INTRODUCTION

EMISSION CODES & INTRO INFORMATION

Hooker and other manufacturers have developed a program whereby all emission-sensitive products can be identified by placing color-coded & numbered labels on product packaging and listing corresponding numeric codes next to each part number. The color coded corresponding numbers and explanations are as follows:

GREEN

The product accompanying this document has been granted a California Air Resources Board (CARB) exemption, an "EO" number, or is a direct or consolidated replacement part. It is 50-state legal, per the manufacturer's application guide.

BLUE

The manufacturer of the product accompanying this document represents that it has not been found, nor is believed to be, unlawful for use under provisions of the Clean Air Act, per the manufacturer's application guide. This product is not legal for sale or use in the State of California (or in states which have adopted California emission standards) except on pre-emission-controlled motor vehicles/motor vehicle engines (pre-1974 model year).

AMBER

The product accompanying this document is legal only for off-highway use (except in California or states that have adopted California emission standards), racing use or for use on pre-emission-controlled motor vehicles/motor vehicle engines (pre-1974 domestic vehicles certified to California standards, pre-1974 domestic vehicles certified to federal standards and all pre-1974 foreign vehicles), per the manufacturer's application guide.

THE WORLD'S BEST HEADER!

It's a tall statement, but true. The fact of the matter is that Hooker has been in the business of making the best headers since the 1960s. From the heyday of the factory Super Stock teams such as Sox and Martin, Bob Glidden, Arnie Beswick, Dave Strickler, Arlen Vanke, Grumpy Jenkins, and a host of other names that literally were household names back then, Hooker was there.

Hooker honed its teeth on the first of the factory big block muscle cars, making premium quality headers for the street, strip and oval track. From this auspicious beginning, Hooker branched its product line out to include headers and exhaust systems to include many "non-race" applications such as RVs, tow vehicles, off-road vehicles and many daily-drivers.

Today, four decades later, Hooker is still there, bigger and stronger than ever, and a member of the Holley family of fine performance products. Noted racers such as Mark Pawuk and Anthony Bertozzi have taken up the Hooker banner and continue to add significant racing victories and laurels to the Hooker mystique. Hooker isn't referred to as "the winningest header in history" for nothing!

Factor in the state-of-the-art engineering and R&D facility, in Bowling Green, KY, and it's readily apparent that Hooker has solidified its position as the "World's Best Header!" manufacturer. The year will continue to see an ever-increasing commitment by Hooker to offer an extensive and high quality exhaust product line.

You, our customer, will be the ultimate benefactor of the Hooker commitment. Just as your past support for Hooker products was earned by their features, quality and performance, so will your current and future support of Hooker products be based. To this end, Hooker will continue to offer THE BEST exhaust performance products in the business,

Period.

COMPETITION HEADERS

THE LOW-COST WAY TO HIGH PERFORMANCE.

Hooker Competition headers offer the best value in the high performance header market. Designed for the value-conscious buyer who is running either a "stock" or "mildly-modified" engine, Hooker Competition headers offer premium features at a very competitive price.

Made of durable 16 gauge mild steel tubing, the Hooker Competition header design utilizes a long transition collector to reduce back pressure and increase exhaust flow. A perfect sealing surface is assured with the 5/16" machined flanges, with welded O-ring seals. Experience has proven that this flange size is ideal to maintain header integrity and be pliable enough to seal each exhaust port. Tubing is mandrel-bent to maintain metal strength and provide consistent tube diameter at radii to maximize performance.

Hooker Competition headers have a standard finish that features a heat-cured, high-heat-resistant paint. Optionally, the famous Hooker Ceramic Thermal Barrier Coating is available.

All necessary hardware is included

Optional ceramic thermal barrier coating

TIP: Breaking in an engine with ceramic coated headers WILL result in damage to the coating and will VOID all warranties. Ceramic coated headers require several heat cycles to fully cure before they will withstand extreme heat. Hooker recommends using cast iron exhaust manifolds or old headers to break in new engines to avoid coating damage. Please call Hooker tech service at 270-781-9741 for additional information regarding ceramic coated exhaust products.

For additional header applications see Engine Swap Section on pages 24-27

HOOKER VIBRATORY POLISHED STAINLESS HEADERS

**NEW
LOWER
PRICING!**

FEATURES & BENEFITS

- Vibratory polished stainless steel for long lasting good looks yet less expensive than hand polished
- 16 gauge stainless steel for strength and reliability
- Mandrel Bent for decreased back pressure and increased exhaust velocity
- 5/16" machined flanges for a perfect sealing surface

AMERICAN MOTORS & BUICK

HOOKER SUPER COMP HEADERS

THE WORLDS BEST HEADER! THE DIFFERENCE ...
IT'S THE PERFORMANCE YOU CAN EXPECT!

5/16" machined flanges

Lightweight 18 gauge mild steel tubing

Mandrel bent tuned length primaries for decreased backpressure & increased exhaust velocity

O₂ bungs (where applicable)

Hooker Super Competition header gaskets

#6228-1HKR

Industry's best welds for durability

Long transition collectors reduce backpressure

All necessary hardware for a simple installation

With Hooker Super Competition the objective has always been to make the maximum horsepower possible and to put it at the optimum point in the power curve. Because of the immense complexity of a modern engine and vehicle combination there are no simple quick answers. It takes a lot of time and money to do the job right. We will sometimes spend up to 2 to 3 times more just to make the Super Competition header work only 5 to 10% better. That commitment to excellence has made Hooker Headers the winningest header manufacturer in automotive drag racing history.

With applications ranging from 50 state legal headers for a Chevy Truck to stepped headers for Pro Stock cars, you can bet Hooker Headers has a header that will make your car quicker, faster and lighter.

SUPER COMPETITION FULL LENGTH CAR HEADERS

With Hooker Super Competition the objective has always been to make the maximum horsepower and to put it at the optimum point in the power curve. It takes a lot of time and money to do the job right. We will sometimes spend up to 2 to 3 times more just to make the Super Competition header work only 5 to 10% better. That commitment to excellence has made Hooker Headers the winningest header manufacturer in automotive drag racing history.

TIP: Breaking in an engine with ceramic coated headers WILL result in damage to the coating and will VOID all warranties. Ceramic coated headers require several heat cycles to fully cure before they will withstand extreme heat. Hooker recommends using cast iron exhaust manifolds or old headers to break in new engines to avoid coating damage. Please call Hooker tech service at 270-781-9741 for additional information regarding ceramic coated exhaust products.

SUPER COMPETITION FULL LENGTH 2WD TRUCK HEADERS

TURN YOUR TRUCK OR SUV INTO A REAL "GROUND POUNDER"!

Hooker has long been known for its dominance of the drag racing circuit, but did you know that Hooker can help the off-road enthusiast scorch the deserts, mountains and swamps of the world? Hooker Headers use long tube lengths and long transition collectors to produce monstrous low-mid range torque without sacrificing top end horsepower. Each Hooker header is designed to provide the finest fit and most durable construction available on the market today.

Hooker offers a complete line of full length and emission compatible headers for the off-road enthusiast to choose from. Whether it be a rock crawling Jeep or a 1000 mile desert racer, Hooker can bring your performance expectations to a new level.

#2065HKR

TIP: Breaking in an engine with ceramic coated headers WILL result in damage to the coating and will VOID all warranties. Ceramic coated headers require several heat cycles to fully cure before they will withstand extreme heat. Hooker recommends using cast iron exhaust manifolds or old headers to break in new engines to avoid coating damage. Please call Hooker tech service at 270-781-9741 for additional information regarding ceramic coated exhaust products.

TIP: Breaking in an engine with ceramic coated headers WILL result in damage to the coating and will VOID all warranties. Ceramic coated headers require several heat cycles to fully cure before they will withstand extreme heat. Hooker recommends using cast iron exhaust manifolds or old headers to break in new engines to avoid coating damage. Please call Hooker tech service at 270-781-9741 for additional information regarding ceramic coated exhaust products.

ENGINE SWAP

SUPER COMPETITION ENGINE SWAP HEADERS

Hooker has a complete line of engine swap headers, front frame mounts and transmission mounts for popular engine swaps. Available for Chevy, Chrysler & Ford small block and big block engines. Hooker swap headers and mounts are designed to provide an exact fit when used together. Hooker swap headers add the extra horsepower and torque the serious enthusiast demands. Hooker Headers are the best single improvement you can make.

TIP: Breaking in an engine with ceramic coated headers WILL result in damage to the coating and will VOID all warranties. Ceramic coated headers require several heat cycles to fully cure before they will withstand extreme heat. Hooker recommends using cast iron exhaust manifolds or old headers to break in new engines to avoid coating damage. Please call Hooker tech service at 270-781-9741 for additional information regarding ceramic coated exhaust products.

SUPER COMPETITION

BLOCK HUGGER
& SIDEMOUNT

SUPER COMPETITION BLOCK HUGGER HEADERS

Street Rod/Universal SUPER COMPETITION headers are great for custom car, truck, or street rod where a specific fit tuned SUPER COMPETITION header is not available. They work great for those tight-fit installations where frame rails are close to the engine block. Stock motor mounts can be used. Because the collector exits parallel with the oil pan rail, maximum ground clearance is allowed. These headers come complete with gaskets, header bolts and collector reducers. These headers come available in chrome, high heat resistant black paint or Hookers Metallic Ceramic Thermal Barrier Coating.

BLOCK HUGGER HEADERS FOR FAST BURN CHEVY (D-PORT) HEADS

FEATURES:

- Mandrel bent tuned-length primary tubes
- Tight-tuck tube design
- Collector exit is parallel with oil pan for maximum ground clearance
- Superior welds
- Increased horsepower and torque for the street
- Long lasting durability and exceptional appearance
- Available in chrome, high heat resistant black paint, polished stainless steel or Hooker's Metallic Ceramic Thermal Barrier Coating

NEW!

NOTE: Block Hugger headers will not fit any factory application with side engine mounts including 63-82 Corvette.

SUPER COMPETITION SIDEMOUNT HEADERS

Super Competition Sidemount headers deliver the most aggressive style and performance for your early Corvette, Camaro, Nova or Firebird. Sidemount headers are built from lightweight 18 gauge tubing. Sidetubes slip directly to the collector for a leak free seal. Hooker sidemount headers and sidetubes come with 3 choices of coating; show quality chrome, high heat resistant black paint and Hooker's Metallic Ceramic Thermal Barrier Coating.

Replaceable Hooker mufflers are available separately in 2 different styles; glasspack and reverse flow. The glass pack style provides the highest performance with minimal back-pressure and sound control. The reverse flow is designed for maximum sound control.

ROADSTER & RACE

SUPER COMPETITION ROADSTER HEADERS

Double flange for ease of installation. Each flange is 5/16" thick and flush ground for a better fit.

Outer flange matched to inner flange. Allows use of symmetrical pipes which naturally plate better.

Inner flange matched with port to allow relocation of bolt holes for maximum bolt head clearance. Simplifies installation.

Heli-brazed 360° around all ports.

Replaceable slip-in muffler available separately. Designed to run cooler by creating an air space between the outside skin of the muffler and inside of the sidepipe wall. Reduced running temperatures prolongs chrome life and reduces bluing. (see page 69)

Sidepipe bracket completely welded on all sides.

Clamp tube for a leak free seal between the collector and side tube.

(Sprint Style shown)

Show quality chrome. All Hooker roadster headers are polished before and after assembly to assure maximum chrome quality for full 360° around all pipes. Hooker's design gives special consideration to the electroplating process to reduce low current density areas which tend to result in poor chrome quality. Show quality chrome appearance is achieved with a full 45 minutes in the nickel tank.

SUPER COMPETITION ADJUSTABLE RACE HEADERS

Hooker Adjustable race headers allow you to change your header primary tube lengths, collector lengths and diameters and collector types (Classic 4 into 1, Merged and Split-Flow).

By altering the relationship between the primary length and collector diameter and length it is possible to increase or decrease the torque and horsepower output at any specific R.P.M. level.

For a slick track the header primaries or collectors can be shortened to decrease the low end torque for better traction. Larger diameter collectors will also reduce low end torque. On a good track with lots of bite, extending the primaries or collectors will pick up bottom end power for a harder launch and awesome e.t.'s. Smaller collector diameters will also increase low end torque. Hooker adjustable headers have taken more Pro Stock drivers to the championship than any other brand.

WELD-UP, CIRCLE TRACK
& TRACTOR/PULLER

SUPER COMPETITION WELD-UP RACE KITS

Hooker Weld-up kits work great for racers who need to build custom headers when a specific fit tuned Super Competition header is not available.

Kits come with mandrel bent one piece primaries, two 5/16" flanges and precision formed collectors incorporating unique long transition to provide better flow. Polished stainless steel NHRA contingency header I.D. tags, gaskets and mounting bolts are also included.

Our newest zoomie weld-up kits for Funny Cars and Dragsters are NHRA and IHRA legal and feature 2 1/2" primaries with double tube design. Popular fuel and alcohol engine header flanges are available separately.

TIP: Breaking in an engine with ceramic coated headers WILL result in damage to the coating and will VOID all warranties. Ceramic coated headers require several heat cycles to fully cure before they will withstand extreme heat. Hooker recommends using cast iron exhaust manifolds or old headers to break in new engines to avoid coating damage. Please call Hooker tech service at 270-781-9741 for additional information regarding ceramic coated exhaust products.

SUPER COMPETITION CIRCLE TRACK RACE HEADERS

- Light weight 18 gauge tubing.
- Machined $\frac{5}{16}$ " Flanges with machined sealing rings for independent port sealing.
- Long transition collectors for increased performance over a broad power curve.
- Specific applications to accommodate mufflers.

SUPER COMPETITION TRACTOR / PULLER HEADERS

Hooker collector style headers for tractor and truck pullers give racers more useable horsepower and torque.

Our Classic 4 into 1 collector type headers are fully adjustable and feature large $2\frac{1}{4}$ " primaries for big blocks. Hooker puller headers use heli-arc construction with fully heli-brazed flanges on the outside to provide maximum strength.

COMPETITION

CHEVROLET, FORD & DODGE/PLYMOUTH
EXHAUST SYSTEMS

COMPETITION EXHAUST SYSTEMS

Designed to fit Hooker Competition header, manifold or catalytic converter back applications. Cat-Back kits install behind the converter and all other applicable emission control devices.

FEATURES:

- Large diameter 16-gauge aluminized steel tubing (2¹/₄" O.D.) for improved efficiency (less back-pressure) and longer life.
- Each exhaust system is mandrel bent not press bent. Mandrel bending maintains a consistent inside diameter for maximum flow; press bending will crush the pipe, easily reducing volume by more than 10%.
- Original equipment tailpipe exit location unless otherwise stated.
- All systems come without mufflers. We recommend using either the Hooker Super Competition, Aero Chamber or Maximum Flow or Turbo mufflers in a 2¹/₄" offset inlet/center outlet configuration.

Check catalog footnotes for any exceptions on pages 68 & 69.

UNIVERSAL DUAL EXHAUST SYSTEM

This system is the most universal dual exhaust system available. Specially designed reducer flex-tubes make connections to any 3" or 3 1/2" header collectors simple, but strong enough to last. Large diameter (2 1/4" o.d., 16 gauge) pipes reduce backpressure improving engine efficiency.

P/N	Description
16500HKR	Complete system with turbo mufflers

SUPER COMPETITION DUAL EXHAUST SYSTEMS

"THE CLASSIC PERFORMANCE EXHAUST SYSTEM"

- Designed to fit Super Competition headers or stock exhaust manifold applications.
- Constructed of large diameter 16-gauge aluminized steel tubing (2 1/2" O.D.) for maximum efficiency (low back-pressure) and long life.
- Each exhaust system is mandrel bent not press bent. Mandrel bending maintains a consistent inside diameter for maximum flow; press bending will crush the pipe, easily reducing volume by more than 10%.
- All systems come without mufflers. We recommend using the Hooker Super Competition, Aero Chamber or Maximum Flow mufflers in a 2 1/2" offset inlet/outlet configuration. Check catalog footnotes on pages 68 & 69.

NOTE ABOUT TAILPIPE EXTENSIONS

- If your wheelbase is greater than 132" tailpipe extensions are required to provide proper tailpipe exit.

DIESEL EXHAUST & AERO CHAMBER™

TRUCK FORCE DIESEL EXHAUST & AERO CHAMBER MUFFLERS

TURBO BACK "TRUCK FORCE" DIESEL TRUCK EXHAUST SYSTEMS

NEW!

Hookers's new big 4" diesel truck exhaust systems offer improved exhaust flow, lower back pressure and a reduction in EGT.

They are a direct replacement for the restrictive factory system and include all the necessary clamps, hardware, hangers and tips. They also include comprehensive instructions ideal for the home "do-it-yourself" mechanic. Hooker's turbo back exhaust systems are big so we recommend the installer also have a helper on hand.

FEATURES / BENEFITS:

- Manufactured from sturdy 16 gauge 409 grade stainless steel to resist corrosion
- All tubing mandrel bent to ensure smooth exhaust flow.
- All welds are robotic to ensure leak-free construction
- Free-flow 7" muffler reduces back pressure for improved torque
- Perforated muffler exhibits aggressive yet mellow "big rig" diesel sound.
- Big 4" tube reduces harmful exhaust gas temperatures for longer engine and turbocharger life.
- Systems are easy to install and include all the components necessary for installation on any cab/bed/chassis configuration
- Includes polished, slash cut 4" to 5" stainless steel tip(s)

AERO CHAMBER MUFFLERS - 23% More Flow Than All Other Brands!

AERO CHAMBER™

THE REAL MASTER OF FLOW!

Look inside all other mufflers and you'll find simple glass packing or welded plates. Look inside Hooker's Aero Chamber™ and you'll find the most sophisticated muffler available!

Stainless steel perforated plate eliminates internal rust

Aerodynamic lens directs sound pressure waves out of muffler

Sound absorption chamber for high frequency sound waves

16 gauge aluminized steel case

Aerodynamic lens directs sound pressure waves into acceleration chamber

Stepped acceleration chamber increases exhaust gas velocity for maximum flow

Resonance chamber and tuning tube cancels unwanted frequencies and amplitudes

The all aluminized and stainless steel Aero Chamber is designed to do much more than simply muffle exhaust noise. The Aero Chamber Muffler produces a deep throaty powerful sound that will not change with time. The Hooker Aero Chamber uses a unique step principal, similar to that which is currently popular in racing header design. The aerodynamically designed chambers flow 23% better and produce more horsepower and torque than the most popular high performance brand.

MAXIMUM FLOW

UNIVERSAL BI-DIRECTIONAL,
TURBO STYLE & SIDE PIPE

MAXIMUM FLOW MUFFLERS - Straight Thru Designed

The Hooker Maximum Flow muffler actually flows 99% and produces more horsepower and torque than a 2 1/2" open pipe. The Maximum Flow is constructed of all aluminized and stainless steel and uses a high temperature packing material to absorb excessive noise while allowing a mellow powerful sound. As with all absorption type silencers, the Maximum Flow will be most effective for sound control with lower compression (8.5 to 1 and lower) motors with conservative camshafts and with applications using catalytic converter(s). The Maximum Flow flows either direction, allowing for easy installation.

MAX FLOW™ SIDPIPE MUFFLER

NEW!

21046HKR

This high performance muffler has been developed for vehicles with 4" sidepipes such as 1965-74 Corvettes or vehicles equipped with Hooker Super Competition Roadster and Side Mount Headers. These mufflers produce an average of 23% more power than open headers and feature a high-flow, perforated core that operates at 99% efficiency. High temperature packing material absorbs noise while producing a powerful mellow sound. These mufflers, as tested on a 1968 Corvette with a 427 cu inch engine increased horsepower by 40 at a peak of 5500RPM and 20 ft.-lbs. at peak of 4500RPM versus a leading aftermarket undercar header/turbo-style muffler combination. The outer case is constructed of durable 16 gauge aluminized steel protected by electrostatically applied high-temperature black paint. The inlet/outlet is a 2.5 perforated core in a 4" casing.

SUPER COMPETITION

MUFFLERS & CAT-BACK SYSTEMS

SUPER COMPETITION TURBO MUFFLERS

FEATURES:

- Lowest backpressure (measured in inches of Mercury @ 200 CFM) of all popular turbo mufflers tested.*
- Large diameter flow tubes.
- Careful application of aerodynamic principles to achieve maximum exhaust gas flow.
- This compact muffler design flows either direction, allowing easy installation with 2", 2 1/4", 2 1/2" and 3" I.D. systems.
- Powerful exhaust sound on acceleration with quiet operation at idle and cruising speeds.
- All aluminized and double wrapped steel construction for longer life (Metallic Ceramic Coating available).
- Unique design to prevent structural damage from vibration, heat and backfires with internal drainage system to reduce corrosion.

COMPETITION TURBO MUFFLERS

FEATURES:

- Low backpressure baffle network using large free flowing 2 1/4" cores with reverse flow.
- This compact muffler design flows either direction, allowing easy installation with 2", 2 1/4" and 2 1/2" I.D. systems available.
- Improved engine efficiency results in better performance and economy.
- Throaty exhaust sound on acceleration with quiet operation at idle and cruising speeds.
- Double wrapped aluminized steel construction.

STREET FORCE™ CAT-BACK SYSTEMS FOR CARS

Each exhaust system is mandrel bent not press bent. Mandrel bending maintains a consistent inside diameter for maximum flow; press bending will crush the pipe, easily reducing volume by more than 10%.

Systems exit at stock locations using great looking Hooker large bore exhaust tip extensions (where applicable).

Most Cat-Back systems feature Hooker Aero Chamber mufflers producing more horsepower and torque than all other popular chambered mufflers with a deep throaty powerful sound that will not change with time.

Systems are designed using flanged construction (where applicable) and existing stock hangers for easy installation.

Large diameter 16 gauge aluminized steel tubing for low back pressure and long life.

NOTE: Any Hooker header, exhaust system or muffler can be Metallic Ceramic coated. Please specify coating when ordering.

TIP: Breaking in an engine with ceramic coated headers WILL result in damage to the coating and will VOID all warranties. Ceramic coated headers require several heat cycles to fully cure before they will withstand extreme heat. Hooker recommends using cast iron exhaust manifolds or old headers to break in new engines to avoid coating damage. Please call Hooker tech service at 270-781-9741 for additional information regarding ceramic coated exhaust products.

SLIP-ON MUFFLERS & TIPS

TUNED FLOW[®] MUFFLERS

Adjustable SOUND and PERFORMANCE without Disassembly!

Sound and flow of the HOOKER Tuned Flow[®] muffler can be adjusted up to 40% simply by rotating the internal barrel.

The Tuned Flow[®] muffler is designed for weld-on or clamp-on installation at the end of tailpipes or header collectors. The housing comes with a welded U-channel bracket and chrome clamp for easy mounting on most applications.

Tuned Flow[®] mufflers are ideal for midgets, dwarf cars, street rods, performance street machines or performance sport compacts.

Tuned Flow[®] mufflers are finished in show-quality chrome.

HOOKER® EXHAUST TIPS

LARGE BORE ROLLED STYLE

Now, a large bore look with the quality you've been waiting for. Available with or without a resonator, our rolled style tip features show quality chrome, black powdercoating, aluminized internal parts with drainage system to reduce corrosion and heat resistant Hooker decaling. The perfect look for your late model or sport compact car.

#31015HKR

ELITE STAINLESS UNIVERSAL MUFFLERS

Elite Series Stainless Mufflers without collector flanges are perfect for really special hot rods or performance street machines. These mufflers utilize a 3½" diameter case, high temperature pack material and large 2" cores. Manufactured from 304 aircraft quality polished stainless steel, the mufflers are available in all popular inlet/outlet sizes.

Part #	Description (in.)
31015HKR	26 Long. 2½ I.D. Inlet and Outlet Diameter

#21037HKR

UNIVERSAL TURNOUT MUFFLERS

Hooker offers universal bolt-on turnout style mufflers which are perfect for Jeeps, Broncos and Landcruisers using fenderwell exit headers. By using a spin-ring for universal mounting, these 3½" O.D. case sidemount mufflers will bolt to any 3-bolt 3" O.D. ringed collectors. We supply mounting hardware for proper muffler support. The mufflers use a welded all metal core for longer life and are engineered to control sound without restricting flow.

Available in "show quality" chrome or heat cured black high temperature paint. We polish chrome mufflers before and after welding to insure a perfect finish. Sold in pairs.

SPECIALTY EXHAUST

SUPER COMPETITION SPECIALTY EXHAUST PRODUCTS

SIDETUBE SLIP-IN MUFFLERS

For 4" sidetube sound control, Hooker builds long lasting slip-in mufflers. These mufflers are easily removed for racing purposes and are available in a performance style glasspack (#21021HKR) or our quieter all metal reverse flow style (#21002HKR and #21003HKR). Hooker mufflers produce a high level of sound control without restricting engine efficiency. Sold in pairs.

Part #	Description
21021HKR	4" sidetube slip-in muffler - glasspack
21002HKR	4" sidetube slip-in muffler - small block reverse flow
21003HKR	4" sidetube slip-in muffler - big block reverse flow
NEW 21046HKR	4" Maximum Flow™ sidepipe muffler - straight thru flow

WARNING: Sidepipes get very hot. Avoid all contact with sidepipes for one hour after operating vehicle.

#21021HKR

UNIVERSAL SIDEMOUNTS

Hooker 4 inch Universal Sidemounts reduce backpressure, improving low end torque for better performance and fuel economy.

The classic Hooker 4 into 1 (**NOTE:** 3 tubes are dummies) collectors utilize huge 2½" diameter primaries mandrel bent to maintain a consistent inside diameter for maximum flow. Our 4" 16 gauge sidepipes utilize long lasting slip-in mufflers. These mufflers are easily removed for racing purposes and are available in a performance style (glasspack) or quieter reverse flow style (all metal).

Show quality chrome finish.

#21063HKR

Part #	Description	Required Hooker Muffler
21063HKR	65" Chrome	21021HKR or 21002HKR (see above) or NEW 21046HKR

SUPER COMPETITION COMPONENTS & ACCESSORIES

NEW!

21046HKR

MAX FLOW™ SIDEPIPE MUFFLER

This high performance muffler has been developed for vehicles with 4" sidepipes such as 1965-74 Corvettes or vehicles equipped with Hooker Super Competition Roadster and Side Mount Headers. These mufflers produce an average of 23% more power than open headers and feature a high-flow, perforated core that operates at 99% efficiency. High temperature packing material absorbs noise while producing a powerful mellow sound. These mufflers, as tested on a 1968 Corvette with a 427 cu inch engine increased horsepower by 40 at a peak of 5500RPM and 20 ft.-lbs. at peak of 4500RPM versus a leading aftermarket undercar header/turbo-style muffler combination. The outer case is constructed of durable 16 gauge aluminized steel protected by electrostatically applied high-temperature black paint. The inlet/outlet is a 2.5 perforated core in a 4" casing.

FLANGE KITS WITH WELDED STUBS

11622HKR

Hooker offers a complete line of fully welded flange kits with stubs. We have taken the most difficult and time consuming part of building a custom header and done it for you! Each flange has a 2" long stub welded to it and is machine milled, not ground, to provide a perfect sealing surface. The flange is then internally deburred and heli-brazed on the outside to provide maximum strength. Flange kits come with gaskets, bolts and polished stainless steel NHRA contingency I.D. header tags.

SUPER COMPETITION COMPONENTS & ACCESSORIES

HEADER BOLTS

Hooker now offers popular sized grade 5 black oxide 6 point header bolts.

#10984HKR

PART NO.	SIZE (in.)	QUANTITY
10981HKR	$\frac{3}{8}$ - 16 X $\frac{3}{4}$	100
10983HKR	$\frac{3}{8}$ - 16 X $\frac{3}{4}$ COUNTER SUNK	12
10984HKR	$\frac{3}{8}$ - 16 X 1	16

ALIGNMENT WELD SLEEVE

Our "Alignment Weld Sleeve" allows the fabricator to align, hold and weld two pieces of mild steel tube without help. Because no rod is needed, the welder has a free hand. The "Alignment Sleeve" assures a perfectly aligned joint with no weld slag inside to reduce the tube diameter and restrict air flow. Perfect alignment and just the right amount of welding material results in a very professional looking weld. Weld Sleeves are packaged 20 sleeves per bag.

PART NO.	TUBE SIZE O.D. (IN.)
12101HKR	$1\frac{1}{2}$ - $1\frac{5}{8}$
12102HKR	$1\frac{3}{4}$
12103HKR	$1\frac{7}{8}$
12104HKR	2
12105HKR	$2\frac{1}{8}$

COLLECTOR RING KITS

Hooker Collector Rings enable the header builder to adapt Hooker collector extensions or reducers to the basic collector. The kit includes two 3-bolt rings, matching gaskets and six bolts.

PART NO.	TO FIT TUBE DIAMETER (O.D. IN.)
11425HKR	$2\frac{1}{2}$
11430HKR	3
11435HKR	$3\frac{1}{2}$

#16803HKR

H-PIPE / BALANCE TUBE ASSEMBLY

Hooker's H-Pipe / balance tube assembly will improve low R.P.M. torque as well as help with the control of excessive noise. Made from heavy wall 16 gauge steel tubing, Hooker H-Pipes are finished with a heat cured, high heat resistant, black paint. This assembly comes complete with all necessary parts needed to install with virtually any dual exhaust system and driveline location.

PART NO.	SIZE O.D. (in.)
16803HKR	$2\frac{1}{2}$

“Hooker’s power, quality and availability make it easy for me to focus on winning.”

- Kevin Helms, 3-Time Consecutive NHRA Stock Eliminator Champion

SUPER COMPETITION COMPONENTS & ACCESSORIES

MERGED SLIP-ON 12" COLLECTORS

Our Merged Collectors are constructed with the primary tubes joining as they transition into the collector to form a spear eliminating sharp edges and voids to reduce turbulence. This allows more precise management of the sound pressure waves (tuning) and improves aerodynamic flow.

These 3 into 1 and 4 into 1 collectors are made from the lightest materials possible; a pair of 17/8" x 3 1/2" weigh only 5 lbs. 4 ozs. Sold in pairs only.

HOOKER REDUCERS

Just pick the reducer size that matches the diameter of the header collector. Bolt it to the collector ring, and weld on the tailpipe. If you have a header without the collector ring, use Hooker slip-on reducers. They're sized to slip over the collector and weld to the exhaust pipe.

For custom or do-it-yourself fabricators building headers for computer controlled cars or trucks using an oxygen sensor. Our universal weld-on fitting works with most OEM and aftermarket sensors using a metric 18 thread size.

RACING CUT-A-WAYS

The Hooker Racing Cut-A-Way allows you to use your exhaust system for everyday use and unleash your vehicles true power on race day with the turn of a wrench.

#11190HKR

Part No. Quantity Comments

11190HKR	1	Two must be ordered for dual exhaust systems. Fits all popular exhaust sizes (2" - 3.5").
----------	---	--

- Can be plumbed into your current exhaust system or installed directly to your header collectors with purchase of Hooker Collector ring kits:

111425HKR - 2 1/2" Collector

111430HKR - 3" Collector

111435HKR - 3 1/2" Collector

- Block plate and ring surface is machined so that no gaskets are needed.
- Removable / replaceable studs make changing damaged studs easy.
- Chrome acorn nuts and studs require no special tools and allow a one handed removal of the machined block plate.
- Coated in high heat resistant black paint.

Header Gaskets

Hooker's precision-matched Super Competition header gaskets provide a sure fit and unmatched exhaust sealing. This OEM quality gasket is constructed of a thick (.070") laminated, graphite impregnated substrate. The substrate combined with a perforated aluminum core provides superior grip and adhesion. This construction also contributes to exact fit compliance between the cylinder head and header flange, offering superior sealing properties during extreme temperature and operating conditions.

#10878HKR

HOOKER® PRESSURE MASTER GASKETS & SEALS WITH EARL'S® SEALING TECHNOLOGY

Pressure Master™

Sealing Systems utilize an aluminum retainer that captures and controls compression of our exclusive graphite foil inner seal for unsurpassed sealing. Unaffected by thermal cycling, each joint can be torqued to optimum pre-load during installation, and there's no residue to clean up after installation.

MUSTANG CAR BARS, Q&A

SUPER COMPETITION LATE MODEL MUSTANG CAR BARS

Hooker is more than just high performance. Once you get your Mustang running like you want it, you've got to make it look as good as it runs.

Hooker car bars are constructed of 2¹/₄" O.D. .125" wall steel tubing with 3/16" attaching plates. The four point design helps stiffen the unibody chassis as well as provide good looks and improved safety without restricting rear seat room.

Available in show quality chrome or high gloss black powdercoat. Most bars can be shipped through UPS.

YEARS	MODEL	BLACK	CHROME
79-93	Hard Top		18615HKR
83-93	Convertible.	18517HKR	18617HKR
94-98	Convertible. & Hard Top	18523HKR	18623HKR

- Hooker Car Bars are:
- 1) not a replacement for responsible driving, and
 - 2) are not intended for competition use.

CAUTION: The ultimate buyer of Hooker Car Bars assumes the risk of damage or injury resulting from their use.

What is the difference between your Super Competition and Competition Headers?

Hooker Super Competition headers are built from lightweight 18 gauge mild steel tubing with "tuned" lengths for maximum performance. Super Competition headers also use long transition collectors for reduced backpressure and increased exhaust flow. $\frac{5}{16}$ " machined flanges with welded O-rings make for a perfect sealing surface.

- Super Competition headers come with many different options in tube diameter and length for a particular application. Super Competition headers are the "World's Best Header".

Competition Headers are built from durable 16 gauge mild steel tubing. Competition headers use long transition collectors for reduced backpressure and increased exhaust flow. $\frac{5}{16}$ " machined flanges with welded O-rings make for a perfect sealing surface.

- By removing some of the constraints on our designers when they design a Super Competition header, we can produce a Competition header for easier installation and a lower price.

The Comp header will weigh slightly more than the Super Competition header but will last slightly longer under extreme climatic conditions. Competition headers are the "World's Second Best Header". We will sometimes spend two to three times more just to make a Super Competition Header work only five to ten percent better.

How thick are your flanges and are thicker flanges better?

Not necessarily. The key to a good flange is to seal at the exhaust port locations. Hooker flanges are machined (using a milling process) to a surface flatness of + or - .0025 between the bolt holes. This process guarantees a proper seal at the port locations virtually eliminating flange leaks. Other header manufacturers simply run their flanges over a belt sander or body grinder.

Hooker flanges are $\frac{5}{16}$ " (except on some unique applications) which is heavy enough to keep the header integrity but is pliable enough to seal each exhaust port. This helps compensate for variables in the head surface. Overly thick flanges are not as pliable and tend to have leaks. Hooker flanges seal the first time every time.

Will your headers fit with aftermarket cylinder heads?

Most aftermarket cylinder head manufacturers offer stock replacement and racing heads. Hooker headers will accommodate the stock replacement head in most cases. If the aftermarket head uses an angle plug configuration, the Hooker header for that application will have footnote 62 which says that it will fit with angle plug heads. If your aftermarket head is a straight plug stock replacement, the Hooker header for your application will fit.

Most aftermarket racing heads have raised exhaust ports. Most Hooker headers are designed around the stock port height and will not accommodate the raised port heads. Hooker will produce headers for raised port heads when that particular head becomes the standard (for example: Super Competition header #6225 fits 1979-93 Mustangs with the popular TFS Twisted Wedge Race Head).

Will your headers fit with my other performance equipment?

In most cases, Hooker headers are developed around the stock engine location using stock equipment. Aftermarket products such as rigid motor mounts locate the motor in a different location causing possible fitment problems. Other performance products such as kickout style oil pans and performance "mini starters" can interfere with some header applications. Check the listing (read the footnotes) in our full line catalog or contact our tech department at (270)781-9741.

Do you have a Warranty?

Yes, Hooker performance exhaust products are covered under the standard Holley Performance 1 year warranty. See the last page of this catalog for complete warranty and contact information.

What tube size do I need and is bigger & better?

Header primary tube sizes vary on many factors: engine combination, transmission type, gear ratio and intended use of the vehicle. For example a truck header will be designed using longer length and smaller diameter primary tubes to enhance low to mid-range performance, where a header for a Pro Stock race car will have larger primary tubes and large collectors for the highest flow available.

Bigger generally is not better when it comes to street driven cars. When you put too large of a header or exhaust on a street driven vehicle, you usually notice a severe drop in low to mid-range performance due to a lack of backpressure. To combat this issue, Hooker sometimes builds 3 or 4 different headers for a particular application with varying tube and collector sizes.

Should I use exhaust wrap on my Hooker Headers?

If your vehicle is being run on the street or for extended periods of time, you should never wrap headers. Exhaust wraps insulate the exhaust too much and the exhaust temperature is raised to a level that fatigues the header material causing cracks.

If under hood temperatures are an issue, we recommend using Hooker's Metallic Ceramic Thermal Barrier Coating. Our coating is applied inside and out. It is corrosion and heat resistant up to 1600°F. It also reduces underhood temperatures and has a polished high luster finish. Holding exhaust temperatures inside the header increases the exhaust gas velocity producing more horsepower.

You can purchase any Hooker header with our Metallic Ceramic Thermal Barrier Coating by adding a -1 to the end of the part number.

TIP: Breaking in an engine with ceramic coated headers WILL result in damage to the coating and will VOID all warranties. Ceramic coated headers require several heat cycles to fully cure before they will withstand extreme heat. Hooker recommends using cast iron exhaust manifolds or old headers to break in new engines to avoid coating damage. Please call Hooker tech service at 270-781-9741 for additional information regarding ceramic coated exhaust products.

	WARRANTY

FOOTNOTES

- 1) This system uses 2 $\frac{1}{4}$ " O.D. tubing. We recommend using either the Super Competition Aero Chamber, Maximum Flow or Turbo Mufflers in a 2 $\frac{1}{4}$ " offset inlet/center outlet configuration. See page 62 for complete muffler information.
- 2) Available with fittings to accommodate air injection manifold. Add a 0 in front of the part number when ordering.
- 3) Factory 4 Wheel Drive.
- 4) Exhaust systems can also be fabricated using either Hooker Super Competition Aero Chamber mufflers, Maximum Flow mufflers, Super Competition turbo mufflers, Competition turbo mufflers or header type Hooker mufflers.
- 5) Not legal for sale or use on vehicles originally equipped with catalytic converters. For racing purposes only.
- 6) Comes with H-pipe/balance tube assembly. For racing purposes only.
- 7) Installation on manual transmission equipped cars requires a Hooker clutch linkage pivot bracket #10942. Also needed are one stock Pinto clutch cable assembly, one link Ford #D1FZ-2861-AJ and one adjustable clutch rod Ford #DOT2-7521-C.
- 9) Installation requires air conditioning bracket #10925 left side or #10926 right side. On 1979 and later vehicles with short compressors, use stock bracket.
- 10) Will not fit motors equipped with air injection pump without modification.
- 11) Header designed for 302W engines using the AR SVO aluminum heads.
- 12) Comes with 12" Classic slip-on collectors and 16 formed adjustable header slip tubes plus 18" slip-on collector extensions where applicable. Split Flow or Merged or Merged Slip-On collectors can be ordered separately.
- 13) Special PRO STOCK header for cars equipped with standard steering.
- 14) Installation with manual transmission requires clutch cable bracket #10943.
- 15) Header comes with *Metallic Ceramic THERMAL BARRIER COATING*.
- 16) This header comes with an adapter flange. The port shape is the same as stock but can be matched to your particular exhaust port configuration.
- 17) Fits all cars equipped with automatic transmissions except 1970 Hornet.
- 18) One tube each side over frame.
- 19) Hooker mufflers #21021 (glass pack), #21003 (reverse flow design for maximum sound control) or 21046HRR Max Flow sidepipe muffler, slip-in design to be used with 4" sidetubes.
- 20) Will not fit with powerglide.
- 21) Will not fit convertible models.
- 22) Header dual system will not fit Turbo 400 applications.
- 23) This header was designed to be used with the original Chevy II V8 block, bell housing and clutch linkage. Will also fit Chevy II with Lakewood bellhousing #15050. For the transplant or anything other than original Chevy II equipment we recommend #224 OR 2243.
- 24) One tube over frame left side.
- 25) This is a tuned equal length "SHORTY" style header which will bolt directly to the 1986 and later factory exhaust headpipes.
- 26) Will not fit 1973 cars equipped with the 440 engine.
- 27) Two tubes over frame on each side.
- 28) Hooker mufflers #21021 (glass pack) or #21002 (reverse flow design for maximum sound control) or 21046HRR Max Flow sidepipe muffler, slip-in design to be used with 4" sidetubes.
- 29) Fits 4V heads only.
- 30) One tube over frame right side.
- 31) Without oil cooler.
- 32) Will not fit 71-72 Comet, refer to #6104. 1972 Torino does not require a power steering bracket.
- 33) Fits 2V heads only.
- 34) Will not fit 1970 Falcon with either 114" or 117" wheelbase.
- 35) Will accommodate the E.G.R. system only.
- 36) Will accommodate all emission control devices, i.e. E.G.R. and air pump fittings.
- 37) This header cannot be installed by using the stock location side motor mounts. This header requires:
 - 1971-74 installation kit #12601 which consists of front and rear motor mounts.
 - 1975-80 front motor mounts #12608.
 - 1975 rear mount #12632 for Turbo 400 installation.
 - 1975 rear mount #12633 for Turbo 350, 4-speed or aluminum powerglide installation.
 - 1976-80 rear mount #12635 for Turbo 350, 4-speed or aluminum powerglide installation.
 - All require any 1967-77 Camaro rubber transmission mount which fits your particular transmission.
- 38) Installation with manual transmission requires the fabrication of a clutch cable bracket.
- 39) Header will not accommodate the emission control devices attached to exhaust manifold on 1977 and later vehicles and is recommended for racing purposes only for these models.
- 40) Will not accommodate E.G.R. system and is recommended for racing purposes only for these models.
- 41) This header requires 1958 and later blocks with side motor mounts and the use of Hooker header installation kit #12604 which consists of front and rear frame mounts and a fiberglass replacement firewall. This kit will fit Turbo 350, 4-speed or aluminum powerglide transmissions. **Will NOT** fit the Turbo 400. All require any 1967-77 Camaro rubber transmission mount which fits your particular transmission.
- 42) Will not accommodate the 1974 and later E.G.R. system and is recommended for racing purposes only on these models.
- 43) Fits integral head engine only (i.e. intake manifold is part of the head - exhaust manifold bolts to the bottom, not to the side of head).
- 44) Will not fit with C-6 automatic transmissions.
- 45) This part number consists of headers with welded air injection fittings, a hot air kit, an adapter for the OEM EFE activator and Y-pipe for catalytic converter accommodation and all necessary hardware and instruction sheet.
- 46) Cat-Back exhaust system does not fit extended cabs.
- 47) Designed for use with Danchuk style engine mount and rear transmission crossmember. Stock mid mount and ears on frame must be removed.
- 48) Fits 6 speed 2F transmissions and standard 5-speed.
- 49) Will fit Dart/Windsor head.
- 50) Will fit dragster and roadster frames **NOT** exceeding 21" in width.
- 51) This Cat-Back exhaust system is supplied with an optional racing H-Pipe/Balance Tube Assembly, for use on racing vehicles only, which replaces the smaller diameter pipes for better performance and the catalytic converters to prevent damage caused by leaded racing fuel. This optional H-Pipe/Balance Tube Assembly is illegal except for racing vehicles which may never be driven upon a highway. Steering shaft must be below the exhaust ports. Requires #10922 for mounting alternator on the right side.
- 52) Smog version #02452 will fit 1969-86 model years only.
- 53) Two tubes over frame right side.
- 55) Manifold dual kit fits 1971-87 only.
- 56) Will not fit EFI engines.
- 57) This is a replacement "SHORTY" style header which will bolt directly to the stock 302 H-pipe headpipes.
- 58) This is a replacement "SHORTY" style header which will bolt directly to the 1994 and later exhaust headpipes.
- 59) This header requires the use of Hooker engine swap front frame mount kit part #12678. Stock transmission crossmember may be utilized.
- 60) Brodix spreadport design.
- 61) This header uses a slip-on collector for ease of installation.
- 62) Will fit with angle plug heads.
- 63) This header requires the use of Hooker engine mount kit part #12679. Stock transmission crossmember can be utilized.
- 64) This is a replacement "SHORTY" style header which will bolt directly to the 1986 and later factory exhaust headpipes.
- 65) This header requires the use on Hooker frame mounts #12602. Also needed are two Ford motor mounts #D7ZZ-6038B (left side) and one Ford transmission mount #C88ZZ-6068A.
- 66) This is an unequal length "SHORTY" style header which will bolt directly to the stock Mustang exhaust headpipes.
- 67) Header designed for engines equipped with TFS aluminum heads.
- 68) Will not fit Dart/Windsor head.
- 69) An H-Pipe/Balance tube assembly is available for this header; part number is listed under dual exhaust system column. This optional H-Pipe/Balance tube assembly is illegal, except for racing vehicles which may never be driven upon a highway and is compatible with Cat-Back exhaust system part #16861/16871.
- 70) Will not fit Chevy Suburban.
- 71) This is a tuned equal length "SHORTY" style header which will bolt directly to the 1994 and later factory exhaust headpipes.
- 72) Will not fit with air conditioning.
- 73) 1990 models require the use of oil pan and pickup from 87-89 models.
- 74) Part #1115 includes headers, cross over pipe and turbo exhaust inlet tube with provisions for oxygen sensor. All parts are coated with Hooker's *Metallic Ceramic THERMAL BARRIER COATING*.
- 75) Header dual exhaust system fits 1975-86 only.
- 76) Installation requires #10922 for mounting alternator/generator on right side.
- 77) Will not fit 1971-73 Mustang/Cougar with manual transmission.
- 78) This design requires a Hooker turbo exhaust outlet tube to complete the system. Outlet tube part #16808 is recommended because it will eliminate exhaust back pressure caused by the stock turbo exhaust outlet elbow flange. This pipe will not accommodate the stock internal wastegate but instead is designed to accept a Turbonetic external wastegate with variable boost control. Outlet tube part #16809 is recommended when the stock wastegate is retained. Outlet tubes are *Metallic Ceramic THERMAL BARRIER COATED*. Outlet tubes are not compatible with the catalytic converter and are recommended for racing purposes only.
- 79) Requires engine setback, rack and pinion steering, will accept stock subframe.
- 80) This header comes with a 1 $\frac{1}{2}$ " aluminum adapter flange. The port shape is the same as stock but can be matched to your particular exhaust port configuration.
- 81) This header cannot be installed by using the stock location side motor mounts. This header requires:
 - 1971-78 front mount #12603.
 - 1975 rear mount #12632 for Turbo 400 installation.
 - 1975 rear mount #12633 for Turbo 350, 4-speed or aluminum powerglide installation.
 - 1976-80 rear mount #12635 for Turbo 350, 4-speed or aluminum powerglide installation.
 - All require any 1967-77 Camaro rubber transmission mount which fits your particular transmission.
- 82) Will not fit cast iron powerglide.
- 83) Installation requires power steering bracket #10961.
- 84) Fenderwell exit.
- 85) Header equipped with smog fittings installed to accommodate factory air pollution control device.
- 86) Header accommodates factory catalytic converter.
- 87) Will not fit models with round port heads.
- 88) Header designed for tube chassis PRO-STOCK style cars with strut front end.
- 89) Will not fit models with rear A/C without modifications to A/C lines.
- 90) See page 70 for more information on Hooker Competition exhaust systems or pages 52-54 for Hooker Super Competition exhaust systems.
- 91) Will not fit the station wagons.
- 92) This header is equipped with a fitting to accept the stock oxygen sensor.
- 93) Designed to fit the silent shaft engine.
- 94) This header comes with accommodations for E.G.R., oxygen sensor and air pump (smog tree welded to header).
- 95) Will not fit 1967 Y-block engines.
- 96) The header requires 1958 or later engine blocks and Hooker frame mounts #12606.
 - Use rear mount #12630 for the Turbo 350, aluminum powerglide or manual transmission.
 - All require any 1967-77 Camaro rubber transmission mount which fits your particular transmission.
- 97) Installation with manual transmission requires use of bellhousing from 1975-78 Skyhawk, Starfire or 78 Monza. Use stock Vega clutch cable. For heavy duty application use any V8 Monza clutch cable.
- 98) 71-74 engine installation requires use of GM factory parts, frame stand, left #1705521, right #1746321, U-shape bracket, left #1249826, right #1250392, rubber motor mount, left #1250717, right #1250716. Above parts also available from 75-78 Skyhawk, Starfire or 78 Monza.
 - 71-74 use rear mount Hooker #12636 for Turbo 400 installation.
 - 71-74 use rear mount Hooker #12637 for Turbo 350, 4 speed or aluminum powerglide.
 - 1975 retain stock crossmember and use Buick V6 rubber transmission mount from 75-78 Skyhawk, Starfire or 78 Monza.
 - 76-79 use rear mount Hooker #12635 for Turbo 350, 4-speed or aluminum powerglide installation.
 - All require any 1967-77 Camaro rubber transmission mount which fits your particular transmission.
- 99) Designed for W-2 heads only.
- 100) System includes two Super Competition turbo mufflers #21106 and will bolt to the factory four bolt catalytic converter outlet flange.
- 101) Will not fit Club Cab.
- 102) This header requires the use of Hooker installation kit #12616 which consists of front and rear frame mounts and fiberglass replacement firewall. This kit will fit Turbo 350, 4-speed or aluminum powerglide transmission. Will **NOT** fit the turbo 400 transmission. All require any 1967-77 Camaro rubber transmission mount which fits your particular transmission.
- 103) This header is designed for any front mount that will place the centerline of the crankshaft 6" above the crossmember.
- 104) Fits cross flow "Iron Duke" only.
- 105) Hooker muffler #21009 slip-in design to be used with sidetubes.
- 106) This header requires Hooker frame mounts #12610 and two Chevrolet later model Corvette motor mounts, GM #17980387. Will fit either a turbo 350 or 700 R-4 transmission using the stock S-10/S-15 crossmember and rubber transmount.
- 107) This header requires use of Hooker installation kit #12605 which consists of front frame mounts and hardware, also will need 2 Ford motor mounts #DOOZ6038G.
- 108) Use Hooker transmount #12676 for C-4 automatic transmission or Borg-Warner and "top-loader" model 4-speed, will also need one Ford transmission mount #D3DZ6068A.
- 109) This header requires use of Advance Adapter or Downey Toyota Swap Kit.
- 110) Two tubes over frame on driver's side and one tube over frame on passenger's side.
- 111) Maximum ground clearance design for cars lowered up to 4 inches.
- 112) Buick supplied the V-6 engine, prior to 1979, with low port heads. 1979 and later engines used the high port head identifiable by a freeze plug in the front of the head. This header designed for high port head.
- 113) Fits fuel injection engines only.
- 114) Will fit aluminum powerglide trans only.
- 115) Requires engine to be moved 1" to right side. Tilton or Hamburger type starter also required.
- 116) This header requires the use of 1969-70 Mustang 302 Boss or 351 Boss frame mount brackets, motor mounts and clutch equalizer shaft for manual transmission applications.

- 117) Reducers available with oxygen sensor on 1980 and later models. 2 1/2" bolt- on part #11045, 3" bolt-on part #11046, 2 1/4" slip on part #11141 or 2 1/2" slip-on part #11140.
- 118) This header requires Hooker frame mount #12651 for GM 4 speed.
- 119) This header requires the use of Hooker transmission mounts.
- 1970-72 use rear transmission mount #12652 for Turbo 350.
 - 1971-78 use rear transmission mount #12653 for Turbo 350.
- 120) Will fit Corvette D-port aluminum angle plug heads.
- 121) Will not fit with Turbo 400 unless trans crossmember is set back 2" at the mount.
- 122) Three tubes over frame on passenger side and one tube over frame on driver's side.
- 123) Dog Leg Port.
- 124) Dual kit fits only standard 16 gallon gas tank.
- 125) Will not fit 1977-2 and later Lo-Boy.
- 126) Some factory heads do not have bolt hole in end. Holes must be drilled and tapped to assuaploper seal.
- 127) Will not fit angle plug heads.
- 128) This header requires installation kit #12620 with Turbo 350, Saginaw 4-speed, Muncie 4-speed and Chevette rack and pinion steering.
- 129) Will not fit 1982 Buick Century (front wheel drive).
- 130) Header dual exhaust system fits 1973-87 only.
- 131) Available with fitting to accommodate oxygen sensor. Add an X in front of the part number when ordering.
- 132) This header requires Hooker frame mount #12677. Use factory stock rear transmission mount.
- 133) Header dual exhaust system fits 1963-82 only.
- 134) This swap requires original frame stands and motor mounts from either 2 or 4 WD 1983 Fords with a 460.
- 135) This is a Tri-Y header. Primary length 15", secondary length 17".
- 136) Modification of rear crossmember necessary for installation of left-hand collector.
- 137) This header requires use of Advanced Adapter Swap Kit.
- 138) Will not fit with heater.
- 139) Front differential pinion is below centerline of axle.
- 140) Front differential pinion is above centerline of axle.
- 141) See page 46-47 for Specialty Exhaust Product applications.
- 142) Will not fit hydraulic clutch.
- 143) Part number 16862 will fit 1979-85 cars if a double hump trans crossmember is used.
- 144) When this header is installed on clutch equipped cars, top racers have found improved performance when 4" Classic #11762 or Merged #14762 collectors are used. Collectors purchased separately see page 51.
- 145) Headers will fit only if stock small block frame stands and motor mounts are used.
- 146) This header requires Hooker front frame mounts #12609 and Hooker transmission mount #1249 for Turbo 400. Powerglide and Turbo 350 transmissions may use stock transmission crossmember.
- 147) See page 44 for more information on Hooker Super Competition Cat-Back exhaust systems.
- 148) Headers will fit their respective applications only if big block engine frame stands are used from the following applications; Camaro 1970-72, Chevelle 1968-72, Nova 1968-72.
- 149) Does not fit fuel injection engines.
- 150) Will fit on angle plug heads **except** 3/4" reach plug applications.
- 151) Header designed to fit Ram Air II/IV, Super Duty, HO and Edelbrock Performer RPM heads only.
- 152) This header is exempted from the prohibitions of Section 27156 of the California Vehicle Code for 1975-82 Chevrolet/GMC trucks and Blazer/Jimmy equipped with an engine of displacement between 305-400 cubic inch engines, excluding those catalytic equipped vehicles using feedback controls (CARB E.O. #D-164.).
- 153) Dual kit runs outside frame.
- 154) Dual kit exits in front of rear wheels.
- 155) Will not fit manual transmissions during 1971-76.
- 156) Long wheel base only.
- 157) Will not fit stock manifolds that exit straight down.
- 158) Dual kit will not fit vans with dual O.E.M. air conditioning.
- 159) Dual kit will not fit 1968-72 pickups with camper special gas tank.
- 160) Dual kit runs down right hand side between frame and drive shaft.
- 161) Manifold duals will not fit 1965-67.
- 162) Manifold duals fit 1965-76.
- 163) Will only fit 16 bolt F.E. cylinder heads with the top four exhaust bolt holes in line. Will not seal properly on heads with the end upper bolts lower than the center bolts.
- 164) Will only fit F-250 models manufactured before 2/1/77.
- 165) Engine swap mount kit #12678 requires the purchase of (2) Isolators, seal power #270-2290 and (2) Ford engine mounts #D3LY-6030A right side and #D3LY-6031A left side.
- 166) Engine swap mount kit #12679 requires the purchase of (2) Anchor engine mounts #2329 or equivalent.
- 167) Super Competition exhaust system #16922 will not fit with Muncie SM420 cast iron transmission.
- 168) This is a tuned equal length "SHORTY" style header which will bolt directly to the factory exhaust head pipes.
- 169) This is a 50 state legal header C.A.R.B. E.O. #D-164-7.
- 170) This is a replacement "SHORTY" style header that bolts directly to the factory headpipes and accommodates air injection.
- 171) Header includes a high flow Y-pipe and flange to accommodate stock catalytic converter. Will not fit 1995 dual catalytic converter cars. Some cutting and welding required.
- 172) System accommodates oxygen sensors and air injection.
- 173) Fits T.P.I. engines with single 3" inlet catalytic converter only. Includes a high flow Y-pipe.
- 174) This exhaust system is supplied without mufflers. It is designed to use Hooker Aero Chamber #21502, Maximum Flow #21602 or equivalent.
- 175) Requires use of 1966 and later motor mounts and frame mounts Ford P.N. D0Z6038G and because of possible chassis sag the shock towers must measure a minimum of 33 3/4" measured between the top of the shocks. Header will fit with C-6 transmission.
- 176) This system has been designed to accommodate the following Hooker mufflers: Aero Chamber P.N. 21502, Maximum Flow P.N. 21602, Super Competition Turbo P.N. 21106 or Competition Turbo P.N. 21006, Chrome or stainless tips are available separately. Tip inlet I.D. required is 2 1/2".
- 177) Engine Code is the eighth digit in the VIN Code.
- 178) Fits 93-94 pickups with stock dual exhaust outlets.
- 179) Includes 2 1/2" high flow Y-pipe to accommodate stock catalytic converter.
- 181) This is a replacement "Shortie" style header which will bolt directly to the factory exhaust headpipes.
- 182) Installation requires purchase of muffler/tailpipe hanger brackets Ford P/N 4Z2-5A248 and 6Z2-5C236A.
- 183) 79-85 models require use of 86 or later double hump crossmember.
- 184) Factory style big block frame stands and motor mounts must be used to ensure proper engine locations and header fit. 67-69 Camaro & 73-75 Nova versions are currently available from "Rick's First Generation Camaros".
- 185) Will not fit with Edelbrock angle plug heads.
- 186) Will not fit 168 tooth flywheel/flexplate applications unless IMI starter part number IMI-102 is used.
- 187) This header will fit the FRS Twisted Wedge race head. The inner flange is not used. Head has been drilled to accept the outer flange and uses the provided 5/16" header bolts.
- 188) Will not fit 1963-65 Fairlanes. See part number 6134
- 189) This is a replacement "Shortie" style header which will bolt directly to the factory exhaust headpipes.
- 190) Will not fit Dart 360 aluminum head because of 1/4" taller port location.
- 191) Push Bars with a manufactured date code of 1-01-97 or later will fit the 1997 models.
- 192) Installation requires removing or trimming bumper guards and relocation of fog lamps.
- 193) 2 1/4" O.D. Cross Bars.
- 194) Will not fit vehicles with ground effects kit.
- 195) These exhaust systems require center inlet/offset outlet mufflers. Aero Chamber mufflers are not available in this configuration. We recommend using Maximum Flow #21601, Super Competition Turbo #21105 or Competition Turbo #21005 mufflers with these kits.
- 196) Will not fit with C-6 transmission.
- 197) Will fit with the 82 and later Lakewood scattershield.
- 198) Fits with a 4 bolt flange catalytic converter.
- 199) Systems available with show quality chrome tailpipes.
- 200) Hooker headers for MOPAR 383-440 engines will bolt on the popular aftermarket B-5 heads. However, because the exhaust port centerline on these heads is 7/8" higher and 1/8" out from the engine centerline compared to stock heads, some header modifications will be required for installation. Custom header applications will be required to fit the B-1 heads because of angled spark plug location.
- 201) Hooker headers for MOPAR 318-360 engines will bolt on the popular aftermarket B-A heads. However, because the exhaust port centerline on these heads is 5/8" higher and 3/8" out from the engine centerline compared to stock heads, some header modifications will be required for installation. Spark plug locations require cutting header flanges for clearance. Do-it-Yourself accessories can be found on pages 51-56.
- 202) Header flange uses Reher and Morrison 18" sub-plate bolt pattern.
- 203) This is a true dual system utilizing 2 Maximum Flow Mufflers.
- 204) Does not fit 2 speed automatic transmission.
- 205) Dart head applications require using Accel short spark plugs #276-S and 90" Taylor spark plug boots for needed clearance.
- 206) Will fit only with block mount starter.
- 207) Will not fit with Edelbrock aluminum heads.
- 208) GT applications require P.N. 21499 chrome turnaround tips to complete the installation.
- 209) Fits with 168 tooth flywheel.
- 210) Does not fit dual catalytic equipped cars.
- 211) Does not fit with 168 tooth flywheel.
- 212) Does not fit with AFR angle plug heads.
- 213) Fits 62-65 Fairlanes only.
- 214) This header does not fit the Cutlass Supreme Model.
- 215) This is a 50 state legal header C.A.R.B. E.O. # D-164-5.
- 216) Designed for lifted vehicles only. A minimum of 2 1/2" lift is required.
- 217) This is a 50 state legal header C.A.R.B. E.O. # D-164-6.
- 218) Will not fit dual air pump.
- 219) 86-87 models need to fabricate headpipes.
- 220) 98 models with engine families WCRXAO360H31 and WCRXAO360J31 are not 50 state legal.
- 221) This header will fit with factory air conditioning on 64-67 Chevelle and El Caminos.
- 222) Fits 2WD model only.
- 223) This is a "shortie" style header for maximum ground clearance.
- 224) Will not fit with passenger car heads.
- 225) This system exits behind the rear wheels.
- 226) Will fit C-6 transmission.
- 227) This is an emission compatible header. To accommodate stock catalytic converter, you must purchase Y-pipe #16721 for 2WD and #16722 for 4WD trucks.
- 228) This is a 50 state legal header C.A.R.B. E.O. #D-164-8.
- 229) This is a 3 step header (1" / 8", 2", to 2" / 8") that is designed to fit with Danchuk sidemount and transmission crossmember.
- 231) Will not fit VIN "w" if ordered with air tubes.
- 232) Will not accommodate 605 gear box.
- 233) Aluminumized "X" pipe that bolts to factory and aftermarket cat-backs is available under P/N 16762HKR
- 234) Aluminumized "Y" pipe that bolts to factory and aftermarket cat-backs is available under P/N 16723HKR
- 235) Does not fit 4WD.
- 236) Includes oxygen sensor extension harness(s)
- 237) Will fit with 168-tooth flywheel if used with Powermaster mini starter P/N 9500
- 238) Fits both LT-1 engines and standard Chevrolet small-block engines
- 239) Requires use of Anchor mount #2292
- 240) Requires use of Anchor mount #2713
- 241) Modification required to stock exhaust required to retain catalytic converter
- 242) Will not fit Saginaw close-ratio power steering
- 243) 4WD drive only
- 251) Aluminumized "Y" pipe that bolts to factory or aftermarket cat-back is available under 16767HKR
- 253) Aluminumized dual exhaust kits that bolts to 2452HKR is available under 16523HKR
- 254) Aluminumized "X" pipe that bolts to factory or aftermarket cat-back is available under 16761HKR
- 256) "Y" pipe will fit with 2460HKR only
- 257) Will not fit heavy duty models
- 258) Aluminumized "Y" pipe that bolts to factory or aftermarket cat-back is available under 16765HKR.
- 259) Redesigned for better clearance for idler arm. Collector is in original location.
- 260) Will fit 605 gearbox.
- 261) Will not fit kickout style oil pan
- 262) Will not fit with Moroso rear sump pan.
- 263) Requires modifications to the crossmember.
- 264) Comes with show polished stainless tips.
- 265) Redesigned for improved clearances.
- 266) Factory style big block frame stands and motor mounts must be used to ensure proper engine locations and header fit. 64-77 Chevelle versions are currently available from "Original Parts Group"
- 267) Factory style big block frame stands and motor mounts must be used to ensure proper engine locations and header fit.
- 268) Will fit with most aftermarket engine mounts that utilize a base plate that bolts to stock block
- 269) These headers will not fit any factory application with side engine mounts including 63-82 Corvette.
- 270) Includes extension pipes for use with factory exhaust manifolds or EO headers.
- 271) Includes 2 stainless steel Aero Chamber mufflers with stainless steel tips.
- 272) Includes Y-pipe assembly.
- 273) With EGR, w/o air.
- 274) With EGR.
- 275) Without EGR
- 276) With air.
- 277) Stainless steel "X" pipe that bolts to factory or Aero Chamber™ muffler is part number 16874HKR.
- 278) No EGR fitting for 97-98 model years.
- * This part number is special order only.
(*) Not legal for sale or use on vehicles originally equipped with catalytic converters
- for racing use only and not intended or applicable for highway use.

HOLLEY PERFORMANCE PRODUCTS LIMITED WARRANTY

All Holley Performance Products Limited Warranties are extended to the original consumer only. This Limited Warranty is not assignable or otherwise transferable. There are no warranties that extend beyond those stated herein. Holley Performance Products offers no other warranties expressed or implied beyond this Limited Warranty.

In the event of an alleged defect in material or workmanship, Holley Performance Products' responsibility is strictly limited to repair or replace the defective product. Holley has no other obligation expressed or implied. Final warranty determination will be in the sole discretion of Holley Performance Products. Holley shall not be responsible for; (a) actual or alleged labor, transportation, or other incidental charges; or (b) actual or alleged consequential or other damages incurred by use of any product of Holley Performance Products.

To initiate the warranty process, the consumer must return the alleged defective product to the place of purchase with a dated receipt and completed applicable warranty claim tag. Warranty claims will be rejected if the date of purchase cannot be established by the consumer. Do not send products directly to Holley Performance Products. Holley Performance Products assumes no responsibility for products sent directly to Holley Performance Products.

This Limited Warranty sets forth specific legal rights. The consumer may have other rights as a result of variations in state laws or provincial laws. This Limited Warranty supersedes all prior warranty statements.

HOLLEY/FLOWTECH/HOOKER/NOS/WEIAND – NEW PRODUCT

Holley Performance Products warrants its new Holley, Flowtech, Hooker, NOS, and Weiand products to be free from defects in material and workmanship for a period of 90 days from date of purchase.

Holley Performance Products Limited Warranty specifically does not apply to products, which have been (a) modified or altered in any way; (b) subjected to adverse conditions, such as misuse, neglect, accident, improper installation or adjustment, dirt or other contaminants, water, corrosion, or faulty repair; or (c) used in other than those applications recommended by Holley Performance Products. Holley Performance Products also does not warrant, and disclaims all liability for products used in racing activities and/or applications other than those specifically recommended in the current brand catalog.

Holley limits the warranty on Metallic Ceramic Coatings to be free from defects in material and workmanship for a period of 90 days from the date of purchase. This limited coating warranty does not apply to any products which have been subjected to adverse conditions, such as high heat encountered during engine break-in or if used during any racing activity.

MARINE PRODUCTS

Holley Performance Products warrants its new marine products to be free from defects in material and workmanship for a period of 90 days from date of purchase. For the safety and protection of persons and property, all United States Coast Guard and other marine product safety installation and use requirements and recommendations must be carefully studied and applied. The above recommendations include, but are not limited to the recommendation that the installation, adjustment, and repair of Holley carburetors or other marine products must be performed only by a trained mechanic having adequate marine fuel system experience, and in strict compliance with the applicable Holley installation, maintenance, and other instructions. Failure to follow such requirements and recommendations will void this Holley Marine Limited Warranty, and Holley disclaims any responsibility and/or liability for accidents resulting from such failure.

Holley Performance Products Limited Warranty specifically does not apply to products, which have been (a) modified or altered in any way; (b) subjected to adverse conditions, such as misuse, neglect, accident, improper installation or adjustment, dirt or other contaminants, water, corrosion, or faulty repair; or (c) used in other than those applications recommended by Holley Performance Products. Holley Performance Products also does not warrant, and disclaims all liability for products used in racing activities and/or applications other than those specifically recommended in the current brand catalog.
