Dear VW® Lover,

29 years! I can't believe I've been doing this for over a quarter of a century! 29 years ago I started taking apart Volkswagens® in my garage. My grand kids are the same age as my kids were then. With the help of many good crew members, we have grown to where we are today. We sell parts for VWs® & Audis®, new used and rebuilt.

Today, our 15,000 square foot 25' high warehouse is chocked full to the rafters and we have an indoor salvage yard.

We import parts from world wide manufacturers and we make recycled parts from dismantled collision damaged VWs®. We buy out dealerships and shops and find these "catches" of parts around the world.

Our Speciality? "The Daily Driver!"

If you drive your car to and from work or school daily, we're your shop. We don't specialize in high performance or racing, so consequently, when you call us for an ordinary item, you're special to us.

Why Mail or Phone Order parts?

Parts stores and places like Wal-Mart, K-Mart, and even drug stores, are trying to sell everything to everybody. You soon find out no generalist really knows about your car. We do. We stay concentrated upon VWs® and it works. We know what fits, what breaks, what squeaks, and what matters. We can answer your phone questions. Call us.

Your local dealer or store won't have in stock everything you want, he'll "special order" something. Order by phone from us and get everything all at once at the right price.
