IRON HORSE

2004 Mountain Bike Catalog

What a year. With the formation of the Iron Horse/MadCatz team, a World Cup and a Junior World Championship in downhill, 2003 turned out to be a winning year for Iron Horse. And just wait - our world champion riders, along with renowned suspension engineer Dave Weagle and the input from our fans across the globe, have helped us design 2004 bikes that will top anything you've ever seen. Or ridden. We've retooled our freeride, trail, and downhill bikes for the sole purpose of going harder, going faster, and going bigger.

Even the critics have come to see the power of the horse. Our SGS Pro was awarded "Downhill Bike of the Year" by Mountain Biking Magazine. Our hardcore fans couldn't be happier. So this year is dedicated to the riders. The hardcore, the serious, the weekend warriors. Our 2004 line is built just for you.

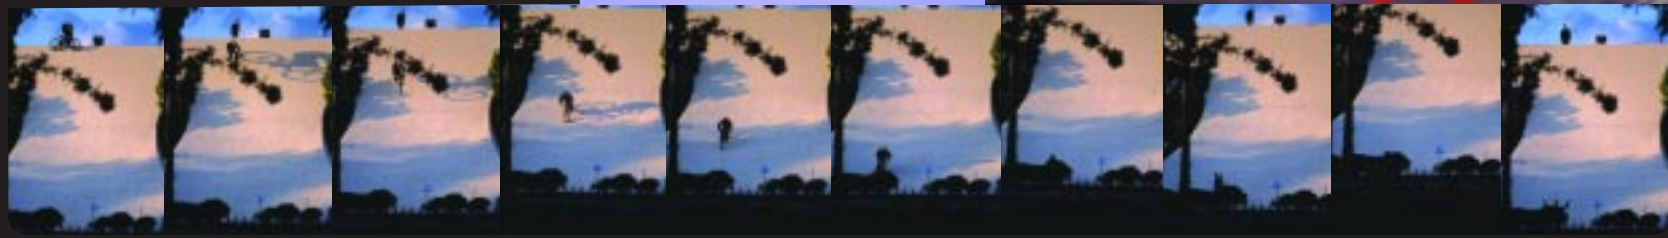

IRON HORSE BICYCLE COMPANY, LLC.

URBAN/JUMPING

ERIC PORTER

The Porter Signature Series is a new addition to the Iron Horse line up for 2004. Developed by Iron Horse's pro street, dirt jumper, and freerider Eric Porter, this new series of progressive freeride mountain bikes is designed for riders breaking new ground in the area of urban, skatepark, and dirt jumping!

Eric Porter is the star of several freeride videos including "Superheros III", "Killing Time", and "Chain Reaction IV". Eric has appeared in several mountain bike magazines including the cover of Flow Magazine. Eric is the first rider to grind rails on a mountain bike!

The frame and geometry was developed by Eric to be the highest performing, most versatile bike for this developing segment of riding. The frame, wheels, and components are designed to take the maximum punishment that this type of riding inflicts on a bike.

There are three models of bikes in the Porter Signature Series. The Porter 24"/26" are actually 2 different bikes, same specs but different wheel size. Both feature a suspension fork, Porter Signature frame and rear Avid brakes. The Porter Pro adds a 9 speed derailleur, e13 chainguide and Marzocchi Dirt Jumper fork. The Porter Signature only comes available as a frame kit. The 20" Porter model reflects Eric's broad range of skills in jumping and extreme riding.

TRAIL

WHAT DOES THE DW-LINK SUSPENSION DO? THE SHORT TECHNICAL ANSWER:
 The dw-link suspension design takes advantage of physics, dynamics, and kinematics principles, which govern motion in a linkage system and acceleration of vehicles. The design takes advantage of and manipulates the influences of chain pull and driving force, and combines them together to give a tuned anti-squat response through the suspension travel.

IRON HORSE BICYCLES 2004 CATALOG
ROAD BIKES • HYBRID BIKES • COMFORT BIKES • TRAIL BIKES • CRUISERS • KIDS BIKES

W

e're dedicated to cyclists. Riders of every size and ability. This year, we've built a comprehensive line of road and recreational bikes that displays our true passion for riding. You'll find some of the best models in our history - from top-end racing bikes to value-priced trail bikes. And we've even built bikes for kids - our Iron Horse champions of the future. We know that there are countless cyclists out there just waiting to show their passion for the road. Or the trail. Or the boardwalk. Let's get pedaling.

SHIMANO NEXUS HUB & SHIFTER
The Nexus Inter-4 rear hub combines the ease of use of a coaster brake hub with the reliable performance of a Shimano internal gear hub that is known throughout the world. The internal four speeds of the Nexus hub allow the rider a broad gear selection for cruising around town, along the boardwalk, or through city streets. The Nexus shifter allows the rider to easily select gears with the turn of the wrist.
