

2010
+ **DIAMONDBACK** BICYCLES

2010 diamondback bicycles

diamondback

Welcome to the 2010 line of Diamondback...Whoa, wait a second...2010.

10 years into the new millennium. By this date, weren't we supposed to be living in a world full of jet cars and cities in the sky? Or shouldn't we at least have put together a multi-national space mission to Europa? We haven't seen any of those things happen. In fact, not even close. But what we have seen is a world change dramatically in 10 years. Fast-paced evolution in technology is all around us, and bicycles are no exception.

From revisions in mechanics to adaptations in materials, our newest generation of Diamondback bicycles boasts features to dominate its niche in the world. Knucklebox suspension is born refined for better performance than ever. Our road line flourishes with flat-bar style and incorporates new drop-bar bicycles. Our women-specific Devine Designs improves this year with stunning function and beautiful form, and we offer more geometry options in our comfort bikes than any previous year. Color is everywhere, and the graphics that grace our bikes are simply outstanding among the competition. Every characteristic has selectively evolved to create the most viable line of bicycles we have ever had.

Over 30 years of lineage and we find ourselves in 2010, in the midst of punctuated technological evolution. We are happy to introduce our new line of bicycles those which have evolved with true adaptive advantage.

perfect suspension made simple

AMAZINGLY EFFICIENT

We designed Knuckle Box to pedal efficiently with long-travel suspension. For 2010, we dialed in a bit more efficiency by reducing the bike's overall leverage ratio. The bikes are buttery-smooth on small bumps, but accelerate and climb even better than before.

EXCELLENT MANEUVERABILITY

Rail a tight switchback on one of our bikes and it'll hit you—this bike tracks like it's on rails. There's a good reason for that. The Knuckle Box design has an exceptionally low center of gravity, which boosts stability. It's basic physics and the same reason Indy 500 race cars look more like go-karts and less like monster trucks.

STIFFER IN ALL THE RIGHT PLACES

It's easy to build a bike that's stiff and heavy. Same goes for light and flexy. Building a frame that's stiff and light? That's the challenge. Our Knuckle Box design has always boasted one of the best stiffness-to-weight ratios on the market. For 2010, we engineered even more stiffness into each frame without adding an extra ounce.

WICKEDLY SMOOTH

We wanted our suspension to have that perfect "endless travel" feeling, yet we didn't want to blow through all that travel when we rode off something stupid-big. That's why we spent two years collaborating with the engineers at Fox to build the perfect rear shocks for our Knuckle Box bikes.

two years, countless prototypes and a hell of a lot of miles in the making

TAPERED HEADTUBE

Tapered head tubes on our Mission and Scapegoat frames reduce flex up front, improve steering precision and boost your frame's fatigue life.

CARTRIDGE BEARINGS

We have carefully chosen each of the 14 Enduro MAX bearings for all our frame and link pivots. Better rigidity, less maintenance and gargantuan load-bearing capacity.

SINGLE SIDED HARDWARE

One of the unique features found on all Knuckle Box bikes is our single sided hardware that allows the 3 main pivot locations to be tightened from one side of the bicycle using standard tools. No need to remove the crank set to tighten pivots.

BETTER STRONGER

This year we burned a hole in our SolidWorks software and came up with a lighter, stouter Knuckle Box. It's like taking stiff and raising it to the tenth power.

I feel very lucky. I cannot imagine doing anything else. Bikes are my passion – my life. Bikes are why I work here and I am grateful that I work at a company filled with people that share the same passion. It's been a long and crazy road that led me here, but I can't imagine being anywhere else. These are exciting times at Diamondback, fueled by some very exciting bicycles. For 2010 we are launching our completely new Mission all-mountain bike as well as an all new, completely redesigned Sortie trail bike. The Mission is my personal favorite, and for 2010 the Mission has been redesigned to offer even better all-mountain performance and durability than before. The Knuckle Box suspension has won many fans over the past 3 years, and now, with the introduction of the 2010 bikes, the fan base will only grow.

Whether it's a Mission, a Sortie, an Insight, or one of the beautiful Devine Designs bicycles for women, I am confident that any Diamondback you choose will fuel your passion for riding, and just having fun on a bike. Thanks for coming along on the ride!

Mike Brown
Diamondback Brand Manager

the new **mission 2010**

now making molehills out of a mountain near you

When we created the Mission three years ago, we set out to build a do-anything, ride-anywhere rig. The result was a six-inch travel, all mountain bike that bombed downhill, pedaled like a rocket, and quickly won fans at North Shore Mountain Bike.com, Mountain Bike, Dirt Rag and Decline magazines.

For 2010, we took everything we liked about the Mission and, to use a technical engineering term, added a can of whoop ass to the mix.

We improved the Mission's pedaling efficiency, tweaked and lightened every single tube to perfection, and upped the frame stiffness with a tapered headtube, a full complement of double-row bearings, and a new Knuckle Box that's devilishly light and stout.

Say hello to the new Mission: the perfect bike for any occasion that involves dirt, sweat and unlawful speed.

MISSION FOUR ANNO GOLD

NEW Weapons Grade Aluminum Mission 6" All-Mountain Frame w/ Knuckle Box Suspension Platform
Fox 36 Talus RC2 FIT 160/130/100mm Fork / Fox Float RP23 XV Rear Shock

big
steep
and
scary?

SOUNDS GOOD TO US **TOO**

From Whistler to Diablo and every bike park in between, there isn't a trail, huck or stunt too sketchy or mean for the **NEW** Scapegoat.

For 2010, we've enhanced the performance of the 'Goat by crafting a bike that's lighter, yet every bit as tough as its predecessor.

Oh, and since we know that everyone isn't blessed with a ski lift in their backyard, we went and made the GOAT an even better climber to boot.

Go ahead, ride it fast and steep: we've got you covered.

SCAPE **GOAT** GREEN / WHITE

NEW Weapons Grade Aluminum Mission 6" All-Mountain Frame w/ Knuckle Box Suspension Platform
 Fox 36 Float RC2 FIT 160mm Fork / Fox DHX Air 5.0 Rear Shock
 Truvativ Hammerschmidt FR 2-Spd Transmission
 Mavic Crossmax SX Wheels
 Avid CODE 4 Piston Hydraulic Disc Brakes

the new **Sortie 2010**

**attention all epic rides,
death marches and
neverending climbs...
you've just met your match.**

Our goal with the Sortie is simple: build the perfect trail bike. That means five inches of plush travel, instant acceleration, and no lumpy pedaling or bobbing...

Actually, as our engineers and test riders will tell you, building a machine that does all that isn't simple at all. They should know; they've spent the past two years wracking their brains and pummeling trails in an attempt to one-up a bike that had already earned unabashed praise from editors at the likes of Bicycling, Outside Magazine and Mountain Bike Action.

SORTIE BLACK MATTE BLACK

NEW Weapons Grade Aluminum Sortie 5" Trail Frame w/ Knuckle Box Suspension Platform

LBC

DIAMOND BACK
GEOMETRY

LBC

laid back comfort are you ready for some fun?

LBC stands for “Laid-Back Comfort”, found on select 26” and 700c hybrid bikes. A simple concept that is all about comfort, control, and fun.

COMFORT

The frame geometry is designed for a relaxed and enjoyable ride: Rider position is upright and easy, with the soft padded saddle further behind the bottom bracket for ease on knees. Front end suspension and seat post suspension together provide sofa-like comfort.

CONTROL

The handle bar design is swept back and adjusted with a slight 15 degree angle down to provide a comfortable reach and to maintain steering stability and control.

FUN

Ride an LBC bike and see for yourself – it is simply fun to sit down, relax, and pedal away for the most enjoyable ride you’ll ever have on a comfort bike!

Heavy Duty Hi-Ten Remington Steel Fork
Alloy Crankset w/ Integrated Chainguard
SSW700 Double Tunnel Alloy Rims
DB Deluxe 2-Density Coil Sprung Hybrid Saddle

sport comfort

euro styling american comfort

Considered a “traditional” design, Sport Geometry is a moderately relaxed rider position found on our Classic (26”) and LX (700c) bicycles. The bottom bracket is below the soft padded saddle, and an upright riding position is maintained with an adjustable stem and riser handle bar. Front end suspension and seat post suspension together round out the Sport Comfort feel. In the end it is not as relaxed and upright as LBC, but not as aggressive and forward as our Performance Geometry. It is right in the middle.

MENONA MATTE CHARCOAL

Butted 6061-T6 Aluminum Sport Hybrid Frame
DB Technik Integrated 40mm Travel Suspension Fork

insight 2010

performance enhancer

Ride it. Commute it. Performance Hybrid it. Performance, control, and comfort – take all three components and add them together to sum up the Insight series: Road wheel performance, a custom-formed lightweight aluminum frame, low rise-bars for control and comfort, and Shimano drive-train reliability. The Insights are the perfect bikes for all-around pavement riding, whether it's for training, exercise, or commuting. If you seek the ultimate choice in performance hybrid look no further than the Insight.

INSIGHT THREE SPEED BLUE

Butted 6061-T6 Aluminum Insight Performance Hybrid Frame

podium 2010

good things come in threes

DBR has returned to the Podium. Bred from road racing, the 2010 Podiums serve up the perfect balance of performance, quality, and value. Ideal for club rides, commuting, benefit rides, fitness, or recreation-whatever your ride, there is a Podium for you. Featuring compact geometry, light weight aluminum frames, carbon forks, and Shimano components, each model has its own place atop the podium.

2010 AIR PRESSURE REFERENCE CHARTS

Suspension set up is very important to the overall performance of your full-suspension mountain bike. 'Sag' is the amount your rear shock or suspension fork compresses when you simply sit on your bike. All Knuckle Box suspension bikes require that they are set up with the correct sag in order to operate correctly. Though sag will vary depending on rider style, terrain, and personal preference, we recommend that you set your shock and fork with approximately 25% sag to get your Knuckle Box bike to perform at its best. Please refer to the charts listed below for the suggested air pressure values for your suspension.

MISSION		
RIDER WEIGHT		AIR PRESSURE
LBS.	KG	PSI.
120-130	54-59	100-110
130-140	59-64	110-120

2010 + DIAMONDBACK BICYCLES LIMITED WARRANTY

Diamondback Bicycles warrants this new bicycle frame against defects in material and workmanship, subject to the following limitations, terms, and conditions:

It is the owner's responsibility to thoroughly read and understand the owner's manual and regularly examine the product to determine the need for professional, authorized service or replacement. Please consult a Diamondback Bicycles Authorized Dealer with any questions on use and maintenance. Regardless of the length of the warranty, Diamondback Bicycles does not infer that the bicycle will last forever or cannot be broken. All Diamondback framesets and bicycles have a finite, limited useful product life cycle. The length of this useful life cycle will vary by environment, riding conditions, frame material and construction, riding style, maintenance, and the amount as well as type of use the bicycle or frame is subjected to. A worn out bicycle does not indicate it is warrantable, rather that the bicycle has outlived (exceeded) its useful product cycle.

ITEM	WARRANTY TERM LENGTH
Steel bicycle frames with wheel size less than 20"	Lifetime, for as long as the original retail purchaser owns the bicycle*
Steel bicycle frames with 20", 24", 26", or 700c wheels	Lifetime, for as long as the original retail purchaser owns the bicycle*
Alloy bicycle frames with 20", 24", 26", or 700c wheels	Lifetime, for as long as the original retail purchaser owns the bicycle*
Full Carbon Fiber or Carbon fiber/alloy bicycle frames with 20", 24", 26", or 700c wheels	Lifetime, for as long as the original retail purchaser owns the bicycle*
Full Suspension bicycle frames	Five years from the date of original retail purchase to the original purchaser*
Forks, Non-branded	Five years from the date of original retail purchase
Forks, Branded	Covered under the fork manufacturer's warranty. Consult dealer for details.
Components, Non-branded	One year from the date of original retail purchase
Components, Branded	Covered under the component manufacturer's warranty. Consult dealer for details.
Finish and decals	One year from the date of original retail purchase
Suspension parts including but not limited to bushings, pivot bearings, link plates, bolts, fasteners, chain stays, seat stays, and shock units	One year from the date of original retail purchase under the condition that the bicycle is regularly maintained as well as operated under normal riding conditions
Labor, frame replacement	One year from the date of original retail purchase
Labor, parts replacement	Thirty days from the date of original retail purchase

1. This warranty only applies to the original retail purchaser and is not transferable.
2. Specific model exceptions to this warranty are noted with the bicycle documentation.
3. Diamondback Bicycles sole obligation during the acceptable duration of this warranty is, at Diamondback Bicycles option, to repair or replace the product with a current item that is equivalent in construction, design, or value.
4. Diamondback Bicycles liability under this limited warranty shall never exceed the amount of the original purchase.

To obtain service under this warranty, you must:

1. Return your fully assembled Diamondback Bicycles bicycle to a Diamondback Bicycles Authorized Dealer within the United States of America. A bicycle that has had the components removed cannot be evaluated or warranted.
- *2. Provide proof of purchase, including but not limited to the retail bill of sale, your credit or debit card receipt, or other satisfactory proof of the date of purchase.
3. The proof of purchase must indicate the bicycle was sold fully assembled and adjusted by a Diamondback Bicycles Authorized Dealer within the United States of America. Sales where the bicycle was delivered in a carton to the end user (e.g., mail order or Internet sales) void the warranty.

This warranty does not apply to damage or failure due to:

1. Accidents, alteration, abuse, neglect.
2. Material fatigue, normal wear and tear.
3. Improper assembly, maintenance, or installation of parts or accessories not originally intended to be compatible with the bicycle as sold, including but not limited to power assist accessories, forks, brakes, or tires different from original specification.

This warranty also excludes:

1. Commercial use (such as rental or security fleets), racing or competition, stunting, jumping, trick riding, ramp riding, aggressive riding, riding with excessive loads, lack of technical skill, competence, or experience of the user.
2. Bicycle frames, which have been repaired (e.g. welded or bonded), repainted, or had the original decals removed.
3. Frames, forks, wheels, axles, handlebars, and stems, which are bent from just riding along, can be a sign of misuse or abuse and are not covered under this warranty.
4. Personal transportation costs or product freight costs to or from a Diamondback Bicycles Authorized Dealer.
5. Any additional costs associated with the incompatibility of existing parts and the replacement frame or fork. These costs are the responsibility of the consumer.

Warranty replacement frames must be fully assembled by a Diamondback Bicycles Authorized Dealer to maintain the warranty coverage.

The warranty for the replacement frame shall be the warranty offered for the equivalent bicycle's frame of that model year. If not assembled by the dealer, replacement frames are considered aftermarket frames. Aftermarket frames are only warranted for one year from the date of purchase for the original purchaser. This one-year warranty excludes any issues that can be traced to assembly or component incompatibility.

This warranty is expressly in lieu of all other warranties, and any implied warranties of merchantability or fitness for a particular purpose created hereby, are limited to the same duration as the express warranty herein. Diamondback Bicycles shall not be liable for any incidental or consequential damages. Some states do not allow the exclusion or limitations of implied warranties, incidental or consequential, so the above limitations and exclusions may not apply to you. Retailers and wholesale outlets for Diamondback Bicycles products are not authorized to modify this warranty in any way. This warranty gives the original owner specific legal rights. Other additional rights may vary from state to state.

All Diamondback bicycles meet or exceed CPSC standards. Complete equipment is included with each Diamondback bicycle but not necessarily shown in photographs, e.g. reflectors. All Diamondback bicycles are covered under warranty. See your authorized Diamondback dealer for complete details. Diamondback specifications are subject to change without prior notice. Diamondback is a registered trademark of Raleigh Cycle Limited. Diamondback bicycles are distributed by Raleigh America, Inc.

WARNING: All riders depicted in this catalog are professionals. Do not attempt to duplicate any actions that are beyond your abilities. ALWAYS WEAR A HELMET!
