## ALL-MOUNTAIN FULL SUSPENSION

Just one year after its introduction, the all-mountain **Mission** has already achieved near legendary status and has become the hands-down favorite of some of the most discriminating riders in the world. This bike put the 'all' in 'all-mountain' and the 'mountain' back in 'mountain bike' upon its introduction last year, leaving riders wondering where they *couldn't* ride it and our competition wondering how to respond. We spent the time since its introduction refining the **Mission** and making it even better for 2008.

The **Mission** is an incredibly versatile, nimble, efficient and stable all-mountain bike with six silky-smooth inches of terrain-initiated travel. It is a true all-mountain bike with no bias for the type of mountain riding it does nor for the direction it goes. Its efficient Knuckle Box suspension design coupled to a Fox shock allows it to climb like a goat and descend with the same confidence and stability as its six inches of travel come to life. Its extremely low center of gravity makes it very stable. Whether it's creeping through the most technical section on the trail, climbing, or railing wide-open through flowy single track – the **Mission** is one bike that truly does it all.

The **Mission** is a three bike series that are all built on the same lightweight, efficient, and torsionally rigid frame platform. They all suit your all-mountain riding needs; find the one that also suits your budget and let the good times roll.

 **knuckle box**

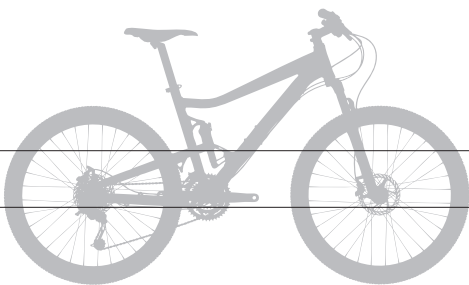

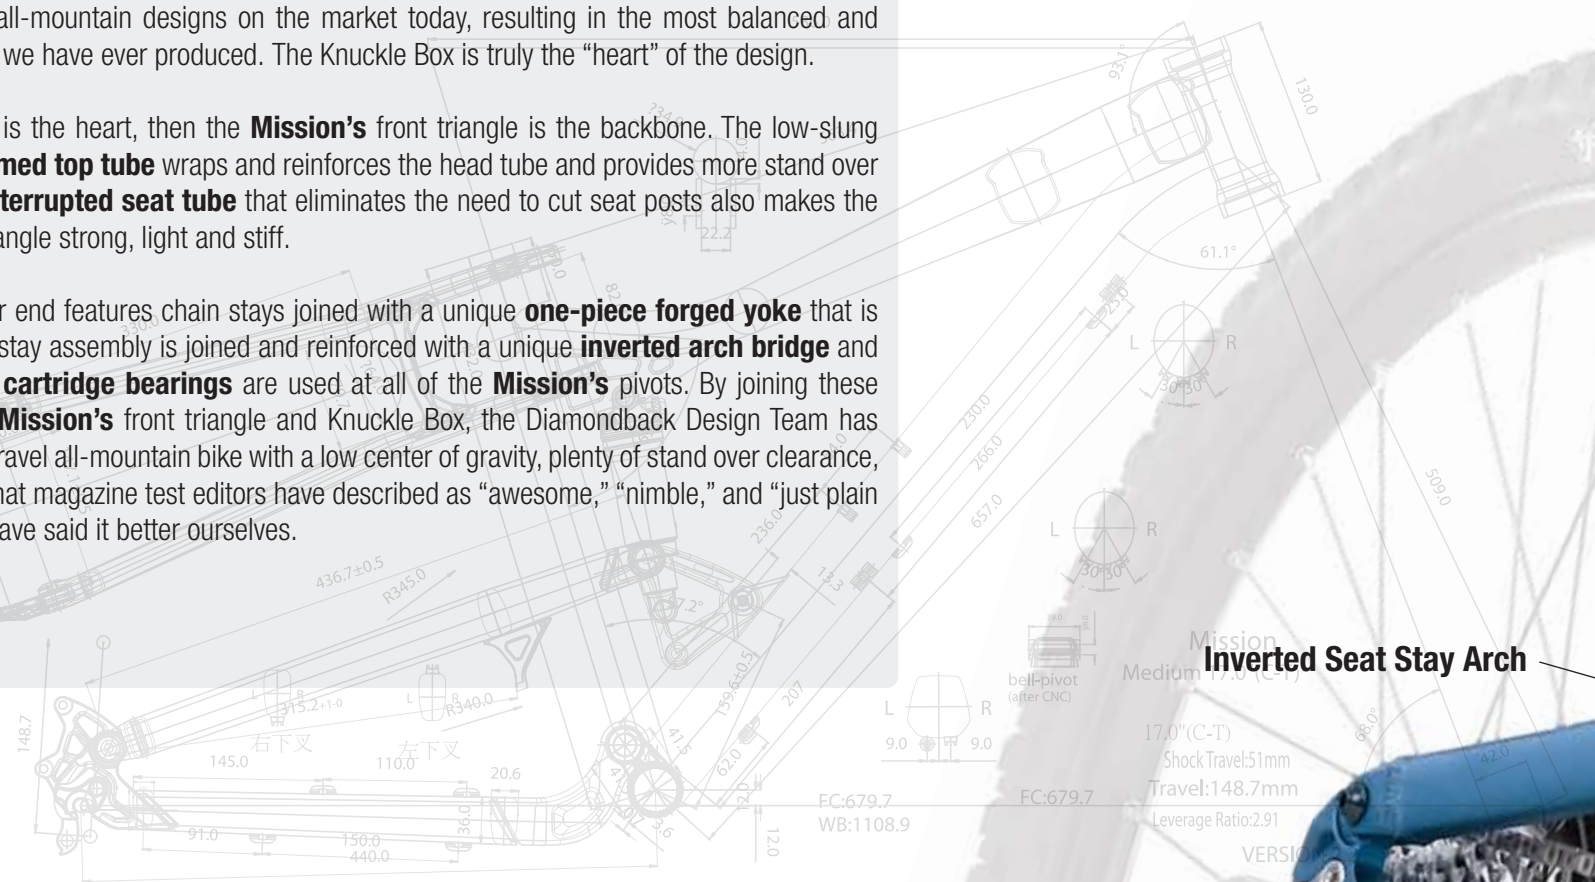

## ALL-MOUNTAIN FULL SUSPENSION MISSION

At the heart of the all-mountain **Mission** is the **Knuckle Box bell-crank**. With its compact design and welded unibody construction, the Knuckle Box ties the rear suspension components together. It isolates, cradles, and guards the FOX air shock while providing a smooth near-linear suspension ratio through the entire six inches of travel. This low and tight design gives the **Mission** a lower center of gravity than most all-mountain designs on the market today, resulting in the most balanced and maneuverable bike we have ever produced. The Knuckle Box is truly the “heart” of the design.

If the Knuckle Box is the heart, then the **Mission's** front triangle is the backbone. The low-slung **Hooded Hydroformed top tube** wraps and reinforces the head tube and provides more stand over clearance. An **uninterrupted seat tube** that eliminates the need to cut seat posts also makes the **Mission's** front triangle strong, light and stiff.

The **Mission's** rear end features chain stays joined with a unique **one-piece forged yoke** that is very stiff. The seat stay assembly is joined and reinforced with a unique **inverted arch bridge** and **precision sealed cartridge bearings** are used at all of the **Mission's** pivots. By joining these assemblies to the **Mission's** front triangle and Knuckle Box, the Diamondback Design Team has created a six-inch travel all-mountain bike with a low center of gravity, plenty of stand over clearance, and a ride quality that magazine test editors have described as “awesome,” “nimble,” and “just plain fun!” We couldn't have said it better ourselves.

Thanks to the very intelligent design concept and engineering, all parts are positioned ultra-low to create the lowest possible **CENTER of GRAVITY** resulting in super stable and precise handling.

**TRAIL**  
**FULL SUSPENSION\_SORTIE**

Introducing the all new **Sortie** four-inch travel trail bike – developed specifically for fast attacks on your favorite trails and to be your wingman in the woods. The **Sortie** series includes three different models, all built on the same platform employing the mission-proven low center of gravity Knuckle Box suspension design and Rapid Response geometry, allowing for unsurpassed agility and performance. From the custom butted / formed tubes and sealed-bearing pivots that make up the **Sortie** frame to the components that finish out each **Sortie** model, we put an immense amount of attention into each detail so the only thing you'd have to pay attention to is the trail and enjoying the ride.

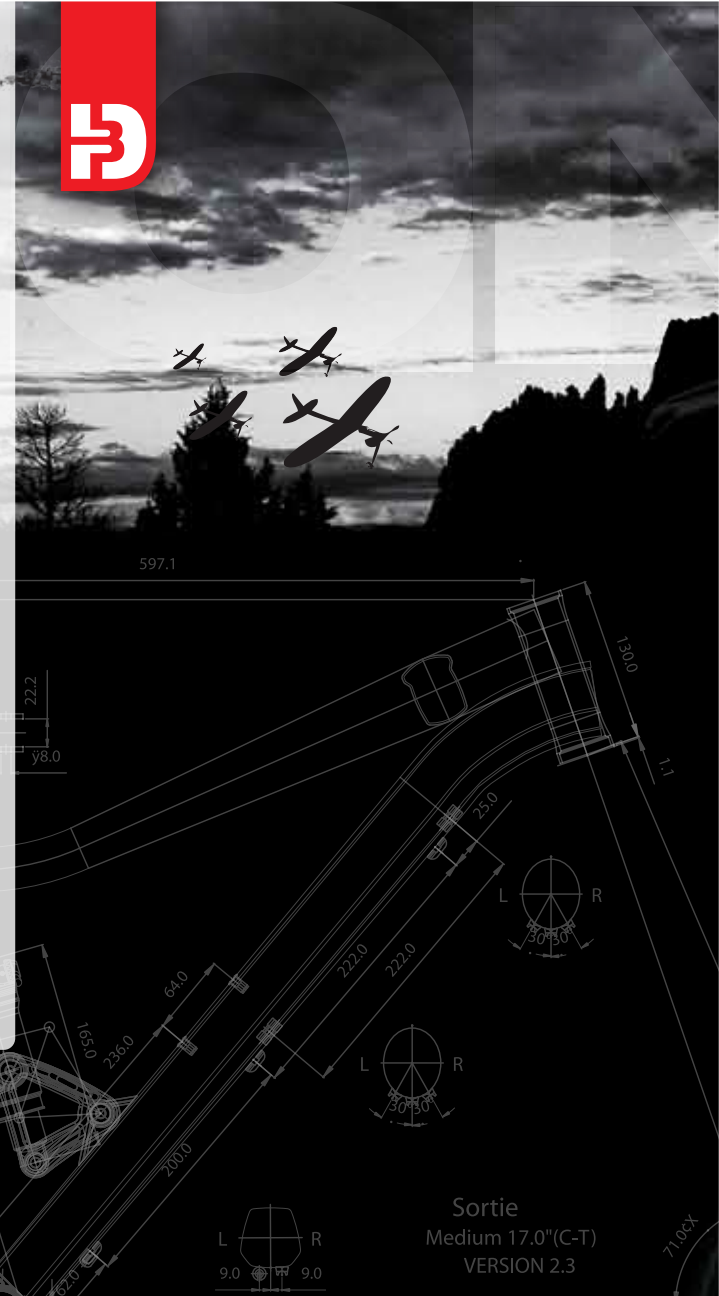

## TRAIL FULL SUSPENSION OPERATION: SORTIE

Upon the completion of the **Mission** project, it became quite obvious that we not only had an all-mountain masterpiece on our hands, but also a platform that could be adapted into an extremely agile, responsive, and lightweight four-inch travel trail bike.

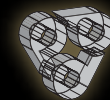

We carefully studied each tube used in the construction of the **Sortie** and optimized the seat stays, chain stays, and down tube to be light weight and tuned to maximize strength and stiffness. We also lightened and refined our signature **Hooded Hydroformed top tube** by tuning the butting profiles and dialing in the wall thicknesses to optimal trail bike specifications.

We then turned our attention to the other structural components that make up the **Sortie** platform. Like the **Mission**, the **Sortie** benefits from the **Knuckle Box** suspension design. The Knuckle Box ties the rear suspension components together. It isolates, cradles, and guards the air shock while providing a smooth near-linear suspension ratio. This design gives the **Sortie** an exceptionally low center of gravity, making it extremely agile, responsive, and maneuverable. The **Sortie's** Knuckle Box bell crank and **forged one-piece chain stay yoke** were then CNC machined to eliminate unnecessary weight. An **inverted seat stay arch** is used to tie the seat stays together and to provide additional stiffness – also making the **Sortie** more responsive and efficient.

Weight reduction played a big part in making the **Sortie** the perfect weapon for attacking the trails, but that was just the beginning. We also employed something we call **Rapid Response Geometry**. A 71° head tube angle, shorter rear stays, and steeper seat tube angle combine forces to allow the **Sortie** to quickly accelerate and to make rapid changes in direction without compromising control.

Thanks to the very intelligent design concept and engineering, all parts are positioned ultra-low to create the lowest possible **CENTER of GRAVITY** resulting in super stable and precise handling.

## 29" ALL-MOUNTAIN / XC

It is with great pride and excitement that we reintroduce a Diamondback original - the **Overdrive**. A lot has changed since 1992 when Diamondback introduced the first 29" wheeled mountain bike to the market with the original **Overdrive**, but the benefits and the good times these bikes provide remain the same.

If you haven't had a chance to ride a mountain bike with 29" wheels, then you really have no way to know what all the fuss is about. Although words really can't do the 29" experience justice, we won't let that keep us from using a few to help you understand what you've been missing.

If you think back to the days when you learned to ride a bike and you graduated from one wheel size to a bigger one, you'll understand the difference between riding an **Overdrive** and a bike with 26" wheels. You'll remember that with each bike you rode with bigger wheels, it became easier to go fast and to maintain speed. The bigger wheels seemed to make the terrain smoother and allowed you to go places you hadn't been able to go before. Those same principals and laws of physics exist today and keep you and the good times rolling – smoothly and steadily.

**ALL-MOUNTAIN  
HARDTAIL**

Every tough work week deserves a tough weekend **Response**. Whether you are new to the trails or a seasoned single track rider, the **Response** series offers uncompromised performance without compromising your bank account. At the heart of each **Response** is our rugged and reliable 'Strongbox' frame design, providing strength and style with clean lines. The components provide more proof of our commitment to providing you with the best bike your money can buy. With three models to choose from, everyone has a chance at a weekend **Response**.

## WOMEN'S ALL-MOUNTAIN HARDTAIL

**Lux**, as in 'deluxe,' finally gives women what they have been asking for - quality and performance that fits! Bucking the "Shrink it and Pink it" trend, we proudly introduce two new mountain bikes designed specifically for women. The **Lux** lets women new to mountain biking get their feet wet, while the **Lux Sport** offers a little extra for those ladies who want a little more from their ride. Using the same Strongbox technology as the Response series, the **Lux** series is designed to fit a woman's body and needs. Four sizes ensure all women can join in on the fun. Dirt isn't just for the boys anymore!

## PERFORMANCE HYBRID

Custom-formed heat-treated aluminum, carbon fiber, precision shifting, lightweight aluminum and composite pedals, high-powered brakes, and high-performance tires. For 2008, we've taken many of the materials, features and characteristics of a high-performance sports car and developed a new line of performance hybrid **Insight** bicycles. Each **Insight** was designed and developed for those with insight – to burn more calories and less gas, and to do this comfortably, but still very fast.

## COMFORT

We all need a break once in a while. A time to get away and go for a leisurely spin with a loved one, friends or family. A time to relax and put enjoying life at the top of your list of things to do, to make time to appreciate the little things along the way that all too often go unnoticed. Our line of **Wildwood** comfort bikes was specifically developed for those who understand that sometimes in order to get the most out of your weekend, you need to do as little as possible.

## COMMUTER

If your commute involves a car and a latte, you probably count on sitting in traffic. Fortunately, you can also count on a **Transporter** to be a great vehicle to get you around the traffic and to your destination. The **Transporter** provides you with performance, reliability, and utility, and comes equipped with accessories every commuter needs - from the full fender set to keep you dry to the bell to let others know you're passing them by. Take a **Transporter** on your next commute and start spending more time feeling better and less money on gas.

## CRUISER

There's no such thing as "summertime blues" when you're stylin' on a Diamondback **Della Cruz** beach cruiser. Despite the innovation and all of the advancements in bicycle technology, there is still no bike that gives you the kind of feeling you get when you take a seat behind the broad, sweeping handlebars of a nice beach cruiser. The saddle is positioned so it's very easy to get on and off. The handlebars are well within a casual and comfortable reach right in front of you. And best of all, your worries and concerns can easily be kept far behind you.

Baby Blue

## YOUTH

It's your choice – you can get your kids off to a healthy start by getting them a trouble-free quality bike that can give them their first taste of freedom, or you can buy one with a price close to free and make riding a source of frustration and another reason to keep the TV on. Diamondback youth bikes are a TV's worst nightmare. They are made with quality replaceable parts like aluminum rims, heavy duty steel frames, and quality bearings and hardware to make riding bicycles the liberating and healthy activity that it should be.

## Bicycle Limited Warranty

DIAMONDBACK bicycles are distributed by Raleigh America, Inc.

It is the owner's responsibility to thoroughly read and understand the owner's manual and regularly examine the product to determine the need for professional, authorized service or replacement. Please consult an authorized Raleigh America, Inc. bicycle dealership with any questions on use and maintenance. Regardless of the length of the warranty, Raleigh America, Inc. does not infer that the bicycle will last forever or cannot be broken. All Raleigh/ Diamondback framesets and bicycles have a finite, limited useful product

life cycle. The length of this useful life cycle will vary by environment, riding conditions, frame material and construction, riding style, maintenance, and the amount as well as type of use the bicycle or frame is subjected to. A worn out bicycle does not indicate it is warrantable, rather that the bicycle has outlived (exceeded) its useful product cycle.

**Raleigh America, Inc. warrants this new Raleigh America, Inc. bicycle frame against defects in material and workmanship, subject to the following limitations, terms, and conditions:**

Item	Warranty Term Length
Steel bicycle frames with wheel size less than 20"	Lifetime, for as long as the original retail purchaser owns the bicycle*
Steel bicycle frames with 20", 24", 26", or 700c wheels	Lifetime, for as long as the original retail purchaser owns the bicycle*
Alloy bicycle frames with 20", 24", 26", or 700c wheels	Lifetime, for as long as the original retail purchaser owns the bicycle*
Full Carbon Fiber or Carbon fiber/alloy bicycle frames with 20", 24", 26", or 700c wheels	Lifetime, for as long as the original retail purchaser owns the bicycle*
Full Suspension bicycle frames	Five years from the date of original retail purchase to the original purchaser*
Forks, Non-branded	Five years from the date of original retail purchase
Forks, Branded	Covered under the fork manufacturer's warranty. Consult dealer for details.
Components, Non-branded	One year from the date of original retail purchase
Components, Branded	Covered under the component manufacturer's warranty. Consult dealer for details.
Finish and decals	One year from the date of original retail purchase
Suspension parts including but not limited to bushings, pivot bearing, link plates, bolts, fasteners, chain stays, seat stays, and shock units	One year from the date of original retail purchase under the condition that the bicycle is regularly maintained as well as operated under normal riding conditions
Labor, frame replacement	One year from the date of original retail purchase
Labor, parts replacement	Thirty days from the date of original retail purchase

1. This warranty only applies to the original retail purchaser and is not transferable.
2. Specific model exceptions to this warranty are noted with the bicycle documentation.
3. Raleigh America, Inc.'s sole obligation during the acceptable duration of this warranty is, AT RALEIGH AMERICA, INC.'S OPTION, to repair or replace the product with a current item that is equivalent in construction, design, or value.
4. Raleigh America, Inc.'s liability under this limited warranty shall never exceed the amount of the original purchase.

#### To obtain service under this warranty, you must:

1. Return your fully assembled Raleigh America, Inc. bicycle to an authorized Raleigh America, Inc. bicycle dealer within the United States of America. A bicycle that has had the components removed cannot be evaluated or warranted.
2. Provide proof of purchase, including but not limited to the retail bill of sale, your credit or debit card receipt, or other satisfactory proof of the date of purchase.
3. The proof of purchase must indicate the bicycle was sold fully assembled and adjusted by an authorized Raleigh America, Inc. dealer within the United States of America. Sales where the bicycle was delivered in a carton to the end user (e.g. mail order or Internet sales) void the warranty.

#### This warranty does not apply to damage or failure due to:

1. Accidents, alteration, abuse, neglect.
2. Materials fatigue, normal wear and tear.
3. Improper assembly, maintenance, or installation of parts or accessories not originally intended to be compatible with the bicycle as sold, including but not limited to power assist accessories, forks, brakes, or tires different from original specification.

#### This warranty also excludes:

1. Commercial use, racing or competition, stunting, jumping, trick riding, ramp riding, aggressive riding, riding with excessive loads, lack of technical skill, competence, or experience of the user.
2. Bicycle frames which have been repaired (e.g. welded or bonded), repainted, or had the original decals removed.
3. Frames, forks, wheels, axles, handlebars, and stems, which are bent from just riding along, can be a sign of misuse or abuse and are not covered under this warranty.
4. Personal transportation costs or product freight costs to or from an authorized Raleigh America, Inc. bicycle dealer.
5. Any additional costs associated with the incompatibility of existing parts and the replacement frame or fork.

Warranty replacement frames must be fully assembled by an authorized dealer to maintain the warranty coverage. The warranty for the replacement frame shall be the warranty offered for the equivalent bicycle's frame of that model year. If not assembled by the dealer, replacement frames are considered aftermarket frames. After market frames are only warranted for one year from the date of purchase for the original purchaser. This one year warranty excludes any issues that can be traced to assembly or component incompatibility.

This warranty is expressly in lieu of all other warranties, and any implied warranties of merchantability or fitness for a particular purpose created hereby, are limited to the same duration as the express warranty herein. Raleigh America, Inc. shall not be liable for any incidental or consequential damages. Some states do not allow the exclusion or limitations of implied warranties, incidental or consequential, so the above limitations and exclusions may not apply to you. Retailers and wholesale outlets for Raleigh America, Inc. products are not authorized to modify this warranty in any way. This warranty gives the original owner specific legal rights. Other additional rights may vary from state to state.

All Diamondback bicycles meet or exceed CPSC standards. Complete equipment is included with each Diamondback bicycle but not necessarily shown in photographs, e.g. reflectors. All Diamondback bicycles are covered under warranty. See your authorized Diamondback dealer for complete details. Diamondback specifications are subject to change without prior notice. Diamondback is a registered trademark of the Raleigh America, Inc. © 2005, Diamondback Bicycles. All rights reserved.

**WARNING:** All riders depicted in this catalog are professionals. Do not attempt to duplicate any actions that are beyond your abilities. ALWAYS WEAR A HELMET!
