. Adjust the cable into any position and it will stay fixed in place, until you decide to change it \*. This feature permits one-handed operation - freeing your other hand for work!

- 18 Inch .4" Fiberoptic Scope #668
- 36 Inch .4" Fiberoptic Scope #730014
- 18 Inch .23" Fiberoptic Scope #730015
- 36 Inch .23" Fiberoptic Scope #669

*The fiberoptic inspection scope is ideal for:*

- Electricians
- Law Enforcement
- Mechanics
- Home Owners
- Exterminators
- Plumbers
- Inspectors
- Welders
- Carpenters
- HVAC Repair

## Computer Spy

### Spector Pro Software #484

Spector is the first automatic screen recording software designed for consumers and corporations. Spector records PC and Internet activity, much like a camcorder, and lets you play back the recorded information. Spector records all applications loaded, all web sites visited, all chat conversations, all keystrokes typed, and all incoming and out going e-mail activity. You see what THEY see. Spector automatically takes snap shots of your display screen, as often as once per second, or as infrequently as once every few minutes. You decide how often Spector records. Whatever the child or employee sees on their screen, you will see when you replay their screens with Spector. There are no confusing codes to decipher, or filter lists that need constant downloading. **You see what they see with Spector.** Spector is appropriate for parents concerned about how their children use the computer and what web sites their children visit. Spector will even record conversations on the Internet. Spector is also ideal for business concerned about how their employees use company PCs. Recent studies indicate that many employees spend several hours a day on company time playing games or visiting inappropriate web sites. There have even been examples of employees using company PCs to download child pornography. Clearly, this is non-productive, at best. At worst it may subject your company to legal liability, especially if an employee arranges to meet a child via the Internet

### KeyKatcher

The KeyKatcher is a 'hardware only' computer monitoring system. **Parents:** Monitor your child's Internet, e-mail, and chat room activity. We believe that there is no off-the-shelf solution for effective parenting, but the KeyKatcher can be your eyes when you are not there. **Employers:** Use the KeyKatcher to monitor employee computer usage compliance. Employees will spend less time browsing the Internet and sending e-mails if they are being monitored. **Executives:** Use the KeyKatcher to detect any unauthorized access of your PC. If someone uses your computer after hours, you will know.

KeyKatcher 32K #84      KeyKatcher 64K #83      KeyKatcher 128K #85

### EBlaster #483

If you are familiar with Spector, you will be at home with eBlaster. EBlaster records web sites visited, applications launched, keystrokes typed and, optionally, take screen snapshots. The twist for eBlaster is that, once installed on a PC, it sends all of its activity reports to an e-mail address you specify! So, you no longer need physical access to the PC you wish to monitor once eBlaster is installed. As a parent, you no longer have to wait until you get home from work to find out what your children have been doing on the Internet. If you have to go away for business, you no longer have to wait days or weeks to see what your children have been doing online. You can now find out from anywhere in the world what they have been doing! As an employer, you can get hourly or daily reports of all the web sites your employees are visiting, as well as everything they are typing. Are the mice playing while the cat is away? They won't be, if you have eBlaster!

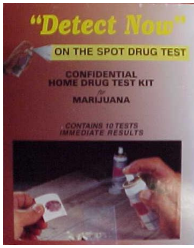

## Testing Kits

### Infidelity Test Kit #261

The KT100 CheckMate Semen and "Sperm" Detection Test Kit is simply the easiest and most cost effective way to put an end to the nightmare of suspicion and doubt caused by the infidelity of a cheating spouse. If your Customers need to know what's really going on in their relationships and they want to know now, tell them to try the CheckMate semen detection test kit. Now they can quickly, easily, and accurately detect and identify suspected semen and or "sperm" stains in undergarments in 5 minutes or less. The Original CheckMate Semen Detection Test Kit will quickly and easily monitor your spouse's or child's sexual activity by detecting invisible traces of dried semen that is left in their undergarments after sex...If any traces of semen are present on the area you decide to test, even in the smallest trace amounts, the patent pending CheckMate Semen Detection Test Kit will detect it. Invisible traces of dried semen can easily be detected for up to 2 years.

**Features:** Detects invisible semen stains, Quick easy and affordable, Laboratory proven results in a home test, Accurate results in 5 minutes or less, Discreet and confidential, Easy to follow instructions, Test 10 items with each kit

**Marijuana Test Kit #262**

The perfect test for parents worried about their teens, for employers to use for pre-employment testing or cause and reasonable suspicion situations. The Marijuana test kit is easy to use, cost effective, easy to dispose of and is backed by laboratory proven results.

Simple spray provides an immediate drug test answer The "Detect Now" drug test can be performed on any surface that has come into contact with marijuana (THC), Confidential non-invasive test kit works anytime, anyplace, It is the same test kit used by law enforcement agencies across the country, Very accurate, no lab work required, Test with or without the knowledge of the person being tested., Contains more than 10 test per box, Complete illustrated directions, FAQ, "What toDo" and resource list included

**Cocaine Test Kit #263**

The perfect test for parents worried about their teens, for employers to use for pre-employment testing or cause and reasonable suspicion situations The Detect Now Cocaine test kit is easy to use, cost effective, easy to dispose of and is backed by laboratory proven results.

Simple spray provides an immediate drug test answer The "Detect Now" drug test can be performed on any surface that has come into contact with Cocaine, Confidential non-invasive test kit works anytime, anyplace, It is the same test kit used by law enforcement agencies across the country Very accurate, no lab work required, Test with or without the knowledge of the person being tested., Contains more than 10 tests per box, Complete illustrated directions, FAQ, "What to Do" and resource list included

**Fingerprint Test Kit #260**

Easy to use home fingerprint test kit. This will help you find and lift latent prints off of objects.

**Disposable 5-Minute, 5-Panel Drug Test Kit #263**

Drug testing has never been easier! The EZ-55 quickly and cleanly analyzes urine sample and displays results right on the front of the sample cup. This one step drug screen test is performed without the use of an instrument. The test utilizes a monoclonal antibody to selectively detect elevated levels of 5 of the most commonly used and abused drugs. Test results also indicate sample temperature and the presence of any "cover up" additives such as bleach and peroxide. **Test accuracy greater than 99%.**

**Drugs Screened:**

- 1.) **Cocaine:** A potent central nervous system (CNS) stimulant and a local anesthetic.
- 2.) **Amphetamine:** A schedule II controlled substance available by prescription and is also available on the illicit market.
- 3.) **Marijuana (THC):** When smoked or orally administered, it produces euphoric effects. Users have impaired short term memory and slowed learning.
- 4.) **Opiate:** Any drug that is derived from the opium poppy, including the natural products, morphine and codeine, and the semi-synthetic drugs such as heroin.
- 5.) **Phencyclidine (PCP):** Also known as "Angel Dust", is a hallucinogen that was first marketed as a surgical anesthetic in the 1950's. It was removed from the market because patients receiving it became delirious and experienced hallucinations.

Each test kit includes urine sample cup, complete step by step instructions, four page manual explaining in detail the effects and history of each drug tested, and a patented "key" that activates the test to ensure that only the test administrator reads the results after the sample has been collected.

## Tracking Products

### SkyEye GPS Tracking System #3925

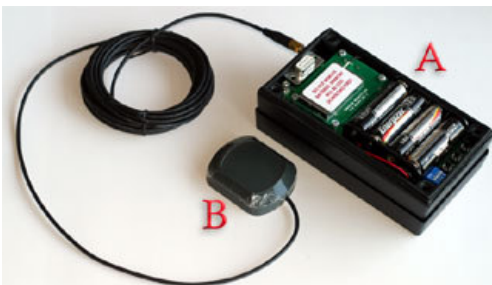

The SkyEye is general purpose asset tracking device that adds security and tracking capability to small, portable equipment such as generators, compressors, pumps, backhoes, Bobcats, etc. In addition to equipment and vehicles, the device can provide security for a range of construction assets such as supply pallets, wire spools, and similar high value assets. The device is fully self-contained and will operate for up to 90 days on 4 AA batteries, or can be hard wired to the unit's electrical system using the Vehicle Adapter Module (sold separately). The device can be programmed to send a status report at whatever frequency the user desires, and has a built-in motion detector to automatically send out position reports if unauthorized movement is detected. Constructed of ruggedized plastic, the SkyEye is vibration, moisture and dust resistant.

**Technology:** The GPS equipment asset tracking system employs three networks to provide remote equipment tracking services: The Global Positioning Satellite (GPS) network, the Groupe System Mobile (GSM) cellular network, and the Internet. These networks allow the user to track their equipment and control their gps system from the comfort and privacy of their home or office.

**GPS Network:** The GPS network is a system of 24 satellites in orbit above the earth's surface. GPS is funded by and controlled by the U. S. Department of Defense (DOD). While there are millions of civil users of GPS worldwide, the system was designed for and is operated by the U. S. military. The satellites provide specially coded signals that are processed by the GPS receiver in the gps device, enabling the system to compute its position, speed and direction.

**GSM/SMS Network:** The Group System Mobile (GSM) cellular network is the latest digital cellular network to be deployed by cellular carriers nationwide, and the latest version has added Short Messaging Services (SMS) capability to allow small amounts of data to be transmitted along with voice traffic. The SkyEye has a GSM/SMS transmitter and receiver that allow the system to receive commands and transmit position reports and other data requested by the user.

**GPRS:** GPRS, or General Packet Radio Service, is an advanced GSM network feature that permits large amounts of data to be transmitted over the cellular network at a reasonable cost. SkyEye Plus utilizes GPRS in order to permit users to make full utilization of the system without incurring a large monthly communications charge

### BATTERY POWERED, MAGNETIC MOUNTED, PASSIVE GPS VEHICLE TRACKING SYSTEM #703

**FEATURES:**

- Low priced unit - no monthly fees
- Records vehicle travel for up to 18 days
- Completely self contained
- Non-volatile memory saves information even if batteries run out

- 12 channel parallel GPS receiver
- Stores over 12,000 Positions In Log
- Downloads to mapping software (U.S. maps included; specific maps of Canada, Europe, and Latin America available upon request)
- Display vehicle location, speed, heading, lat/lon and time at remote location
- Operates on 4 AA batteries - can also be configured to operate off the vehicle's 12-volt power
- Small size: 3" x 5" x 1.5"
- Weatherproof package designed to look like car electronics
- Built-in motion detector to conserve batteries
- Adjustable data recording rate
- Magnetic mounting for easy installation

### Passive GPS Vehicle Tracker #702

Want to know the whereabouts of your teenager? The Passive GPS Vehicle Tracker is designed to be concealed within the vehicle, allowing you to record the complete travel activities of any vehicle... anywhere... anytime. Why engage in the dangerous practice of following a vehicle when you can quickly and easily let the Passive GPS Vehicle Tracker do the work for you?

The Passive GPS Vehicle Tracker gives you proof your suspicions were right...

Ever wish you had a tool that could prove your suspicions were valid? Next time you sense suspicious activity, make sure the Passive GPS Vehicle Tracker goes along for the ride. The Passive GPS Vehicle Tracker can track a vehicle to the nearest address, tell how long the vehicle remained at any given destination and provide details of suspicious activities. Why pay a fortune to hire a private investigator when you can be your own "detective" with the Passive GPS Vehicle Tracker...and pocket the money?

Don't like paperwork?

Let the Passive GPS Vehicle Tracker do the work for you!

The Passive GPS Vehicle Tracker is a fabulous record keeping tool for business owners, independent contractors and individuals who need support to document their taxes. The unit automatically gathers miles driven on a daily basis, maintains hourly billing records and produces comprehensive reports on all travel activities -- ideal for the busy executive who dislikes paperwork.

How the amazing Passive GPS Vehicle Tracker Works

The Passive Vehicle Tracker is a GPS (Global Positioning Satellite) vehicle tracking system used for monitoring the travel activities of private vehicles. The Passive GPS Vehicle Tracker unit uses GPS satellite signals to provide extremely accurate positioning, typically between 10 feet and 50 feet of actual vehicle location. Designed to be concealed within the vehicle, the miniature-sized the Passive GPS Vehicle Tracker is a tiny computer that rides aboard the vehicle telling you the exact whereabouts of the driver, including the address of each destination, names of streets traveled, how long the vehicle remained at each location AND IF THE DRIVER WAS SPEEDING!

When the vehicle returns home, the Passive GPS Vehicle Tracker hardware unit is easily removed from the vehicle and downloaded to any Windows® 95/98 or NT computer. Here the travel route can be viewed on your computer screen. A detailed map of your town's streets is built into the amazing the Passive GPS Vehicle Tracker software allowing the unit to display a variety of travel data, including every turn, locating every stop, the exact time and duration of each stop, mileage and, of course, speed.

Dimensions: 2" x 3.38" x 0.98"

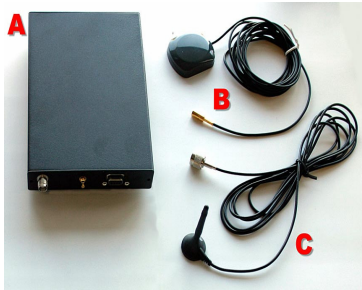

### GPS tracking logger with remote radio download and tracking capabilities. #710

For: Investigators - Fleet Management - Law Enforcement  
Rental Vehicles - Infidelity - Teenage Driver Safety

#### FEATURES:

- Low priced unit - no monthly fees
- Radio transmitter for data communication
- Stores over 12,000 Positions In Log
- Completely self contained
- 12 channel parallel GPS receiver
- Non-volatile memory saves information even if batteries run out
- Downloads to mapping software (U.S. maps included; specific maps of Canada, Europe, and Latin America available upon request)
- Display vehicle location, speed, heading, lat/lon and time at remote location
- Covert unit operates on 4 C batteries
- Fleet version operates off the vehicle's 12-volt power
- Small size: 3" x 5" x 1.5"
- Weatherproof package designed to look like car electronics
- Built-in motion detector to conserve batteries
- Adjustable data recording rate - 10, 20, 30 or 60 seconds
- Magnetic mounting for easy installation
- Data recording rate can be changed remotely via the RF interface

### REAL-TIME GPS VEHICLE TRACKING SYSTEM GPS #705

Digital GPS is a digital vehicle tracking system that uses Global Positioning Satellites (GPS). The GPS satellite signals are continuously broadcast from an orbit of 20,000 miles and the Digital GPS receives those signals to calculate its location. The longitude, latitude, Unit ID and other GPS information is transmitted via a CDMA cellular modem to a your computer or control center for display on a regional map.

The Digital GPS consists of a GPS Receiver and Cellular Modem which is fastened to the target. A GPS "Puck" antenna attaches with a magnet to the underside of the bumper cover and a miniature magnet mount cellular antenna fastens to the frame. Power is supplied by a direct connect to vehicle power or by a field replaceable battery pack which will power the system for approximately 5 days.

The system can be accessed from a Host PC at your office using our Host software package. The location of the target is displayed on a digital map of your area showing movement as it occurs.

Dimensions: 6" x 5.4" x 1"

GPS vehicle tracking over the cellular network.

Real-time Tracking With 1.5 Second Update

Displays Where Vehicles Are NOW!

12 channel parallel GPS receiver

Shows detailed route history

Displays entire fleet at a glance

Available in Digital (CDMA) and PCS

Stores 3,700 Positions In Log

Alarm Inputs and Relay Outputs

Built-in Motion Detector For Low Power Use

No infrastructure-- just a PC and modem.

Compatible with Windows 98/ME/2k/XP

## Night Vision

### R1100 Gen 1+ Night Vision Monocular #690

The Rigel 1100 is a compact, yet powerful night vision monocular and can be used for virtually all types of night viewing. Easy to operate and focus, the Rigel 1100 features a single ocular construction and a built-in high power IR illuminator, for viewing in total darkness. Unlike many other night vision monoculars, the Rigel 1100 incorporates over light protection circuitry to protect the image tube from sudden and unexpected bright lights. Enhanced image intensifier tube and high 30 lin/mm resolution offer professional grade night vision viewing at an affordable price.

Additional features include: High 3.6 magnification, Wide 11 degree field of view

### R3200 Gen 1+ Tactical Night Vision Headgear #684

The Rigel 3200 Pro Night Vision Goggles can be used as an extra light weight night vision goggle, or detached from the mask for use as a night vision binocular. This model features hi resolution and a superb image intensifier for crisp, bright images in total darkness. Additional special feature includes overligh protection against sudden bright illumination.

Extra light weight - only 1.1 lbs. (530 grams) - make these night vision goggles ideal for using over long periods of time. The Rigel 3200 Pro Night Vision Goggles are among the most superior Gen 1+ models on the commercial market today.

Additional features include: Built-in infrared illuminator for operation in total darkness, Individual objective lens focus, Individual eyepiece diopter adjustment, 3-position rotary switch: all power off - system on - system on plus infrared illuminator on, Contour eyecups block side light, Comfortable and safe fully adjustable headmount with flip-up storage capability

### R3300 Gen 1+ Tactical Night Vision Headgear #686

The Rigel 3300 Night Vision Goggles / Monocular functions as both a night vision goggle and a single ocular monocular viewing device. Due to its single ocular, the Rigel 3300 Night Vision Goggle / Monocular can be used as an extra light weight night vision goggle over long periods of time. The monocular is detachable from the mask for use as a stand alone night vision device. This model from Rigel Optics features high resolution and a superb Gen. 1+ image intensifier for crisp, bright images in total darkness. The Rigel 3300 is also specially built with overligh protection circuitry. Extra light weight - only .77 lbs (350 grams).

Additional features include: Can be used with 3.6 mag. Lens, Wide field of view, Specially coated optics for enhanced images

### R2100 Gen 1+ Night Vision Binoculars #687

The Rigel 2100 Night Vision Binoculars is a premium grade night vision product. It is made with an enhanced image intensifier and a professional quality lens for professional night vision image recognition and viewing performance.

The Rigel 2100 pro night vision binoculars feature 30 lin/mm. resolution, high magnification, and a built in IR illuminator for viewing very remote objects in pitch darkness with maximum clarity. True stereoscopic night vision is the hallmark of the Rigel 2100.

Light weight and very easy to use. Best used for night time surveillance, general outdoors, hunting, camping, and by uncompromising enthusiasts. Compact construction makes the Rigel 2100 easy to use.

Additional features include: High 2.7 magnification, Wide 14 degree field of view, Professional grade image intensifier for crisp night vision images, Easy to focus

### R2300 Gen 1+ Night Vision Binoculars #688

The pinnacle in Gen 1+ night vision technology. The Rigel 2300 high magnification night vision binoculars feature increased 3.6 x magnification to maximize viewing distance. 30 lin/mm. resolution and specially coated optics offer enhanced image recognition. Durable and professional construction - an excellent Gen. 1+ night vision binocular unsurpassed in performance.

Additional features include: Professional grade image intensifier tube, 11 degree field of view, Unique ocular adjustment to custom fit any user, Automatic overlight shutoff protection, Built in IR Illuminator for viewing in total darkness

## Binoculars

### Raptor - 7x to 21x Zoom Binoculars #631

The Carson Raptor™ compact binocular has a 7-21x power zoom range. Ruby tinted lenses provide unsurpassed infra-red and ultra-violet protection, reducing eyestrain and improving image contrast. The center focus knob and independent right diopter adjustment offers maximum focusing flexibility. A one-touch zoom lever and suregrip finish on the body allows fast, easy handling.

Magnification: 7-21 power, Objective Lens Diameter: 21 mm, Minimum Focusing Distance: 15 feet, Prism Type: BAK-4 porro, Field of View: 276/123.5 feet at 1,000 yards, Weight: 10 ounces / 250 grams, Accessories: Pouch Case and Strap

### 20x to 80x Zoom Binoculars #640

Carson's unique SuperZoom™ compact binocular allows you to view at 20x magnification and then zoom-in for pinpoint accuracy to 80x power, without ever losing sight of you object. The Z-80 Superzoom™ has high performance prisms and fully coated lenses that provide exceptionally sharp, high-contrast images.

Magnification: 20-80 power, Objective Lens Diameter: 25 mm, Minimum Focusing Distance: 13 feet, Prism, Type: BAK-4 porro, Field of View: 98/42.2 feet at 1,000 yards, Weight: 12.5 ounces / 312 grams, Accessories: Pouch Case, Strap, Lens Cloth, Tripod Adapter

### Silver Mini Monocular #634

Our new and improved Monocular is sleek and stylish looking with its stainless steel finish. The miniature monocular has a powerful fully coated 8 x 21 magnification optics, is waterproof, and comes with a neck strap & carry case.

### 2 Mega Pixel 8x Binocular with Memory Slot #4255

Resolution - 2Mega Pixel 1600 x 1200 (HI) 640 x 480 (LO)

Memory - 16MB SDRAM Internal Memory

Memory Slot - SD card slot for expandability

Tripod mount for Tripod

Video - only with optional SD memory card - Video in AVI format.

Self-timer 10 second delay for photos you want to be in.

USB Connector for fast downloads.

Status LCD display.

Auto power off to conserve battery life.

### Golden Eye Mini Monocular

#636

This small monocular can easily fit inside the hand of a small child and offers 8x magnification. It's perfect for those PIs that just need something small to carry around all the time.

### Tactical Door Viewer

#664

When placed on a door's peephole, it reverses the view and allows you to see who or what is in the room. This is very useful for law enforcement officers that need to see the general layout and contents of a room before forced entry.

### Spy Pen

#643

This small monocular is the size of an actual ink pen. It is really a 6x10 monocular and has a handy pocket clip for easy carrying. This product is great for people that just need a mid-sized monocular that is easy to carry around.

Size 1.5" x 4.0"

### SP-305 Spymaster™

25 x 30 mm

#637

The Spymaster™ provides high 25x image magnification and lightweight convenience with easy image capture. It has a 30 mm objective lens and a durable, easy-grip surface. Complete with removable clip-pod and protective pouch.

## Protection and Safety

### Hand-held Metal Detector #241

The US Federal Aviation Administration in their Report DOT/FAA/CT-95/49 titled "Screening With Hand-Held Metal Detectors." \* rated the Model 1000 highly. Products produced by the world's leading manufacturers were evaluated. Twenty-six experienced airport security officers rated fourteen of the most commonly used products. The following factors were included in the testers' assessment: The advanced automatic tuning transmit/receive circuitry is housed in a rugged high impact ABS plastic case and detects ferrous and non-ferrous metals and alloys.

The unit's de-sensitivity feature and tight detection pattern help to reduce false alarms when the scanner is used to screen at ankle height and in the vicinity of floors with re-bar. Sensitivity adjustments are made through a screw driver access hole in handle. This reduces the potential for tampering or inadvertent adjustment.

**Detects:** Medium pistol at 12" (300 mm), Small pistol at 9" (230 mm), Razor blade at 3" (75 mm), Hat Pin at 1" (25 mm), 486 processor at 4" (100 mm) **Low Battery Warning:** Low voltage conditions are indicated when LED lamp flashes and steady state beeper tone changes to a warbling sound. **Dimensions:** 16"x 3 1/16"x 1 3/8" (406 x 78 x 35 mm) **Weight:** 14 ounce (400 g)

**Warranty:** Two year limited warranty on parts and labor.

### ALCOHOL TEST KIT

# 518

The pocket-size AlcAlert measures blood-alcohol concentration from a person's breath in seconds. Utilizing advanced semiconductor gas-sensor technology, it clearly displays the alcohol concentration in digital percentile increments. The AlcAlert is a snap to use: Simply press the button, wait for the beep, blow into the unit (no tube necessary!), and within a few seconds the LCD displays a digital readout. Protective carrying pouch and 2 AAA batteries included.

### Truster - Portable Lie Detector #500

Trust Technology uses multiple indices of sonic wave and creates a multi-dimensional voice profile in the neutral situation where statements are true. Truster Technology analyzes lies from the answers "Yes" and "No", and recognizes various feelings from words and conversations. The technology makes an automatic analysis of speech flow by using mathematical model. It analyzes speeches while conversations are made.

In our testing here in the store, this unit had a surprising accuracy of about 80% and displays 9 different levels of stress, excitement, and truth results.

### The TeleSpy, Portable Personal Home Alarm #673

The TeleSpy is an economical intrusion notification systems built into a working telephone. With the internal hidden motion detector and microphone this plain telephone is now your DIY customers easy way to install a home Alarm, simply enter the number you would like the TeleSpy to call in the event of an intrusion and turn the power switch on when the motion activated sensor is triggered the TeleSpy will call the number and the internal microphone will allow the call recipient to hear who is in their home or office.

#### Specifications

Phone, Stores 1 number, "Slim Line" type standard telephone, Plugs into standard wall phone jack  
Built in motion sensor and microphone, 30 seconds of listening after 30 seconds the TeleSpy call disconnects and re-arms, Motion Sensor, Passive infrared technology, 45 degree wedge beyond the sensor origin, Microphone, Amplified condenser microphone

**Includes:** (Pre-packaged), Telespy, Coil phone cord, Phone Cord, AC adapter, Instructions

### Wireless Outdoor Driveway Chime #238

This is a wireless motion sensor that is specifically designed for outdoor home use. It has a 1000' LOS rating and will transmit through most objects. When the sensor detects motion it chimes the receiver box alert those nearby of the activity. This unit was originally designed for long driveways so that home owners would know when someone is approaching. It is also good for backyards and fields.

Extra Transmitters available #440006

Extra Receiver Available #40007

### Wireless Driveway Sensor #242

This Driveway Sensor sets a new standard in cost-effective, customized security and notification for homes and small businesses. Using the latest technology in wireless PIR and digital voice recording, The Unit offers: 6-Zone Monitoring Capability, Customized Voice-Recordable Alerts, All Weather, Wireless PIR Sensor Transmitter, Multiple Beam Patterns for Optimal Detection, Adjustable Mounting, Beam Sensitivity, and Delay Timer, 4 "C" Relays

To install, simply mount the PIR where you need zone control, plug in the base unit and then record a voice message to identify each zone. Other features include: On/Off switch, adjustable volume control, missed message indicator, missed message playback, one button message check, and low battery voice notification.

Extra Transmitters available #440008

Extra Receiver Available

### Air Taser Kit

This handheld unit has all the stopping power of a standard stun gun and also offers the benefit of more range. The air taser will launch 2 barbed leads up to 15' out. The leads will snag in skin or clothing and once lodged, the circuit is complete. The unit will begin it's shock cycle. It will shock , then pause, then shock, and so on... It will continue in this fashion for approximately 30 seconds. Once you launch an explosive pack it must be replaced, but the unit can still be used as a normal stun gun even without the explosive packs. This kit comes with the gun, 2 explosive packs, an instructional video, an aluminum full sized target, and a hard-shell case. After watching the video, you can practice and get a feel for the range using the aluminum target. Replacement heads are available.

This unit is designed to be dropped at the scene so that it continues to shock the assailant. You will have approximately 30 seconds to leave the area. Once a police report is filed, if the gun is unretrievable, Air Taser Inc. will replace the device free of charge. For this reason, we at Spycentre.com are required to register with Air Taser all people who purchase this product.

- Air Taser—Gun Shape w/ laser sight* #338
- Air Taser—Gun Shape* #332
- 2 pack explosive head replacements* #325

### Standard Stun Guns

- 100K stun gun* #324
- 300K stun gun* #326
- 500K stun gun* #331
- 600K stun gun* #336
- 500K Stun baton short* #330
- 500K Stun baton lang* #339

*Cell Phone Stun Gun with a personal alarm* #540017

### Flashlight Stungun #335

Made of high quality ABS engineered plastic, this unit functions as high voltage (200K) shock generator and a flashlight.

The KL-139 self-defense flashlight features ni-cad built in storage batteries and comes complete with it's own recharger and extra bulb. Uses the latest electric "pulse" technology. Charges in 4 hours. Size: 6" long and 1" diameter.

### Batons

These solid steel batons expand to either 16, 21 or 26 inches with just a flick of the wrist. Comes with a foam covered handle for easy gripping and a FREE heavy-duty nylon holster for easy carrying. If you are looking for effective self-defense with extra reach, the steel baton is it.

- 16" baton #270
- 21" baton #271
- 26" baton #272

### Triple Action Pepper Spray

Combines OC PEPPER with CN TEAR GAS along with a UV MARKING DYE. OC PEPPER causes eyes to slam shut and uncontrollable coughing and choking. CN TEAR GAS causes profuse tearing, an intense burning sensation to the face and disorientation. UV DYE marks the assailant and may aid in identification once apprehended

- Small key chain triple action* #311
- Leather pouch triple action* #316
- Large hand held triple action* #322

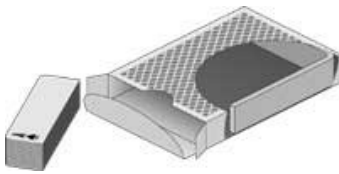

**Muzzle Dog Spray #308**

Velcro-like attachment can secure unit to bike or car. Features flip-top safety cap. 17 gram unit sprays 8-10 feet. Contains 10 one second bursts.

**Diversion Safes**

**Deck of Cards Safe #4158**

The Full-House Card Deck can provide a discreet hiding spot for a variety of small items. Made from an actual deck of cards, it looks like a normal box of cards. Even if you open the top of the box, it appears to have regular cards inside. Weight is 3.2 oz., slightly less than normal so that the weight will feel right when loaded. Compartment dimensions: 2.75" x 2.25" x 1.67". Stack the deck in your favor against snoops and burglars.

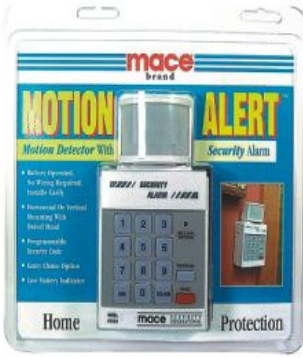

**The "Brief Safe" #4157**

The "Brief Safe" is an innovative diversion safe that can secure your cash, documents, and other small valuables from inquisitive eyes and thieving hands, both at home and when you're traveling. Items can be hidden right under their noses with these specially-designed briefs which contain a fly-accessed 4" x 10" secret compartment with Velcro closure and "special markings" on the lower rear portion. Leave the "Brief Safe" in plain view in your laundry basket or washing machine at home, or in your suitcase in a hotel room - even the most hardened burglar or most curious snoop will "skid" to a screeching halt as soon as they see them. (Wouldn't you?) Made in USA. One size. Color: white (and brown).

- Small can safe #531
- Large can safe #536
- Single compartment Book Safe #532
- Double Compartment Book Safe #546
- Flower Pot Safe #545
- Candle Safe #547
- Rock Safe #533
- Wall Safe #535

**Mace™ Motion Alert—#499**

A passive infrared system that detects motion in any selected area. Compact and attractive, it mounts easily (vertically or horizontally) near any entry area and is battery operated, eliminating any need for wiring. Unit can be coded with a personal security code and can be set to utilize a two-tone entry chime, instead of the alarm sound. Mounting screws included. 9-volt battery not included.

**Mini Alert Alarm—#502**

The **Mini Alert Alarm** uses passive infrared technology to protect a room from intruders. Producing an infrared triangle, the Mini Alert creates an unseen barrier that's impossible to penetrate without setting off the alarm! Battery operated, the Mini Alert needs no wiring and can be easily moved to a new location. Mounting bracket included. Requires three "AA" batteries.

**Big Jammer—#506**

**Mace™ Big Jammer** is a strong 20 gauge steel adjustable door brace that installs easily under door knob and provides added security for home or business. Adjusts to fit most hinged doors. End caps can be removed to allow for use on sliding glass doors as well. Clean, baked enamel finish makes it attractive for in-house use.

**Window Alert—#504**

**Mace™ Window Alert** is a 95 decibel glass breakage alarm that attaches to windows and set off by vibrations if someone tries to break through. Installs easily on any window. Solid, state-of-the-art design. Battery included.

**Door Stop Alarm: #508**

Use this alarm to block a door from being opened. if anyone tries to open the door, this 120db alarm will sound. Alarm shuts off when pressure is released from door

stop plate. The alarm is pressure sensitive and also works as a door jam. Uses one 9-volt battery.

**Child Guard: #501**

Worn by the child, the cartoon animal-shaped transmitter sends a constant signal to the receiver, which is held by the adult. The signal is adjustable - from a distance of 6 to 30 feet, so when the child goes beyond the set distance, the adult's receiver starts to beep, letting them know that the child is starting to wander off. Frequencies adjust themselves automatically to alert the proper receiver if more than one adult is in the same area using the Child Guard monitoring system. The Cutting Edge of new microchips produced by SMT® technology, also referred to as the IC unit, is wafer thin and performs with superb accuracy and is incredibly reliable. The IC unit is nicely hidden in a small plastic animal (looks like a toy) and can be concealed very easily under a shirt or jacket if desired. Simple and easy to use compact wireless design. Child friendly design - Strategically hidden in a plastic toy looking transmitter. Has a rotating dial that you can adjust anywhere between 6 and 30 feet. Transmitter can be attached by buckle, to clothes, or worn as a necklace. Suitable for indoor and outdoor use. Lithium batteries included. Easy to read instructions.

**Personal Alarm: #507**

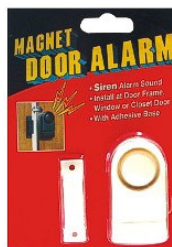

Designed to draw attention to any crisis, our 130db Personal Alarm is as loud as eight 100db alarms. The alarm is activated when the strap attached to the alarm pin is pulled. Travels easily on your belt or in your purse. The Door Alarm accessory converts the Personal Alarm into a portable door or window alarm. Great for home, hotel rooms, college dorms, etc. Use 9-volt battery.

**Keychain Alarm: #516**

Combines the two best deterrents against attack.. a 125db alarm and a flashing light. A hidden disarm switch ensures that only the owner can deactivate the alarm. Can be used as a flashlight without activating the alarm to provide additional night time safety. Keychain. Battery included.

**Magnetic Door/Window Alarm #505**

This compact, attractive uses magnetic affinity to initiate its 110 decible siren. The base of the alarm is bolted to door or window frame, the actuator is connected to the window or door. The alarm is activated by opening the door or window. Great for any door or window, particularly those hard to protect sliding glass doors. Requires 3 lithium button cell batteries (included).

### Visible Theft Powder #264

Depending upon your particular situation, visible stain detection may be preferable to ultraviolet detection in some cases. Visible stain thief detection powder is used to trap thieves by applying to objects likely to be stolen. After the protected item comes in contact with the skin, the body's amino acids react with the powder, creating a highly visible purple stain which can last up to several days. Note: the stains may discolor the marked object.

Non-toxic. 2 oz. container.

### Ultraviolet Thief Detection Powder #266

Ultraviolet Thief Detection Powder is designed for thief detection and the identification of stolen or altered items. For example, an article can be marked so that it is invisible to the eye, but under ultraviolet light the item and anyone who touched it can be identified. Powder, once touched, remains on fingers and hands, invisible except under UV light. Tampering, theft, substitution, etc., can be

revealed as well as evidence against a suspect provided. Fluorescence is the phenomenon by which certain materials absorb ultraviolet energy and re-emit this invisible radiation in the form of visible colored light. Fluorescence occurs only while the material is being activated by the UV rays. Once the source of the UV radiation is removed, the fluorescent glow ceases. The best fluorescent responses occur in darkness or under low-level lighting conditions. This fluorescent tracer powder readily transfers to the fingers and hands when touched, leaving the subject "glowing" when put under UV inspection. Powder is recommended for indoor use; paste is recommended for most outdoor use. To make an ultraviolet paste, simply mix the powder in Vaseline. Ultraviolet powder and paste can be applied to locks, fire alarm boxes, off-limits door knobs, computer keyboards, etc.; the list is unlimited, depending upon your security requirements. Non-toxic. 2 oz. container. Recommended for use with the Ultraviolet Lamp (see below).

### X-Ray Spray #503

Just spray this on an envelope and wait a few seconds. Once the spray has soaked through the envelope you will be able to read the contents inside. The spray will dry within a few minutes and will leave no residue or discoloration to standard envelop paper.

### Ultraviolet Spy Light Set #259

Our Ultraviolet spy light set is a 2 part system that consist of and ultraviolet (UV) ink pen and a mini UV light. This system permits the user to write phone number, secret messages and mark cash taht is unseen

by others. The pen can also be used to mark skin with UV ink and will stay on the skin for up to 24 hours. The UV light can be used as a money detector. Also sold separately Model AB308 Light Only Model UVSL1 Pen Only

#### Specifications

Sub-compact design

Uses 2 AA alkaline batteries (not included)

### UV Lamp #265

Dem: Length 6 1/4 x 2 1/8 x 7/8

This economical and efficient transistorized hand-held ultraviolet lamp provides rays in the UV-A (blacklight) range (365 NM to be precise), perfectly matched for use with our detectable substances. Its convenient coat pocket size makes it as practical in the field as in the lab. It also has a standard white flashlight bulb built in. Uses four AA batteries (not included). Note: A small segment of the population is sensitive to radiation in this region of the spectrum and may experience adverse effects. Size: 2" x .75" x 6".

### UV Light Pen #267

It is the smallest UV light with built in UV pen in the world and can be easily carried and used without the knowledge of those around you. Your message can be written on paper, metal, plastic or skin.

This is first time the both UV pen and UV light together in the same pen. Pls. contact us for real best price for your

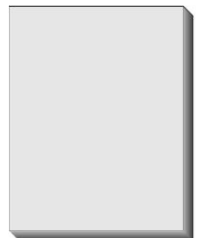

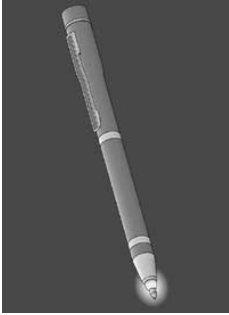

INVISIBLE WRITING

### Dissolving "Spy Paper"

This "spy paper" looks like ordinary paper, but is unique in that it dissolves in just seconds when contacted with liquid, resulting in a useless, non- reconstructible mulch which is far more secured than the output of any standard shredder. You can write on this paper normally, but contact it with any liquid, even saliva, and it transforms into a secure mulch. It's ideal for those confidential notes that may have to "disappear" quickly with little advance notice. It comes in one pad of 32 sheets, each sheet is 2.75" x 4.25" in a sealable storage bag.

**NITE-WRITER® PEN #521**

The Nite-Writer® Pen is an ideal companion for anyone who uses charts or maps, or might need to write in a darkened area without losing their night vision. Utilizing two micro LEDs, the Nite-Writer® casts a green glow around the area of the pen point to illuminate only the area needed to be seen. Aluminum housing. Color: matte black with gold accents. Batteries included.

**VANISHING INK PEN #522**

This unique pen contains a special proprietary ink which will disappear without a trace after 3 or 4 days (depending on surface). You can now write confidential or sensitive notes on documents and be assured they will be gone a few days later. And the image cannot be retrieved with ultraviolet or any other light. If security and privacy are important to you, this pen can have hundreds of various practical applications. For those occasions when you want to say something-temporarily-this is the pen to have. Works best on higher quality bond paper. WARNING: Not to be used for check writing or on legal or financial documents.

**Nap Zapper #517**

Everyone has experienced drowsiness while driving. Some of us have actually fallen asleep only to be awakened by the blaring horn of an oncoming car. Avoid this potential tragedy by wearing the Nap Zapper on your ear. If your head should nod, an alarm will go off, waking you and any sleeping passengers in the vehicle. Uses one 6 volt alkaline battery (included)

**Res-Q-Me #514**

Breaks side windows with a force of 12 lbs. or less, Slices through jammed seatbelts, Functions when submerged in water, Cannot injure users when carried normally, Will not damage clothing when carried normally, Does not cause injury if activated against these skin., Unit hooks on keychain for easy access.

**Knife w/flashlight #286**

3" 50/50 serrated blade, brilliant white LED flashlight, whistle

SUGGESTED RETAIL \$39.95

**X1 Spotlight, Titanium Anodized, Blue LED #302**

Blue LED, single bright LED array with precision ground AR coated glass lens for clear focused beam. Made from 2011 aircraft aluminum in a gray/silver anodized body color. Twist constant on/off or momentary tail cap switch. Waterproof to 150 feet. 10+ hours life, one AA battery

**LifeHammer #520**

**Using LifeHammer:**

When seconds count and you must escape from a sinking or burning vehicle...

**LOCATE LifeHammer** by looking for its luminescent pin. Hold LifeHammer by the easy-grip handle, with the hammer head pointing up.

**RELEASE** the tightness of your seatbelt as much as possible, hook the seatbelt into the blade, and pull up/down, continuing to pull as the blade cuts through the belt.

Release other passengers, small children first, from their restraints.

**SMASH** a side window by swinging LifeHammer overhand, like a household hammer. One or two strikes should shatter the glass. Any of the two heads of the hammer can be used for this purpose.

**SHEILD** your eyes and face from the glass, and instruct others to do the same. Still using LifeHammer, scrape the remaining glass from the window edges.

**Frog Tool® 15 Function Multi-Tool \$291**

Durable, stainless steel construction  
Lightweight  
Perfect for emergencies  
Complete with handy belt pouch

**Includes:**

- Straight Bit Screwdriver
- #2 Phillips® Bit 9/16"
- Wrench 1/2" Wrench
- 7/16" Wrench 14 mm
- Wrench 12 mm Wrench
- 1/4" Hex Drive
- 3/8" Square Drive 1/4" Square Drive
- .035 Plug Gap Tool
- .032 Plug Gap Tool
- .030 Plug Gap Tool
- Valve Core Tool #25
- Torx® Bit

Size: 1.75"W (43 mm) 4.125"L (110 mm)

**FM Radio Pen #4166**

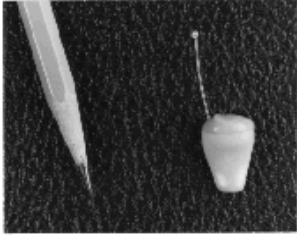

**Laser Pointer and Extends to Point #4270**

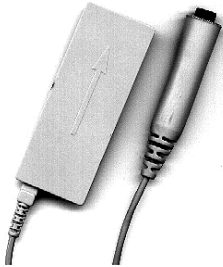

## Two Way Communications

### Covert Earpiece with Push to Talk Microphone #717, #718

This is the top-of-the-line covert earpiece communicator set. The covert earpiece goes in your ear and the magnetic communicator goes under your shirt on the same side of your body as the earpiece.

You have a push-to-talk microphone that you can place under your shirt as well. You would only need to use this if you wanted to talk back. This is a complete set that needs to be made with the correct jacks depending on which set of two-way radios that you are using.

### 2-Way Personal Communicator #721

**Description:** Wearable 2-way radios for hanging out in style and in touch.

Up to Two-Mile Range  
Digital Watch  
22 Channels:  
Channels 1-14 FRS  
Channels 15-22 GMRS  
Vox (Voice Activated)

### 2-Way Wristwatch Communicator #720

**Description:** Take the walkie-talkie to a whole new level of cool and convenience.

Up to a 1.5-Mile Range  
Digital Watch  
22 Channels:  
Channels 1-14 FRS  
Channels 15-22 GMRS  
Vox (Voice Activated)  
Includes AC charger

### X-Linx 2-Way Digital Watch GMRS/FRS Radio with VOX #4121

22 channels: 14 FRS and 8 GMRS  
Transmits up to 2 miles  
Call alert, channel scan, electronic volume control and fixed antenna  
Backlit LCD, 5.2 MHz Bandwidth  
Uses 3 AAA batteries  
Includes belt clip

### 2-Way Wristwatch Communicator with 38 codes

Same as above watch except with 38 codes

### Rear View Sunglasses #667

These sunglasses have a mirrored surface on the inside edge of the lenses. It is very similar to the side mirrors on your car. These glasses are also great for lounging around the pool with.

Rear View glasses—black square style #667  
Rear View glasses—brass round style #662  
Rear View glasses—black round style #665

Books

**BUG BOOK #349**

Everything You Ever Wanted to Know about Electronic Eavesdropping . . . But Were Afraid to Ask

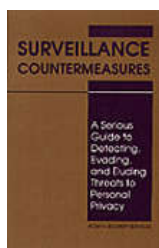

What would you do if you thought you were being bugged? How would you defend yourself? How would you even know about it? If you've pondered these questions, and especially if you haven't, you need to read this book. It was written to tell you, the average Joe, everything

there is to know about tiny hidden transmitters that can broadcast your personal and business conversations to spies, government agents . . . even the next-door neighbors. Find out how these devices work, how effective they are, how to find them and deal with them and how to use this technology in your own self-defense if necessary. Includes scores of ideas and resources for protecting the privacy of landline, cellular and cordless telephones, as well as pagers, fax machines and computers, plus phone phreaking terms and tricks and, as one reviewer put it, true tales of the Biz that "will spook you . . . and a few that will make you laugh." 8 1/2 x 11, softcover, photos, illus., 168 pp

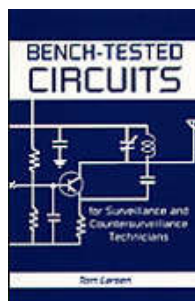

**SECRETS OF SURVEILLANCE #416**

A Professional's Guide to Tailing Subjects by Vehicle, Foot, Airplane, and Public Transportation  
Pros know that the real secret of surveillance lies in the skill of the operators, not in high-tech gadgets. This book is for the true practitioners of the craft. It focuses on tactics that can only be learned from stalking the streets and standing in the shadows. 5 1/2 x 8 1/2, softcover, illus., 248 pp.

**SURVEILLANCE COUNTERMEASURES #421**

A Serious Guide to Detecting, Evading, and Eluding Threats to Personal Privacy  
Learn to detect and evade surveillance efforts that threaten your personal security. These time-tested tactics of observation, detection and evasion are proven effective against the most sophisticated surveillance techniques used in the world. 5 1/2 x 8 1/2, softcover, illus., 192 pp.

**BENCH-TESTED CIRCUITS FOR SURVEILLANCE AND COUNTERSURVEILLANCE TECHNICIANS #346**

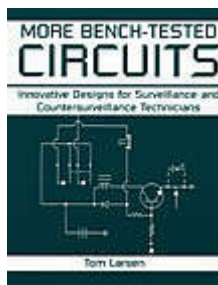

If you're hungry for updated, practical electronic circuits, this is a beggar's banquet. Not only do these ingenious circuits - some never published - really work, but they're simple, inexpensive and fun. Includes clear explanations and schematics plus real-life applications. 5 1/2 x 8 1/2, softcover, photos, illus., 128 pp.

**TECHNIQUES IN COUNTERSURVEILLANCE #422**

The Fine Art of Bug Extermination in the Real World of Intelligence Gathering

This eye-opening book will show you how corporate spies gather info on you with phone taps, bugs, hidden mics and video recorders and then use it against you in business and in court. Then it shows you how to catch them in the act and use their own technology against them! 5 1/2 x 8 1/2, softcover, illus., 120 pp.

**MORE BENCH-TESTED CIRCUITS #393**

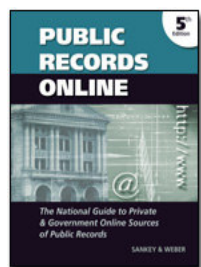

Innovative Designs for Surveillance and Countersurveillance Technicians  
Larsen's latest is packed with fun, inexpensive and brilliantly simple designs, each with a detailed schematic. There's an incendiary method of destroying inaccessible taps and bugs, circuits for detecting phone line cuts and usage, designs for undetectable phone taps, ways to use off-the-shelf components to remotely control a bug or phone tap, some low-power-drain circuits for marking hidden caches and much more! For academic study only. 8 1/2 x 11, softcover, photos, illus., 72 pp.

**DONT GET MAD - GET EVEN #359**

The Fine Art of Revengemanship  
Stop being mad as hell. Start striking back! An outrageous compilation of nasty payback techniques, devilishly devious tricks and fiendishly clever plots, schemes, pranks and stunts, this master tome of revengemanship arms you with the skills you need to turn the game of getting even into an art form. For entertainment purposes only. 5 1/2 x 8 1/2, softcover, 256 pp.

**Public Records Online #432** Use *Public Records Online*. As the only "Master Guide" to online public record searching, *Public Records Online's* fifth edition details nearly 8,000 online databases, both government agencies and private sources. This new edition is completely revised and updated, easier to use, and contains:75 page "Public Record Primer." Informative and descriptive text educates researchers on the complexities of public record research. Detailed profiles on public record websites for all 50 states including County, State and Federal government agencies. A directory of recommended government

sites. Indexes and profiles of over 220 private companies who distribute public records. Nearly 4,500 databases with FREE access.

**DONT BUG ME #358**

The Latest High-Tech Spy Methods  
This comprehensive study of spying devices shows you how to stop others from tapping into your privacy and violating your right to be left alone. It covers everything from inexpensive transmitters hidden in potted plants to the latest high-tech supersystems favored by governments and businesses. 8 1/2 x 11, softcover, photos, illus., 152 pp

# ADVANCED

## Camera Technology

### We offer fully custom and professional CCTV camera installations

Some of the companies that we have serviced in the DFW area include: Home Interiors, Wing Stop, One Stop Convenience Stores, Dickey's BBQ, Wise County Sheriff's Dept., Kilgore Texas Police Dept., TXU Electric, Southwestern Bell, Airborne Express, Excel Communications, Home Depot, Blue Cross Blue Shield, Dallas County Sheriff's Department, Mrs. Baird's Bakery, Mr. Gatti's Pizza, Quizno's, Mi Cocina's, Fina Oil Corporation, Countrywide Home Loans, and News Channels 4,5 and 11 in Dallas, TX. We can provide pictures of previous work, and references to verify our work. The *Spy Centre* guarantees we have the experience needed to get your job done.

FM 97.9 and 94.5  
Dallas, TX

Smith & Wollensky

### We also build custom covert video kit systems.

This kit was designed for a local sheriff's department and is being used to record activity at remote locations. This unit can be left for several weeks to record video only when there is activity. The case is waterproof and can be buried. Several different cameras can be used with this system, it also has a wireless motion sensor to activate the system. The system also has a built-in monitor in the lid of the case to view the set-up of the camera.

We can custom design a kit system to meet your needs.

## ***Six Reasons To Choose Advanced Camera Technology as your CCTV Company***

### **Experience is KEY. Private Eye was founded in 1990**

Private Eye Enterprise, Inc. is a Texas Corporation founded in 1990, DBA Advanced Camera Technology. We began as a catalog retailer of surveillance equipment, and have evolved into a security camera specialist. Check out the Texas Corporations Search feature at <http://ecpa.cpa.state.tx.us/coa/Index.html> and search for Private Eye Enterprise to verify our company history and tax status. Beware of a startup company, or a one-person show.

### **Three convenient store locations. You always know where to find us.**

Always require a physical address and phone number where you can contact a CCTV company. We have two “brick and mortar” stores so you can always phone someone for technical support, or come to the store to get a face to face demonstration. We deal with many customers who are left high and dry by other CCTV companies when they no longer return phone calls. Remember cell phones and web sites can disappear without a trace.

### **We strive for excellent customer for service.**

We have six skilled employees who are ready to help you at all times. We also have a hands-on owner who cares about the service you receive. From the initial quote to the project completion, customer satisfaction is of utmost importance. Check out our letters of reference from our customers. (available upon request)

### **Technical license to work in the security industry.**

Ask for and verify their current license number. Private Eye Enterprise, Inc. is licensed by our President/CEO Michael Dear under C-class license C09375. C-Class license is the most qualified level of licensing, meaning that he has fulfilled the requirements and continuing education for both an A-class (private investigator) and B-class (security company). Check out the Texas Commission of Private Security at their website, <http://www.tcps.state.tx.usdatabasesearch.htm>, and search by name or company name to check if they are currently licensed.

### **We are properly insured for your protection.**

Private Eye Enterprise carries full general liability and workers compensation insurance. This helps protect both the customer and the company from unwanted exposure to damages. We will provide a copy of our insurance waiver upon request. A CCTV company that does not carry this insurance exposes you to professional liabilities.

### **Check our references, please!**

A little time spent up front can help solidify your decision. Please read our letters of recommendation, as well as our past customers list. We have many satisfied customers who are happy to talk about their successes. You may also call the Dallas Better Business Bureau at 214-220-2000. We are a member in good standing since 1999 under the name Spy Center and Spy Centre.

# SPY Centre

"best in the business" - *Patrick Allison, Manager Affordable Investigations*

"Instances of theft and inappropriate behavior have decreased" "extremely pleased with the system, installation and service"

*Steve Walker, Asst Chief Engineer 97.9 the Beat*

"I would definitely recommend your company to a business like mine."

*Mike Bernoski, Vice President AAA Pallet Company*

"The staff was very knowledgeable"

*Sgt. J. Koelhar, Farmers Branch Police Dept. Narcotics Division*

"From camera equipment and recommendations, to the installation crew and your subsequent follow up upon competition, all was timely and professional."

*Jim Stroupe, Manager Plano Centre, City of Plano*

"I particularly appreciate the time your technical staff spent developing the system and physically testing [the equipment] prior to installation"

*Jim Tyriell General Manager, Dallas Gun Club*

"We are pleased with the installation and support from Michael Dear and his staff" - *Jim King, Facility Services Manager, Home Interiors and Gifts*
