

TOURING

The open highway holds endless promise, and Harley-Davidson® Touring models are your ticket to freedom. A wide range of Genuine Motor Accessories are ready to tailor your ride into a perfect companion. Even though this Road King® model has taken on three distinctive personalities, at its heart is a machine waiting to take on the road.

ROAD KING®
KING OF THE ROAD

Equipped with detachable fairing lowers and leather Tour-Pak® luggage, this Road King® is ready for the highway. And with a Sundowner™ seat, pullback bar and low suspension, even a shorter rider can rack up the miles.

ROAD KING®
BLING MAGNET

A dose of chrome and sky-high apes turn this classic into the ultimate custom bagger. The rich Color Shop paint adds a passionate look, and the two-up seat and backrest mean you can bring someone along for the ride.

ROAD KING®
HOT ROD HAULER

Stripped for duty, this broad-shouldered ride makes its presence known. The Color Shop denim paint and blacked-out front end and exhaust anchor the bike, and the drag bars and Anarchy wheels provide the attitude.

TOURING | WINDSHIELDS

SPLIT THE WIND

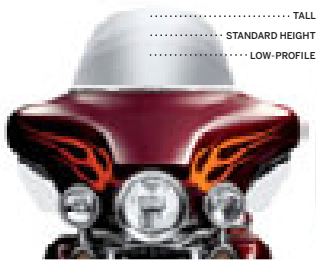

At highway speed, you take the wind full-force in the chest, causing fatigue in your arms, neck and shoulders. Take the pressure off with an easy-to-install detachable windshield. Shaped to divert air, rain and road debris around the rider, a windshield can add hours of riding comfort.

TOURING WINDSHIELD TYPES

WIND SPLITTER

Wind Splitter windshields are shaped for effective air flow management and “wow” styling. The sweeping design adds height over a traditional low-profile wind deflector in the center where it counts.

FAIRING

Selecting a windshield that tops out just below your line of sight eliminates having to look through bug spots, condensation and road grime. An unobstructed view makes for safe and enjoyable riding.

KING

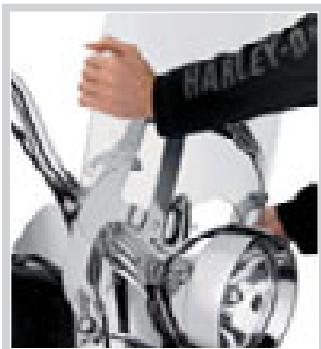

Maximum protection from the elements. Available in low-profile, standard and tall sizes, the King windshield manages airflow and visibility for almost any size rider. Bugs, wind and rain don't stand a chance.

THE SELECTION GUIDE

For maximum wind protection, and the best view down the road, select a windshield that tops out just below your line of sight. Your dealer has the tools to make the selection simple.

CHANGING YOUR WINDSHIELD

Designed to be installed or removed without tools in seconds, a Detachable Windshield gives you the freedom to define your ride at the drop of a hat. Ride across the country protected from the elements, then quickly remove the windshield to hit the streets in style.

TEMPERATURE CONTROL

Control the air-flow to your lower legs for maximum riding comfort. Vented Fairing Lower allows you to adjust the amount of air that circulates across the engine. Open vents direct additional cooling air, and when closed, the lowers provide maximum protection from the cold and rain.

A. ROAD KING 22" KING-SIZE WINDSHIELD – CLEAR

WINDSHIELDS
Whether it's for keeping bugs off your face or warmth in your body, a windshield has a huge impact on rider and passenger comfort. By diverting air pressure past your chest and over your helmet, a windshield can add hours of riding comfort. For maximum protection from wind and weather, select a windshield that tops out just below your line of sight. You avoid looking through rain drops, bug spots and road grime to get a clear view of the highway ahead.

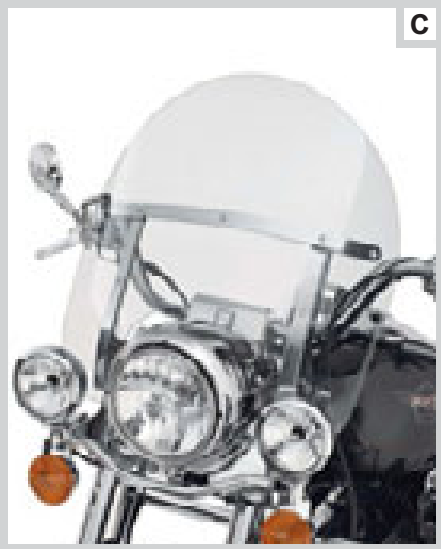

A. ROAD KING® 22" KING-SIZE WINDSHIELD
Get maximum protection from the wind. This clear Lexan® windshield is 2" taller than the standard-height windshield to improve air-flow for taller riders. The Detachable shield can be removed and re-installed in seconds to tailor your bike to different riding conditions. Windshield dimensions: Overall height-29.0"; overall width-23.1".
57995-96 22" Clear. **\$319.95**

B. ROAD KING 18" KING-SIZE WINDSHIELD

This drops the windshield edge below the line of sight, while maintaining the envelope of clean air around the rider. Complete assembly features a durable Lexan shield and the stainless steel brackets that mount to the Original Equipment docking points for ease of installation and removal. Windshield dimensions: Overall height-25.0"; overall width-23.1".
58325-06 18" Clear. **\$334.95**

Windshields – Road Glide®

A. WIND SPLITTER WINDSHIELD

In the world of functional performance, size does matter. After all, it's simple to understand that the larger the windshield area, the greater the amount of wind deflection. The Wind Splitter Windshield is a great look for all Touring models and is shaped for the perfect combination of effective air flow management and "wow" styling. The sweeping design complements the shape of the fairing and the inner dash panel, and adds height over a traditional low-profile wind deflector in the center where it counts. The shape decreases wind noise, and improves your ability to hear the motorcycles sound system. The rich smoked finish does not interfere with your forward view, and looks great against any paint color. The easy-to-install Wind Splitter features a center-mount Bar & Shield medallion for a distinctive finishing touch.

A. FLHT AND FLHX WINDSHIELDS

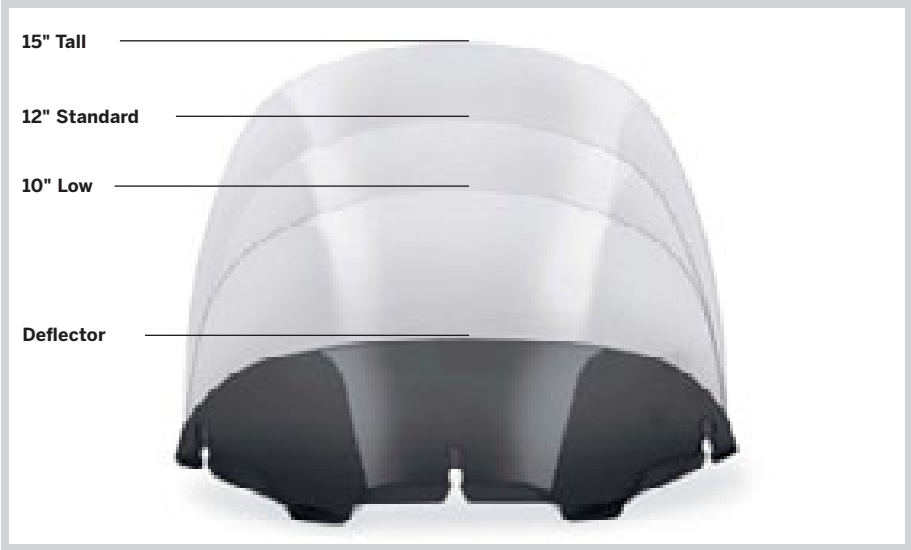

Tailor your bike to your size and riding style. For the best compromise between adequate protection from the elements and a clear view of the road ahead, select a windshield that tops out just below eye level. Harley-Davidson® windshields are formed of Lexan® polycarbonate for strength and scratch resistance, and are available in a variety of heights and tints to suit your riding needs. SEAT OF POWER

The right seat is equal parts ergonomics and comfort. Its shape anchors your position and determines the reach to the ground and to the controls, and the padding supports your tailbone and hips to relieve stress and pressure. Pick the right one for you—and your passenger.

TALLBOY SEAT

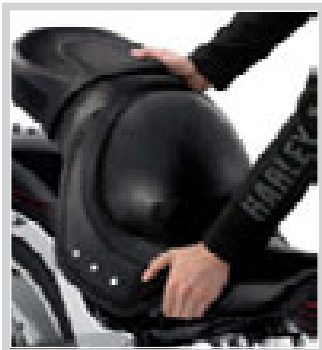

SUPER REDUCED REACH® SEAT

FIT SHOP TIPS

If you plan on racking up the miles, look for a broad seating surface to distribute your weight and reduce pressure points. If you have a short inseam, search for a narrow, tapered thigh zone to bring your legs together for an easier reach to the ground. If you have shorter arms, consider a seat with a stepped profile to keep you from sliding back during acceleration. For more details, visit www.h-d.com/fitshop.

CHANGING YOUR SEAT

Switching out your seat is simple. And because certain rides call for certain styles, some folks like to have multiple seats to match the occasion. Install a comfortable, supportive touring seat for the longer treks, and swap it out for a low-profile seat for a night on the town. Please see your owner's manual for proper removal and installation of seats.

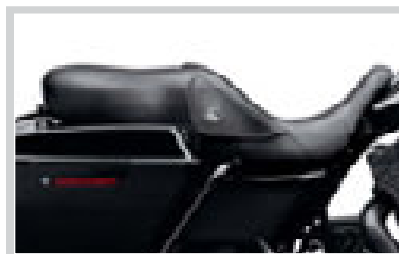

TOURING SEAT TYPES

Solo or two-up, comfort or style, check out these seats to get an idea of where you want to sit.

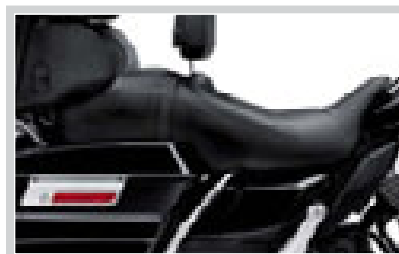

CUSTOM PROFILE SEATS

These saddles combine radical styling with a "deep in the bike" riding position. Long and lean, Badlander®, Brawler®, Sidekick® and Rallyrunner® seats bring you lower to the ground than most other seats.

TOURING SEATS

Designed for comfort, Sundowner™, Signature Series® and Sun Ray® seats offer a broad seating surface to reduce pressure points, and a dished shape that holds you in place and provides additional back support.

SUSPENSION SEATS

Harley® Hammock and Road Zeppelin® seats provide isolation from road shock with internal fabric or air bladder suspension systems that prevent "bottoming out" to increase rider comfort and endurance.

CUSTOM SEAT PROGRAM

A personalized seat is the perfect thread to tie your bike's attitude together. Select the stitching pattern, leather inlay and thread color that best support your custom movement, and you'll have your personalized seat in just three weeks. For more details, turn to page 728, or visit www.h-d.com/customseat.

A. ROAD ZEPPELIN® AIR ADJUSTABLE SEAT – '08-LATER MODELS

The open road. That's where we developed and tested the revolutionary comfort of the Road Zeppelin Seat. This remarkable seat removes pressure points and "hot spots" by adjusting the amount of air contained in each bladder within the seat. Three easy-to-reach rocker switches on the side of the seat control the built-in compressor, adding and bleeding off air with the quick push of a button. On a long run, occasionally inflating and deflating the air bladders reduces the "numb butt" effect by improving the blood flow to the extremities. The new Road Zeppelin Seat features two adjustment zones for the rider and one for the passenger, and a re-designed internal air compressor that adjusts the air level nearly twice as fast as the previous version. The ergonomically-friendly seat design features a narrow front nose for ease of touching the ground at a stop, with a wide seating surface for long range rider and passenger comfort. This seat is a great addition to Trike models too. The easy-to-clean vinyl seat is finished with an embroidered Road Zeppelin logo that lets everyone see that you take riding comfort seriously. This easy-to-install seat accepts a rider backrest and passenger grab rail for additional touring comfort. Seat width 20.0"; passenger pillion width 14.5".

ROAD ZEPPELIN® SEAT COLLECTION – '97-'07 MODELS

When we sit down on the job, it's usually on a motorcycle. That's where we developed and tested the revolutionary comfort of the Road Zeppelin Seat Collection. These remarkable seats remove pressure points and adjust rider and passenger positions with the push of a few buttons. These buttons control air bladders that are placed within the seat to help relieve pressure from the lower back, tailbone or lower extremities. The seats come with a protective, water-resistant cover and are easy-to-install. So grab a seat. And enjoy the ride.

Tailbone Zones

Press the 2nd button to inflate and deflate the tailbone chamber, providing maximum comfort to the backbone.

Lower Back Zones

Press the 3rd button (rider only) to adjust the support in the lower back zone chambers, relieving pressure points in the lower back.

A fine, aged patina and character wrinkles are a sign of the extremely high quality materials used to construct your seat or backrest. The appearance of scars or marks on the leather are a result of using natural leather panels and should not be thought of as an imperfection. Seating

A. SIGNATURE SERIES™ SOLO SEAT WITH RIDER BACKREST

The perfect combination of foam density and shape has resulted in our most comfortable seat for long haul touring. The seat is shaped with a wide seating area to spread the pressure across the broad surface and a narrow nose area to keep your legs together for a shorter reach to the ground. The Signature Series Solo Seat features a built-in, fully adjustable and removable rider backrest for added support. The backrest provides a 5-position height adjustment with 1.5" range, and a wide range of forward/back adjustment with a quick twist of the control knob. The backrest pad features a sleek shape that provides full lower back support without pushing the rider forward. When combined with the comfortable Passenger Pillion P/N 51770-09 (*sold separately*), the slim profile of the rider backrest offers the passenger a few more inches of space, and the fold-down design permits easy passenger mounting/dismounting. The rich vinyl seating surface is easy to clean and maintain, and features an embossed Bar & Shield logo on the side skirts for a finishing touch. Seat width 16.5".

51700-09 **\$499.95**

B. SIGNATURE SERIES™ PASSENGER PILLION

This easy-to-install pillion is designed for long range passenger comfort. The wide seating surface and specific-density padding reduce pressure points and spread the weight for superior support. C. CIRCULATOR SEAT PAD

Keep comfortable on your next long ride. These breathable Circulator Seat Pads feature 3-D construction that promotes air movement and reduces heat build-up where the rider's body touches the seat. Designed to keep the rider cool by reducing the perspiration build-up between you and the seating surface, the Circulator Pad can be installed and removed in seconds for easy cleaning. The low-profile design minimizes seat-height change compared to inflatable pads, while enhancing comfort with its shock-absorbing construction. Manufactured of UV-stable materials, these seat pads resist fading when exposed to the sun. Elastic under-seat strap and non-slip base provide secure installation, and the available Circulator Passenger Pillion Pad attaches to the rider pad with hook-and-loop tabs.

TOURING | BACKRESTS, RACKS & LUGGAGE

COMFORT ON THE GO

Sometimes you need more than your bike to make it a great ride. Tour-Pak® luggage holds plenty of rain gear, extra clothing, and basic supplies, while a detachable backrest means a passenger can take on the road with you.

THE RIGHT COMBINATION

PUTTING IT TOGETHER

A detachable sissy bar upright and backrest pad is the starting point for a complete touring machine. Start by shopping the following pages and selecting all the components required for your particular model.

EQUIPPED FOR THE MILES AHEAD

Solo and stripped down, two-up and fully loaded, or anywhere in between, you can tailor any Harley-Davidson® motorcycle to meet the demands of the highway.

TWO-UP

Take a day's ride on a bike built for two. Saddlebags carry clothes and the essentials, while a Sissy Bar Backrest Pad provides hours of passenger comfort on the open road.

TWO-UP TOUR-PAK®

The ultimate road trip. With all this space and comfort, you and one lucky passenger are fully equipped to go wherever you want, for as long as you want. See you later.

SOLO TOUR-PAK®

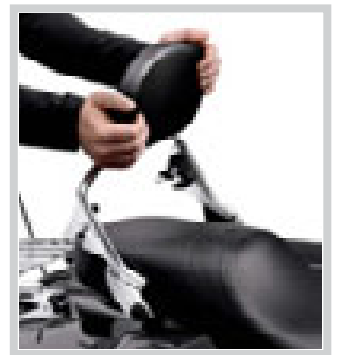

Ride like you're on a mission. The saddlebags and Tour-Pak offer tons of storage space, and the Solo Mounting Rack positions the Tour-Pak Pad for maximum rider back support.

CHANGING YOUR BACKREST

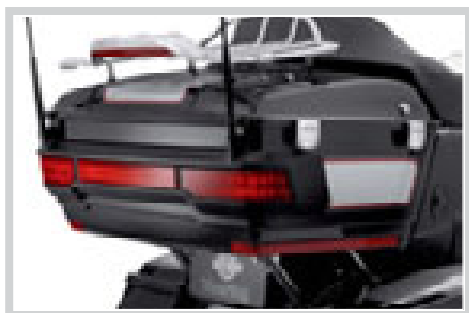

With a Docking Hardware Kit installed, adding or removing a Detachable accessory is a simple "slide and click" proposition. Rotate the cam-lock to release the sissy bar from the rear docking points. Pivot the sissy bar forward, and lift it free from the front docking points.

REAR LIGHTING

Grab additional attention by adding the right combination of rear lighting elements. Options like fast-acting LED Tour-Pak® lamps and high-mount brake lights help you stand out in the dark.

TOUR-PAK® LUGGAGE: PACK IT ALL

Designed for maximum convenience and versatility, Tour-Pak luggage makes packing for your next trip a pleasure. Available in a variety of capacities, these hinge-opening trunks are designed to keep your belongings dry in almost any weather.

SADDLEBAGS: FUNCTION WITH STYLE

Factory-equipped with saddlebags, Touring models are already capable of hauling almost everything you need. So why not dress them up to match your sense of style? Color-Matched Extended Saddlebags add capacity with a custom “tail dragger” look, and the matching Lid Spoilers add flair and visibility.

OTHER THINGS TO CONSIDER

There are plenty of options that can make your saddlebags and Tour-Pak luggage work even harder. Form-fitted liners and mesh interior pouches simplify the search for small items, and lid rails and luggage racks make adding additional soft luggage a breeze.

A fine, aged patina and character wrinkles are a sign of the extremely high quality materials used to construct your luggage. The appearance of scars or marks on the leather are a result of using natural leather panels and should not be thought of as an imperfection. Please use Harley-Davidson Leather Dressing P/N 98261-91V to protect your investment.

A. COLOR-MATCHED STRETCHED SADDLEBAG BOTTOMS*

Add the long and low “slammed” look to your Touring bike without compromising the suspension travel and ride height. These Stretched Saddlebag Bottoms wrap around the exhaust to add visual length to the bike, and hide the muffler bracket and hanger from view. The full-depth extended Saddlebag Bottoms add additional storage capacity, and are manufactured of the same materials as the latest Original Equipment saddlebags for a glass-smooth painted surface. Available primed or factory-finished to match your Original Equipment single-color painted finish, these Stretched Bottoms are pre-drilled to accept your existing saddlebag lids and latches. Simply attach the extended saddlebag bottom to your saddlebag lids with the included hardware, and install on the bike like the original bags.

Fits '93-later Touring models equipped with Color-Matched Hard Saddlebags.

Custom fork sliders, wheels and rotors put your sense of style front and center. And simple additions like custom axle covers and hardware finish the look.	A chrome swingarm and custom wheels make a major visual impact, and easy-to-install axle covers, belt guards and custom hardware give a unified look.	Custom calipers, wheels and rotors can have a radical impact on the look, but small additions like caliper trim and chrome hardware can provide subtle style.	One of the easiest ways to customize your motorcycle is adding decorative covers. Fender trim, component covers and custom hardware all grab your attention.	Adding mirrors, grips and a little chrome puts style in full view of the rider. A custom master cylinder, switch covers and hand levers give instant gratification.	Custom footpegs, foot levers and shift linkages offer exceptional function and style, and highway pegs and engine guards add comfort and engine protection.	The link between your brain and the bike. Auxiliary gauges help you monitor your engine's vital signs, and a custom console says a lot beyond the numbers.	The V-Twin engine is the heart of the bike. Adding well-chosen covers, a custom air cleaner and a decorative collection instantly sets your bike apart from stock.	Lighting adds distinctive style and aids visibility. Choose from a variety of auxiliary lamps, headlamp trim and LED lighting to grab maximum attention.	Performance options make a styling statement as well. Screamin' Eagle® high-flow air cleaners and custom exhaust systems show that you mean business.

If your combined electrical accessories operating at any one time consume more electrical current than your vehicle's charging system can produce, the electrical consumption can discharge the battery and cause vehicle electrical system damage. Ask your dealer for advice about the amount of current consumed by additional electrical accessories.

TOURING | SUSPENSION

NEVER IN A TIGHT SPOT

On the road, you've got to feel good in the saddle. Whether you're cruising around town or out for the long haul, your bike should welcome you like an old friend and feel like an extension of yourself. So, once you've picked the bike, it's time to choose the suspension that best equips your ride to your personal dimensions.

A STRONG FOUNDATION

Being sure-footed at a stop or when parking your bike enhances your feeling of control and confidence. Adjusting the ride height by lowering the suspension may be the first step in fitting the bike to your inseam length. Combining a low-profile suspension and a narrow seat is the easiest way for a shorter rider to fit comfortably on a larger bike.

C. PREMIUM RIDE HAND-ADJUSTABLE LOW TOURING SHOCKS*

Experience the ultimate in superior ride quality with these premium Low Touring shocks. These shocks utilize a single tube, nitrogen-charged design that offers enhanced compression and rebound damping when compared to the air-adjustable Original Equipment or Profile® Low shocks. This provides a plush, controlled ride with reduced chance of bottoming. The compression and rebound damping is split between the two shocks—compression on the right and rebound on the left. This design balances the load of each shock; stiff spring with rebound damping on the left and soft spring with compression damping on the right. Larger chambers with 40mm diameter pistons and 14mm rods allow these shocks to react more quickly to impacts. This keeps the tires tracking while minimizing harshness transmitted through the frame. A simple knob behind the left saddlebag allows the rider to conveniently modify the spring preload via a hydraulic adjuster. The Premium Ride Hand-Adjustable Low Touring Shocks lower the seat height by up to 3/4".

54680-10 \$499.95

Fits '09-later Touring models (except Trike). Does not lower '09-later FLHX, FLTRX and FLTRSE3 models. Stock on FLHXSE.

B. TOURING SUSPENSION AIR PUMP

This pump was designed to allow safe and simple adjustment of the front and rear air suspension on Touring motorcycles. Unlike a bicycle pump or a fuel station air hose, the hand-operated pump with controllable "micro bleed" valve allows precise adjustment to air volume, and the "no loss" air connector maintains shock pressure when the fitting is removed. The 4.5" swivel air hose simplifies valve stem attachment. The aluminum housing is compact, lightweight, and durable, and fits easily into your bag for "on-the-road" adjustments. The high-quality 0-60 psi gauge ensures accurate air pressure.

54630-03A **\$49.95**
For use with Touring air suspension components.

C. CHROME CENTER STAND

Lifting your bike upright and off the side stand is ideal for cleaning and servicing, and reduces the space required for parking – handy where space is at a premium in a crowded garage, a small parking spot, or at a ride-in bike show. The robust Chrome Center Stand attaches directly to the frame and does not reduce the lean angle. Designed to work with all Original Equipment suspension configurations and with Profile suspension lowering kits, the adjustable feet can be set to lift the rear tire clear of the pavement, or to keep the rear tire on the ground for reduced lifting effort. The lifting lever is inconspicuously tucked away, and fits with all Harley-Davidson® Original Equipment and accessory footboards. Kit includes chrome stand, black mounting brackets, and all necessary installation hardware.

ENHANCE YOUR RIDE

How you fit your motorcycle is a major factor in maximizing comfort and enjoyment, but it's not the only factor. Sometimes, the way you look when riding down the highway dictates how you equip your bike. Selecting the right combination of comfort and style is up to you.

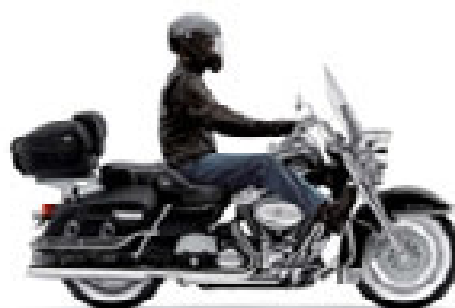

FOOT POSITION

Where your feet contact the controls can often determine how many miles you can put on in a day. Footboards position your feet just ahead of the knee for an upright riding posture, allowing your legs to carry some of your body's weight. If you need to change positions on a long ride, engine-guard-mounted highway pegs let you stretch your legs. For more details, visit www.h-d.com/fitshop.

FOOTBOARDS

HIGHWAY PEGS

HAND POSITION

Where the bar positions your hands, wrists and arms directly affects how you feel on the motorcycle. While every handlebar has its own distinct characteristics, there are

four basic styles to consider in your quest for custom-styled comfort. For more info, turn to page 574.

STREET SLAMMER BAR

Combine the width of a drag bar with added rise and pull back of integrated risers for a relaxed riding position.

APE HANGER BAR

The high-rise buck-horn shape stretches the arms and turns the wrists for an in-the-wind riding position.

REDUCED REACH BAR

Shaped to bring the controls closer to the rider, this narrow bar provides superior comfort for the short-armed rider.

TALLBOY BAR

The additional height and width of a Tallboy bar reduces the cramped elbow-down posture for a long-armed rider.

STYLE OPTIONS

Whether it's flames, skulls or tribal graphics, installing a custom hand grip and footpeg collection ties your bike's look together. To check out all your options, turn to page 546.

HIGHWAY PEGS

Repositioning your feet during a long ride relieves muscle tension and strain, and reduces rider fatigue. Adjustable highway pegs offer a comfortable cushion for your feet while traveling the open road.

Sidecar Accessories

Harley-Davidson is the only major motorcycle company that makes its own sidecars.* Harley® sidecars are available in a wide range of solid and two-tone colors. We'll match stock paint for 2004-2011 model years and offer two interior styles: Standard and Ultra Classic®. The Ultra model offers a plush interior which includes a premium sound system designed to complement the stereo on FL models. All Harley® sidecars feature hand-laid fiberglass bodies, third wheel disc brake, carpeted interiors, windshields, tonneau covers, and four different wheel/tire combinations. Sidecar includes all necessary mounting hardware.

See your Harley-Davidson® Dealer for additional information.

***WARNING:** Sidecars are for use only on FL Touring motorcycles. Sidecars must never be used on Softail® motorcycles, FLSTS/FLSTSC motorcycles, motorcycles fitted with the Springer® front fork or '05-'07 Police motorcycles with anti-lock brakes. Use of these vehicles or forks with sidecars could adversely affect handling which could result in death or serious injury.
