

For over thirty years, DMT® has been the leader in, and innovator of, a full range of diamond sharpening products that are dependable and solve a multitude of sharpening, honing or deburring needs. DMT's patented and award-winning products are known for their superior quality and versatility, are easy to use and allow for sharpening in a fraction of the time required by other methods. DMT products are popular with woodworkers, chefs and gardeners, in the kitchen, workshop or tool room, or to take camping, hiking, skiing, hunting and fishing.

DMT® Product Index

Application	Surface Type	Features	Trade Names
Sharpening, honing and deburring	Interrupted Diamond	Our signature polka-dot pattern where the holes are slightly recessed in order to collect metal fines removed during sharpening. This feature prevents loading.	DuoSharp®, Diamond Whetstone™, Diafold®, Mini-Sharp®, Diamond Broadhead™, Aligner™
Sharpening, honing and deburring. Continuous surface well suited for small contact area and pointed tools.	Continuous Diamond	Made with the same consistently sized preferred Monocrystalline diamond as our polka-dot products	Dia-Sharp®, Mini Hone®, Flexi Sharp®, DiamondVee™, Crystal Saver®, Diamond Steel™, Burr Doctor®, Honing Cones
Polishing and fine edge finishing	Continuous Unbreakable Ceramic	Aluminum core prevents chipping, cracking and breaking common with traditional ceramics.	Ceramic Steel, 6 in 1 Diamond-Ceramic Triangle, Ceramic Serrated Sharpener
Polishing to a mirror finish	Diamond Paste Compound (not bonded)	Monocrystalline diamond suspended in oil base	Dia-Paste™

DMT® Color Coded Diamond and Ceramic Grit System

Grit Designation	Grit Symbol	Color	Micron Size	Mesh Equivalent	Application
Extra-Extra-Coarse	XX	NA	120	120	For extreme stock removal to repair very damaged edges. Excellent for flattening—plane soles, irons, chisel backs, water stones, Arkansas stones, and synthetic stones.
Extra-Coarse	X	Black	60	220	When significant removal of material is needed for damaged tools. Great for water stone flattening.
Coarse	C	Blue	45	325	Quickly restores neglected edge on a tool or blade. Also great for water stone flattening.
Fine	F	Red	25	600	Puts a keen edge on a regularly maintained tool.
Extra-Fine	E	Green	9	1200	Polishes and refines a razor edge after sharpening tool or blade on a coarser grit.
Ceramic	Cer	White	7	2200	Provides the finest polished edge of all bonded abrasives.
Diamond Compound	NA	Copper	6	4000	Scratches begin to disappear with light pressure polishing action.
Diamond Compound	NA	Yellow	3	8000	Bevel edge will be glossy and reflect light after use
Diamond Compound	NA	Gray	1	15000	Ultimate in mirror bevel edge polish refinement

Durable construction will provide years of consistent performance and reliable service. For proper tool maintenance, woodworkers, chefs and other professionals rely on the superior quality and versatility of DMT® products. Made in USA.

STEELS	DS4F	14" Diamond Steel™ Sharpener	F	0 17042 00130 8	\$37.80	DMT combines fast honing diamond and ceramic surfaces with the realigning and convenience found in traditional steels for sharper results. All steels have a black plastic handle with safety guard and color coded ring for easy grit identification and hang-up. Sharpening with diamonds and ceramic is fast and easy. No messy oils needed—sharpen dry or with water. 14" Diamond Steel. Rod: 14" x .375" (356 mm x 10 mm)
	DS2F	12" Diamond Steel™ Sharpener	F	0 17042 00120 9	\$34.65	12" Diamond Steel™ sharpeners. Rod: 12" x .375" (304 mm x 10 mm)
	DS2E		E	0 17042 00119 3	\$34.65	
	CS2	12" Ceramic Steel Sharpener	Cer	0 17042 00452 1	\$44.00	Through a patented process DMT combined the finer abrasive characteristics of ceramic with a lightweight aluminum base to create an unbreakable, wear-resistant sharpener. The 12" Ceramic Steel is the right choice for regular "touch-ups" to maintain a razor sharp edge. Rod: 12" x .5" (304 mm x 13 mm)
	DS0F	10" Diamond Steel™ Sharpener	F	0 17042 00110 0	\$32.00	10" Diamond Steel™ sharpener. Rod: 10" x .375" (254 mm x 10 mm)
	CDT62	6-in-1 Diamond-Unbreakable Ceramic Triangle Sharpener	CF Cer	0 17042 00454 5	\$58.05	The ultimate in edge care versatility! The Diamond-Unbreakable Ceramic Triangle Sharpener features six sharpening surfaces: one ceramic side and two diamond sides and three different radii, all for sharpening edges. DMT incorporates the best sharpening surfaces: the finer grit characteristics of ceramic and two diamond surfaces. Adaptable for serrated knives, standard knives, scissors and any edge that may need sharpening. Designed with a comfortable handle with safety guard. This multi-purpose sharpener is perfect for a wide variety of knives and tools. Fast and easy sharpening, use dry or with water.

Diamond Gives The Edge!®

CONSTRUCTION OF DMT®'s
INTERRUPTED SURFACE

- FAST-** Hardest material, most efficient sharpening abrasive. Available in unique interrupted surface and
- EASY-** Light pressure produces a sharp edge with just a few strokes.
- CLEAN-** Use water for lubrication — no oil, smell or mess.
- VERSATILE-** Hones ALL hard materials: carbide, steel, etc.
- DURABLE-** Starts flat, stays flat.

DMT Diamond Whetstone™ sharpeners are renown for their remarkable sharpening speed. The sharpening speed of DMT® products is a function of the quality of the micronized super abrasive, monocrystalline diamond.

MONOCRYSTALLINE Diamond

(a strong, single crystal)

Uniform and precisely sized Monocrystalline Diamond is permanently bonded to nickel on a precision ground plate. Approximately two thirds of each crystal is embedded in the nickel with one third exposed. Because Diamonds are the hardest material known, the working abrasive points (top third of the diamond) will wear very slowly to give a long product life. Extremely pure, DMT diamond crystals permit a single layer of diamond to perform for years. Competitors claims of multiple layers of diamond only indicate poor quality diamond that quickly wears.

POLYCRYSTALLINE Diamond

Our competition uses this fragmented compound that breaks apart and wears away easily with use. Sharpeners made with Polycrystalline Diamond will wear out and need replacement.

EASY CARE & USAGE

Your DMT Diamond Whetstone™ sharpener is a precision tool. When used with reasonable care, it will give you many years of faithful service.

1. Break-in period: Initially your diamond stone will seem especially rough. It will smooth over time with gentle stroking without impacting performance. You need not exert extra pressure - *let the diamonds do the work!*
2. Use only light pressure when sharpening. As a rule, 5-10 minutes on a conventional oilstone is equal to about 20 seconds on DMT Diamond Sharpeners.
3. Use only water as a lubricant. A lubricant is only necessary to speed the process of clearing swarf (material removed during sharpening) into the recessed dots.
4. After use, rinse and dry your diamond sharpener. Store dry. When further cleaning is needed, use an abrasive cleaner (non-petroleum base) and a scrub brush. Always store your diamond sharpener clean and dry or the metal fines removed during sharpening will rust if left on the surface.

WARRANTY

The DMT Commitment - For over thirty years, DMT has been committed to one thing - to innovate and produce the world's finest diamond knife and tool sharpeners. All DMT products are made using the highest quality materials and workmanship and are guaranteed to be free of defects. Any products found to be defective will be replaced free of
