CLASSIC · HANDMADE · QUALITY

THE WORLD OF DRUMMONDS

## **Welcome to the world of Drummonds**

We have established an excellent reputation as a major supplier of architectural antiques – providing a wide range of reclaimed building materials and unique architectural features. Today, however, the products we manufacture play a significant and increasing role in our business.

We are proud to present Drummonds' ranges of new handmade bathrooms, door and window furniture and information about our comprehensive reclaimed flooring services within this catalogue.

Over the years, we have handled a vast array of wonderful original antique bathroom equipment and door furniture. From amongst all these treasures, we have chosen to make a few of the finest designs using traditional methods and the same exacting standards applied when making the originals a century or more ago.

We are alone in exclusively employing the lost wax method to produce our fabulous range of solid brass bathroom and door furniture products. The lost wax process means that for every component in a finished door knob or plumbing fitting, an original in wax was made, only to be destroyed in the process. The benefit is that extremely fine detail can be reproduced.

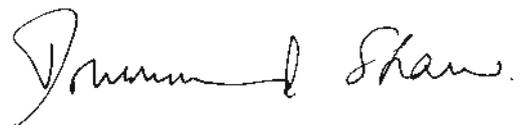

This hands-on approach applies to the preparation and installation of our reclaimed flooring as well. Reclaimed floor boards must be de-nailed in a laborious process that cannot be mechanised. Then, each board is prepared and sanded individually to retain the original patina of age.

All our products are made by hand in our own workshops. In this age of mass production and synthetic materials, we are making products to last a lifetime and we think the effort is worthwhile.

I hope you find this catalogue a useful resource in choosing your new bathroom or items of door furniture. Indeed, I hope you are encouraged to visit our showrooms to view samples of our reclaimed flooring and architectural antiques as well.

If any questions remain, please do not hesitate to contact us through one of our showrooms in Chelsea, London, or Hindhead, Surrey. We look forward to seeing you soon.

## **Wood and stone flooring and installation**

Drummonds offers a complete flooring service using the very best reclaimed timber, stone and tiles. Large, covered stores ensure supplies are available of different batches of old oak, pine, parquet de Versailles and other woods, some dating back to the 18th century which are purchased as available.

Antique handmade tiles, limestone flags, Yorkstone, various sizes of more formal limestone and slate cabouchon floors, and other reclaimed stone are also purchased as available. Large sample panels of both timber and stone flooring are displayed in the showrooms.

Fully equipped workshops enable timber to be prepared to customers' exact requirements, including tongue and groove, thickening and edging. All reclaimed boards are prepared and sanded by hand to maintain their original beauty and patina. Drummonds' vacuum kiln enables timber to be dried to specific moisture content as required.

Additionally, Drummonds has available a number of skirting and architrave styles to finish your new floor to perfection and custom profiles can be prepared as required.

Its in-house team of experienced floor layers is able to create the most beautiful results with the floor of your choice.

All Drummonds' reclaimed wood flooring is prepared to client's specifications in our own workshops and laid by our highly experienced floorlayers to create the most beautiful results, as shown here with our 20th century oak.

# WOOD FLOORING

## Original 17th and 18th century oak

The selection of stone flooring shown here is only a sample of the reclaimed stone flooring Drummonds can offer. We often have interesting and unusual batches of stone and other floors as well as very old hamstones and limestones. Please contact us for current availability.

As our stocks are continually changing please contact us for further information or visit our website [www.drummonds-arch.co.uk](http://www.drummonds-arch.co.uk)

Polished surface limestone.

# STONE AND TILE FLOORING

## Polished limestone

Our limestone has a smooth surface with hand cut edges. Suitable for internal use and comes in random sizes and thicknesses of about 22mm – 30mm thick.

**From £138 per sq/m**

## English yorkstone flags

We source our English yorkstone from gardens and pavements, some of which can be used as interior flagstones. All our yorkstone is oil free.

**From £83 per sq/m**

## Cobbles

We normally hold stocks of pink granite, yorkstone sets and cobbles with clean surfaces and in regular sizes, which are ideal for courtyards, driveways or as edging stones.

**From £150 per tonne**

The selection of tiles shown here is only a sample of the reclaimed tiles Drummonds can offer. Our large store houses 18th and 19th century terracotta tiles and quarry tiles, Victorian floor tiles and wall and dado tiles.

Also available is a selection of mosaics, stable bricks, pavers and handmade bricks.

As our stocks are continually changing please contact us for further information or visit our website [www.drummonds-arch.co.uk](http://www.drummonds-arch.co.uk)

# CARE FOR YOUR DRUMMONDS PRODUCTS

## Vitreous enamel cast iron bath

Drummonds cast iron baths are the only new baths on the market today that are enamelled using the traditional vitreous dry frit (powdered glass) process. The resultant enamel is incredibly hard and durable and approximately three times thicker than the wet coated enamel more commonly used today. Drummonds is so confident that one of our baths will last you a lifetime that each one is supplied with a market leading 25 year guarantee. The guarantee covers manufacturing defects or physical deterioration in the interior enamel finish.

To care for your enamelled bath, clean it regularly using a mild non-abrasive detergent applied with a soft cloth and plenty of water to wash away gritty deposits. Ensure that your taps and shower are properly maintained so that they do not drip; this hampers the build up of dirt and limescale.

If the exterior of your bath is polished, clean it occasionally with a soft cloth and wax it with a pure wax polish.

## Brass products

Drummonds brassware products are made using the lost wax process from 100% brass. They have been

individually assembled, hand polished and, if required, plated in chrome or nickel. All Drummonds' brassware products are supplied with a 1 year guarantee against manufacturing defects and physical deterioration in the exterior plated finish.

Never use abrasive cleaning materials on brassware. Use a mild non-abrasive bathroom cleaner. For stubborn stains, particularly in hard water areas, lightly apply a proprietary nickel/chrome cleaner.

## China sanitaryware

As with the other products in the Drummonds range, china sanitaryware is handmade using the finest materials to give a classic quality finish. All china sanitaryware products are supplied with a 1 year guarantee against manufacturing defects and physical deterioration in the glazed finish.

When cleaning, use any proprietary bathroom cleaner.

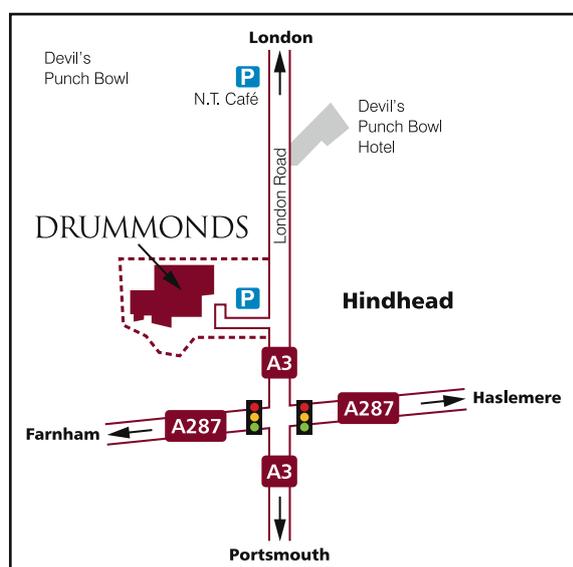

## Installation

Drummonds' products should be installed by a qualified plumber in accordance with water regulations. Any questions about installation should be directed to the technical support line on 01428 609444.

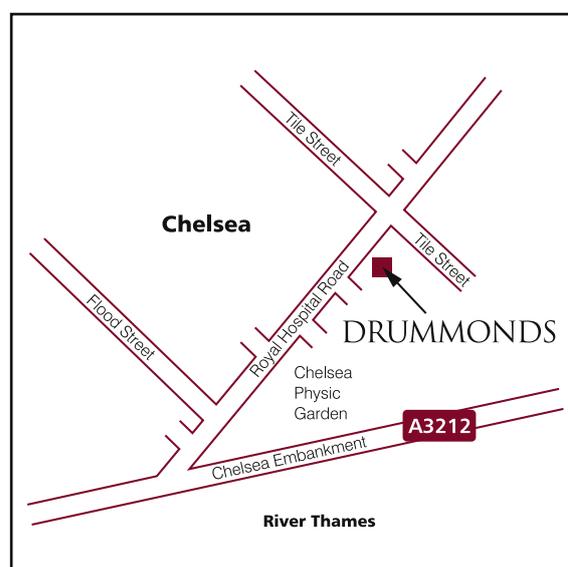

### Notes:

- 1 All prices include VAT at current rate. All prices and product descriptions within this catalogue are correct at the time of going to press.
- 2 All Drummonds' cast iron baths are handmade, therefore dimensions may vary slightly.
- 3 All photographs within this brochure are of actual room sets or products, colours have been matched as closely as possible, but there may be slight variations due to the printing process.
