NOW IT’S PERSONAL

THE DIRECTION YOU CHOOSE IS YOURS AND YOURS ALONE. AND YOU’LL NEVER LET ANYONE TELL YOU DIFFERENT. AT HARLEY-DAVIDSON, WE RESPECT THAT. WE KNOW YOUR CUSTOM JOURNEY IS A PROCESS IN CONSTANT MOTION. IT IS AN ACT OF WILL, DEDICATION AND ORIGINALITY. THIS GENUINE MOTOR PARTS AND ACCESSORIES CATALOG IS OUR COMMITMENT TO STAND BY YOU EVERY STEP OF THE WAY.

FIT, FUNCTION & STYLE

The process of achieving your custom vision is genius in its simplicity. Fit, Function and Style are the three core steps of customization. First, determine if the bike feels natural and fits your body type. Next, establish how your bike's functional qualities will reflect you're riding preferences. And last, bring your own personal sense of style to the table.

TRUE TO FORM. ON THE ROAD, YOU'VE GOT TO FEEL GOOD IN THE SADDLE. WHEN YOU SWING YOUR LEG OVER AND YOUR FOOT TAPS THE GROUND ON THE OTHER SIDE, THE BIKE WELCOMES YOU LIKE AN OLD FRIEND. WHEN YOUR HANDS AND FEET FALL NATURALLY TO THE CONTROLS, YOU FEEL IN COMMAND. WHETHER YOU'RE CRUISING AROUND TOWN OR OUT FOR A LONG RUN, YOUR BIKE SHOULD FEEL LIKE AN EXTENSION OF YOURSELF.

THE SWEET SIGH OF RELIEF

The correct riding position can help a tall rider sit comfortably on the bike, and avoid leg cramps and back strain during a long day in the saddle. Selecting the proper seat height, handlebars and foot controls will put you on the road to fatigue-free riding.

A. SELECTING THE RIGHT SEAT

For riders with longer inseams, consider "test-sitting" a Tallboy® seat. Designed to move the rider up and back from the stock seating position to avoid a "knees-high" leg position.

B. COMFORT WITHIN REACH

The position of your hands, wrists and elbows directly affects how you feel on the bike. A Tallboy handlebar moves the controls away from the rider for a natural arm stretch.

C. STRETCH FOR THE LONG HAUL

Extended-reach footboards, a folding heel shift lever and a Mustache engine guard or highway pegs provide freedom to stretch and change position while riding.

RIDING POSITIONS

PROFILING RIDING POSITION

High-style, boulevard-bound posture achieved with an ape-hanger type handlebar, forward foot position, and solo or low-profile seat.

CRUISING RIDING POSITION

The ultimate fusion of comfort and laid-back style, achieved with a buckhorn or sport handlebar and forward foot position.

SPORT RIDING POSITION

Upright stance with emphasis on handling, achieved with flat or sport bars, low-profile or sport seat, and a mid-range or slightly pulled back foot position.

TOURING RIDING POSITION

Natural, upright position for high-mile comfort, achieved with a wide handlebar, a standard foot position with pegs or footboards and a deep bucket seat.

TAKE CONTROL

Control on the road is paramount for the shorter rider. Sitting comfortably, grasping the handlebar firmly and placing your feet on the ground with confidence all result in a controlled and comfortable ride.

A. COMFORT UP FOR GRABS

Selecting the right handlebar is critical for a rider with short arms. The width, rise and pull-back should position the hands naturally, and not pull the rider forward on the seat when turning.

B. POSITION OF POWER

Specially-designed to move riders with a shorter inseam closer to the controls, the Reach® Seat also features a lower profile and a narrow thigh zone to bring the legs closer together to minimize leg stretch.

C. LOWERING THE SUSPENSION

Adjusting the ride height by lowering the suspension will generate a lower center of gravity, increasing control for the shorter rider. Combined with a narrow-width seat, the feet remain firmly planted at a stop.

CHOOSE YOUR TOOLS. CRUISING, CHASING THE HORIZON, OR A LITTLE OF BOTH? HARLEY-DAVIDSON HAS A WIDE RANGE OF SADDLEBAGS, LUGGAGE RACKS, TOUR-PAK® CARRIERS, BACK RESTS AND OTHER FUNCTIONAL ITEMS THAT'LL COME IN HANDY WHEN YOU'RE OUT ON THE OPEN ROAD. CONSIDER YOUR RIDING STYLE WHEN CHOOSING FUNCTIONAL GEAR, AND IF IT'S VERSATILITY YOU CRAVE, CHECK OUT SOME OF THE DETACHABLE ACCESSORIES HIGHLIGHTED BELOW.

EQUIPPED FOR THE ROAD

Geared up with the necessary hardware, this long-haul motorcycle is ready to tackle the miles ahead. Comfort-driven accessories like windshields and backrests ease the physical strain of life on the road, and make for a less stressful ride. A rider is only as happy as the passenger, trust us.

A. WINDSHIELDS

Nobody likes getting abused by headwind. Adding a detachable windshield will take the pressure off your chest and arms, and keep you out on the road longer. Select the size that's best for you.

B. BACKRESTS & RACKS

With a detachable back rest and luggage rack, your bike can go from a stripped-down afternoon cruiser to a fully loaded two-up touring machine in seconds. Your passenger will thank you.

LOAD UP

Depending on the ride you've got planned, your storage needs will vary. Efficient, versatile luggage systems provide you with the storage space for a longer ride. Pack your rainsuit, riding gear, tools, tent and sleeping bag. You'll still have room for the T-shirts you buy along the way.

C. SADDLEBAGS

Saddlebags provide ample storage, and carry the weight low on the bike to maintain a comfortable riding balance. Detachable leather bags allow you to strip the bike down when you get there.

SOFT LUGGAGE

Designed for maximum versatility, soft Touring Bags accommodate a lot of gear. The bags easily strap to the rack, and offer grab-and-go convenience once you've reached your destination.

STRIPPED FOR THE STREET

Designed to be installed or removed in seconds, detachable accessories give you the flexibility to outfit your bike for the day's ride. Pop off the windshield, back rest and saddlebags, install a solo seat and luggage rack, and you're ready for a night on the town.

CHROME TO THE TEETH

When it's layered in chrome and custom paint, double-takes come with the territory and gawking crowds get old…almost.

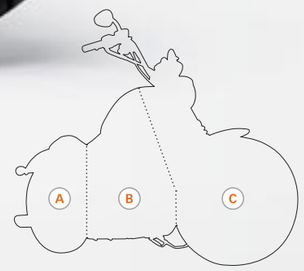

Start at the beginning with chrome front forks and set of custom wheels, then draw the eye to the rear with custom foot controls, a chrome swingarm, and Screamin' Eagle® exhaust. Chrome is classic for a reason.

DARK AS NIGHT

Strip it down and black it out. This twisted take on custom keeps the minimalist roots of motorcycling alive.

Black hand controls and fork sliders set the tone up front, while the high-rise ape hanger handlebar, wrinkle-black engine covers, and black ceramic-coated Screamin' Eagle® mufflers bring a little unrest to the streets.

PUT YOUR SIGNATURE ON OURS. THIS IS WHERE YOUR MOTORCYCLE COMES TO LIFE. MACHINERY CAN ONLY TAKE YOU SO FAR—IT'S UP TO YOUR UNRELENTING PASSION TO MAKE THE BIKE INTO A SYMBOL OF YOUR INDIVIDUALITY. STYLE ISN'T DICTATED BY THE MASSES—IT'S SOMETHING THAT COMES FROM YOUR SOUL. OLD SCHOOL, NEW SCHOOL OR NO SCHOOL, FIND A DIRECTION, TAKE A STANCE AND EXECUTE ACCORDINGLY.

IN THE ZONE

Once you find your direction, plan your customization to maximize installation efficiency. Changing wheels? Add chrome wheel spacers and fork sliders at the same time. New handlebar? Consider adding custom hand controls and mirrors too. The possibilities can seem overwhelming, but looking at your bike in sections may help.

VRSC™ CONTENTS

Although the VRSC motorcycles look like low-slung, stripped-down machines, there's still plenty of room to add your personal touch. Browse through the following pages for a little inspiration, and let your imagination run wild.

But you're not done yet. You'll find an arsenal of additional custom options in the Screamin' Eagle,® Multi-Fit and Color Shop sections of this catalog.

RIDER'S ESSENTIALS 26

Where to start? A quick-release windshield, passenger backrest and luggage rack are the basic accessories you need for comfort on the open road.

WINDSHIELDS 28

By diverting air pressure away from your chest, a windshield can add hours of riding comfort. For full protection, pick the size that's right for you.

SEATS & BACKRESTS 30

Tailored to position the rider and a passenger for maximum comfort, accessory seats are available to fit a wide variety of riders and riding styles.

TOURING ACCESSORIES 35

Designed for convenience and versatility, accessory saddlebags, luggage racks and touring bags make packing for your next trip a breeze.

ENGINE & CHASSIS TRIM 38

From the front forks to the rear axle, nothing draws your eye from one end of the bike to the other like well-coordinated chrome or gloss black.

HAND & FOOT CONTROLS 50

Put your body in the perfect position. It's as simple as selecting the right suspension height, handlebar shape and hand and foot control position.

LIGHTING & HORN 55

Grab the attention of fellow motorists. Halogen headlamps, LED tail lamps, auxiliary lighting and air horns make your bike a little harder to ignore.

WINDSHIELDS
Whether it's for keeping bugs off your face or warmth in your body, a windshield has a huge impact on rider and passenger comfort. By diverting air pressure past your chest and over your helmet, a windshield can add hours of riding comfort. For maximum protection from wind and weather, select a windshield that tops out just below your line of sight. You avoid looking through rain drops, bug spots and road grime to get a clear view of the highway ahead.

A. QUICK-RELEASE DETACHABLE COMPACT WINDSHIELD
Combine the classic Harley-Davidson® windshield shape with a revolutionary new attachment system, and you have the best of style and function. The standard-height, clear windshield mounts to the fork tubes with elegant die-cast lever-release clamps, so the windshield does not require any "leave-behind" docking hardware. You get quick on-and-off convenience, and a clean, custom look. No tools are required, and the kit includes everything needed to install the windshield. The tough, hard-coated polycarbonate windshield features traditional chrome horizontal and vertical braces. Patented.

Choosing a Backrest

A sissy bar upright and passenger backrest are the starting point to build a complete touring machine. The backrest provides long-range comfort and support, and adds a feeling of control and confidence for the passenger. For permanent installation, choose rigid sideplates and a style of upright that suits your riding style. For added flexibility, choose a detachable sideplate kit and appropriate Docking Hardware to make adding or removing a Detachable accessory a simple "slide and click" proposition.

A. PREMIUM OIL COOLER FOR SPORTSTER® MODELS
Big Twin oil cooler technology for the Sportster® model. This vertical-mount cooler features a unique "Turbulator" system that efficiently distributes oil across the cooling chambers. The air fins feature several louvers to efficiently dissipate heat. The Premium Oil Cooler has been designed for ease of installation, and features oil lines that connect directly to the oil pump and engine. Kit includes oil cooler, oil lines and mounting hardware.

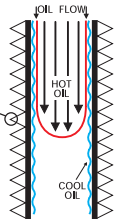

62996-07 Fits '04-later XL models. **$224.95**

Inside View of Premium Oil Cooler with Turbulators

Turbulators disperse and mix oil inside cooler to provide more efficient cooling capabilities. The cooler oil is not allowed to remain along the boundaries of the flow tube as in conventional coolers.

Inside View of Conventional Oil Cooler without Turbulators

Coolers without the Turbulator system allow oil to flow only in a straight path. Oil does not mix and the cooler oil remains along the outer boundaries, while the hotter oil remains along the center path of flow. Without the mixing effects of the Turbulators, the conventional oil cooler provides less efficient cooling capabilities.

WINDSHIELDS
Whether it's for keeping bugs off your face or warmth in your body, a windshield has a huge impact on rider and passenger comfort. By diverting air pressure past your chest and over your helmet, a windshield can add hours of riding comfort. For maximum protection from wind and weather, select a windshield that tops out just below your line of sight. You avoid looking through rain drops, bug spots and road grime to get a clear view of the highway ahead.

A. QUICK-RELEASE DETACHABLE COMPACT WINDSHIELD
Combine the classic Harley-Davidson® windshield shape with a revolutionary new attachment system, and you have the best of style and function. The windshield mounts to the fork tubes with elegant die-cast lever-release clamps, so the windshield does not require any "leave-behind" docking hardware. You get quick on-and-off convenience, and a clean, custom look. No tools are required, and the kit includes everything needed to install the windshield. The tough, hard-coated polycarbonate windshield features traditional chrome horizontal and vertical braces. Patented.

FIND THE PROPER SUPPORT

On a long ride, your body can quickly tell whether a seat works for you. For example, does your back still feel relaxed after hours in the saddle? Do your hands fall naturally to the hand controls? Do you feel comfortable putting your feet down at a stop sign? It's a lot to think about, but a Harley-Davidson® dealer can find the seat for the comfort, style and control you want.

THE COMFORT ZONE A seat is more than just leather and foam. For maximum highway comfort, a broad seating surface distributes weight to reduce pressure points. For a short rider, a narrow, tapered thigh zone provides easier reach to the ground. And a stepped seat profile keeps the rider from sliding back during acceleration.

Badlander® Seat
Was it made for "cruising the boulevard," or was "cruising the boulevard" made for it? Long and lean, its custom look brings you lower to the ground than most other seats. Think of it as an attitude adjustment disguised as a posture adjustment.

Brawler®, Sidekick® and Rallyrunner® Collection Seats
These saddles combine radical styling with contoured padding for long haul support. Top grain cowhide leathers stretch over the hand-laid fiberglass seat pan for extra durability. Comes in solo, low-profile and mini-touring styles.

Reach® Forward Position Seat
It's good to have both feet on the ground when you come to a stop. Specially-designed to move riders with a shorter inseam closer to the controls, the Reach Seat also features a low-profile and a narrow thigh zone to bring the legs closer together to minimize leg stretch.

Sundowner™ Deep Bucket Seat
Your backside's going to look forward to long trips. The deep bucket design puts you into proper touring position and the thick padding makes it want to stay there. The dish shape holds you in position and provides lower back support.

Choosing a Backrest

A sissy bar upright and passenger backrest are the starting point to build a complete touring machine. The backrest provides long-range comfort and support, and adds a feeling of control and confidence for the passenger. For permanent installation, choose rigid sideplates and a style of upright that suits your riding style. For added flexibility, choose a detachable sideplate kit and appropriate Docking Hardware to make adding or removing a Detachable accessory a simple "slide and click" proposition.

Dyna® Docking Hardware For Detachable Racks and Sideplates
Docking hardware fitment is dependent on vehicle model and saddlebag configuration.

A fine, aged patina and character wrinkles are a sign of the extremely high quality materials used to construct your saddlebags. The appearance of scars or marks on the leather are a result of using natural leather panels and should not be thought of as an imperfection. HAND & FOOT CONTROLS 302

Put your body in the perfect position. It's as simple as selecting the right suspension height, handlebar shape and hand and foot control position.

LIGHTING & HORN 336

Grab the attention of fellow motorists. Halogen headlamps, LED tail lamps, auxiliary lighting and air horns make your bike a little harder to ignore.

NOTE: Some Harley-Davidson® seats are made of leather. Fine leathers or other natural materials WILL gain "character," such as wrinkles or wear, with age. This is normal. A fine, aged patina and character wrinkles are a sign of the extremely high quality materials used to construct your seat or backrest. The appearance of scars or marks on the leather are a result of using natural leather panels and should not be thought of as an imperfection. FIND THE PROPER SUPPORT

On a long ride, your body can quickly tell whether a seat works for you. For example, does your back still feel relaxed after hours in the saddle? Do your hands fall naturally to the hand controls? Do you feel comfortable putting your feet down at a stop sign? It's a lot to think about, but a Harley-Davidson® dealer can find the seat for the comfort, style and control you want.

THE COMFORT ZONE A seat is more than just leather and foam. For maximum highway comfort, a broad seating surface distributes weight to reduce pressure points. For a short rider, a narrow, tapered thigh zone provides easier reach to the ground. And a stepped seat profile keeps the rider from sliding back during acceleration.

Badlander® Seat
Was it made for "cruising the boulevard," or was "cruising the boulevard" made for it? Long and lean, its custom look brings you lower to the ground than most other seats. Think of it as an attitude adjustment disguised as a posture adjustment.

Brawler®, Sidekick® and Rallyrunner® Collection Seats
These saddles combine radical styling with contoured padding for long haul support. Top grain cowhide leathers stretch over the hand-laid fiberglass seat pan for extra durability. Comes in solo, low-profile and mini-touring styles.

Reach® Forward Position Seat
It's good to have both feet on the ground when you come to a stop. Specially-designed to move riders with a shorter inseam closer to the controls, the Reach Seat also features a low-profile and a narrow thigh zone to bring the legs closer together to minimize leg stretch.

Sundowner® Deep Bucket Seat
Your backside's going to look forward to long trips. The deep bucket design puts you into proper touring position and the thick padding makes it want to stay there. The dish shape holds you in position and provides lower back support.

Touring Seat with Rider Backrest
Hit the road with more than the wind at your back. When equipped with a rider backrest, a touring seat adds a whole new level of comfort. A backrest positions the rider in an upright touring posture, and adds adjustable lower back support.

F. DUAL BULB HALOGEN HEADLAMP KIT – ROAD KING/FL SOFTAIL WITH CHROME HEADLIGHT NACELLE (SHOWN)

E. HIGH INTENSITY DISCHARGE (HID) DUAL BULB HEADLAMP KIT*

Cut through the darkness. The Harley-Davidson® High Intensity Discharge Headlamp Kit features a true HID (Xenon) low-beam bulb that projects a curb-to-curb spread of "blue/white" light. Compared to the yellow light of a traditional halogen bulb, the HID lamp produces a "Daylight Color Impression" that appears more natural to the user.

The HID Dual Bulb Headlamp assembly features unique advanced optics with separate low and high beam reflectors dedicated to focus the light for optimal illumination. The HID low beam is always illuminated, providing a wide pool of light, and the separate Halogen high-beam bulb adds a focused shaft of light down the center of the lane.

The HID Dual Bulb Headlamp is not just a high-performance bulb, it's a complete lighting system. The system includes the HID bulb, an electronic starter, and a ballast system. The bulb is a complex tube that replaces the filament with arc-producing electrodes. The starter allows quick ignition of the arc, and the ballast converts incoming power to the high voltage needed to maintain the glow. The Xenon-filled HID bulb is resistant to vibration, and has a life expectancy of up to 10 times that of a Halogen bulb. The headlamp kit is DOT approved for use in all 50 states.

The complete Headlamp Kit includes the shock and vibration resistant housing, HID low-beam bulb, halogen high-beam bulb, starter, waterproof ballast, and all necessary wiring.

F. DUAL BULB HALOGEN HEADLAMP KIT

The Dual Bulb Halogen Headlamp features advanced reflector optics and separate bulbs for high and low beam functions. The euro-inspired projector beam styling combines a state-of-the-art look with a CAD designed faceted reflector bowl that is optimized for crisp patterns and light cut-off. The single upper bulb functions in low beam, and both upper and lower bulbs operate in high beam. The low beam setting produces a wide curb-to-curb light pattern, and the high beam adds focused light down the center of the lane without compromising width. Kit includes housing, 55-watt low beam halogen lamp, 35-watt high beam halogen lamp and all necessary mounting hardware. Does not meet ECE regulations.

Ask your dealer for advice about the amount of current consumed by additional electrical accessories.

A ONE-TRACK MIND. FOR OFF-THE-LINE PERFORMANCE, IT'S WHAT'S ON THE INSIDE THAT COUNTS. STREET-LEGAL SCREAMIN' EAGLE PERFORMANCE PARTS DELIVER THE AGGRESSIVE PERFORMANCE AND SOUND YOU EXPECT FROM A HARLEY-DAVIDSON® MOTORCYCLE. FACTORY-TESTED SCREAMIN' EAGLE STREET-LEGAL PERFORMANCE CONFIGURATIONS ARE ENGINEERED TO BALANCE THE DEMAND FOR PERFORMANCE, RELIABILITY AND RESPONSIBILITY.

THE DYNO CHART

An invaluable tool in performance modification, the dyno chart can visually compare the performance characteristics of a stock engine with those of a modified engine—and can help you determine if a particular set-up will generate the power gains you're after. The horizontal axis indicates engine speed in RPM and the left and right vertical axis shows the amount of torque and horsepower produced. Comparing the stock and modified torque and horsepower curves can tell you how a configuration performs in a specific RPM range.

HORSEPOWER AND TORQUE

While many judge a motorcycle's performance solely in terms of horsepower, torque is an equally important factor in the equation. In a nutshell, torque is the twisting force that gets your bike moving, while horsepower is the effort required to keep it moving—meaning that torque influences acceleration, while horsepower determines velocity. Your goal should be to reach the balance between horsepower and torque that most closely matches the performance you need.

WARRANTY AND CAUTION

OVERVIEW Harley-Davidson® has the engineering expertise, the sophisticated dyno lab and complete testing facilities to provide enthusiasts with a line of performance products designed to produce good, solid, reliable horsepower and torque. Engine related performance parts are intended for the experienced rider only.

WARRANTY Installation of Screamin' Eagle® products, and similar off-road or competition products from other manufacturers, except some street-legal offerings installed by authorized Harley® dealers, may void your H-D limited vehicle warranty. Installation of a California performance kit on a 49-state model motorcycle, or a 49-state performance kit onto a California model motorcycle will void manufacturers warranty, as it will not result in a street-legal configuration.

CAUTION Harley-Davidson motorcycles modified with some Screamin' Eagle high-performance engine parts must not be used on public roads and in some cases may be restricted to closed-course competition.

SCREAMIN' EAGLE® RACING UPDATE

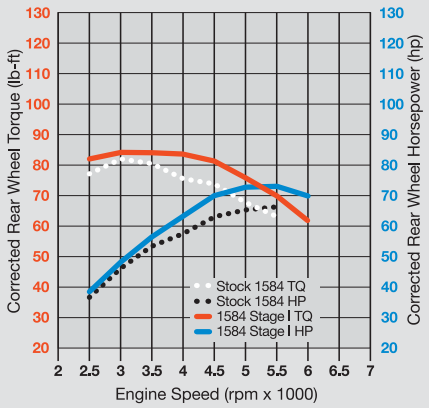

NHRA® The Screamin' Eagle/Vance & Hines Racing Team is on a mission. In 2007, Andrew Hines tallied a career-best five wins in seven final round appearances while setting his fastest elapsed time of 6.910 seconds. In his first year on the factory squad, teammate Eddie Krawiec became the first rider ever to run a shattering 6.99-second pass at Pomona. In 2008, Andrew and Eddie will team up once again to make a run at the title on their V-Rod® motorcycles. Follow the Countdown to the Championship at NHRA.com.

AMA® With AMA Flat Track Twins Championships in 2006 and 2007, Kenny Coolbeth becomes one of only 10 riders in AMA history to win back-to-back titles. Coolbeth wrapped up the 2007 season with 6 wins and 3 second-place finishes. Wrecking Crew member Jared Mees finished behind Coolbeth in the #2 spot for the second year in a row. Riders Bryan Smith, finished in the #3 spot in 2007, and Joe Kopp round out the Wrecking Crew, with strong results in 2007 and high ambitions for the 2008 season.

LIFE STAGES DEVELOPED SPECIFICALLY FOR FUEL-INJECTED HARLEY-DAVIDSON® MOTORCYCLES, SCREAMIN' EAGLE® STREET-LEGAL STAGE KITS ELIMINATE THE GUESSWORK AND THE NEED FOR TRIAL-AND-ERROR TESTING NORMALLY ASSOCIATED WITH ENGINE MODIFICATIONS. JUST DEFINE YOUR PERFORMANCE GOALS, AND PICK THE STAGE KIT THAT GETS YOU THERE.

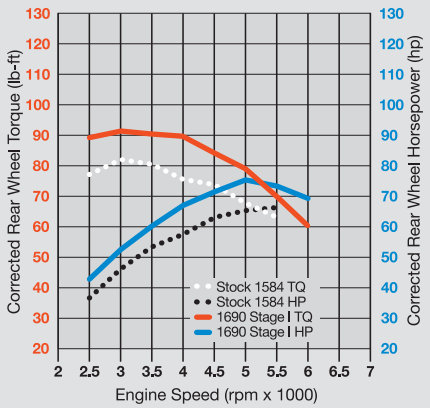

Twin Cam 96 Stock vs. 96ci Stage I Kit

STAGE I AIR CLEANER

Let It Breathe The first step to unleashing the power of a V-Twin motor is to let it breathe. The engine is an air pump, so the more air and fuel it can swallow, burn and exhale, the more power it produces. Adding a Stage I High Flow or Heavy Breather Air Cleaner and Street Performance Muffler combination produces a lot of "bang for the buck", and is a great place to start your performance build.

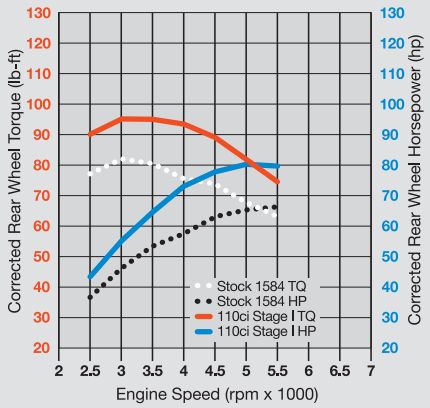

Twin Cam 96 Stock vs. 103ci Stage I Kit

STAGE I BIG BORE

Open It Up Getting inside the engine and adding big bore cylinders and matching pistons is the fastest way to increase your bike's pulling power. When the torque curve peaks early and continues to pull all the way through the mid-range, you feel it. Big bore engines provide the power required to pass a slow moving camper or to pull a loaded bike up a long grade. Want even more? Step up to the Big Bore Stage II Kit and you add performance-matched cams for measurable increases in torque and horsepower.

Twin Cam 96 Stock vs. 110ci Stage I Kit

STAGE I BIG DISPLACEMENT

Get It All There's no substitute for cubic inches. Screamin' Eagle® 110 kits for Twin Cam 96™ models and 103 kits for Twin Cam 88® models deliver hard-hitting Street Legal performance with proven reliability. Original Equipment on the Harley-Davidson® Screamin' Eagle® CVO motorcycles, these Stage I Kits feature system-matched cylinders, heads, pistons, cams and ECM calibrations for demonstrated performance.

CAUTION ICONS:

GO LIGHT These Screamin' Eagle products are 50-state street-legal for sale and use on all vehicles, including those that are pollution controlled.

STOPHAND Harley-Davidson motorcycles modified with some performance engine parts must not be used on public roads and in some cases may be restricted to closed-course competition. Those performance parts identified with a stophand symbol are U.S. EPA legal, but are NOT legal for sale or use in California on pollution-controlled motor vehicles. California guidelines on tampering can also lead to substantial fines and penalties.

CALIFORNIA These Screamin' Eagle products are street legal for sale and use on pollution controlled vehicles in the state of California.

Stage I Air Cleaner

Heavy Breather Air Cleaner

Touring ('07-'08 only)

Dyna ('07-'08 only)

Softail ('07-'09 only)

*Recalibration is required for proper installation, and will allow engine to rev to 5500 RPM. See dealer for details. Labor cost not included.

When installed by an authorized Harley-Davidson Dealer at the time of vehicle delivery, these kits do not impact the vehicle's limited warranty.

NOTE: Installation of a California performance kit onto a 49 state model motorcycle, or a 49 state performance kit onto a California model motorcycle will void manufacturers warranty, as it will not result in a street legal configuration.

High flow rate/high scavenge rate oil pump, stock on '07 and later Twin Cam 96 models, improves the stock oiling system to increase oil flow to piston oil jets, cam chain tensioner, pinion shaft bearings and connecting rod bearings. Increased oiling results in lower engine operating temperatures and increased performance. Billet Cam Support Plate is precision machined from 6061 Aluminum and anodized for durability. Kit is pre-assembled with crankshaft bushing and oil pressure relief value. Kit includes Billet Cam Support Plate, Oil Pump assembly, bearing retainer plate, and chain guide riser.

I. SCREAMIN' EAGLE® BILLET CAM SUPPORT PLATE

A great upgrade for any performance motor. The Billet Cam Support Plate is manufactured from billet aluminum with pressed-in bronze bushings, and is pre-assembled with the crankshaft bushing and oil pressure relief valve. Aluminum is specified at 6061 billet plate, heat treated to T6 specifications with a surface-hardened anodized finish to provide superior strength, rigidity, and durability. CNC-precision machining insures precise dimensions and constant material thickness across the plate, enabling perfect alignment of cams and chains. Cam bushings are made from 660 bronze material to provide enhanced wear resistance, and to stand up to increased loads from the high lift cams common in large displacement motors.

Fits '06-later Dyna and '07-later Softail and Touring models.

J. SCREAMIN' EAGLE LEFTY BEARING

The Lefty Bearing is designed to provide increased load capacity and enhanced durability in high-torque applications. The bearing is installed in the left side of the crank case, and supports the output shaft to the primary drive system.

K. AUTOMATIC COMPRESSION RELEASE

Automatic Compression Release (ACR) valves reduce the strain of starting your high performance motor by reducing cylinder compression – automatically! ACR gives you peace of mind and protects your investment. ACR can be installed on stock or Screamin' Eagle Performance cylinder heads for all '07-later Twin Cam equipped models. Installation requires matching to be performed by a competent machinist using the Screamin' Eagle Automatic Compression Release Fixture Kit. P/N 94648-08 *(sold separately)*. A. SCREAMIN' EAGLE® 6-SPEED TRANSMISSION AND GEAR SET

Designed from the ground up, the Screamin' Eagle transmission incorporates many of the best Original Equipment features, like late-style shifting mechanism and a newly designed "shift ring" system to make this the smoothest shifting Harley-Davidson® transmission available. The "shift ring" system is similar to the system used in the VRSC transmission, and it slides on the shafts to mate into the gears. This eliminates sliding heavy gears to accomplish the shift, and results in smooth, precise and light effort shifting. Sixth gear is a true overdrive, at a .89:1 ratio, and the first five gears mimic today's proven 5-speed ratios. The overdrive feature allows you to run a lower engine RPM in sixth gear, at any given road speed. Lower RPM can result in lower vibration, longer engine life and smoother cruising. The Screamin' Eagle 6-Speed Transmission is available as a complete transmission, or as a replacement gear set, and can be matched with Hydraulic or Cable-operated clutch controls.

Screamin' Eagle 6-Speed Transmissions feature forged chrome "trap door", forged shifter forks and forged and precisely ground gears. No speedometer or exhaust mount modifications are required. Complete transmissions are ready to install into the chassis, and the 6-Speed Gear Set Kits are designed to replace the stock gear set without removing the transmission. Gear Set Kits require slight modification (template included) to the Original Equipment transmission case, and include all necessary installation hardware.

BREATHE NEW LIFE. NOTHING BEATS FACTORY-FRESH. WE CAN REMANUFACTURE YOUR HIGH MILEAGE MOTOR TO ORIGINAL SPECIFICATIONS. YOU HAVE THE OPTION TO SELECT STAGE I BIG BORE UPGRADES, AND WHEN ORIGINALLY REMOVED AND INSTALLED BY AN AUTHORIZED HARLEY-DAVIDSON® DEALER, YOUR REMANUFACTURED ENGINE CARRIES A 12-MONTH UNLIMITED MILEAGE LIMITED WARRANTY. FOR DETAILS, VISIT WWW.HARLEY-DAVIDSON.COM/REMAN.

HOW IT'S DONE–STEP BY STEP

When the miles start to add up, the Harley-Davidson® Engine Remanufacturing Program can put the rumble back into your powerplant simply, quickly and affordably. The program is available for the Evolution® 1340, Twin Cam 88,® Twin Cam 88B™ and Twin Cam 95™ engines. Contact your Harley-Davidson® dealer for more information.

GETTING STARTED

Your engine's journey begins at your Harley-Davidson dealership. The engine is removed from your bike and shipped via Con-way® in a specially-designed container to our state-of-the-art Powertrain Operation, Capitol Drive facility in Wauwatosa, WI.

STEP 1: DISASSEMBLY

Upon its arrival, your engine is completely taken apart and inspected by the remanufacturing team. Engine components that can be cleaned and remanufactured to original specifications are saved, while those not worth saving are discarded.

STEP 2: CLEANING AND POWDER COATING

All reusable parts are cleaned, and paint is thermally removed from the cylinders and heads. Small components are cleaned through a baking soda blasting process. After inspection, parts are powder coated in our state-of-the-art production paint facility.

STEP 3: MACHINING

Once powder coated, these parts are machined, bored and honed to exact tolerances. Then, they proceed through rigid specification checks. Only the components that meet our strict standards ever make it past this point.

STEP 4: REASSEMBLY

*During reassembly, crankcases are set, bearings are pressed and components are meticulously reassembled. All chromed and polished components are replaced with new parts, and your engine is upgraded to meet the latest specifications, while retaining its stock configuration.**

STEP 5: TESTING AND FINISHING

After reassembly, your engine is run through a battery of tests to ensure it performs to Harley-Davidson standards. Upon passing these tests, your engine is awarded a one-year, unlimited mileage factory warranty. After cleaning and polishing, your engine is ready to come home.

BACK IN THE SADDLE

Approximately two weeks after its journey began, your V-Twin® is returned to your dealer for installation with a new lease on life and its original Vehicle Identification Number (VIN).

**For legal and warranty purposes, all engines will receive stock camshafts. If you have installed high-performance cams, they will not be reinstalled or returned.*

GRAB HOLD OF YOUR CUSTOM. THE MOST VISUAL CONTACT POINT YOU HAVE WITH YOUR MOTORCYCLE IS WHERE YOUR HANDS MEET THE CONTROLS. BEGIN BY CHOOSING A HANDLEBAR SUITABLE FOR YOUR PHYSICAL NEEDS. THEN SELECT GRIPS, HAND CONTROLS, FOOT PEGS AND MIRRORS TO UNDERSCORE THE DIRECTION OF YOUR RIDE.

GOING FURTHER

For immediate visual impact, install a chrome or black master cylinder kit with complementing hand levers. Hand grips, switch housings and switch caps work together with braided control cables and brake lines to round out your custom statement.

HEATED HAND GRIPS
Keep comfortable on those cool morning or frigid night rides. Warm hands have a major impact on overall body comfort, and sometimes gloves just aren't enough. These thermostatically controlled grips have variable heat settings and automatic temperature monitoring to adjust to changing ambient temperatures. The grips remain at a constant temperature regardless of changes in outside temperatures. The self-contained control circuit and control knob means you have no additional switches or controller boxes to mount, and the grips are switched on/off with the ignition to avoid draining your battery. The "glueless" grip design allows grip removal if you change handlebars or motorcycles. Patent pending.

Handlebar Measurements

HANDLEBAR BASICS*

Bars communicate style and also affect how you handle your bike. You want to select a handlebar that puts your arms in a position that matches both the attitude you want to convey and the kind of riding you expect to do. While every handlebar has its own distinct measurements and characteristics, there are four basic factors to consider in your quest for custom-styled comfort:

Rise is the vertical distance between a handlebar's tip and its base. Adding risers to bars that sit low can help put hand grips in a higher spot.

Pull Back brings hand controls closer while also lowering grip height. More pullback facilitates an upright posture, and suits riders with a shorter reach.

Width is measured from the tip of one hand grip to the other. Touring calls for a wider bar, while sport riding is best with a narrower tip-to-tip width.

Knurl Center to Center is the distance between the center of one knurl to the center of the other knurl. To ensure correct fit between the handlebar and risers, measure the center to center distance between the riser clamping surfaces and select a handlebar with the same dimension.

CUSTOM BRAIDED BRAKE LINE KITS
Dress your bike for maximum custom impact and performance. Harley-Davidson offers a choice of three braided brake line finishes, and two different design configurations, to match your customizing needs. All brake lines meet or exceed all DOT requirements.

A. DIAMONDBACK™ BRAIDED BRAKE LINES
The signature Harley-Davidson exclusive Diamondback braid provides a splash of chrome to your custom bike. Diamondback Brake Lines feature highly polished chrome fittings and a micro-fine wire braiding that perfectly match the weave pattern on Diamondback Braided Control Cables. Available in "Modular" and select "1-Piece" brake line configurations.

B. STAINLESS STEEL BRAIDED BRAKE LINES
Get the traditional custom look of stainless steel, by upgrading your Original Equipment black brake lines to braided stainless steel. Smooth, consistent stainless steel braiding and polished chrome fittings provide for a fit and finish second to none. Available in "1-Piece" brake line configurations.

C. DIAMOND-BLACK BRAIDED BRAKE LINES
Introducing new Diamond-Black Braided Brake Lines. Unlike others, Diamond-Black braided brake lines utilize a black braided wire providing a deeper, truer, black finish, while still allowing you to see the premium braided appearance from a distance. Dual Disc Front

Single Disc Front

DIAMONDBACK™ MODULAR BRAKE LINES feature a 2-piece design that provides maximum versatility for both stock and alternate (plus) length brake line applications. Modular Brake Lines come in single and dual disc configurations and require a separate purchase of both a lower and an upper brake line for installation. The common lower line is shared with specific models, while the variable length upper lines work with models depending on single disc (Dyna/Softail, except FXDF) or dual disc (Touring/FXDF) application. Upper brake lines come completely assembled in lengths up to +10" over the stock configuration and can be ordered with 0°, 35°, and 90° banjo angles to accommodate almost any handlebar configuration. A single JIC connection at the lower triple tree fastens the lines together and automatically orients the banjo fittings to ensure proper installation. Modular Brake Lines are offered exclusively in Diamondback finish.

INSTRUCTIONS FOR FINDING STOCK AND ALTERNATE LENGTH MODULAR BRAKE LINES:

1. Find your model and year on the chart below for the stock fitment.

2. The stock Diamondback Modular Front lower and upper brake lines are listed along with the length and banjo angle for reference.

3. Alternate lengths for Diamondback upper lines are listed on the next page according to 0°, 35°, and 90° banjo configurations. (If you require assistance determining the appropriate alternate length and banjo angle for your application, ask your Harley-Davidson Dealer.)

NOTE: Diamondback Modular Brake Lines require both upper and lower brake line kits for installation. Subsequent changes due to handlebar modifications may only require a new upper line.

For alternate length and banjo angle upper brake lines, see the chart on the next page. Proper routing may require a different banjo angle from that used for stock fitment.

*NOTE: Installation of accessory risers and handlebars might require a change in clutch and throttle/idle cables and brake lines. Consult your Dealer for model-specific measurements prior to purchase.

A DIFFERENCE YOU CAN SEE. WHETHER YOU WANT TO GRAB A LITTLE MORE ATTENTION ON THE BOULEVARD OR LIGHT UP THE DESOLATE HIGHWAY, ACCESSORY LIGHTING GIVES YOU OPTIONS. FROM EURO-INSPIRED PROJECTOR BEAM HEADLAMPS TO AUXILIARY TURN SIGNALS, YOU CAN EQUIP YOUR BIKE TO STAND OUT FROM THE CROWD OR STAND UP TO THE DARK.

LOUD AND CLEAR

Easy to hear and impossible to ignore. The Premium Air Horn is one of the loudest motorcycle horns available and is tuned to mimic a truck horn to grab attention. The self-contained compressor and horn bell are designed for durability and easy installation.

LET THERE BE LIGHT
Featuring the latest in reflector optic design, Harley-Davidson® Original Equipment headlamps and accessory Dual Bulb Halogen Headlamps offer low-beam performance that is superior to traditional sealed beam bulbs. The wide curb-to-curb low beam pattern provides a great around-town view. Cruising down the back roads, Dual Bulb High Intensity Discharge (HID) or Dual Bulb Halogen headlamps add extra punch down the center of the lane, all while maintaining their excellent low-beam performance.

A. HIGH INTENSITY DISCHARGE (HID) DUAL BULB HEADLAMP KIT*
Cut through the darkness. The Harley-Davidson High Intensity Discharge Headlamp Kit features a true HID (Xenon) low beam bulb that projects a curb-to-curb spread of "blue/white" light. Compared to the yellow light of a traditional Halogen bulb, the HID lamp produces a "Daylight Color Impression" that appears more natural to the user.

The HID Dual Bulb Headlamp assembly features unique advanced optics with separate low and high beam reflectors dedicated to focus the light for optimal illumination. The HID low beam is always illuminated, providing a wide pool of light, and the separate Halogen high beam bulb adds a focused shaft of light down the center of the lane.

The HID Dual Bulb Headlamp is not just a high-performance bulb, it's a complete lighting system. The system includes the HID bulb, an electronic starter, and a ballast system. The bulb is a complex tube that replaces the filament with arc-producing electrodes. The starter allows quick ignition of the arc, and the ballast converts incoming power to the high voltage needed to maintain the glow. The Xenon-filled HID bulb is resistant to vibration, and has a life expectancy of up to 10 times that of a Halogen bulb. The headlamp kit is DOT approved for use in all 50 states.

The complete Headlamp Kit includes the shock and vibration resistant housing HID low beam bulb, halogen high beam bulb, starter, waterproof ballast, and all necessary wiring.

68094-06C **$524.95**
Fits '96-later Electra Glide® and Street Glide models.

68043-06B **$524.95**
Fits '02-later Road King® models.
(Available September 2008)

NOTE: HG-Lamp contains Mercury. Manage in accordance with disposal laws.

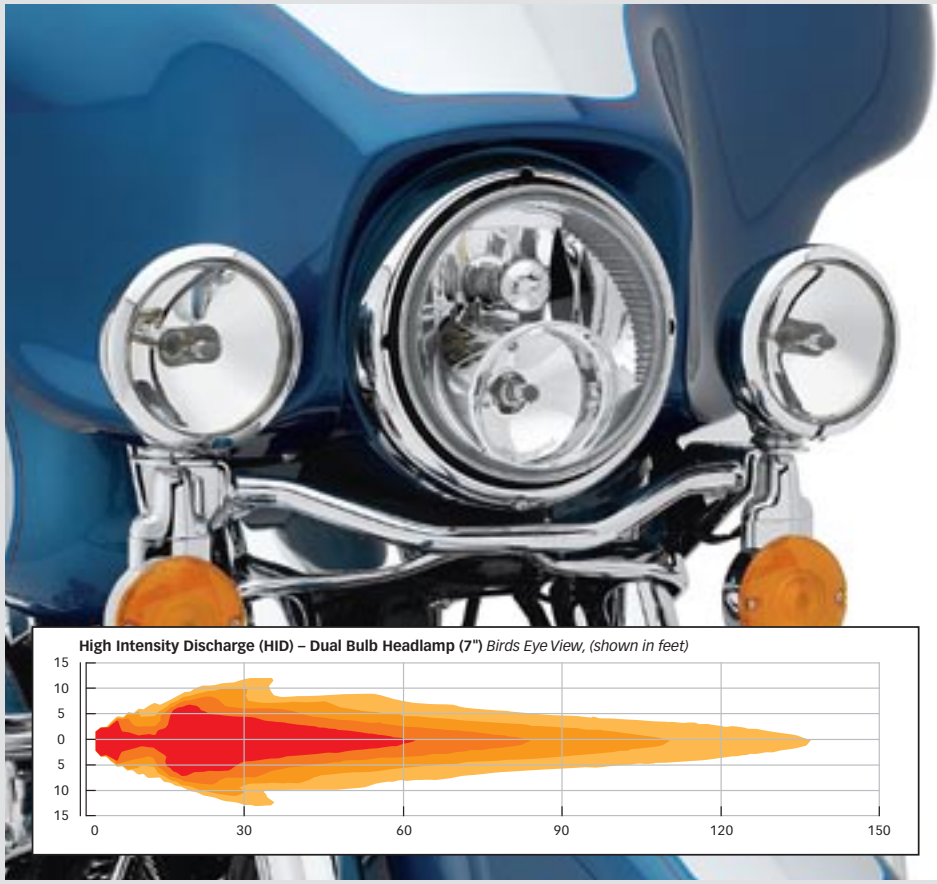

B. DUAL BULB HALOGEN HEADLAMP KIT
The Dual Bulb Halogen Headlamp features advanced reflector optics and separate bulbs for high and low beam functions. The euro-inspired projector beam styling combines a state-of-the-art look with a CAD designed faceted reflector bowl that is optimized for crisp patterns and light cut-off. The single upper bulb functions in low beam, and both upper and lower bulbs operate in high beam. The low beam setting produces a wide curb-to-curb light pattern, and the high beam adds focused light down the center of the lane without compromising width. Kit includes housing, 55-watt low beam halogen lamp, 35-watt high beam halogen lamp and all necessary mounting hardware. Does not meet ECE regulations.

Step Into the Light

Believe it or not, chrome isn't the brightest accessory you can use to customize your ride. Harley-Davidson offers a variety of lighting options that can add the perfect finishing touch to nearly any part of your bike.

ELECTRA-GLO™ LIGHT PODS

Light up the night. These compact LED Light Pods radiate a neon-like glow to accent almost any part of the motorcycle. Featuring a solid-state circuit board sealed against the weather, these self-adhesive lights can be placed under the tank, behind the air cleaner, or almost anywhere your imagination takes you. Electra-Glo LED lighting draws minimal amperage, allowing lights to be left on for hours when parked. Light Pods connect directly to the motorcycle wiring harness, and the one-way wiring simplifies installation.

ELECTRA-GLO™ LIGHT POD KIT*

The complete kit includes 6 light pods, basic wiring in a selection of lengths, adhesive wire ties, and a compact on/off switch with rheostat to control the lighting intensity. Available Expansion Kits provide plug-in installation of additional lighting.

Fits all models. Lights are intended for display use only. Some local regulations prohibit using colored lights during vehicle operation on public streets.

SAY IT IN MOTION. CUSTOM WHEELS ARE ONE OF THE EASIEST WAYS TO COMPLETELY REVAMP THE LOOK OF YOUR MOTORCYCLE. PICK A NOSTALGIC LACED WHEEL OR A CONTEMPORARY CAST OR FORGED WHEEL. EITHER WAY, YOU GET WHEELS THAT MEET THE HIGHEST STANDARDS OF REAL-WORLD PERFORMANCE AND DURABILITY.

SPROCKETS AND ROTORS

For a complete look throughout your motorcycle, matching wheels, brake rotors and drive sprocket will do the trick in keeping your visual appearance consistent. Select compatible brake calipers, axle nut covers and rotor hardware to add the finishing touch.

A Visual Turning Point

From a visual perspective, the wheels, sprocket and brake rotors make up almost half of the motorcycle's profile, and set the styling direction for the whole bike. Choose wisely. Harley-Davidson® Forged, Cast and Laced wheels undergo hundreds of hours of real-world testing, to meet the highest standards of performance and durability. All Harley-Davidson wheels bear DOT and JWL markings, ensuring that they meet the requirements of those agencies.

CUSTOM WHEEL ORDERING PROCESS

STEP 1: Select a wheel part number for your specific fitment.

STEP 2: Select the wheel installation kit for your specific application (model, year and front or rear). NOTE: If your model is not specified in the wheel fitment, a wheel installation kit will not make the wheel fit your model.

STEP 3: Refer to the instruction sheet included in your wheel kit to determine the necessary parts required from the installation kit.

STEP 4: Use only Harley-Davidson approved tires. Using non-approved tires, tires from different manufacturers, or tires with non matching tread patterns on the same motorcycle can adversely affect handling and stability.

BLADE FORGED WHEEL

REAPER CAST WHEEL

FORGED WHEELS

Performance Under Pressure One-piece forged wheels are manufactured by squeezing a solid billet of aerospace-grade 6061-T6 aluminum under extreme pressure. The resulting material is very strong, so the final wheel design can have a lighter, more open style. The forging process aligns the metal grain for maximum strength, and the non-porous surface takes chrome like no other. Harley-Davidson custom forged wheels are manufactured in the USA by Alcoa®, the inventor and leading supplier of forged wheels to the transportation industry.

CAST WHEELS

Liquefied Metal One-piece cast wheels are manufactured by pouring molten aircraft-grade aluminum into a wheel-shaped mold. This casting method allows the wheel design to feature hollow spokes and hubs for lighter weight, and permits incorporating styled surface textures that add visual interest. The casting process produces a wheel surface that is ideal for machining and polishing, and accepts both chrome and painted finishes for a distinctive look. Available in a wide variety of styles, cast wheels are an affordable customizing option.

Wheel Installation Kits Once you select your wheel style, select the Wheel Installation Kit designed specifically for your motorcycle. Kit includes the bearings and spacers required for installation.

A. CHROME NINE-SPOKE CAST WHEEL

Add a splash of chrome. Also available for Softail models, these fully polished nine-spoke wheels are styled to match the Original Equipment wheels on many Touring models. The rib on the Original Equipment wheel spoke has been removed to provide a smooth uninterrupted spoke finish. Special masking was developed to prevent plating corrosion inside bolt holes and bearing sleeve areas. Certain wheel kits require separate purchase of model-specific Wheel Installation Kit.

SELECT A DESIGN THAT MIRRORS YOUR ATTITUDE AND REFLECTS YOUR BIKE'S SOUL. BECAUSE THE PAINT'S DESIGN SETS THE TONE FOR THE REST OF THE ACCESSORIES, THE OVERALL LOOK OF YOUR BIKE WILL FALL INTO PLACE.

There is simply no better way to start or finish your personalized motorcycle than with a genuine Harley-Davidson® custom paint set.

Custom paint is the most visible piece of any customizing strategy. The design, depth and richness set the tone for the rest of the accessories, and the finish sets your bike apart from the crowd.

Harley-Davidson revolutionized the process. we hand-pick our custom painters and continually monitor the painting process and finish quality to guarantee your satisfaction. Every Color Shop custom paint set begins with virgin factory sheet metal, ensuring the best starting point, and we apply only the finest primers, paints and coatings to achieve the richest, fade-free finish. Finally, we stand behind every Color Shop paint set with an unmatched 2-year Harley-Davidson warranty.

To protect the exclusive nature of each custom paint set, the Color Shop team introduces new designs just twice a year. Sets are distributed in limited numbers to Harley-Davidson dealers world-wide, so you shouldn't see the same design parked next to you on Main Street.

But don't be disappointed if your Dealer doesn't have the paint set you crave in stock. He may be able to help you locate the set by accessing the dealer-exclusive Parts Locator system.

RADICAL COLLECTION – TEPHRA
Indiscriminate heat raining down from the sky. With bold overlapping red and cream flames, this paint calls to mind a hailstorm of fire. RADICAL COLLECTION – SOLSTICE
Start the season off right. These sweeping airy flames set fire to the rich black paint, like the Northern Lights decorate the sky. RADICAL COLLECTION – MONTEZUMA
Call out the Marines. Air brushed granite and razor-sharp blue strokes follow the bike's lines and sit atop a vivid black base in a testament to strength and determination. The Aztec slate grey looks cool to the touch but heats up in a crowd. *Available starting November 2008 – see your Dealer for availability.*

RADICAL COLLECTION – APOCALYPSE RED
In a design the Four Horsemen would be proud of, the red-orange flames emerge from the rich gloss black in a fury of judgment. Striking and subdued tone-on-tone skulls smile in doomsday detail as hand-laid pinstripes accentuate the entirety of the bike. Devil-may-care script Harley-Davidson sends the message home. *Available starting December 2008 – see your Dealer for availability.*

CUSTOM GRIND COLLECTION – CHISEL
Freedom from the stone tomb. With exposed sheet metal, this bare bones paint pays no mind to the velvet gingerbread rider. The rubbed steel treatment carries through both fenders to round out the unvarnished attitude. A Dark Custom skull casts a foreboding and stone cold glare on the road. *Available starting September 2008 – see your Dealer for availability.*

Notice: The prices appearing in this catalog are the manufacturer's suggested retail prices. Actual retail prices may vary.

CUSTOM GRIND COLLECTION – ALPHA
With a street tartan splayed across a satin black base, this clan rides with an iron fist. In the mark of the rebel tribe, the distinctive metallic plaid is accented with a gothic Harley-Davidson script logo. As it once was, so shall it always be. *Available starting September 2008 – see your Dealer for availability.*

SURGE CUSTOM COLOR – WIRED
Surge Custom Color Sets are created with revolutionary ultra-thin applied graphics. The satin silver skull and surrounding free-form flames appear to be exposed metal, and the chalk-effect outlines lift the design from the matte black surface. The entire surface is covered with satin clear coat for added depth.

SURGE COLOR SETS

It's your opportunity to create timeless art on wheels. You supply the sheet metal and the color choices, and we return a completed paint set, finished to legendary Harley-Davidson quality standards.

Color Shop Sheet Metal Exchange is available in two different programs, California Kid Custom Paint and Spectrum Custom Paint.

The Color Shop Sheet Metal Exchange Program allows you to refresh weather-worn bodywork with a precise match to the original finish. It also permits you to dramatically change the look of a used police or civilian motorcycle to match your color taste. SPECTRUM CUSTOM COLOR PROGRAM

Tap into a quarter-century of legendary Harley-Davidson® design and styling expertise.

The Spectrum Custom Color Program allows you to draw from virtually every standard color and logo combination offered by the factory since 1979. Select from classic two-tone panel designs, color schemes, and decal or medallion logos to make your dream come alive. You have the freedom to select from an almost unlimited combination of colors to color-match current or historic Harley-Davidson® models, or you can select from an endless number of automotive-style color choices.

You can supply your own Original Equipment undamaged sheet metal, or buy a replacement primed set; either way, you can create your own look and still get the high quality you expect from a factory-painted Harley® motorcycle.

Available exclusively through your participating Harley-Davidson® Dealer, the dealer can help you create your design, choose your colors, and select a decal or silk-screen graphic to finish the look.

THE HARLEY-DAVIDSON® SPECTRUM CUSTOM PAINT PROGRAM*

The Spectrum Custom Paint Program allows you to have your Harley® motorcycle painted to match any color scheme you can imagine. Start with your own sheet metal, or buy a replacement set. You can have individual fenders and tanks painted, or order complete sets, using the part numbers shown below. If the customer's existing sheet metal is being used, it is the customer's responsibility to submit original condition, undamaged parts in a timely manner. See your dealer for details.

You can choose your main color, panel color, top coat, and pinstripes. You can specify a "clear," "pearl" or "candy" finish top coat. The top coat is a special paint that will work with the main and panel colors to create different effects.

Shown on these two pages are just a few of the unlimited color options available. Mix & match colors from vintage bikes, classic cars, or any other monochrome or two-tone paint scheme you can think of.

A. H-D® SMART SECURITY SYSTEM

The H-D Smart Security System offers automatic self-arming and hands-free disarming for vehicle electronic security functions for your '07-later Harley motorcycle. The Hands Free Fob communicates directly on its own unique and individualized frequency with the Hands Free Security Module and Antenna. Attach the Hands Free Fob to your vehicle ignition key ring. As you upright your vehicle or switch the ignition on, the Hands Free Fob will communicate the Security System "disarm" command allowing you to start your vehicle. After riding your vehicle, park and switch the ignition off with your key. Within 5 seconds the Security System will automatically self-arm, disabling your vehicle starter, ignition and electronic fuel injection (EFI). The rider may also disarm the system by keying a previously entered personal code on the turn signal switches. A flashing status indicator informs the rider that the Smart Security System is armed or disarmed. The Smart Security System allows configuration to include the Transport Mode or Extended Storage Mode. The Smart Security System includes: Hands Free Security Module (Integrated Security Sensor and Turn Signal Module), Hands Free Fob, Antenna Module, Antenna Harness and Antenna Mount (Dyna models).

C. HARLEY-DAVIDSON® FACTORY SECURITY SYSTEM

Equip your '06-earlier Harley-Davidson® VRSC™, Sportster®, Dyna®, Softail® or Touring model with the security system designed and approved by The Harley-Davidson Motor Company.

When armed, the Security System disables the starter and ignition while monitoring the electrical system and vehicle motion with adjustable sensitivity. Minor disturbances trigger a momentary warning; major ones an unbroken thirty-second alarm, after which the Security System returns to monitoring. A distinctive four-way flasher pattern is the alarm signal. An optional self-powered Smart Siren Kit adds a piercing scream that sounds even if the battery cable is cut.

The Security System is armed and disarmed with a remote control waterproof key fob utilizing state-of-the-art rolling code technology. If the key fob is not available, the rider may arm or disarm the system by keying a previously entered personal code on the turn signal switches. A flashing status indicator informs the rider that the Security System is armed or disarmed.

When armed in the Transport Mode, the Security System disables the starter and ignition, but monitors only the electrical system, not vehicle motion. The vehicle may be moved but electrical tampering triggers an alarm.

An Extended Storage Mode keeps the battery from discharging when the Security System is armed for extended periods of time.

The Security System is compatible with FL Touring models equipped with approved TLE/Ultra Sidecars when the system is configured as described in the SIDECAR OWNER'S MANUAL.

SCREAMIN' EAGLE® SYN3® SYNTHETIC MOTORCYCLE LUBRICANT, SAE 20W50

TESTED-CERTIFIED for use in Harley-Davidson® engine, primary chaincase and transmission applications, Screamin' Eagle® SYN3® Synthetic Lubricant makes changing and topping- off fluids a simple one-product process. Developed with a proprietary three synthetic basestock formula, Screamin' Eagle SYN3 Lubricant is formulated to provide for long-term protection and engine cleanliness requirements, and to provide superior high-temperature protection for high-output engines. SYN3 Lubricant is formulated to maintain the coefficient of friction for proper clutch operation and to provide the proper lubrication to the primary chain drive. In addition, SYN3 Lubricant is designed to provide the correct lubricity for the anti-wear requirements of transmission gears and for improved seal protection. This formula is approved by Harley-Davidson for use in all stages of engine life and is not detrimental to the break-in stage of engines.

WHAT ARE THE KEY BENEFITS TO USING SYN3® MOTORCYCLE LUBRICANT?

- SYN3 Lubricant can be used in the engine, primary chaincase, and transmission.
- SYN3 Lubricant offers improved film strength for superior wear protection at high temperatures, and improved deposit control for a cleaner engine, transmission, and primary chaincase.
- SYN3 Lubricant is formulated for reduced oil consumption, improved wear protection, high-temperature detergency, and superior overall field performance.

WHAT'S THE DIFFERENCE BETWEEN SYNTHETIC AND PETROLEUM-BASED LUBRICANTS?

Both synthetic and petroleum-based lubricants are derived from the same crude oils. But that's pretty much where the similarities end. Unlike their petroleum-based counterparts, which inherit physical components (including contaminants) of the source crude oil in the refining process, synthetic lubricants are manufactured from basestocks that are custom-designed from scratch to have desired properties for specific purposes, meaning that engineers have complete control of the lubricant from start to finish – at the molecular level.

WHAT DOES SYN3® SYNTHETIC MOTORCYCLE LUBRICANT DO FOR MY DRIVETRAIN?

SYN3® Synthetic Motorcycle Lubricant offers all the benefits of Genuine Harley-Davidson® 360 Motorcycle Oil, and:

- Offers superior wear protection at higher temperatures
- Keeps engines, transmissions and primary chaincases cleaner
- Meets the anti-wear lubricity requirements of all transmission gears
- Lubricates all primary chaincase components
- Delivers smooth, sure clutch operation
- Provides long-term protection of all internal components
- Improves seal and gasket performance
- Offers superior performance in high-output engines

WHEN CAN I START USING SYN3 SYNTHETIC MOTORCYCLE LUBRICANT?

Right away. SYN3® Synthetic Motorcycle Lubricant is approved for all stages of engine life, including the first service interval – which means it's not detrimental to engine break-in. You can even use it as a first fill upon delivery of a new motorcycle.

SINCE SYN3 SYNTHETIC MOTORCYCLE LUBRICANT IS A HIGH-PERFORMANCE LUBRICANT, CAN I WAIT LONGER BETWEEN CHANGES?

No. As with petroleum-based engine lubricants, you should drain and replace the synthetic motorcycle lubricant in your engine at every 5,000-mile service interval. You should also change your oil filter anytime the engine lubricant is changed. If you ride your motorcycle hard, under dusty conditions, or in cold weather, you should change your SYN3® Synthetic Motorcycle Lubricant and oil filter more often. You should always change your engine lubricant and filter prior to any extended storage so that your engine is clean and free of any contaminants during this time.

TESTED-CERTIFIED SYN3® EXTENDED SERVICE INTERVALS:

Primary Chaincase

Protect your Harley-Davidson® motorcycle with H-D® 360 Oil

Harley-Davidson Motorcycle Oil is unlike off-the-shelf oils. H-D® 360 is a complex mixture of carefully selected premium quality mineral oil and an exclusive performance additive package. Designed for maximum performance in H-D® engines, H-D 360 is a unique oil for a unique application.

WHAT DOES H-D® 360 MEAN?
The name Harley-Davidson 360 has its roots in the testing criteria applied to certify this oil. More than just a dynamometer test, it is a designation of an entirely new performance rating system. To earn the name H-D 360, this oil had to outperform all others on a full round of tests. Laboratory bench testing measured viscosity retention and oxidation stability. Next, the oil was run on the open road under high ambient temperatures and high load conditions. After each test, the engineers performed a complete engine tear-down and analysis. Plenty of oils vied to carry the name Harley-Davidson, but only one oil met the challenge: H-D 360.

WHAT VISCOSITY GRADE SHOULD I USE IN MY HARLEY® MOTORCYCLE?
The recommended viscosity grade for all temperature conditions is SAE 20W50 Harley-Davidson Motor Oil. SAE 10W40 H-D Motorcycle Oil is also available and appropriate for low temperature climates. The SAE 50 H-D Motorcycle Oil is satisfactory in ambient temperatures of 60-80°F, and the SAE 60 H-D Motorcycle Oil in ambient temperatures above 80°F. SAE 20W50 covers the broadest range of operating temperatures.

		SAE 20W50			
0	20	40	60	80	100° F
-18	-6	4	16	27	28° C
SAE 10W40			SAE 50		SAE 60

WHAT DOES HARLEY-DAVIDSON® MOTORCYCLE OIL DO FOR MY ENGINE?
- Protects the engine from rust and corrosion
- Keeps the engine clean
- Cools engine parts
- "Seals in" combustion pressure
- Prevents foaming
- Permits easy starting at a wide range of temperatures
- Provides quick oil circulation
- Reduces friction and power loss

HOW OFTEN SHOULD I CHANGE MY MOTORCYCLE ENGINE OIL?
You should change your motorcycle engine oil and engine oil filter at the first 1,000-mile service interval and at every 5,000-mile service interval thereafter. If you ride your motorcycle hard, under dusty conditions, or in cold weather, the engine oil and filter should be changed more often. You should always change your engine oil and filter prior to winter storage (or any extended storage) so that your engine oil is clean and free of contaminants for this time period.

CAN I GO LONGER BETWEEN OIL CHANGES BY CHANGING THE FILTER?
NO! The job of the oil filter is to remove dust, soot and other solid matter. Filters cannot remove water, gasoline or acids and cannot do the job of oil additives that have been used up. You should change your oil filter at the first 1,000-mile service interval and at every 5,000-mile service interval thereafter or prior to winter or extended storage periods.

GENUINE HARLEY-DAVIDSON® H-D® 360 MOTORCYCLE OIL

Harley-Davidson Genuine H-D 360 Motorcycle Oil is developed and tested for use in Harley-Davidson® motorcycles. Our unique additive package helps prevent engine wear and helps keep your engine cooler, cleaner, free of sludge, varnish and corrosion.

Harley-Davidson V-Twin motorcycles operate at higher temperatures than water-cooled automobiles, thus a specific high temperature additive package is necessary to protect the engine. Be assured, H-D 360 Oil can be trusted in a Harley-Davidson engine.

Available in SAE 10W40, SAE 20W50, SAE 50, and SAE 60. Refer to your Harley-Davidson owner's manual for the proper SAE grade recommendation based on the climate and temperature range you ride in.

OIL FILTERS

The function of an oil filter is to remove dust, soot and other solid matter which contribute to engine wear. Filters cannot remove water, gasoline or acids and cannot do the job of oil additives that have been used up. You should change your oil filter at the first 1,000-mile service interval and at every 5,000- mile service interval thereafter or prior to winter or extended storage periods.

A. DEFINITIVE5™ FILTRATION SYSTEM

Stylized motor oil filtration system featuring integral pressure relief and anti-drain back valves and a replaceable filter element. The removable end cover allows for easy drain, preventing used fluid from draining onto the crankcase. Cover, housing and threaded adapter are CNC machined from aluminum and steel. The technologically advanced synthetic filter media provides nominal 5 micron (1 micron = .001mm) filtration which retains dust, soot and other solid matter with low internal pressure loss. The disposable filter element is more environmentally friendly as it does not contain the metal structure of a spin-on filter. Includes cover wrench.

Fits '92-later XL, FXR, Softail, Touring and '91-later Dyna models. Does not fit models equipped with Premium Oil Cooler Kits, Touring models equipped with Sidecar, or some models equipped with Front Spoilers. Can be used on '99-'06 Touring models equipped with Oil Cooler P/N 62895-03A.

BUILD YOUR BIKE AT HARLEY-DAVIDSON.COM/CUSTOMIZER.

THE CUSTOMIZER INTERACTIVE WEB TOOL LETS YOU SELECT YOUR BIKE, INSTALL AND REMOVE ACCESSORIES, AND VIEW, SAVE AND PRINT THE LIST FOR THE RIDE YOU'VE CREATED. THE CUSTOMIZER GIVES YOU THE FREEDOM TO TRY DIFFERENT OPTIONS, REDUCES THE TRIAL AND ERROR, AND LETS YOU SEE THE VISUAL IMPACT OF AN ACCESSORY BEFORE YOU BUY.

STEP BY STEP: LOG IN AT WWW.HARLEY-DAVIDSON.COM/CUSTOMIZER

STEP 1: FANTASIZE

To begin, the Customizer allows users to choose a motorcycle family, model and color. Most current VRSC,® Sportster,® Dyna,® Softail® and Touring models are available at the click of a mouse.

STEP 2: VISUALIZE

This step may be the most important in your custom journey. Decide here what kind of ride you need. Do you want to equip your bike for cruising, touring or as an all-out custom?

STEP 3: CUSTOMIZE

Choose accessories from a long list of options. As you select the parts, they appear on the bike to give you a feel for what looks right. The Customizer also lets you know if you need any additional hardware for installation.

STEP 4: REALIZE

The Customizer lets you "window shop" the huge collection of Harley-Davidson Accessories. Save your design, or print your list and bring it in to your local Harley-Davidson® dealer to make your dream bike a reality.
