Fuel System

Fuel Cells and Accessories

Fuel Safe Brand Fuel Cells

Optional Red or Black Powder Coating Available.

At Last!
There's a "Fuel Safe" Alternative to the Cougar Factory Fuel Tank.

Safety is issue #1 on the street or track and this drop in replacement fuel cell addresses that issue head on! In the racing world, the brand name Fuel Safe needs no introduction. For over twenty years, Fuel Safe has manufactured racing fuel bladders and accessories for all types of vehicles. **Now, they have designed models specifically for our early Mustangs & Cougars in a natural finish aluminum housing for a stock-like appearance!** The Fuel Safe fuel cell is constructed along aircraft guidelines, and features a puncture resistant coated rubber bladder inside a TIG welded aluminum housing, and a stout fuel filler plate with an integral anti-backsplash valve. They are designed to be used with pump gasoline, racing gasoline, or gasohol which makes these fuel cells perfect for any type of Cougar project! Fuel Safe Fuel Cells provide the greatest level of safety and peace of mind you can buy for your Mustang & Cougar. They are available in either 16 or 22 gallon capacities. Housings available in red or black powder coat at additional cost.

Pro Cell

The Pro Cell is Fuel Safe's top of the line fuel cell! This unit features a super tough double coated nylon rubber bladder, internal fuel strainers, full foam anti-slosh baffling, an integral pickup assembly, a stout, standard fill plate, plus a five year warranty! Natural finish aluminum housing. Custom housings in black or red powder coat available.

Sportsman

The Sportsman Cell provides a high quality product at an affordable price. It features a standard, coated rubber bladder, internal fuel strainers, full foam anti-slosh baffling, internal pickup assembly, a stout, standard fill plate, plus a three year warranty! Natural finish aluminum housing. Custom housings in black or red powder coat available. Many different styles to choose from. Our most popular are listed below.

Drop In Fuel Cell for Stock Style Fill System

Do you want the safety and peace of mind that a fuel cell offers, but don't want to have to open your trunk to fill your gas tank? This new product from Fuel Safe was designed especially to solve that exact problem. It is designed to be used with the Filler Neck Kit that is shown below. When installed, you have the safety of a fuel cell, but with the outer appearance and convenience of the stock gas tank and filler neck! You even use your original gas cap! Comes with a fuel gauge sending unit already installed.

65-70	Pro Cell; Stock Fill; 16 Gal; rubber bladder; Includes sending Unit.....	#7159	\$1,522.95 ea**
65-70	22 gal. fuel cell; w/stock style filler plate, includes sending unit; (Filler neck modification required.)	#7504	\$1,677.95 ea**

** Note: To make the fuel gauge work correctly, additional electrical parts are required from Radio Shack. Included instructions list the parts needed

Fuel

Late Model Fuel Cell

(#6354)

Fuel Safe Late Model Mustang Fuel Cells are designed to fit perfectly into the stock location with a 20-22 gallon capacity. They include the correct mounting straps, and will use your stock filler, fuel pump, pick-up, vent, sender, and wiring harness! The 22 gallon Cobra Cell features a rubber bladder and aluminum housing. The 20 gallon Street Cell is made of tough polyethylene and requires no housing.

An Easy Install That Even an 8 Year Old Could Do!

Mustangs Plus

Mustang Billet Gas Cap

I decided to do an article on this simple install because of a conversation I overheard at the swapmeet a few days ago. Two guys were looking at one of the billet gas caps that was in the box. "That gas cap is awesome!" One of the guys said to his friend. "I'd buy it, but I wouldn't want to have to drill that many holes in my car to install it." So I approached them. I took the cap out of the box and showed him the back side and how it attached just like a stock gas cap. No holes to drill, easy to install, and easy to put the stock gas cap back on at any time. The perfect custom product.

In case you're wondering, the gentleman I was talking to did not buy the cap. But his comments showed me that we needed to make sure that our customers know how easy this product is to install. But first, we need a little history lesson.

The stock Mustang gas cap is held to the car by a cable. The first Mustangs built, 1964 1/2's as we call them today, did not have this cable. As a result, many gas caps were left at gas stations when forgetful gas station attendants did not put them back on the cars. (Remember, 1964 is well before the public pumped their own gas!) Also, since there was nothing to hold them to the cars, many Mustang gas caps were stolen as the cars sat at home in the driveway or in the parking lot at work. With so many complaints for a "better idea", it didn't take Ford long to come up with a revised gas cap with the cable to keep it locked onto the car. Now, on to the install!

Step 1.) We have to unbolt the cable to release the gas cap from inside the trunk. Do this by opening the trunk lid and, using a 7/16" socket and an extension long enough to clear the bracing in the trunk, remove the retaining nut and remove the gas cap.

Step 2.) Put the cable stud through the hole where the stock gas cap was removed from and put the nut on it. Tighten it up, but not too tight. A lock nut is supplied with the new Mustang gas cap.

Step 3.) Put the new Mustang gas cap on the car and enjoy it! Remember, since it is new, it may be a little tighter fit than the old stock gas cap.

If you have any problem with either of these installs, just grab the nearest 8 year old and have them set you straight. That's what I always do!
