# BUILDING YOUR PERFECT RIDE

*Regardless of which bike you choose, any Harley-Davidson® motorcycle can be tailored to match your unique body type, riding style and personality. By adding Harley-Davidson® Genuine Motor Parts and Accessories, any model can become the perfect one-of-a-kind ride. The most important piece of the puzzle is you.*

*Take this Softail® Fat Boy® motorcycle, for example. Look how one model can be tailor-made for different riders and different roads with three completely different approaches to customizing. It's not about what everybody else is doing. It's about what's right for you.*

## **WHERE TO BEGIN?**

Customizing your bike relies on three key elements: Fit, Function and Style. First, your bike needs to be set up to accommodate your physical stature. Second, your bike should be equipped to tackle the demands of the roads you want to ride. And last, your bike should be dressed to show off your personality. [Turn the page for more details.](#)

## TAILOR YOUR RIDE.

*How you fit your motorcycle is a major factor in maximizing comfort and enjoyment. The correct riding position can build confidence when you put your feet down at a stoplight. It can enhance the feeling of control on a winding road. And it can add 100 miles to a day's ride. It's as simple as selecting the right seat, handlebar and ride height.*

### FOUR KEY AREAS

Enhance your feeling of control and confidence with a natural position, having all controls at just the right reach. Consider these four adjustable areas to confirm your riding fit:

#### A. RIDE HEIGHT

*Adjusting the ride height by lowering the suspension may be the first step in fitting the bike to your inseam length. Combining a low-profile suspension and a narrow seat is the easiest way for a shorter rider to fit comfortably on a larger bike.*

#### B. BUTT PLACEMENT

*For maximum comfort, a broad seating surface distributes weight to reduce pressure points, and a narrow, tapered thigh zone provides easier reach to the ground. A stepped seat profile keeps the rider from sliding back during acceleration.*

#### C. HAND POSITION

*Where the bar positions your hands, wrists and arms directly affects how you feel on the motorcycle. The shape of the bar determines your reach to the hand controls and, therefore, your overall comfort and feeling of control.*

#### D. FOOT LOCATION

*A long stretch to the controls or a "knees-high" cramped riding position puts strain on your body after even a short ride. Repositioning your feet on the controls relieves muscle tension, takes pressure off the tail bone, and reduces rider fatigue.*

### STOPPING BY THE FIT SHOP

The more you ride, the more you'll appreciate feeling good in the saddle. But finding the right fit by trial and error can be frustrating. And expensive. Don't go it alone.

*The H-D® Fit Shop experts at your local Harley® dealership are here to share years of experience and priceless tribal knowledge. They've helped thousands of other riders find the perfect combination of seat, suspension, and hand- and foot controls to maximize their riding comfort and enjoyment. Stop by and see for yourself. They're here to help you find your fit.*

**BE PREPARED NO MATTER THE DESTINATION.**

*How you equip your bike for the miles ahead significantly impacts your comfort and convenience. Saddlebags, windshields, luggage racks and passenger backrests all help you get the most out of your ride and keep your options open. And if you need versatility, Harley-Davidson® offers a full lineup of detachable options to keep you ready for any situation.*

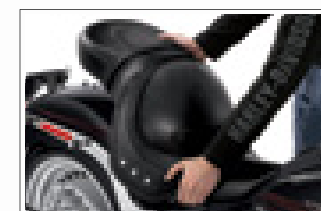

**DETACHABLES AND INSTALLATION**

Designed to be installed or removed in seconds, the Harley-Davidson® Detachables accessories give you the flexibility to outfit your bike on the fly, changing the look and function of your motorcycle in minutes.

**INSTALLING A DETACHABLE WINDSHIELD**

*Designed to be installed or removed without tools in seconds, a Detachable Windshield gives you the freedom to define your ride at the drop of a hat. Ride across country protected from the elements, then quickly remove it to hit the streets in style.*

**CHANGING A SEAT**

*Switching out your seat is simple. And because certain rides call for certain styles, some folks like to have multiple seats to match the occasion. Install a comfortable, supportive touring seat for the longer treks, and swap it out for a low-profile seat for a night on the town.*

**INSTALLING A DETACHABLE BACKREST**

*With a detachable backrest and luggage rack, your bike can go from a stripped-down afternoon cruiser to a fully loaded two-up touring machine in seconds. Comfort- and convenience-driven accessories ease the physical strain of life on the road, and make for a less stressful ride.*

**FOUR KEY AREAS**

Check out these four critical areas to choose the options that will work hardest for you when out and away from the homestead.

**A. WINDSHIELDS**

*At speed, your chest captures all the air pressure and causes fatigue in your arms, neck and shoulders. Shaped to divert the air, rain and road debris, a windshield can add hours of riding comfort.*

**B. PASSENGER BACKRESTS**

*A detachable backrest can take your ride from a stripped-down cruiser to a two-up touring machine in seconds. After all, a comfortable and confident passenger is a happy passenger.*

**C. LUGGAGE RACKS**

*Luggage racks are versatile hardware that help you take more stuff along for the ride. Outfitted with a soft duffel, a luggage rack can haul a change of clothes, a rain suit and all the gear you need.*

**D. SADDLEBAGS**

*Versatile saddlebags provide ample storage and carry the weight low on the bike to maintain a good riding balance. Detachable leather bags allow you to strip the bike down when you get there.*

If you are looking for the basics and beginning accessories, look to your family Fit and Function section for Rider's Essentials. They're a perfect custom foundation.

# DEFINING YOUR STYLE

## MAKE YOUR BIKE SING...

*For those that walk on the wild side and don't mind showing it, this is your time to shine. Start with high-impact chrome wheels, pipes and front forks, and then finish it off with details like custom trim pieces and collections that will leave a lasting impression.*

### ...OR MAKE IT GROWL.

*If you come alive at night, or just want to add a touch of attitude, you're in the right place. Slap on a wicked grind or denim paint set to make the streets hiss, then finish your engine, pipes and hand controls in black to mark your territory.*

# REALIZING YOUR DREAM BIKE

## BUILD YOUR BIKE ONLINE.

*The Customizer interactive Web tool lets you select your bike, install and remove accessories, and view, save and print the list for the ride you've created.*

*The Customizer gives you the freedom to try different options, reduce the trial and error, and lets you see the visual impact of an accessory before you buy.*

**STOPPING BY THE FIT SHOP**

**A. SEATS**

*Where the seat positions your waist relative to the foot controls, hand controls and the ground will impact your riding comfort, so test-sit a variety of seats to get it right.*

**B. FOOT CONTROLS**

*Where your feet meet the controls is equal parts riding style and physical necessity; it also determines the angle of your hip, knee and ankle, so keep it comfortable.*

**C. HANDLEBAR & CONTROLS**

*Each bar has a unique combination of rise, width and pullback—putting your hands, wrists, arms and shoulders in different configurations. See what feels natural and stick with it.*

**D. RIDE HEIGHT**

*Suspension components and seat shape combine to determine your riding position. Finding the right combination is the easiest way for a shorter rider to fit comfortably on a larger bike.*

**GEARING UP WITH RIDER ESSENTIALS**

Selecting even the basic accessories can be daunting. Start by adding versatility and long-haul comfort. These windshields, backrests and luggage racks are designed to fit your specific VRSC™ model and will get you ready for the open road.

**WINDSHIELDS**

Whether it's for keeping bugs off your face or warmth in your body, a windshield has a huge impact on rider and passenger comfort. By diverting air pressure past your chest and over your helmet, a windshield can add hours of riding comfort. For maximum protection from wind and weather, select a windshield that tops out just below your line of sight. You avoid looking through rain drops, bug spots and road grime to get a clear view of the highway ahead.

**A. QUICK-RELEASE ULTIMATE TOURING WINDSHIELD**

You get quick on-and-off convenience, and a clean, custom look. No tools are required. The large-diameter of the BPF's internal piston allows a reduction in damping pressure, for better feedback and smoother action. This performance suspension kit also provides a very controlled feeling which leads to more rider confidence. The BPF's rebound and compression damping force settings are easily fine tuned via two adjuster screws located on top of the fork bolts. The spring pre-load is adjusted via a M5 hex screw on the axle holders. The rear Showa shocks feature 36mm pistons with piggyback nitrogen-charged reservoirs. The compression damping can be adjusted via a knob on top of the piggyback reservoir. The rebound is adjusted with a thumb wheel on the lower clevis. Rear spring pre-load is also adjustable on the shock for optimum 1G sag. The kit includes one set of Big Piston Front Forks and one set of rear shocks.

# Choosing a Backrest

A sissy bar upright and passenger backrest are the starting point to build a complete touring machine. The backrest provides long-range comfort and support, and adds a feeling of control and confidence for the passenger. For permanent installation, choose rigid sideplates and a style of upright that suits your riding style. For added flexibility, choose a detachable sideplate kit and appropriate Docking Hardware to make adding or removing a Detachable accessory a simple “slide and click” proposition.

**GENUINE HARLEY-DAVIDSON®  
SISSY BAR SIDEPLATES**

Add your choice of sissy bar uprights, backrest pads and luggage racks when you install rigid or detachable sideplates to your motorcycle. Manufactured and tested to rigorous Harley-Davidson standards, these sideplates are designed to specific model application for exact fit.

## A. PREMIUM OIL COOLER FOR SPORTSTER® MODELS

Big Twin oil cooler technology for the Sportster® model. This vertical-mount cooler features a unique "Turbulator" system that efficiently distributes oil across the cooling chambers. The air fins feature several louvers to efficiently dissipate heat. The Premium Oil Cooler has been designed for ease of installation, and features oil lines that connect directly to the oil pump and engine. Kit includes oil cooler, oil lines and mounting hardware.

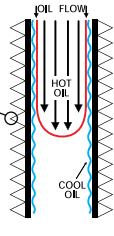

**62996-07** Fits '04-later XL models. **\$224.95**

**Inside View of Premium Oil Cooler with Turbulators**

Turbulators disperse and mix oil inside cooler to provide more efficient cooling capabilities. The cooler oil is not allowed to remain along the boundaries of the flow tube as in conventional coolers.

**Inside View of Conventional Oil Cooler without Turbulators**

Coolers without the Turbulator system allow oil to flow only in a straight path. Oil does not mix and the cooler oil remains along the outer boundaries, while the hotter oil remains along the center path of flow. Without the mixing effects of the Turbulators, the conventional oil cooler provides less efficient cooling capabilities.

# SPORTSTER® CHASSIS TRIM

## DEFINE YOUR LOOK.

*Customizing your motorcycle is about selecting accessories that work together to reflect your personality. Envision your bike as a whole and choose the options that will make that vision a reality. Developing a “look” for your bike doesn’t have to be difficult; before you start, just decide on a direction and stick with it.*

### BLACK & CHROME

Genuine H-D® Accessories are developed by the same folks that built your bike, so you can be assured that plated or painted parts will match the Original Equipment finishes for a unified look.

## FOCUS ON THE PROFILE

### FRONT END TRIM

*Custom fork sliders, wheels and rotors put your sense of style front and center. And simple additions like custom axle covers and hardware finish the look.*

### REAR END TRIM

*A chrome swingarm and custom wheels make a major visual impact, and easy-to-install axle covers, belt guards and custom hardware give a unified look.*

### HAND CONTROLS

*Adding mirrors, grips and a little chrome puts style in full view of the rider. A custom master cylinder, switch covers and hand levers give instant gratification.*

### FOOT CONTROLS

*Custom foot pegs, foot levers and shift linkages offer exceptional function and style, and highway pegs and engine guards add comfort and engine protection.*

### CONSOLES & GAUGES

*The link between your brain and the bike. Auxiliary gauges help you monitor your engine's vital signs, and a custom console says a lot beyond the numbers.*

### LIGHTING

*Lighting adds distinctive style and aids visibility. Choose from a variety of auxiliary lamps, headlamp trim and LED lighting to grab maximum attention.*

# DYNA® SEATS

## SEAT OF POWER

*The right seat is equal parts ergonomics and comfort. Its shape anchors your position and determines the reach to the ground and to the controls; and the padding supports your tailbone and hips to relieve stress and pressure. Pick the right one for you...and your passenger.*

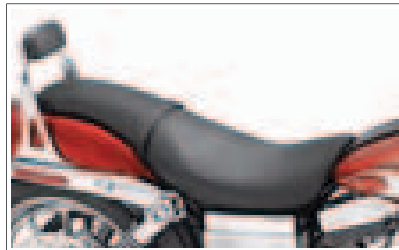

### COMFORT ZONE

A seat is more than just leather and foam. For maximum highway comfort, a broad seating surface distributes weight to reduce pressure points. For a short rider, a narrow, tapered thigh zone provides easier reach to the ground. And a stepped seat profile keeps the rider from sliding back during acceleration.

### DYNA SEAT TYPES

Solo or two-up, comfort or style, check out these seats to get an idea of where you want to sit.

#### LOW-PROFILE SEATS

*These saddles combine radical styling with a "deep in the bike" riding position. Long and lean, Badlander®, Brawler® and Sidekick® seats bring you lower to the ground than most other seats.*

#### POSITION SEATS

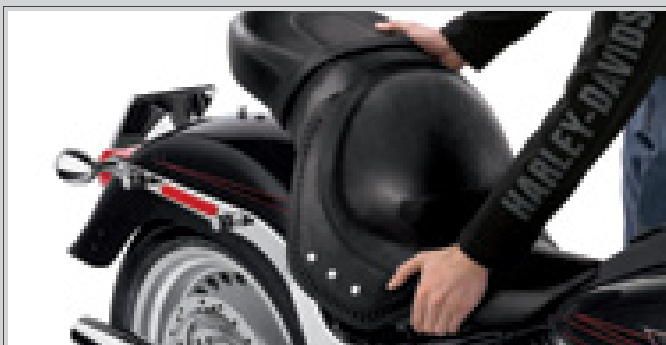

*Designed to place the rider in the best relationship to the controls, Reach® and Tallboy® seats position short and tall riders for a comfortable extension of the arms and legs.*

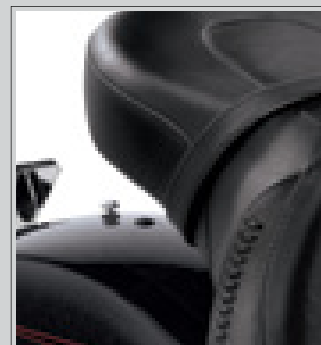

#### TOURING SEATS

*Designed for comfort, touring seats and passenger pillions offer a broad seating surface to reduce pressure points. The dish shape holds you in place and provides additional back support.*

### CHANGING YOUR SEAT

Switching out your seat is simple. And because certain rides call for certain styles, some folks like to have multiple seats to match the occasion. Install a comfortable, supportive touring seat for the longer treks, and swap it out for a low-profile seat for a night on the town. Please see your owner's manual for proper removal and installation of seats.

## NEVER IN A TIGHT SPOT

*On the road, you've got to feel good in the saddle. Whether you're cruising around town or out for the long haul, your bike should welcome you like an old friend and feel like an extension of yourself. So, once you've picked the bike, it's time to choose the suspension that best equips your ride to your personal dimensions.*

### A STRONG FOUNDATION

Being sure-footed at a stop or when parking your bike enhances your feeling of control and confidence. Adjusting the ride height by lowering the suspension may be the first step in fitting the bike to your inseam length. Combining a low-profile suspension and a narrow seat is the easiest way for a shorter rider to fit comfortably on a larger bike.

G

G. WIDE TIRE KIT – DYNA WIDE GLIDE SHOWN

**DEFINE YOUR LOOK**

*Customizing your motorcycle is about selecting accessories that work together to reflect your personality. Envision your bike as a whole and choose the options that will make that vision a reality. Developing a “look” for your bike doesn’t have to be difficult; before you start, just decide on a direction and stick with it.*

**BLACK & CHROME**

Genuine H-D® Accessories are developed by the same folks that built your bike, so you can be assured that plated or painted parts will match the Original Equipment finishes for a unified look.

**FOCUS ON THE PROFILE**

**FRONT END TRIM**

Custom fork sliders, wheels and rotors put your sense of style front and center. And simple additions like custom axle covers and hardware finish the look.

**REAR END TRIM**

A chrome swingarm and custom wheels make a major visual impact, and easy-to-install axle covers, belt guards and custom hardware give a unified look.

**WHEELS & BRAKES**

Custom calipers, wheels and rotors can have a radical impact on the look, but small additions like caliper trim and chrome hardware can provide subtle style.

**CHASSIS TRIM**

One of the easiest ways to customize your motorcycle is adding decorative covers. Fender trim, component covers and custom hardware all grab your attention.

**HAND CONTROLS**

Adding mirrors, grips and a little chrome puts style in full view of the rider. A custom master cylinder, switch covers and hand levers give instant gratification.

**FOOT CONTROLS**

Custom foot pegs, foot levers and shift linkages offer exceptional function and style, and highway pegs and engine guards add comfort and engine protection.

**CONSOLES & GAUGES**

The link between your brain and the bike. Auxiliary gauges help you monitor your engine’s vital signs, and a custom console says a lot beyond the numbers.

**ENGINE TRIM & HARDWARE**

The V-Twin engine is the heart of the bike. Adding well-chosen covers, a custom air cleaner and a decorative collection instantly sets your bike apart from stock.

**LIGHTING**

Lighting adds distinctive style and aids visibility. Choose from a variety of auxiliary lamps, headlamp trim and LED lighting to grab maximum attention.

**PERFORMANCE**

Performance options make a styling statement as well. Screamin’ Eagle® high-flow air cleaners and custom exhaust systems show that you mean business.

## ONLY YOU CAN DECIDE HOW YOU RIDE.

*Fit and function are the bare essentials of customizing. If you do nothing else to your motorcycle, make sure your bike fits your body properly and accommodates the type of riding you plan to do.*

*Having the right accessories makes all the difference in the comfort and control you feel on the road. Take the time to learn how your Softail® model can be personalized so you can get the most out of your riding experience.*

### FINDING YOUR FIT AND FUNCTION

To make your Softail® motorcycle fit you like a well-worn pair of jeans, your inspiration is only a few pages away. The page numbers listed at the right will help you quickly navigate to the section of the Catalog that most interests you. Turn the pages, and mark your trail with bent-over corners and scribbled notes in the margins. Customizing is a journey...travel well.

### STOPPING BY THE FIT SHOP

#### A. SEATS

*Where the seat positions your waist relative to the foot controls, hand controls and the ground will impact your riding comfort, so test-sit a variety of seats to get it right.*

#### B. FOOT CONTROLS

*Where your feet meet the controls is equal parts riding style and physical necessity; it also determines the angle of your hip, knee and ankle, so keep it comfortable.*

#### C. HANDLEBAR & CONTROLS

*Each bar has a unique combination of rise, width and pullback—putting your hands, wrists, arms and shoulders in different configurations. See what feels natural and stick with it.*

#### D. RIDE HEIGHT

*Suspension components and seat shape combine to determine your riding position. Finding the right combination is the easiest way for a shorter rider to fit comfortably on a larger bike.*

### GEARING UP WITH RIDER ESSENTIALS

Selecting even the basic accessories can be daunting. Start by adding versatility and long-haul comfort. These windshields, backrests and luggage racks are designed to fit your specific Softail® model and will get you ready for the open road.

# SOFTAIL® WINDSHIELDS

## SPLIT THE WIND

*At highway speed, you take the wind full-force in the chest, causing fatigue in your arms, neck and shoulders. Take the pressure off with an easy-to-install detachable windshield. Shaped to divert air, rain and road debris around the rider, a windshield can add hours of riding comfort.*

### SOFTAIL WINDSHIELD TYPES

#### SUPER SPORT WINDSHIELD

*Low and lean shape gives your bike a sleek and athletic appearance. Minimal coverage, but sometimes that's all you need to extend your ride into the next straightaway.*

#### COMPACT & KING WINDSHIELDS

*Standard issue windshield for any ride. The full coverage shape takes on everything the road throws at it while maintaining a clean and strictly business look.*

#### THE SELECTION GUIDE

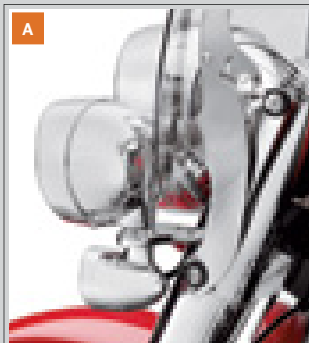

*For maximum wind protection, and the best view down the road, select a windshield that tops out just below your line of sight. Your dealer has the tools to make the selection simple.*

### CHANGING YOUR WINDSHIELD

Designed to be installed or removed without tools in seconds, a Detachable Windshield gives you the freedom to define your ride at the drop of a hat. Ride across the country protected from the elements, then quickly remove the windshield to hit the streets in style.

- A. STANDARD DETACH HARDWARE
- B. QUICK-DETACH HARDWARE

A. DETACHABLE SUPER SPORT WINDSHIELD

B. QUICK-RELEASE SUPER SPORT WINDSHIELD – INVERTED FORKS

**WINDSHIELDS**

Whether it's for keeping bugs off your face or warmth in your body, a windshield has a huge impact on rider and passenger comfort. By diverting air pressure past your chest and over your helmet, a windshield can add hours of riding comfort. For maximum protection from wind and weather, select a windshield that tops out just below your line of sight. You avoid looking through rain drops, bug spots and road grime to get a clear view of the highway ahead.

**A. DETACHABLE SUPER SPORT WINDSHIELD**

Super is an apt description for this do-it-all shield. Detachable convenience. Harley-Davidson sport styling. High-quality, lightly smoked Lexan® polycarbonate that shields you from the elements. The windshield mounts to the fork tubes with Detachable Docking Hardware (*sold separately*) for easy on-and-off convenience and a quick return to a sporting profile.

# SOFTAIL® SEATS

## SEAT OF POWER

*The right seat is equal parts ergonomics and comfort. Its shape anchors your position and determines the reach to the ground and to the controls; and the padding supports your tailbone and hips to relieve stress and pressure. Pick the right one for you...and your passenger.*

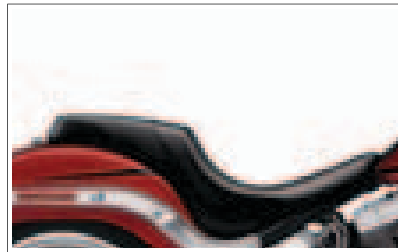

### COMFORT ZONE

A seat is more than just leather and foam. For maximum highway comfort, a broad seating surface distributes weight to reduce pressure points. For a short rider, a narrow, tapered thigh zone provides easier reach to the ground. And a stepped seat profile keeps the rider from sliding back during acceleration.

### SOFTAIL SEAT TYPES

Solo or two-up, comfort or style, check out these seats to get an idea of where you want to sit.

#### LOW-PROFILE SEATS

*These saddles combine radical styling with a “deep in the bike” riding position. Long and lean, Badlander®, Brawler® and Sidekick® seats bring you lower to the ground than most other seats.*

#### POSITION SEATS

*Designed to place the rider in the best relationship to the controls, Reach® and Tallboy® seats position short and tall riders for a comfortable extension of the arms and legs.*

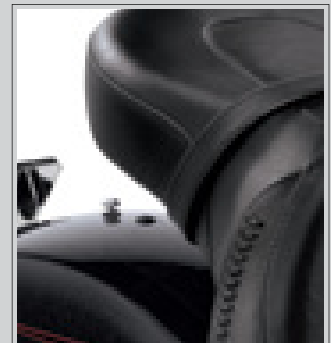

#### TOURING SEATS

*Designed for comfort, Sundowner™ and Signature Series™ seats offer a broad seating surface to reduce pressure points and a dish shape holds you in place and provides additional back support.*

### CHANGING YOUR SEAT

Switching out your seat is simple. And because certain rides call for certain styles, some folks like to have multiple seats to match the occasion. Install a comfortable, supportive touring seat for the longer treks, and swap it out for a low-profile seat for a night on the town. Please see your owner's manual for proper removal and installation of seats.

B. SIDEKICK SEAT

NOTE: Some Harley-Davidson® seats are made of leather. Fine leathers or other natural materials WILL gain "character," such as wrinkles or wear, with age. This is normal. A fine, aged patina and character wrinkles are a sign of the extremely high quality materials used to construct your seat or backrest. The appearance of scars or marks on the leather are a result of using natural leather panels and should not be thought of as an imperfection. Please use Harley-Davidson Leather Dressing P/N 98261-91V to protect your investment.

### A. CIRCULATOR SEAT PAD

Keep comfortable on your next long ride. These breathable Circulator Seat Pads feature 3D construction that promotes air movement and reduces heat build-up where the rider's body touches the seat. Designed to keep the rider cool by reducing the perspiration build-up between you and the seating surface, the Circulator Pad can be installed and removed in seconds for easy cleaning. The low-profile design minimizes seat-height change compared to inflatable pads, while enhancing comfort with its shock-absorbing construction. Manufactured of UV-stable materials, these seat pads resist fading when exposed to the sun. Elastic under-seat strap and non-slip base provide secure installation, and the available Circulator Passenger Pillion Pad attaches to the rider pad with hook-and-loop tabs.

**51076-10** Large Pad (16.0" width). **\$89.95**

# SOFTAIL® BACKRESTS & RACKS

## COMFORT ON THE GO

*With a detachable backrest and luggage rack, your bike can go from a stripped-down after-noon cruiser to a fully loaded two-up touring machine in seconds. Comfort- and convenience-driven accessories make for a less stressful ride.*

### THE RIGHT COMBINATION

#### BUILD YOUR OWN

*A detachable sissy bar upright and backrest pad is the starting point for a complete touring machine. Start by shopping the following pages and selecting all the components required for your particular model.*

#### ALL IN ONE PIECE

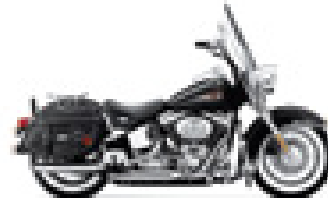

*When brought together, the sideplates, upright, pad and luggage rack form a complete assembly that can be installed or removed from your bike in seconds.*

### EQUIPPED FOR THE MILES AHEAD

Solo and stripped down, two-up and fully loaded, or anywhere in between, you can tailor any Harley-Davidson® motorcycle to meet the demands of the byways.

#### SOLO

*Go it alone in style. Saddlebags hold a change of clothes, a rain suit and the basic travel gear. A Solo Rack and soft bag can store any souvenirs you pick up along the way.*

#### TWO-UP

*Take a day's ride on a bike built for two. Saddlebags carry clothes and the essentials, while a Sissy Bar Backrest Pad provides hours of passenger comfort on the open road.*

#### SOLO WITH TOUR-PAK®

*Ride like you're on a mission. The saddlebags and Tour-Pak offer tons of storage space, and the Solo Mounting Rack positions the Tour-Pak Pad for maximum rider back support.*

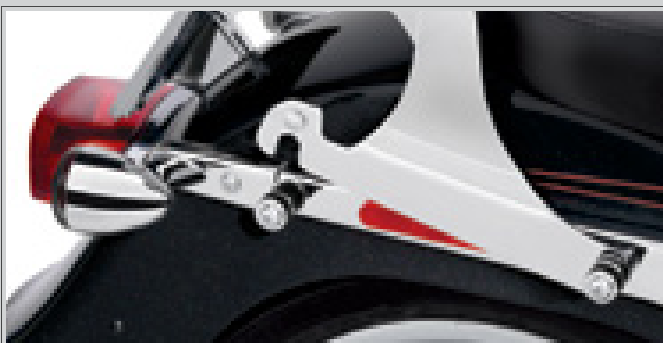

#### TWO-UP WITH TOUR PAK®

*The ultimate road trip. With all this space and comfort, you and one lucky passenger are fully-equipped to go wherever you want, for as long as you want.*

### CHANGING YOUR BACKREST

With a Docking Hardware Kit installed, adding or removing a Detachable accessory is a simple "slide and click" proposition. Rotate the cam-lock to release the sissy bar from the rear docking points. Pivot the sissy bar forward, and lift it free from the front docking points.

## Choosing a Backrest

A sissy bar upright and passenger backrest are the starting point to build a complete touring machine. The backrest provides long-range comfort and support, and adds a feeling of control and confidence for the passenger. For permanent installation, choose rigid sideplates and a style of upright that suits your riding style. For added flexibility, choose a detachable sideplate kit and appropriate Docking Hardware to make adding or removing a Detachable accessory a simple "slide and click" proposition.

### GENUINE HARLEY-DAVIDSON® SIDEPLATES

Add your choice of sissy bar uprights, backrest pads and luggage racks when you install rigid or detachable sideplates to your motorcycle. Manufactured and tested to rigorous Harley-Davidson standards, these sideplates are designed to specific model application for exact fit.

# SOFTAIL® SUSPENSION

## NEVER IN A TIGHT SPOT

*On the road, you've got to feel good in the saddle. Whether you're cruising around town or out for the long haul, your bike should welcome you like an old friend and feel like an extension of yourself. Once you've picked the bike, it's time to choose the suspension that best equips your ride to your personal dimensions.*

### A STRONG FOUNDATION

Being sure-footed at a stop or when parking your bike enhances your feeling of control and confidence. Adjusting the ride height by lowering the suspension may be the first step in fitting the bike to your inseam length. Combining a low-profile suspension and a narrow seat is the easiest way for a shorter rider to fit comfortably on a larger bike.

## DEFINE YOUR LOOK

*Customizing your motorcycle is about selecting accessories that work together to reflect your personality. Envision your bike as a whole and choose the options that will make that vision a reality. Developing a “look” for your bike doesn’t have to be difficult; before you start, just decide on a direction and stick with it.*

### BLACK & CHROME

Genuine H-D® Accessories are developed by the same folks that built your bike, so you can be assured that plated or painted parts will match the Original Equipment finishes for a unified look.

## FOCUS ON THE PROFILE

### FRONT END TRIM

Custom fork sliders, wheels and rotors put your sense of style front and center. And simple additions like custom axle covers and hardware finish the look.

### REAR END TRIM

A chrome swingarm and custom wheels make a major visual impact, and easy-to-install axle covers, belt guards and custom hardware give a unified look.

### WHEELS & BRAKES

Custom calipers, wheels and rotors can have a radical impact on the look, but small additions like caliper trim and chrome hardware can provide subtle style.

### CHASSIS TRIM

One of the easiest ways to customize your motorcycle is adding decorative covers. Fender trim, component covers and custom hardware all grab your attention.

### HAND CONTROLS

Adding mirrors, grips and a little chrome puts style in full view of the rider. A custom master cylinder, switch covers and hand levers give instant gratification.

### FOOT CONTROLS

Custom foot pegs, foot levers and shift linkages offer exceptional function and style, and highway pegs and engine guards add comfort and engine protection.

### CONSOLES & GAUGES

The link between your brain and the bike. Auxiliary gauges help you monitor your engine's vital signs, and a custom console says a lot beyond the numbers.

### ENGINE TRIM & HARDWARE

The V-Twin engine is the heart of the bike. Adding well-chosen covers, a custom air cleaner and a decorative collection instantly sets your bike apart from stock.

### LIGHTING

Lighting adds distinctive style and aids visibility. Choose from a variety of auxiliary lamps, headlamp trim and LED lighting to grab maximum attention.

### PERFORMANCE

Performance options make a styling statement as well. Screamin' Eagle® high-flow air cleaners and custom exhaust systems show that you mean business.

### STOPPING BY THE FIT SHOP

#### A. SEATS

*Where the seat positions your waist relative to the foot controls, hand controls and the ground will impact your riding comfort, so test-sit a variety of seats to get it right.*

#### B. FOOT CONTROLS

*Where your feet meet the controls is equal parts riding style and physical necessity; it also determines the angle of your hip, knee and ankle, so keep it comfortable.*

#### C. HANDLEBAR & CONTROLS

*Each bar has a unique combination of rise, width and pullback—putting your hands, wrists, arms and shoulders in different configurations. See what feels natural and stick with it.*

#### D. RIDE HEIGHT

*Suspension components and seat shape combine to determine your riding position. Finding the right combination is the easiest way for a shorter rider to fit comfortably on a larger bike.*

### GEARING UP WITH RIDER ESSENTIALS

Selecting even the basic accessories can be daunting. Start by adding versatility and long-haul comfort. These windshields, backrests and luggage racks are designed to fit your specific Touring model and will get you ready for the open road.

# TOURING WINDSHIELDS

## SPLIT THE WIND.

*At highway speed, you take the wind full-force in the chest, causing fatigue in your arms, neck and shoulders. Take the pressure off with an easy-to-install detachable windshield. Shaped to divert air, rain and road debris around the rider, a windshield can add hours of riding comfort.*

### TOURING WINDSHIELD TYPES

#### FAIRING WINDSHIELD

*Selecting a windshield that tops out just below your line of sight eliminates having to look through bug spots, condensation and road grime. An unobstructed view makes for safe and enjoyable riding.*

#### KING WINDSHIELD

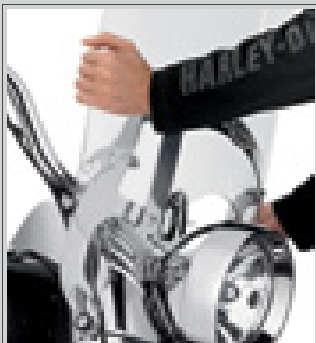

*Maximum protection from the elements. Available in low-profile, standard and tall sizes, the King windshield manages airflow and visibility for almost any size rider. Bugs, wind and rain don't stand a chance.*

#### THE SELECTION GUIDE

*For maximum wind protection, and the best view down the road, select a windshield that tops out just below your line of sight. Your dealer has the tools to make the selection simple.*

### CHANGING YOUR WINDSHIELD

Designed to be installed or removed without tools in seconds, a Detachable Windshield gives you the freedom to define your ride at the drop of a hat. Ride across the country protected from the elements, then quickly remove the windshield to hit the streets in style.

A. ROAD KING 22" KING-SIZE WINDSHIELD – CLEAR

**WINDSHIELDS**

Whether it's for keeping bugs off your face or warmth in your body, a windshield has a huge impact on rider and passenger comfort. By diverting air pressure past your chest and over your helmet, a windshield can add hours of riding comfort. You avoid looking through rain drops, bug spots and road grime to get a clear view of the highway ahead.

## SEAT OF POWER.

*The right seat is equal parts ergonomics and comfort. Its shape anchors your position and determines the reach to the ground and to the controls; and the padding supports your tailbone and hips to relieve stress and pressure. Pick the right one for you...and your passenger.*

### COMFORT ZONE

A seat is more than just leather and foam. For maximum highway comfort, a broad seating surface distributes weight to reduce pressure points. For a short rider, a narrow, tapered thigh zone provides easier reach to the ground. And a stepped seat profile keeps the rider from sliding back during acceleration.

### TOURING SEAT TYPES

Solo or two-up, comfort or style, check out these seats to get an idea of where you want to sit.

#### CUSTOM PROFILE SEATS

*These saddles combine radical styling with a “deep in the bike” riding position. Long and lean, Badlander®, Brawler®, Sidekick® and Rallyrunner® seats bring you lower to the ground than most other seats.*

#### POSITION SEATS

*Designed to place the rider in the best relationship to the controls, Low-Profile®, Reach® and Tallboy® seats position short and tall riders for a comfortable extension of the arms and legs.*

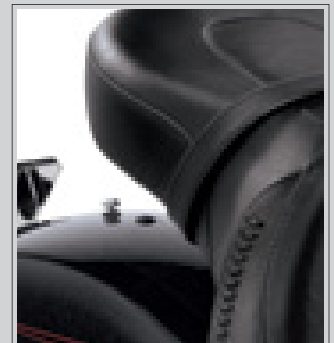

#### TOURING SEATS

*Designed for comfort, Sundowner™, Signature Series™ and Road Zeppelin® seats offer a broad seating surface to reduce pressure points and a dish shape holds you in place and provides additional back support.*

### CHANGING YOUR SEAT

Switching out your seat is simple. And because certain rides call for certain styles, some folks like to have multiple seats to match the occasion. Install a comfortable, supportive touring seat for the longer treks, and swap it out for a low-profile seat for a night on the town. Please see your owner's manual for proper removal and installation of seats.

## A. ROAD ZEPPELIN AIR ADJUSTABLE SEAT

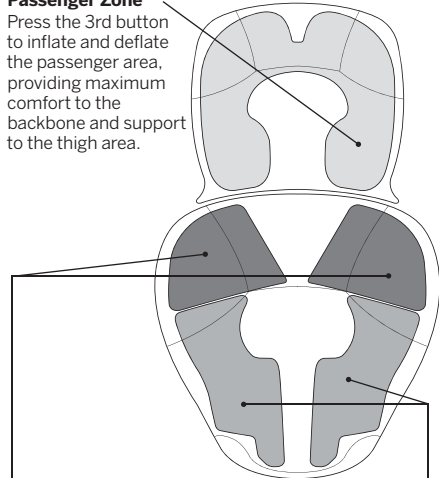

The open road. That's where we developed and tested the revolutionary comfort of the Road Zeppelin Seat. This remarkable seat removes pressure points and "hot spots" by adjusting the amount of air contained in each bladder within the seat. Three easy-to-reach rocker switches on the side of the seat control the built-in compressor, adding and bleeding off air with the quick push of a button. On a long run, occasionally inflating and deflating the air bladders reduces the "numb butt" effect by improving the blood flow to the extremities. The new Road Zeppelin Seat features two adjustment zones for the rider and one for the passenger, and a re-designed internal air compressor that adjusts the air level nearly twice as fast as the previous version. The ergonomically-friendly seat design features a narrow front nose for ease of touching the ground at a stop, with a wide seating surface for long range rider and passenger comfort. This seat is a great addition to Trike models too. The easy-to-clean vinyl seat is finished with an embroidered Road Zeppelin logo that lets everyone see that you take riding comfort seriously. This easy-to-install seat accepts a rider backrest and passenger grab rail for additional touring comfort. Seat width 20.0"; passenger pillion width 14.5".

# TOURING **TOUR-PAK®** & SADDLEBAGS

## ROOM TO ROAM

*Hitting the open road with just the clothes on your back may sound romantic, but it's not always the easiest way to travel. Rain gear, extra clothing and basic supplies are easy to take along when you add Tour-Pak® luggage and saddlebag accessories.*

## TOUR-PAK LUGGAGE: PACK IT ALL

Designed for maximum convenience and versatility, Tour-Pak luggage makes packing for your next trip a pleasure. Available in a variety of capacities, these hinge-opening trunks are designed to keep your belongings dry in almost any weather.

## SADDLEBAGS: FUNCTION WITH STYLE

Factory-equipped with saddlebags, Touring models are already capable of hauling almost everything you need. So why not dress them up to match your sense of style. Color-Matched Extended Saddlebags add capacity with a custom “tail dragger” look, and the matching Lid Spoilers add flair and visibility.

## OTHER THINGS TO CONSIDER

There are plenty of options that can make your saddlebags and Tour-Pak luggage work even harder. Form-fitted liners and mesh interior pouches simplify the search for small items, and lid rails and luggage racks make adding additional soft luggage a breeze.

- A. LED AUXILIARY LIGHTING
- B. FITTED LINERS & LIFT-OUT BAGS
- C. WATER BOTTLES & STORAGE POUCHES

So, get in a good day at the office, change your gear, and hit Main Street in style. Tour-Pak® & Saddlebag Accessories

## A. COLOR-MATCHED STRETCHED SADDLEBAG BOTTOMS\*

Add the long and low “slammed” look to your Touring bike without compromising the suspension travel and ride height. These Stretched Saddlebag Bottoms wrap around the exhaust to add visual length to the bike, and hide the muffler bracket and hanger from view. The full-depth extended Saddlebag Bottoms add additional storage capacity, and are manufactured of the same materials as the latest Original Equipment saddlebags for a glass-smooth painted surface. Available primed or factory-finished to match your Original Equipment single-color painted finish, these Stretched Bottoms are pre-drilled to accept your existing saddlebag lids and latches. Simply attach the extended saddlebag bottom to your saddlebag lids with the included hardware, and install on the bike like the original bags.

Fits '93-later Touring models equipped with Color-Matched Hard Saddlebags.

# TOURING *SUSPENSION*

## NEVER IN A TIGHT SPOT

*On the road, you've got to feel good in the saddle. Whether you're cruising around town or out for the long haul, your bike should welcome you like an old friend and feel like an extension of yourself. So, once you've picked the bike, it's time to choose the suspension that best equips your ride to your personal dimensions.*

### A STRONG FOUNDATION

Being sure-footed at a stop or when parking your bike enhances your feeling of control and confidence. Adjusting the ride height by lowering the suspension may be the first step in fitting the bike to your inseam length. Combining a low-profile suspension and a narrow seat is the easiest way for a shorter rider to fit comfortably on a larger bike.

### THE FIT SHOP LIST

Here are a few options to consider when outfitting your bike to fit you. Find your model, and flip to the pages for more information.

The 4.5" swivel air hose simplifies valve stem attachment. The aluminum housing is compact, lightweight, and durable, and fits easily into your bag for "on-the-road" adjustments. The high-quality 0-60 psi gauge ensures accurate air pressure.

## DEFINE YOUR LOOK

*Customizing your motorcycle is about selecting accessories that work together to reflect your personality. Envision your bike as a whole and choose the options that will make that vision a reality. Developing a “look” for your bike doesn’t have to be difficult; before you start, just decide on a direction and stick with it.*

### BLACK & CHROME

Genuine H-D® Accessories are developed by the same folks that built your bike, so you can be assured that plated or painted parts will match the Original Equipment finishes for a unified look.

## FOCUS ON THE PROFILE

### FRONT END TRIM

Custom fork sliders, wheels and rotors put your sense of style front and center. And simple additions like custom axle covers and hardware finish the look.

### REAR END TRIM

A chrome swingarm and custom wheels make a major visual impact, and easy-to-install axle covers, belt guards and custom hardware give a unified look.

### WHEELS & BRAKES

Custom calipers, wheels and rotors can have a radical impact on the look, but small additions like caliper trim and chrome hardware can provide subtle style.

### CHASSIS TRIM

One of the easiest ways to customize your motorcycle is adding decorative covers. Fender trim, component covers and custom hardware all grab your attention.

### HAND CONTROLS

Adding mirrors, grips and a little chrome puts style in full view of the rider. A custom master cylinder, switch covers and hand levers give instant gratification.

### FOOT CONTROLS

Custom foot pegs, foot levers and shift linkages offer exceptional function and style, and highway pegs and engine guards add comfort and engine protection.

### CONSOLES & GAUGES

The link between your brain and the bike. Auxiliary gauges help you monitor your engine's vital signs, and a custom console says a lot beyond the numbers.

### ENGINE TRIM & HARDWARE

The V-Twin engine is the heart of the bike. Adding well-chosen covers, a custom air cleaner and a decorative collection instantly sets your bike apart from stock.

### LIGHTING

Lighting adds distinctive style and aids visibility. Choose from a variety of auxiliary lamps, headlamp trim and LED lighting to grab maximum attention.

### PERFORMANCE

Performance options make a styling statement as well. Screamin' Eagle® high-flow air cleaners and custom exhaust systems show that you mean business.

Ask your dealer for advice about the amount of current consumed by additional electrical accessories.

All our street-legal configurations are factory-tested for high performance and unmatched reliability.*

## THE DYNO CHART

An invaluable tool in performance modification, the dyno chart can visually compare the performance characteristics of a stock engine with those of a modified engine — and can help you determine if a particular set up will generate the power gains you're after. The horizontal axis indicates engine speed in RPM and the left and right vertical axis shows the amount of torque and horsepower produced. Comparing the stock and modified torque and horsepower curves can tell you how a configuration performs in a specific RPM range.

## HORSEPOWER & TORQUE

While many judge a motorcycle's performance solely in terms of horsepower, torque is an equally important factor in the equation. In a nutshell, torque is the twisting force that gets your bike moving, while horsepower is the effort required to keep it moving — meaning that torque influences acceleration, while horsepower determines velocity. Your goal should be to reach the balance between horsepower and torque that most closely matches the performance you need.

## WARRANTY & CAUTION

### OVERVIEW

Harley-Davidson has the engineering expertise, the sophisticated dyno lab and complete testing facilities to provide enthusiasts with a line of performance products designed to produce good, solid, reliable horsepower and torque. Engine related performance parts are intended for the experienced rider only.

### WARRANTY

Installation of Screamin' Eagle® products, and similar off-road or competition products from other manufacturers, except some street-legal offerings installed by authorized Harley® dealers, may void your H-D® limited vehicle warranty. Installation of a California performance kit on a 49-state model motorcycle or a 49-state performance kit onto a California model motorcycle will void manufacturers warranty, as it will not result in a street-legal configuration.

### CAUTION

Harley-Davidson® motorcycles modified with some Screamin' Eagle® high-performance engine parts must not be used on public roads and in some cases may be restricted to closed-course competition.

# SCREAMIN' EAGLE® STAGE KITS

## LIFE STAGES

Just define your performance goals, and pick the Stage Kit that gets you there.

#### STAGE I AIR CLEANER

**Let It Breathe** The first step to unleashing the power of a V-Twin motor is to let it breathe. The engine is an air pump, so the more air and fuel it can swallow, burn and exhale, the more power it produces. Adding a Stage I High Flow or Heavy Breather Air Cleaner and Street Performance Muffler combination produces a lot of “bang for the buck,” and is a great place to start your performance build.

#### STAGE I BIG BORE

**Open It Up** Getting inside the engine and adding big bore cylinders and matching pistons is the fastest way to increase your bike’s pulling power. When the torque curve peaks early and continues to pull all the way through the mid-range, you feel it. Big bore engines provide the power required to pass a slow moving camper or to pull a loaded bike up a long grade. Want even more? Step up to the Big Bore Stage II Kit and you add performance-matched cams for measurable increases in torque and horsepower.

#### STAGE I BIG DISPLACEMENT

**Get It All** There’s no substitute for cubic inches. Screamin’ Eagle® 110 kits for Twin Cam 96™ models deliver hard-hitting Street Legal performance with proven reliability. Original Equipment on the Harley-Davidson® Screamin’ Eagle® CVO™ motorcycles, these Stage I Kits feature system-matched cylinders, heads, pistons, cams and ECM calibrations for demonstrated performance.

### CAUTION ICONS

**GO LIGHT** These Screamin’ Eagle® products are 50-state street-legal for sale and use on all vehicles, including those that are pollution-controlled.

**STOPHAND** Harley-Davidson® motorcycles modified with some performance engine parts must not be used on public roads and in some cases may be restricted to closed-course competition. Those performance parts identified with a stophand symbol are U.S. EPA legal, but are NOT legal for sale or use in California on pollution-controlled motor vehicles. California guidelines on tampering can also lead to substantial fines and penalties.

**CALIFORNIA** These Screamin’ Eagle products are street legal for sale and use on pollution-controlled vehicles in the state of California.

Aluminum is specified at 6061 billet plate, heat treated to T6 specifications with a surface-hardened anodized finish to provide superior strength, rigidity, and durability. CNC-precision machining ensures precise dimensions and constant material thickness across the plate, enabling perfect alignment of cams and chains. Cam bushings are made from 660 bronze material to provide enhanced wear resistance, and to stand up to increased loads from the high lift cams common in large displacement motors.

This premium compensator has been engineered with heavier springs and increased travel to support the high-torque output associated with high compression race and large displacement engines. Designed to support up to 7 times the energy absorption capacity of the Original Equipment compensator, this unit helps protect the engine and driveline components during harsh drag race launches. The perfect addition to a complete performance upgrade, and it complements the installation of the Screamin' Eagle Performance Clutch Hub P/N 37976-08.

**40274-08** **\$249.95**

## E. SCREAMIN' EAGLE PERFORMANCE SLIPPER CLUTCH FOR VRSC MODELS

This clutch offers reduced lever effort and improved performance. The unique "slip and assist" ramp system opens the two halves of the clutch hubs slightly during high loads to the drivetrain, allowing a moderate slip that reduces shock to the drivetrain during rapid downshifting. The resulting reduction in wheel hop allows maximum contact between the tire and the road in wet or slippery conditions. Clutch lever effort is also reduced by 20% in 1130cc and 30% on 1250cc applications.

**37938-08KA** **\$239.95**  
Fits '02-'07 VRSC models.

Transmission

F

The Screamin' Eagle 6 Speed Transmission has been tested and validated using the same rigorous procedures that Original Equipment transmissions are subjected to, and is backed by a 12 or 24 month (depending on model year), unlimited mileage warranty when installed at the time of a new bike purchase.

## F. SCREAMIN' EAGLE® 6-SPEED TRANSMISSION AND GEAR SET

Designed from the ground up, the Screamin' Eagle transmission incorporates many of the best Original Equipment features, like late-style shifting mechanism and a newly designed "shift ring" system to make this the smoothest shifting Harley-Davidson® transmission available. The "shift ring" system is similar to the system used in the VRSC transmission, and it slides on the shafts to mate into the gears. This eliminates sliding heavy gears to accomplish the shift, and results in smooth, precise and light effort shifting. Sixth gear is a true overdrive, at a .89:1 ratio, and the first five gears mimic today's proven 5-speed ratios. The overdrive feature allows you to run a lower engine RPM in sixth gear, at any given road speed. Lower RPM can result in lower vibration, longer engine life and smoother cruising. The Screamin' Eagle 6-Speed Transmission is available as a complete transmission, or as a replacement gear set, and can be matched with hydraulic or cable-operated clutch controls.

Screamin' Eagle 6-Speed Transmissions feature forged chrome "trap door", forged shifter forks and forged and precisely ground gears. No speedometer or exhaust mount modifications are required. Complete transmissions are ready to install into the chassis, and the 6-Speed Gear Set Kits are designed to replace the stock gear set without removing the transmission. Gear Set Kits require slight modification (template included) to the Original Equipment transmission case, and include all necessary installation hardware.

Formulated with a high tackifier, this lubricant clings to parts and provides excellent start-up and break-in protection. It provides excellent corrosion resistance, and it won't drip off like common oil when you set coated parts aside to work on the rest of the engine. That's why we use it on all of our test engines. Don't start your re-built or serviced engine without it. Recommended applications: cams, gears, crankpins, piston wrist pins, oil pumps, valve guides, rocker arm and push rod tips and roller tappet wheels.

# ENGINE REMANUFACTURING

*To get your engine firing like new, we can remanufacture your high-mileage motor to original specifications. Select a Stage I Big Bore upgrade and take your pick of chrome, polished or powder-coated factory finishes to give your engine a new lease on life. When originally removed and installed by an authorized Harley-Davidson® dealer, your remanufactured engine will carry a 12-month Unlimited Mileage Limited Warranty.*

*For more information, visit: [www.harley-davidson.com/reman](http://www.harley-davidson.com/reman)*

## HOW IT'S DONE STEP BY STEP

When the miles start to add up, the Harley-Davidson® Engine Remanufacturing Program can put the rumble back into your powerplant simply, quickly and affordably. The program is available for the Evolution® 1340, and many Twin Cam engines. Contact your Harley-Davidson® dealer for more information.

### GETTING STARTED

*Your engine's journey begins at your Harley-Davidson dealership. The engine is removed from your bike and shipped via Con-way® in a specially-designed container to our state-of-the-art Powertrain Operation, Capitol Drive facility in Wauwatosa, WI.*

### STEP 1: DISASSEMBLY

*Upon its arrival, your engine is completely taken apart and inspected by the remanufacturing team. Engine components that can be cleaned and remanufactured to original specifications are saved, while those not worth saving are discarded.*

### STEP 2: CLEANING AND POWDER COATING

*All reusable parts are cleaned, and paint is thermally removed from the cylinders and beads. Small components are cleaned through a baking soda blasting process. After inspection, parts are powder coated in our state-of-the-art production paint facility.*

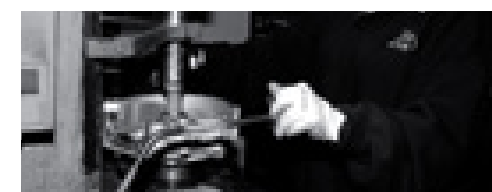

### STEP 3: MACHINING

*Once powder coated, these parts are machined, bored and honed to exact tolerances. Then, they proceed through rigid specification checks. Only the components that meet our strict standards ever make it past this point.*

### STEP 4: REASSEMBLY

*During reassembly, crankcases are set, bearings are pressed and components are meticulously reassembled. All chromed and polished components are replaced with new parts, and your engine is upgraded to meet the latest specifications, while retaining its stock configuration.\**

### STEP 5: TESTING AND FINISHING

*After reassembly, your engine is run through a battery of tests to ensure it performs to Harley-Davidson standards. Upon passing these tests, your engine is awarded a one-year, unlimited mileage factory warranty. After cleaning and polishing, your engine is ready to come home.*

### BACK IN THE SADDLE

*Approximately two weeks after its journey began, your V-Twin® is returned to your dealer for installation with a new lease on life and its original Vehicle Identification Number (VIN).*

\* For legal and warranty purposes, all engines will receive stock camshafts. If you have installed high-performance cams, they will not be reinstalled or returned.

# ENGINE TRIM

*The V-Twin is one of the most impactful visual elements of your motorcycle, making it a great opportunity for customization. Pick a direction that reflects your attitude and find the trim options that will help you execute it. Your engine is the heart and soul of your ride, so wear it on your sleeve.*

## CHROME VS. BLACK

### CHROME

*A fresh take on the Dark Custom™ logo, this collection features domed surfaces and high-contrast finish. These die-cast and formed aluminum covers are highly polished for both durability and style.*

### BLACK

*Polished and black anodized for a quality finish, these billet covers are machined, anodized and then remachined to expose the raw aluminum beneath the surface.*

## FOCUS ON THE CENTER

*Developing a “look” for your bike doesn’t have to be difficult. Add a well-chosen air cleaner, some custom hardware and a complementing derby and timer cover collection, and you’ll have a strong style that tells other motorists exactly what you’re about.*

### BLACK & CHROME

You can make a huge custom impact by changing the basic engine finish. Genuine H-D® chrome and wrinkle black covers are designed for precise fit and trouble-free installation.

## DEFINING YOUR BIG TWIN ENGINE’S LOOK

The easiest and most affordable way to customize is by adding decorative covers. With choices ranging from air cleaner covers to headbolt bridges, you can dress every inch of your engine.

## IT'S IN THE DETAILS

### CHROME HARDWARE (RIGHT)

The final step in finishing a bike is the hardware — but not just any “hardware store” parts will do. Harley-Davidson® Chrome Hardware is manufactured to Original Equipment specifications, ensuring the finish, the fitment and quality you expect.

### OIL LEVEL DIPSTICKS (LEFT)

Oil is the lifeblood of your V-Twin engine, so keep an eye on its health. LCD-lighted dipsticks provide push-button access to the oil temperature and oil level information. No more grabbing a rag to pull your hot dipstick, and no more oil drips on your pipes and the garage floor.

## Oil Coolers

### PREMIUM OIL COOLER KIT

The oil cooler has been designed to simplify installation and enhance performance. The large heat exchanger provides excellent cooling efficiency. The kit features a one-piece adapter plate with integrated thermostat that allows oil lines to connect to the oil filter bracket. Thermostat activates at 185°F (85°C). Kit comes complete with mounting hardware and pre-cut oil lines. Kit includes Chrome Oil Cooler Cover.

A. PREMIUM OIL COOLER KIT FOR DYNA MODELS

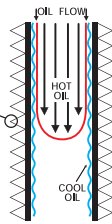

B. PREMIUM OIL COOLER FOR SOFTAIL MODELS

#### Inside View of Premium Oil Cooler with Turbulators

Turbulators disperse and mix oil inside cooler to provide more efficient cooling capabilities. The cooler oil is not allowed to remain along the boundaries of the flow tube as in conventional coolers.

#### Inside View of Conventional Oil Cooler without Turbulators

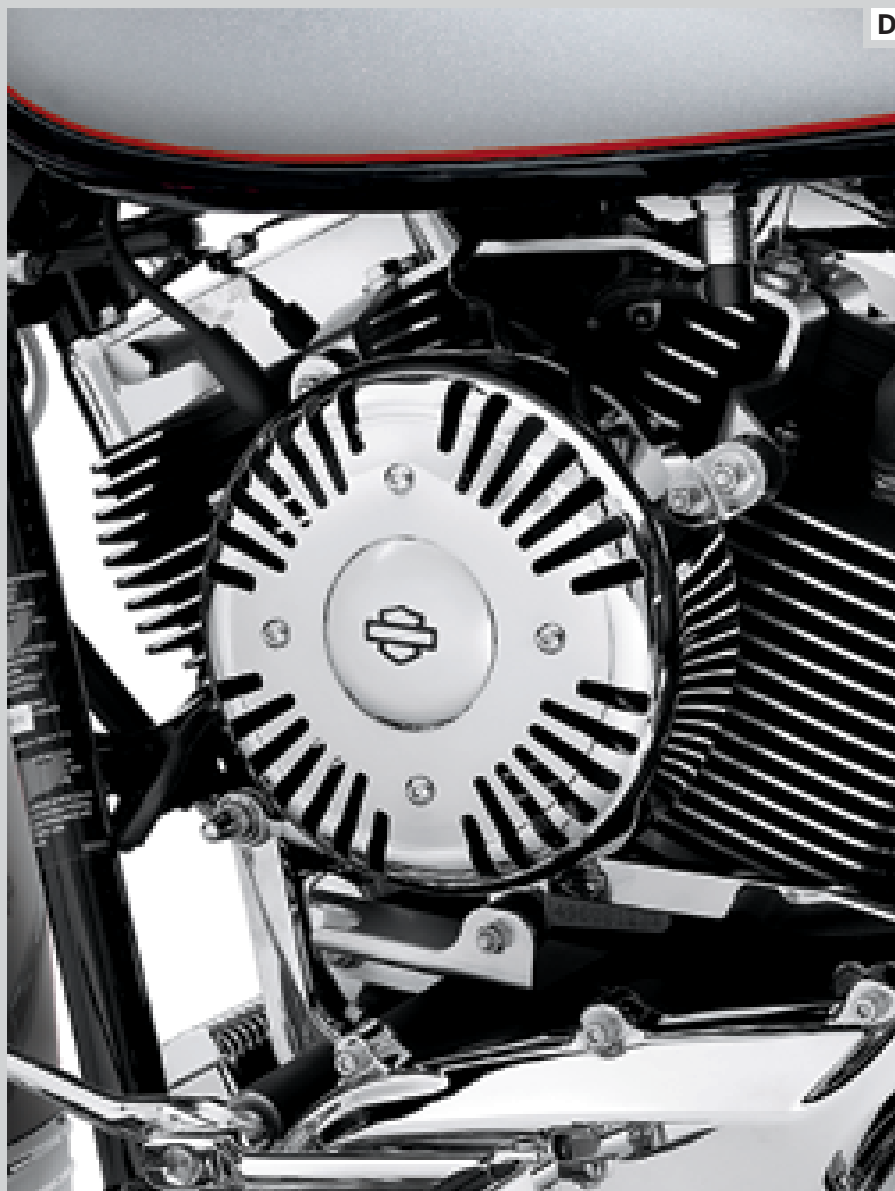

Coolers without the Turbulator system allow oil to flow only in a straight path. Oil does not mix and the cooler oil remains along the outer boundaries, while the hotter oil remains along the center path of flow. Without the mixing effects of the Turbulators, the conventional oil cooler provides less efficient cooling capabilities.

# HAND CONTROLS

*Your style fingerprints are all over your bike. Now put them where they count. Custom hand and foot controls, mirrors, and handlebars set the tone in comfort and attitude. Start by selecting a handlebar from a full range of shapes and sizes. Add proper control cables and finish it with chrome or black grips and pegs.*

## PICK A DIRECTION

### SINISTER LOOKS

*Build on the factory satin black controls by adding black levers, mirrors and custom grips. And because all the black finishes match, the controls look like they were machined from a single piece.*

### SIMPLE STYLE

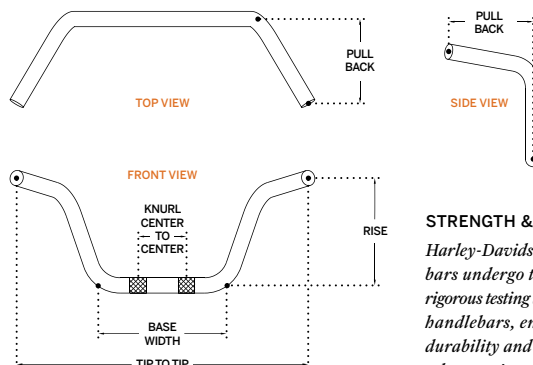

*Adding chrome mirrors, grips and a master cylinder cover gives instant gratification. To take your customizing further, add chrome switch caps, a set of chrome switch housings and braided lines and cables.*

## HANG 'EM HIGH OR LOW

*Where a handlebar positions your hands, wrists, arms, shoulders and back are all key factors to keep in mind when searching for the right fit. The three key elements to any handlebar are rise, width and pullback. Every rider requires a special combination, so choose wisely.*

*For a complete selection of handlebar options, see pages 576-597.*

**STRENGTH & QUALITY**  
*Harley-Davidson® accessory bars undergo the same rigorous testing as our factory handlebars, ensuring durability and control that others can't match.*

### YOUR RIDING POSITION

#### STOCK HANDLEBAR

*Just about every model of Harley-Davidson® motorcycle comes with a different stock handlebar. Selected to complement the style of the bike, the handlebar may be the ideal shape for many riders, but of course, not everyone has the same physical characteristics.*

#### STOCK HANDLEBAR WITH RISERS

*If the stock handlebar has the correct width and hand position for you, but seems just a little too far away, we offer riser kits that can bring the controls within reach. Straight and curved risers are available for many model and handlebar combinations.*

#### DRAG HANDLEBAR

*Narrow, flat and more aggressive, drag bars provide a straight elbow and neutral hand and wrist position. For maximum comfort, drag bars can be positioned with curved or straight risers to minimize stretch to the controls.*

#### APE HANGER & TALLBOY® BARS

*Tall and wide, ape hanger and Tallboy® handlebars provide a classic "fist-in-the-wind" look, and can add long-haul comfort for riders with long arms. Because handlebar height is regulated in many areas, check local laws before installing a tall handlebar.*

#### WIDE BEACH BAR

*Low and wide, a beach bar spreads your arms and gives you room to breathe. Ideal for the rider with long arms, beach bars can be a little too wide for many riders. While selecting a bar, make sure you can reach the hand controls when the handlebar is fully turned.*

#### NARROW BEACH BAR

*Not up for the wide grip? This handlebar combines the low-rise and sweeping shape of a beach bar with a narrower tip-to-tip width for added rider control. And when combined with pullback risers, this might be an ideal compromise between comfort and style.*

\*NOTE: Installation of some handlebars and risers may require a change in clutch and/or throttle cable and brake hose for some models. Handlebar height is regulated in many states. Check state or local laws before installation.

## Heated Hand Grips

### HEATED HAND GRIPS

Keep comfortable on those cool morning or frigid night rides. Warm hands have a major impact on overall body comfort, and sometimes gloves just aren't enough. These thermostatically controlled grips have variable heat settings and automatic temperature monitoring to adjust to changing ambient temperatures. The grips remain at a constant temperature regardless of changes in outside temperatures. The self-contained control circuit and control knob means you have no additional switches or controller boxes to mount, and the grips are switched on/off with the ignition to avoid draining your battery. The "glueless" grip design allows grip removal if you change handlebars or motorcycles.

Comfort and cool, clean looks in one. Heel Raiser Chrome and Rubber Footpegs provide a large surface area that lets you change foot position for maximum comfort, and the fold-out heel rest provides floorboard-style support that relieves calf and thigh tension on the highway. The heel rest can be deployed or retracted with your boot while riding. The sole-gripping horizontal black rubber bands complement the mirror-chrome finish, and add vibration isolation and a rich appearance to the pegs. Complete the look with Shifter Pegs and Brake Pedal Pads from the Chrome and Rubber Collection. ## Mirrors

### A. SPLIT VISION MIRRORS\*

See even more of the world you just passed. This exclusive-design Split Vision Mirror minimizes blind spots and provides a wide panoramic rear view of the left and right lane, and the road behind you. The mirror features a large primary panel for normal view, and a second outboard convex panel for a wider field of vision. Chrome-plated to a brilliant shine, the mirror's shape adds a contemporary touch to the traditional teardrop design. The deep embossed "Harley-Davidson" script and the curving slotted stem set this mirror apart from the others.

The forward-facing eye-level lamps command additional attention from oncoming traffic. Both mirrors flash when the emergency hazard lights are activated. The wiring is concealed in the housing and stem, and is easily connected to the Original Equipment wiring harness. Available in mirror-chrome or satin black finish.

## Handlebars

### HANDLEBAR BASICS\*

Bars communicate style and also affect how you handle your bike. You want to select a handlebar that puts your arms in a position that matches both the attitude you want to convey and the kind of riding you expect to do. While every handlebar has its own distinct measurements and characteristics, there are four basic factors to consider in your quest for custom-styled comfort:

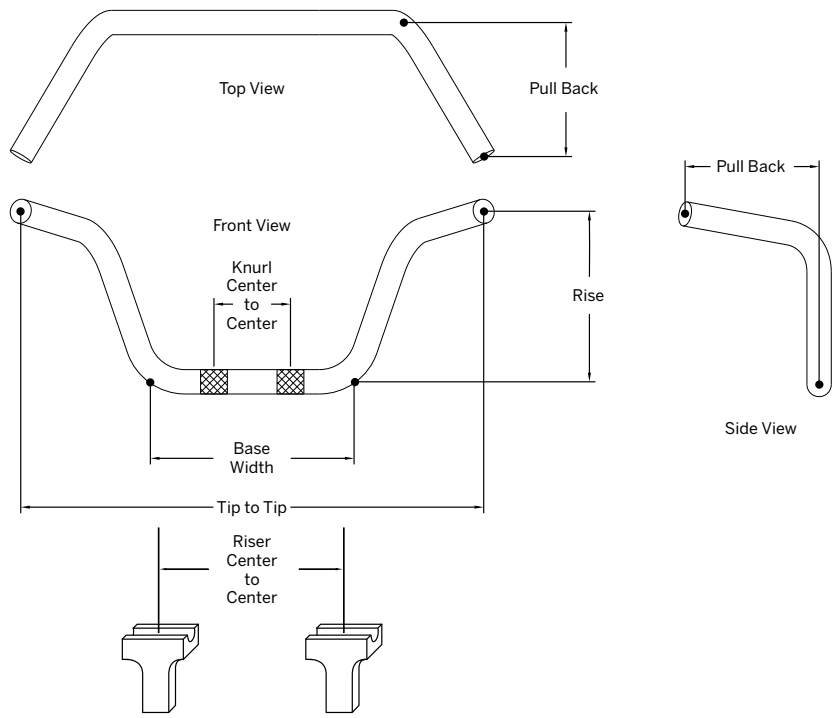

**Rise** is the vertical distance between a handlebar's tip and its base. Adding risers to bars that sit low can help put hand grips in a higher spot.

**Pull Back** brings hand controls closer while also lowering grip height. More pullback facilitates an upright posture, and suits riders with a shorter reach.

**Width** is measured from the tip of one hand grip to the other. Touring calls for a wider bar, while sport riding is best with a narrower tip-to-tip width.

**Knurl Center to Center** is the distance between the center of one knurl to the center of the other knurl. To ensure correct fit between the handlebar and risers, measure the center to center distance between the riser clamping surfaces and select a handlebar with the same dimension.

\*NOTE: Installation of some handlebars and risers may require a change in clutch and/or throttle cable and brake hose for some models. Handlebar height is regulated in many states. Check state or local laws before installation.

## CUSTOM BRAIDED CONTROL CABLES

Dress your bike for maximum custom impact. Harley-Davidson offers a choice of three braided cable finishes to match your customizing style. All cables include a clear anti-yellowing outer jacket, providing superior scuff protection and easy maintenance.

### E. DIAMONDBACK™ BRAIDED CABLES

The signature, Harley-Davidson exclusive, Diamondback braid provides a splash of chrome to your custom bike. The brilliant metallic finish blends perfectly with mirrored-chrome handlebars and controls, or provides a stark contrast to “blacked out” options. Diamondback cables feature highly polished chrome fittings and a micro-fine wire braiding that perfectly match the weave pattern of Diamondback Braided Brake Lines. Available in stock length and alternate (plus) lengths for custom applications.

### F. DIAMOND-BLACK BRAIDED CABLES

Introducing new Diamond-Black Braided Control Cables. Unlike others, Diamond-Black braided cables utilize a black braided wire providing a deeper, truer, black finish, while still allowing you to see the premium braided appearance from a distance. Fittings are matched in black chrome to give you the very best sinister look for your ride. Available in select stock length and custom length applications.

**F. DIAMOND-BLACK BRAIDED CONTROL CABLES**

### G. STAINLESS STEEL BRAIDED CABLES

Get the traditional custom look of stainless steel, by upgrading your Original Equipment black cables to braided stainless steel. Smooth, consistent stainless steel braiding and polished fittings at the handlebar provide for a fit and finish second to none. Available in select stock length and custom length applications.

#### TO SELECT THE CORRECT CABLE KIT:

For Original Equipment Applications (stock handlebars and risers): Locate the model and year of vehicle on pages 610-611. Applicable stock length part numbers are listed for each available finish.

For Custom Applications (custom handlebars and/or risers), available Diamondback alternate length cables are listed in the corresponding platform tables on pages 608-609. If you require assistance in determining the appropriate alternate length for your application, ask your Harley-Davidson® Dealer.

#### Need Help?

Visit your local Harley-Davidson Dealer. They have the tools and expertise to select the correct cables and brake lines for your custom application. Your dealer can measure and test-fit cables and lines to determine the proper length and fittings to ensure smooth operation and interference-free routing.

## Brake Lines

### CUSTOM BRAIDED BRAKE LINE KITS

Dress your bike for maximum custom impact and performance. Harley-Davidson offers a choice of three braided brake line finishes, and two different design configurations, to match your customizing needs. All brake lines meet or exceed all DOT requirements.

#### A. DIAMONDBACK™ BRAIDED BRAKE LINES

The signature Harley-Davidson exclusive Diamondback braid provides a splash of chrome to your custom bike. Diamondback Brake Lines feature highly polished chrome fittings and a micro-fine wire braiding that perfectly match the weave pattern on Diamondback Braided Control Cables. Available in "Modular" and "1-Piece" brake line configurations.

#### B. DIAMOND-BLACK BRAIDED BRAKE LINES

Introducing new Diamond-Black Braided Brake Lines. Unlike others, Diamond-Black braided brake lines utilize a black braided wire providing a deeper, truer, black finish, while still allowing you to see the premium braided appearance from a distance. Available in "Modular" and "1-Piece" brake line configurations.

#### C. STAINLESS STEEL BRAIDED BRAKE LINES

Get the traditional custom look of stainless steel, by upgrading your Original Equipment black brake lines to braided stainless steel. Smooth, consistent stainless steel braiding and polished chrome fittings provide for a fit and finish second to none. Available in "1-Piece" brake line configurations.

### BRAKE LINE CONFIGURATIONS

Braided brake lines are available in two designs: 1-Piece and Modular lines.

#### "1-Piece" Brakes

Feature continuous brake lines that are specific to a stock length, and/or to a specific accessory handlebar application. "1-Piece" Brake Lines come in both single disc and dual disc configurations. "1-Piece" Brake Lines have pre-assembled/ crimped banjo fittings for easy installation and to ensure the correct fit for the specific application.

#### Modular Brake Lines

Feature a 2-piece design that provides maximum versatility for both stock and alternate (plus) length brake line applications. Modular Brake Lines come in single and dual disc configurations and require a separate purchase of both a lower and an upper brake line for installation. The common lower line is shared with specific models, while the variable length upper lines work with models depending on single disc (Dyna/Softail, except FXDF) or dual disc (Touring/FXDF) application. Upper brake lines come completely assembled in lengths up to +10" over the stock configuration and can be ordered with 0°, 35°, and 90° banjo angles to accommodate almost any handlebar configuration. A single JIC connection at the lower triple tree fastens the lines together and automatically orients the banjo fittings to ensure proper installation.

**INSTRUCTIONS FOR FINDING STOCK AND ALTERNATE LENGTH MODULAR BRAKE LINES:**

1. Find your model and year on the chart below for the stock fitment.
2. The stock Diamondback Modular Front lower and upper brake lines are listed along with the length and banjo angle for reference.
3. Alternate lengths for Diamondback upper lines are listed on the next page according to 0°, 35°, and 90° banjo configurations. (If you require assistance determining the appropriate alternate length and banjo angle for your application, ask your Harley-Davidson Dealer.)

NOTE: Diamondback Modular Brake Lines require both upper and lower brake line kits for installation. Subsequent changes due to handlebar modifications may only require a new upper line.

For alternate length and banjo angle upper brake lines, see the chart on the next page. Proper routing may require a different banjo angle from that used for stock fitment.

## Headlights – Bulbs

### LET THERE BE LIGHT

Featuring the latest in reflector optic design, Harley-Davidson® Original Equipment headlamps and accessory Dual Bulb Halogen Headlamps offer low-beam performance that is superior to traditional sealed beam bulbs. The wide curb-to-curb low beam pattern provides a great around-town view. Cruising down the back roads, Dual Bulb High Intensity Discharge (HID) or Dual Bulb Halogen headlamps add extra punch down the center of the lane, all while maintaining their excellent low-beam performance.

### A. HIGH INTENSITY DISCHARGE (HID) DUAL BULB HEADLAMP KIT\*

Cut through the darkness. The Harley-Davidson High Intensity Discharge Headlamp Kit features a true HID (Xenon) low beam bulb that projects a curb-to-curb spread of "blue/white" light. Compared to the yellow light of a traditional halogen bulb, the HID lamp produces a "Daylight Color Impression" that appears more natural to the user.

The HID Dual Bulb Headlamp assembly features unique advanced optics with separate low and high beam reflectors dedicated to focus the light for optimal illumination. The HID low beam is always illuminated, providing a wide pool of light, and the separate halogen high beam bulb adds a focused shaft of light down the center of the lane.

The HID Dual Bulb Headlamp is not just a high-performance bulb, it's a complete lighting system. The system includes the HID bulb, an electronic starter, and a ballast system. The bulb is a complex tube that replaces the filament with arc-producing electrodes. The starter allows quick ignition of the arc, and the ballast converts incoming power to the high voltage needed to maintain the glow. The Xenon-filled HID bulb is resistant to vibration, and has a life expectancy of up to 10 times that of a halogen bulb. The headlamp kit is DOT approved for use in all 50 states.

The complete Headlamp Kit includes the shock and vibration resistant housing HID low beam bulb, halogen high beam bulb, starter, waterproof ballast, and all necessary wiring.

**68094-06C** **\$524.95**

Fits '96-later Electra Glide®, Street Glide®, and Trike models.

**68043-06B** **\$524.95**

NOTE: HG-Lamp contains Mercury. Manage in accordance with disposal laws.

### B. DUAL BULB HALOGEN HEADLAMP KIT

The Dual Bulb Halogen Headlamp features advanced reflector optics and separate bulbs for high and low beam functions. The euro-inspired projector beam styling combines a state-of-the-art look with a CAD designed faceted reflector bowl that is optimized for crisp patterns and light cut-off. The single upper bulb functions in low beam, and both upper and lower bulbs operate in high beam. The low beam setting produces a wide curb-to-curb light pattern, and the high beam adds focused light down the center of the lane without compromising width. Kit includes housing, 55-watt low beam halogen lamp, 35-watt high beam halogen lamp and all necessary mounting hardware. Does not meet ECE regulations.

**67864-04A** **\$164.95**

Fits '94-later Electra Glide®, Road King® and Trike models, and '94-later FL Softail® models equipped with Chrome Headlight Nacelle Kit P/N 67907-96B. Kit includes mounting ring assembly.

\*NOTE: It is possible to overload your motorcycle's charging system by adding too many electrical accessories. If your combined electrical accessories operating at any one time consume more electrical current than your vehicle's charging system can produce, the electrical consumption can discharge the battery and cause vehicle electrical system damage. Ask your dealer for advice about the amount of current consumed by additional electrical accessories.

## D. FREIGHT TRAIN CHROME HEADLIGHT NACELLE

If the chrome from this nacelle seems to reflect the image of the 1960s FL models, that's because the spirit of the past is built right in. Bold locomotive styling adds visual strength to the bike's profile, and stretches the rider's view to the horizon when looking over the headlamp. Coupled with the separate purchase of the Chrome Nacelle Hardware Kit P/N 67897-96B, the Nacelle fits with an existing H-D® windshield and/or passing lamps. Kit includes hardware required for installation of the Nacelle with a detachable windshield without passing lamps. ## Turn Signals

### A. MINI-BULLET LED TURN SIGNAL KIT

Take a new direction in lighting. Bright, fast-acting LED turn signal elements are housed in a mirror chrome-plated mini bullet housing for definitive style. # WHEELS

*Upgrading your wheels is one of the quickest ways to overhaul the look of your bike. But your wheels shouldn't just look good; it's important that they stand up to the rigors of the road. Forged, cast or laced, you'll ride comfortably knowing Harley-Davidson® custom wheels meet the highest standards of performance and durability.*

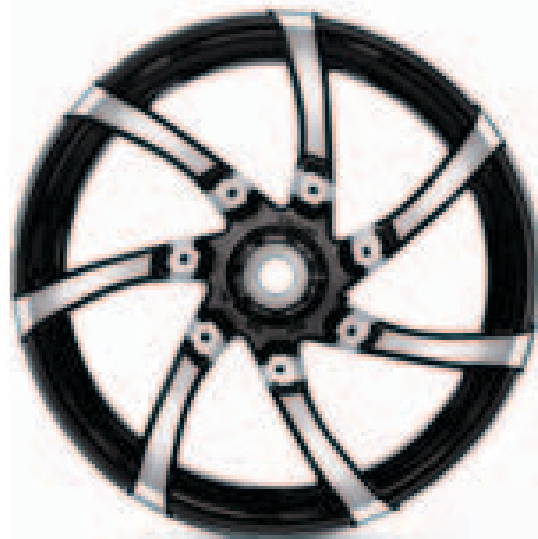

## CHOOSE YOUR CUSTOM DIRECTION

### CHROME

*Chrome wheels always get instant attention. Adding a new set of wheels is the perfect way to kick off a custom effort or put on the finishing touches. We have both classic and contemporary styles to fit the character of your ride, so choose what'll work best with what you have in mind.*

### BLACK

*Black wheels set an aggressive tone for the rest of your bike. They're the perfect way to finalize your full-out Dark Custom™ effort or add a touch of black to balance the overall style direction of your ride. See which wheels speak loudest to you and watch as they instantly transform your bike's attitude.*

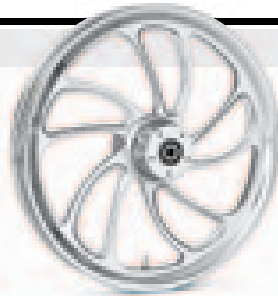

## STRENGTH AND STYLE

*From a visual perspective, the wheels, sprocket and brake rotors make up almost half of the motorcycle's profile, and set the styling direction for the whole bike. Choose wisely. Harley-Davidson® Forged, Cast and Laced wheels undergo thousands of hours of real-world testing to meet the highest standards of performance and durability. All Harley-Davidson wheels have been certified to perform to our tough vehicle standards for handling.*

### SEEING THE DIFFERENCE

#### FORGED WHEELS (BLADE FORGED WHEEL SHOWN)

**Performance Under Pressure** One-piece forged wheels are manufactured by squeezing a solid billet of aerospace-grade 6061-T6 aluminum under extreme pressure. The resulting material is very strong, so the final wheel design can have a lighter, more open style. The forging process aligns the metal grain for maximum strength, and the nonporous surface takes chrome like no other.

#### CAST WHEELS (REAPER CAST WHEEL SHOWN)

**Liquefied Metal** One-piece cast wheels are manufactured by pouring molten aircraft-grade aluminum into a wheel-shaped mold. This casting method allows the wheel design to feature hollow spokes and hubs for lighter weight, and permits incorporating styled surface textures that add visual interest. The casting process produces a wheel surface that is ideal for machining and polishing, and accepts both chrome and painted finishes for a distinctive look. Available in a wide variety of styles, cast wheels are an affordable customizing option.

### ORDERING PROCESS

#### CUSTOM WHEEL ORDERING PROCESS

**Step 1:** Select a wheel part number for your specific fitment.

**Step 2:** Select the wheel installation kit for your specific application (model, year and front or rear). Note: If your model is not specified in the wheel fitment, a wheel installation kit will not make the wheel fit your model.

**Step 3:** Refer to the instruction sheet included in your wheel kit to determine the necessary parts required from the installation kit.

**Step 4:** Use only Harley-Davidson approved tires. Using non-approved tires, tires from different manufacturers, or tires with non-matching tread patterns on the same motorcycle can adversely affect handling and stability.

#### WHEEL INSTALLATION KITS

Once you select your wheel style, select the Wheel Installation Kit designed specifically for your motorcycle. Kit includes the bearings and spacers required for installation.

C. CHROME NINE-SPOKE CAST WHEEL

## C. CHROME NINE-SPOKE CAST WHEEL

Add a splash of chrome. These fully polished wheels are styled to match the popular nine-spoke design featured on traditional Touring models. More than just a chrome-plated Original Equipment Touring Wheel, these wheels utilize tooling developed specifically for chrome-plating to give a near perfect finish without the "waves" created when polishing the Original Equipment cast wheel. The rib on the Original Equipment wheel spoke has been removed to provide a smooth uninterrupted look, and countless hours of polishing result in a superior finish. Special masking was developed to prevent plating contamination inside bolt holes and bearing bores. All Genuine Motor Accessory wheels have been certified by Harley-Davidson to perform to our tough vehicle standards for handling, quality and durability. Wheel kits require separate purchase of model-specific Wheel Installation Kit.

Fang & Mirror Disc Wheels

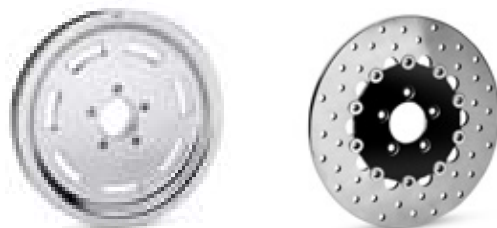

B

## B. FANG CUSTOM WHEEL

Something to sink your teeth into. This custom disc wheel features a unique contrast chrome and black finish. First, the cast wheel is painted to a deep luster, then it is machined to expose the bare metal, and finally chrome-plated for a brilliant shine. This reverse process leaves crisp contrast lines without the rough masking lines of some other painted chrome wheels. Chrome-plated bolt-in "saber fang" inserts add a finishing touch. Requires separate purchase of model-specific Wheel Installation Kit.

**43265-09** 16" Front. **\$749.95**

## PAINT & BODYWORK

*Are you classic and understated, hard-core and brash, or simple and tough? Find the paint scheme that strikes the right balance between attitude and subtlety, or take it to the extremes. All Harley-Davidson® Color Shop paint sets put a premium on depth of design, paint quality and finish. To maintain exclusivity, sets are introduced just twice a year and quantities are strictly limited.*

*Harley-Davidson hand-picks our custom painters and continually monitors their painting process and finish quality to guarantee your satisfaction. Color Shop custom paint sets begin with virgin factory sheet metal, and we apply only the finest primers, paints and coatings to achieve the richest, fade-free finish.*

## COLOR SHOP LIMITED SERIES – CHANCE

Luck be a lady tonight. In the tradition of 1940s bomber art, this hand-painted beauty delivers the goods with detailed shadowing and rockabilly-inspired style. Airbrushed highlights bring the graphic to life while dominos spelling out Harley-Davidson let the chips fall where they may. Fenders feature an airbrushed spade.

Available starting October 2009 – see your Dealer for availability.

For a finishing touch, order the matching custom framed wall hanging to decorate your den or garage. Hand painted by the same artists that worked on your bike, the framed sheet-metal canvas reflects the unique design of your ride.

**COLOR SHOP LIMITED SERIES – RAZE**

Search and destroy. Strictly business, the Candy Root Beer basecoat looks wet enough to drink. Candy Tangerine grind flames across the tank and fenders finished in a transparent orange gloss demolish anything brave enough to get close, while vibrant orange pinstripes bear the mark of a professional. A Bar & Shield logo in motion cuts the competition down to size.

## COLOR SHOP LIMITED SERIES – BACKLASH

The enemy of my enemy is my friend. Worlds collide when denim and gloss work together to settle an old score. It's time to pay the piper. Hot scalloped tribal flames promote discipline, and the blood-red pinstripes leave a lasting impression. ## COLOR SHOP LIMITED SERIES – PRIMO

The cream of the crop. Brilliant lace webbed yellow and orange basecoat stops traffic with deeply textured detail. Reap what you've sown. Matte black scallops atone for their sins in a world fired by denim charcoal. Hand painted jet-black pinstripes lay on top of a satin clear-coat, and add depth and dimension to the place between heaven and hell. The impact is vintage style living in the darkest dimension.

# ***SPECTRUM CUSTOM COLOR PROGRAM***

## **TAP INTO A QUARTER-CENTURY OF LEGENDARY HARLEY-DAVIDSON® DESIGN AND STYLING EXPERTISE.**

The Spectrum Custom Color Program allows you to draw from virtually every standard color and logo combination offered by the factory since 1979. Select from classic two-tone panel designs, color schemes, and decal or medallion logos to make your dream come alive. You have the freedom to select from an almost unlimited combination of colors to color-match current or historic Harley-Davidson® models, or you can select from an endless number of automotive-style color choices.

You can supply your own Original Equipment undamaged sheet metal, or buy a replacement primed set; either way, you can create your own look and still get the high quality you expect from a factory-painted Harley® motorcycle.

This program is available exclusively through your participating Harley-Davidson® dealer. The dealer can help you create your design, choose your colors, and select a decal or silk-screen graphic to finish the look.

## THE HARLEY-DAVIDSON® SPECTRUM CUSTOM PAINT PROGRAM\*

The Spectrum Custom Paint Program allows you to have your Harley® motorcycle painted to match any color scheme you can imagine. Start with your own sheet metal, or buy a replacement set. You can have individual fenders and tanks painted, or order complete sets, using the part numbers shown below. If the customer's existing sheet metal is being used, it is the customer's responsibility to submit original condition, undamaged parts in a timely manner. See your Dealer for details.

You can choose your main color, panel color, top coat, and pinstripes. You can specify a "clear," "pearl" or "candy" finish top coat. The top coat is a special paint that will work with the main and panel colors to create different effects.

Shown on these two pages are just a few of the unlimited color options available. Mix & match colors from vintage bikes, classic cars, or any other monochrome or two-tone paint scheme you can think of.

## Security Systems

### A. H-D® SMART SECURITY SYSTEM – '07-LATER MODELS

The H-D Smart Security System offers automatic self-arming and hands-free disarming for vehicle electronic security functions for your '07-later Harley motorcycle. The Hands Free Fob communicates directly on its own unique and individualized frequency with the Hands Free Security Module and Antenna. Attach the Hands Free Fob to your vehicle ignition key ring. As you upright your vehicle or switch the ignition on, the Hands Free Fob will communicate the Security System "disarm" command allowing you to start your vehicle. After riding your vehicle, park and switch the ignition off with your key. Within 5 seconds the Security System will automatically self-arm, disabling your vehicle starter, ignition and electronic fuel injection (EFI). The rider may also disarm the system by keying a previously entered personal code on the turn signal switches. A flashing status indicator informs the rider that the Smart Security System is armed or disarmed. The Smart Security System allows configuration to include the Transport Mode or Extended Storage Mode. The Smart Security System includes: Hands Free Security Module (Integrated Security Sensor and Turn Signal Module), Hands Free Fob, Antenna Module, Antenna Harness and Antenna Mount (Dyna models).

### B. H-D FACTORY SECURITY SYSTEM – '06-EARLIER MODELS

Equip your '06-earlier Harley-Davidson® VRSC™, Sportster®, Dyna®, Softail® or Touring model with the security system designed and approved by The Harley-Davidson Motor Company.

When armed, the Security System disables the starter and ignition while monitoring the electrical system and vehicle motion with adjustable sensitivity. Minor disturbances trigger a momentary warning; major ones an unbroken thirty-second alarm, after which the Security System returns to monitoring. A distinctive four-way flasher pattern is the alarm signal. An optional self-powered Smart Siren Kit adds a piercing scream that sounds even if the battery cable is cut.

The Security System is armed and disarmed with a remote control waterproof key fob utilizing state-of-the-art rolling code technology. If the key fob is not available, the rider may arm or disarm the system by keying a previously entered personal code on the turn signal switches. A flashing status indicator informs the rider that the Security System is armed or disarmed.

When armed in the Transport Mode, the Security System disables the starter and ignition, but monitors only the electrical system, not vehicle motion. The vehicle may be moved but electrical tampering triggers an alarm.

An Extended Storage Mode keeps the battery from discharging when the Security System is armed for extended periods of time.

The Security System is compatible with FL Touring models equipped with approved TLE/Ultra Sidecars when the system is configured as described in the SIDE CAR OWNER'S MANUAL.

#### H-D Factory Security System Includes:

- Security Module (Integrated Security Sensor, and Turn Signal Module)
- Remote Control Waterproof Key Fob

## Motorcycle Lifts & Tie-Downs

### A. MOTORCYCLE SERVICE LIFT

This lift raises and lowers motorcycles by a hand crank, allowing you to elevate the motorcycle up to 19" off the ground. A friction disc helps hold the lift in place and wheels make it easy to roll into storage. Minimum clearance for lift is 4-1/2 inches. Tie-downs must be used with Lift. Recommend using Hog Ties® P/N 94649-98 and/or Hog Ties with Integrated Soft Hooks P/N 94672-99. Frame Protectors P/N 94675-99 also recommended.

**94653-98** **\$379.95**

Fits all Harley-Davidson® V-Twin models (except Trike and models equipped with a Sidecar). Twin Cam-equipped Dyna® models require Adapter Kit P/N 98965-99 for proper fitment.

#### Also available:

#### FRAME PROTECTORS

Use these Frame Protectors to protect the underside of your motorcycle when using any lift. A must for Softail® models to provide the clearance necessary to keep lift pressure on the frame and not the shock absorbers. Universal and customizable to fit any V-Twin Harley-Davidson® motorcycle.

**94675-99** Fits all 1-1/4" frame tubes. (pair) **\$15.95**

#### TWIN CAM-EQUIPPED DYNA® MODEL MOTORCYCLE SERVICE LIFT ADAPTER KIT (not shown)

Provides the necessary clearance of the oil tank that allows the Motorcycle Service Lift P/N 94653-98 to be used on '99-later Dyna models equipped with the Twin Cam engine.

**98965-99** **\$24.95**

### B. HOG TIES® STRAPS WITH INTEGRATED SOFT HOOKS

This version of the popular Hog Ties tie-down has integrated Soft Hooks along with the standard coated steel hooks, allowing you a choice of either the soft or steel hook against the motorcycle. It is especially useful for avoiding pinching of brake lines, wiring or other parts that can be damaged by steel hooks. Features sturdy buckles with cast Harley-Davidson Bar & Shield logo.

**94672-99** Fits all models. (pair) **\$42.95**

### C. HOG TIES STRAPS AND HOG TIES SOFT HOOKS

#### 1. Hog Ties® Straps

Made and designed specifically for Harley-Davidson® motorcycles, these are among the sturdiest tie-downs on the market. Each tie-down is a full 1-1/2 inches wide for unbelievable holding strength, with sturdy buckles that feature the Harley-Davidson Bar & Shield logo. At least 50% wider and 50% stronger than a standard tie-down. Don't trust your Harley-Davidson® motorcycle to anything less.

**94649-98** Fits all models. (pair) **\$39.95**

#### 2. Hog Ties Soft Hooks

New, wider Soft Hooks to be used in conjunction with the super strong Hog Ties Straps. These Soft Hooks prevent scratching of handlebars, fairings, etc. and have a whopping 5,700 pounds of tensile strength.

# CLEANING & MAINTENANCE

*Cleaning and servicing your bike is both essential and rewarding. Just remember: avoid using “auto parts store” brand parts and cleaning supplies. Genuine Harley-Davidson® service parts are engineered to maintain the integrity of your ride, and oils, lubes and cleaning supplies are formulated for the unique surfaces and operating conditions of your motorcycle.*

## SOLVING COMMON CLEANING ISSUES

- ✔ Before applying any protective or cosmetic product, you should always start off by washing your motorcycle with Sunwash® Concentrate.
- ✔ Don't detail your bike in the direct light of the day. Sun-warmed clearcoat and hot surfaces may streak and swirl when drying.
- ✔ To soften melted-on boot marks and tar from exhaust pipes, put a generous dab of Harley® Glaze on the spot and let it set for a few minutes. Then scrape away the gunk with an H-D® softcloth.
- ✔ The natural acid in bug splatter is damaging to surface finishes, so be sure to act quickly. Apply Harley-Davidson® Bug Remover, wait a minute to soften the residue, and rinse away the debris.
- ✔ Don't have time for a complete detailing session? Use Harley Gloss or Harley Spray Cleaner & Polish for quick jobs.

### TIRES & TIRE CARE

Certified by Harley-Davidson, model-specific Dunlop® and Michelin® tires have been subjected to rigorous handling and reliability testing. And Harley® Black Protectant shields the sidewalls from harmful UV rays.

## ENGINE OIL FAQ'S

### HOW OFTEN SHOULD I CHANGE MY MOTORCYCLE ENGINE OIL?

You should change your motorcycle engine oil and engine oil filter at the first 1,000-mile service interval and at every 5,000-mile service interval thereafter. If you ride your motorcycle hard, under dusty conditions, or in cold weather, the engine oil and filter should be changed more often. You should always change your engine oil and filter prior to winter storage (or any extended storage) so that your engine oil is clean and free of contaminants for this time period.

### CAN I GO LONGER BETWEEN OIL CHANGES BY CHANGING THE FILTER?

NO! The job of the oil filter is to remove dust, soot and other solid matter. Filters cannot remove water, gasoline or acids and cannot do the job of oil additives that have been used up. You should change your oil filter at the first 1,000-mile service interval and at every 5,000-mile service interval thereafter or prior to winter or extended storage periods.

### WHAT VISCOSITY GRADE SHOULD I USE IN MY HARLEY® MOTORCYCLE?

The recommended viscosity grade for all temperature conditions is SAE 20W50 Harley-Davidson Motor Oil. SAE 10W40 H-D Motorcycle Oil is also available and appropriate for low temperature climates. The SAE 50 H-D Motorcycle Oil is satisfactory in ambient temperatures of 60-80°F, and the SAE 60 H-D Motorcycle Oil in ambient temperatures above 80°F. SAE 20W50 covers the broadest range of operating temperatures.

		SAE 20W50

## SYN3 ENGINE, PRIMARY AND TRANSMISSION OIL FAQ'S

### WHAT ARE THE KEY BENEFITS TO USING SYN3® MOTORCYCLE LUBRICANT?

- SYN3 Lubricant offers improved film strength for superior wear protection at high temperatures, and improved deposit control for a cleaner engine, transmission, and primary chaincase.
- SYN3 Lubricant can be used in the engine, primary chaincase, and transmission.
- SYN3 Lubricant is formulated for reduced oil consumption, improved wear protection, high-temperature stability, and superior overall field performance.

### WHAT'S THE DIFFERENCE BETWEEN SYNTHETIC AND PETROLEUM-BASED LUBRICANTS?

Both synthetic and petroleum-based lubricants are derived from the same crude oils. But that's pretty much where the similarities end. Unlike their petroleum-based counterparts, which inherit physical components (including contaminants) of the source crude oil in the refining process, synthetic lubricants are manufactured from basestocks that are custom-designed from scratch to have desired properties for specific purposes, meaning that engineers have complete control of the lubricant from start to finish – at the molecular level.

### WHAT DOES SYN3® FULL SYNTHETIC MOTORCYCLE LUBRICANT DO FOR MY DRIVETRAIN?

SYN3® Full Synthetic Motorcycle Lubricant offers all the benefits of Genuine Harley-Davidson® 360 Motorcycle Oil, and:

- Offers superior wear protection at higher temperatures
- Keeps engines, transmissions and primary chaincases cleaner
- Meets the anti-wear lubricity requirements of all transmission gears
- Lubricates all primary chaincase components
- Delivers smooth, sure clutch operation
- Provides long-term protection of all internal components
- Improves seal and gasket performance
- Offers superior performance in high-output engines

### WHEN CAN I START USING SYN3 FULL SYNTHETIC MOTORCYCLE LUBRICANT?

Right away. SYN3® Full Synthetic Motorcycle Lubricant is approved for all stages of engine life, including the first service interval – which means it's not detrimental to engine break-in. You can even use it as a first fill upon delivery of a new motorcycle.

### SINCE SYN3 FULL SYNTHETIC MOTORCYCLE LUBRICANT IS A HIGH-PERFORMANCE LUBRICANT, CAN I WAIT LONGER BETWEEN CHANGES?

No. As with petroleum-based engine lubricants, you should drain and replace the synthetic motorcycle lubricant in your engine at every 5,000-mile service interval. You should also change your oil filter anytime the engine lubricant is changed. If you ride your motorcycle hard, under dusty conditions, or in cold weather, you should change your SYN3® Synthetic Motorcycle Lubricant and oil filter more often. You should always change your engine lubricant and filter prior to any extended storage so that your engine is clean and free of any contaminants during this time.

### B. HARLEY-DAVIDSON® GOLD SPARK PLUGS

A special thread and shell coating ensures quick and easy removal from aluminum heads and resists corrosion. A gold palladium insert extends life and improves resistance to corrosion. The tapered tip provides better spark exposure to air/fuel mixture and allows the mixture to flow more easily through gap area for maximum combustibility. Fouling resistance is improved with smaller diameter center electrode wire and insulator tip. Plus, a copper-cored ground electrode runs cooler for extended life.

## D. SCREAMIN' EAGLE ST PERFORMANCE SPARK PLUG

Screamin' Eagle ST Spark Plugs feature double platinum coating for superior erosion resistance and extended life. The "V" trimmed ground electrode reduces shrouding of the flame front to promote flame propagation, and the fine wire center electrode enhances start ups and ignitability. Screamin' Eagle ST Plugs feature Ribbed Core Technology (RCT) that provides resistance to fouling, and are designed with Original Equipment-style noise suppression to prevent electrical interference with radios and CB communication equipment. Works great with racing applications where rich air fuel conditions are required. Unique style with Screamin' Eagle logo. (Sold in packages of two.)

### High Compression Applications

These plugs are designed for high performance applications involving modifications in high flow air cleaners, cam shafts, exhaust, performance heads, ignition components, higher compression ratios above Original Equipment configurations or engines specific for racing applications.

**32186-10** **\$15.95**

D. SCREAMIN' EAGLE ST PERFORMANCE SPARK PLUG

**Terminal construction** ensures solid watertight connection with standard or performance spark plug wires.

**Plated jacket** helps prevent corrosion in harsh weather and temperature conditions.

**RCT (Ribbed Core Technology)** provides improved resistance to plug fouling. The rib's proximity promotes spark discharge to the shell on plugs that are starting to foul, allowing the air/fuel charge in the cylinder to ignite and clear the plug.

**"V-trimmed" ground electrode** reduces shrouding to promote flame propagation.

**Built-in suppressor/resistor** reduces radio noise and interference.

**Fine Wire Center Electrode** promotes ignitability and enhances start up.

**Platinum pads** on both electrodes reduce gap erosion for longer plug life.
