Bear
ARCHERY

WELCOME TO BEAR COUNTRY

This is the "Scrape Tree" where I took my first buck with a bow. It is very near where I grew up and spent countless days learning to bowhunt as a young man. Believe it or not, the bucks are still scraping under this old maple 35 years later. I do not get to return to this area very often anymore, but when I do I feel like if there truly is a Bear Country this is what it would look like.
- David Westmoreland, Missouri

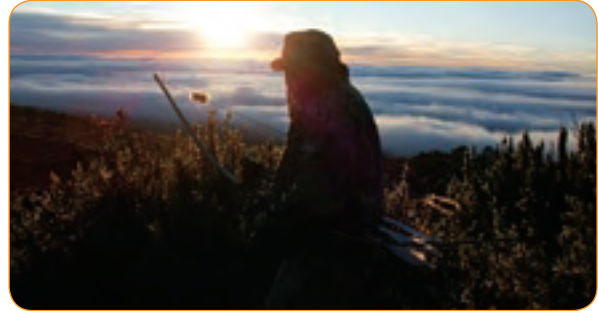

The Primos Team has been working with the folks at Bear Archery for three years now. We are very impressed at how the engineers at Bear have responded and delivered to our input and experience from the field. The bows they have created are everything we could want in a bow. Most important, the bows are dependable. In a market that is full of continually innovative products, Bear has focused on what is important to hunters—a bow that is always dependable, smooth and has a level of performance that is well above price. If you haven't shot a Bear bow lately, you won't know how good these bows shoot until you get your hands on one. At Primos, we're proud to be a part of Bear Country.

Will Primos
Will Primos

My Bear Country...Sunrise on Mauna Kea. Big Island, Hawaii.
- Tad Yomono, Hawaii

A great trip to Montana with good friends and my boys as my hunting partners has left me with many great memories. My Bear Country is anywhere as long as I have good friends, family and fun. Hunting is only the excuse to go. A good adventure should not be judged by how many trophies are taken but rather how many times you smiled or laughed.
- Casey Blum, Montana

Where's your Bear Country? Over the last year, we've asked that question of Bear archers all over the world. And for every one who answered, it was something different. We thought we'd share some of these responses from our **friends, families, partners** and **customers**.

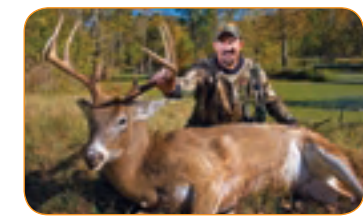

My Bear Country is on some property we hunted up by a little country church in Southern Indiana. As a young boy that was just starting to bowhunt, I looked forward to going up to that church every weekend with my dad during deer season. All in all, it was about enjoying the outdoors with friends and family. There is no doubt those times created the passion that I have for bowhunting today and is the reason why I want to share this sport with my boys as well.
- Ross Rinehart, Indiana

I was on a mountain lion hunt when I snapped this great pic of my Bear Country. I had been hunting for the past week when we headed down to lower elevation for a late lunch break. I was unable to capitalize on this hunt but I was able to take some great pics. Because of Bear Archery, I have been able to take many trophies in my hunting career and I love your products. Thanks for your great gear!
- John Purviance, Nevada

My Bear Country is a cold lonely windswept mountain top nestled along the continental divide, where the snow gets deep and the bulls grow big.
- Matt Gibson, Idaho

What's our Bear Country? That's easy. It's hunting North America's most elusive big game animal, the Whitetail deer. There's nothing more exhilarating than taking down one of these monarchs with a stick and string. Pound for pound, no other animal can provide you with more excitement... and sometimes humility. But what's really neat, is the folks at Bear Archery understand that. For this reason and many others, we're proud to call Bear Archery our partner. And every time a monster buck enters our sights, the last thing we worry about is whether or not our Bear bow is going to perform. As a true testimony to this, in one season alone, the Whitetail Properties Team put 2201 inches of antler on the ground while shooting Bear bows. We're looking forward to more visits to our Bear Country.

**MESSAGE FROM JACK BOWMAN –
VICE PRESIDENT AND GENERAL MANAGER, BEAR® ARCHERY**

In Bear Country, we couldn't be more thankful, and more honored!

Thank you to the dealers, many of whom are small family businesses, who allow ALL of us (hunters, archers and manufacturers) to continue pursuing our passion. We should never forget the decades of risk that these men and women have put forth to support our industry.

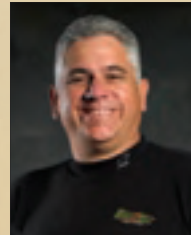

To the hunters and archers who support both Bear Archery and the dealers, thank you! Your continued support and feedback make us more focused and more responsive every year. Because of you, we strive to develop the most trusted and innovative new product, to invest in new technologies, and to make every contact with you the best experience you can have. As always, your comments and critiques are what keep us on top of our sport. Don't hesitate (and I know you won't) to tell us how we're doing.

And we're honored – proud even – that Fred Bear's legacy continues in the products that we develop each year. We like to think that Fred would be proud to see his name on our newest products. And we're especially honored to collaborate with Team PRIMOS®. The collaboration of two such legendary groups is unique in archery today. The insight and feedback that Bear receives from Will and his team are invaluable.

This year, like no other, the promise of our new technologies is spreading across our entire line – from our industry-leading TRUTH® 2 bow to our newest expansion of The TRUTH 2 family, including the Dark Horse™, the YOUNG GUN™, the ULTRA LIGHT™ and target-finish bows. In addition, our traditional line (for which we are famous) is still strong and beautiful, including great new accessories. Plus, our youth line has never been stronger.

In short, our engineering has been fully integrated with Bear's commitment to the tradition of support for hunters and archers of all ages. The results are uniquely strong and humbling. I am honored to be a part of it. And, we're all thankful for the opportunity to serve you.

FIRST, IT WAS A TOTAL SYSTEM ADVANCEMENT. NOW, THE ADVANCEMENT IS SPREADING.

When Bear engineers are asked,

“What’s the one new characteristic of the Bear® line in 2009?”

They answer:

“It’s not one thing. It’s a total system advancement that began with The TRUTH® 2. And this year, we’re taking those advancements even further across the entire line.”

THE TRUTH® 2 OBJECTIVE:

An even smoother, quieter bow – beginning with draw cycle and through release – without a speed compromise.

THE TRUTH® 2 RESULT:

A bow design so inherently smooth and quiet that few, if any, additional vibration dampeners are desired. A bow so energy-packed that it reaches speeds of 318 fps (IBO). Plus, a sturdy and more efficient bow system that transmits more energy to the arrow and delivers more consistent accuracy – shot after shot.

THE DETAILS OF ‘HOW’:

The dramatic advances detailed below are found on The TRUTH® 2. In 2009, these advancements are spreading even further across the entire Bear® line.

MINIMIZED RISER REFLEX. The less the riser reflex, the more forgiving and accurate the shot. Plus, the smaller overall profile improves maneuverability in the field or treestand.

THE PERIMETER-WEIGHTED MODULAR SINGLE CAM. The powerful single cam proves it is an engine for speed when The TRUTH 2 reaches 318 fps. Yet, the cam’s shape sets the stage for a smooth draw – including an asymmetric power track that reduces friction and increases cable life. Further, the cam quietly rotates during draw and release on a sealed, stainless steel ball bearing. Likewise, the idler wheel pivots on stainless steel sealed ball bearings. Smooth is built into every part of The Truth 2. And this cam has 1 in. modular increments and 1/2 in. post increments, including a large segment of the draw length range that does not require a bow press.

FLARE QUAD LIMBS. Ultra-short, flared limbs flex well beyond parallel. Bear perfected the limb design through FEA (finite element analysis) to evenly distribute stress during draw and release. Even stress distribution in a short, lighter limb creates these advantages. 1) “SMOOTH” is the natural result of lighter limbs accelerating and decelerating during release. 2) Beyond-parallel limb position creates a short, vertical travel where opposing limb movements cancel each other, rather than a forward thrust of conventional limbs. 3) Even stress distribution allows for a more efficient transfer of energy to the arrow; maximizing the reduction of vibration and noise.

AXLE-MOUNTED WEIGHTED DAMPENERS. Four dampeners are positioned optimally at the far end of the limbs where energy release occurs – for the optimal absorption of vibration.

DUAL, ARC STRING SUPPRESSORS are integrated into the riser. These dual string suppressors were designed and optimized using high-speed photography to counter the greatest amount of string vibration.

MACHINED ALUMINUM PIVOTING LIMB CUPS are built with a side-locking tang on The TRUTH 2 to create a rigid, “zero tolerance” fit – increasing sturdiness and consistency while reducing vibration. Pivoting limb cups maintain a tight limb-to-cup-to-riser fit, regardless of draw weight adjustment. And rubber isolation boots mean that the limb never touches the limb cup (avoiding any direct transference of vibration from limb to riser).

ONE-PIECE, SLIM SYNTHETIC GRIP reduces vibration, minimizes hand torque and provides the warmest feel in cold weather.

A customized bonus: WINNER’S CHOICE® STRINGS – recognized as the technology leader in the industry – are standard on The TRUTH 2 and are pre-conditioned for non-stretch performance from the very first shot.

AND A BEAR ESSENTIAL – FOR DURABILITY AND SPEED Bear limbs continue to be made with **PATENTED** compression-molding technology – continuous, long fibers that deliver the most energy-packed and durable limbs in the industry.

BRACE HEIGHT. The TRUTH 2 is designed with a brace height of 7 in. Shots are forgiving yet benefit from maximum stored energy to the limbs during draw. Maximum stored energy – combined with an even and efficient transfer of energy – equals speed.

THE TRUTH[®] 2

GET YOUR HANDS ON ONE...

The second generation collaboration with Team Primos created performance that was quickly recognized as legendary. "Bear Archery took a proven winner and turned it into a startling new champion," *Inside Archery*.

"The Truth[®] 2 tied with Mathews[®] DXT™ for top honors in our objective testing," *Outdoor Life*. "You won't know how good this bow feels for yourself until you get your hands on one," says Will Primos of Primos[®] Hunting Calls.

The bottom line: The TRUTH 2 raises the bar again for performance that is well above price.

See how The Truth 2 family has grown on pages 10 & 11.

Will Primos and Team Primos are seen here during a meeting with Bear Archery as both groups evaluate the progress of the 2nd generation TRUTH 2 prototype.

MACHINED ALUMINUM PIVOTING LIMB CUPS.

The laser engraved limb cups utilize a side-locking tang and limb isolation boot to achieve a "zero-tolerance" limb-to-cup-to-riser fit to further reduce limb vibration and increase accuracy.

DUAL STAINLESS STEEL SEALED BALL BEARINGS in the idler wheel.

AXLE-MOUNTED WEIGHTED DAMPENERS

are positioned optimally at the far end of the limbs for maximum vibration absorption.

MINIMUM RISER REFLEX

delivers a more forgiving and accurate shot and sets the design platform for many of The TRUTH 2 advancements.

STAINLESS STEEL STABILIZER BUSHING

DUAL ARC STRING SUPPRESSORS.

Designed and optimized using high-speed photography to counter the greatest amount of string vibration.

FLARE QUAD LIMBS.

These beyond-parallel limbs are the smoothest limbs found on a bow today (see page 6 for details). Yet, Bear compression-molded technology means these short limbs are among the most durable and energy-packed limbs found anywhere.

THE PERIMETER-WEIGHTED MODULAR SINGLE CAM.

It's the engine of The TRUTH 2 speed (achieving 318 fps IBO). It's SMOOTH (rotates on a sealed, stainless steel ball bearing and includes an asymmetric power track to reduce friction and increase cable life).

THE TRUTH[®] 2

ARCHERY'S NEWEST PERFORMANCE BOW FAMILY HAS EXPANDED.

THE TRUTH² DARK HORSE™

The DARK HORSE was created in collaboration with Team Primos[®] – makers of Double Bull™ Ground Blinds. It's a simple concept: Eliminate Profiling. The inside of the ground blind is black, you're wearing black, your bow should be black. It's 100% Truth 2 in every way.

"The new TRUTH 2 DARK HORSE™ spells 'silent night' to any critter I pursue. It is dead quiet, deadly accurate, and an absolute must for the ground blind fanatics. Understanding that camouflage MUST match its surrounding means that this black bow disappears in all black backed hides."

– Keith Beam, Primos[®] Double Bull™ Ground Blinds

Item No. AB9WG

THE TRUTH² TARGET BOWS

The minimum riser reflex of The TRUTH[®] 2 means you can count on a high degree of forgiveness and an accurate shot. The bow's sturdy frame also means a consistent level of energy delivered to the arrow, shot after shot. These characteristics make The TRUTH 2 an excellent choice for a target bow. Besides, The TRUTH[®] 2 legendary smoothness will treat you well all day long. And the two bold new Bear[®] finishes (Cobalt Blue and Fire Tiger) will turn heads at your next competition.

DONE DEAL

SMOOTH, POWERFUL ENOUGH TO BE ONE OF THE WORLD'S MOST INTRIGUING WEAPONS.

It's a DONE DEAL for speed, power and feel. Outside of The TRUTH® 2, this Bear® bow benefits the most from the collaboration of the Bear and Primos® engineering and hunting teams. The feature-packed DONE DEAL has made its mark as one of the world's most intriguing archery weapons. While this bow reaches speeds of 311 fps IBO, you have to shoot one to truly understand how smooth it is. And even though this unique combination of speed, power and feel is unsurpassed in archery, the DONE DEAL is developed in the finest tradition of Bear Archery—delivering performance that far exceeds price. It's about the hunt...your hunt.

GAME OVER

THIS FORGIVING BOW BRINGS MORE PERFORMANCE PER INVESTMENT THAN ANY WE'VE EVER BUILT.

It's GAME OVER when you are looking for one of the most forgiving bows in the Bear® compound bow line. And the game is over when you try to compare this bow – feature for feature – to any comparably priced bow on the market. Many of the performance enhancements developed for The TRUTH® 2 and DONE DEAL make their way into this bow – including the unique Bear Flare Quad Limbs and integrated string suppressor. Because it's from Bear, you know it's performance above price. The GAME OVER, however, takes this concept to a new level.

LIGHTS OUT

A FORGIVING, MANEUVERABLE, SHORT AXLE-TO-AXLE PERFORMER. EVERY BIT A BEAR® BOW.

LIGHTS OUT is the most maneuverable bow in the line – with the shortest axle-to-axle measurement and lightest weight among Bear® compound bows. Yet, because of the easy-shooting 8.75in. brace height, this bow still retains a high degree of forgiveness. And this bow is every bit a Bear bow – benefitting from the development efforts used to create The TRUTH® 2 and the DONE DEAL. Genuine Bear bow features, like PATENTED compression-molded limbs and a powerful modular cam allow this bow to achieve speeds of 300 fps IBO. Try one, you will be surprised at the level of performance in this modestly priced piece of shooting equipment.

See the NEW Lights Out finishes on pages 18 & 19.

SHOWDOWN

A FIELD-PROVEN CAM AND BEAR® ESSENTIALS MAKE THIS A SOLID PERFORMER.

SHOWDOWN brings performance and feel that rival bows costing much more. A field-proven cam system helps this amazingly-priced bow reach speeds of 290 fps IBO. And, because this is a Bear® bow, the SHOWDOWN uses PATENTED compression-molded limb technology to deliver the most energy-packed and durable limbs in the industry. The parallel limb configuration with pivoting limb cups allow this bow to take its place in the smooth-shooting Bear line-up. This is a high-performing value that would make Fred Bear proud.

PRIMOS
APPROVED

ALUMINUM PIVOTING LIMB CUPS achieve "zero-tolerance" limb-to-cup-to-riser fit regardless of draw weight adjustment – greatly reducing limb vibration. Rubber isolation boots mean that the limb never touches the limb cup (avoiding any direct transference of vibration from limb to riser).

MINIMUM RISER REFLEX is characteristic of the Bear line. Less reflex allows a more forgiving and accurate shot.

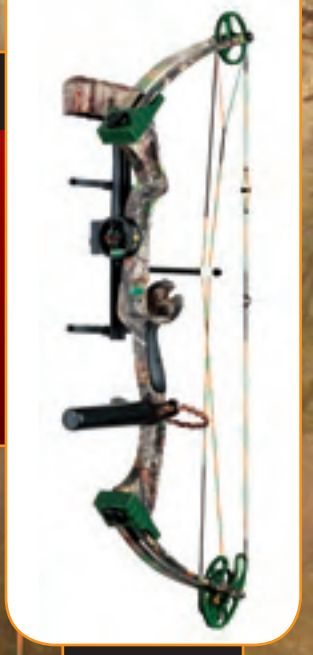

FIELD-PROVEN SINGLE CAM SHOOTING SYSTEM. This field-proven cam system is the main source of speed for the SHOWDOWN. In addition, this smooth cam allows 1" draw length adjustments from 25"-31", and 1/2" post adjustments.

BEAR PATENTED COMPRESSION-MOLDED QUAD LIMBS. Industry-leading technology uses continuous long fibers to create the most energy-packed, reliable limbs in the industry.

ALSO AVAILABLE
RTS
READY-TO-SHOOT

- RTS ACCESSORIES INCLUDE:**
- Whisker Biscuit® Quick Shot Black
 - Stabilizer with Wrist Strap
 - Wheel Peep
 - Trophy Ridge® Six-Shooter Quiver
 - Trophy Ridge Hawk Eye Sight
 - Nock Loop

Simply set your draw length and peep height, then sight in. You're ready to shoot!

THE TRUTH² ULTRA LIGHT

THERE'S NEVER BEEN A LIGHT, SHORT DRAW LENGTH BOW LIKE THIS ONE.

You're looking for the performance that rivals the top bows in the world, but you want less mass weight, less draw weight and shorter draw lengths.

YOU JUST FOUND THE PERFORMANCE YOU ARE LOOKING FOR.

Simply put, there's never been a bow like The TRUTH² ULTRA LIGHT. Never has there been such a high-performing bow within the short draw length range. The unique opportunity to build one comes from the total system performance of The TRUTH 2, and the commitment of Bear® to archers of all ages, genders and sizes. **Every TRUTH 2 component is built into the ULTRA LIGHT.** Scaled components simply create a shorter draw length and lighter mass weight.

It's from Bear.
It's from Team Primos.
It's a new level of commitment!

Available in 2009!

THE TRUTH² YOUNG GUN

THERE'S NO BETTER YOUNG BOW...PERIOD.

Only one archery company can draw from the experience of high performance archery traditions and combine it with the commitment to the young hunter.

EASILY MODIFIED. GROWS WITH YOU. STAYS WITH YOU.

The YOUNG GUN is the closest you can get to "Dad's bow." Developed in collaboration with Team Primos®, it has all the bones of The TRUTH² to give your "young gun" every advantage to learn the traditions of hunting and the most subtle tactics of shooting. Like The TRUTH 2, it's a smooth performer – with cast machined aluminum riser, compression-molded limbs, pivoting aluminum cast limb cups, dual-arc string suppressors, even axle-mounted vibration dampeners. But, most important, this bow's cam (unique to Bear®) offers 14 draw length positions to grow with your young archer.

It's from Bear.
It's from Team Primos.
It's unmatched!

NO BOWPRESS REQUIRED

ROTATING MODULAR CAM SYSTEM
This industry-leading cam has 14 draw length positions, more than any other system.

TRADITIONAL BOWS

HAND-CRAFTED LEGENDARY PERFORMANCE

Often rated a top buyer's choice for quality and bowyer craftsmanship, the traditional line-up from Bear® Archery continues to satisfy those recurve and longbow enthusiasts looking for a time-tested quality hunter. These are the same handcrafted bows that Fred Bear designed and tested all over the world. Exotic hardwoods have been used to create stunning bows that are both superior in the field and almost certainly to become tomorrow's collectables.

TAKEDOWN SUPREME

Fred Bear's original TakeDown is believed to be the finest traditional bow ever built by Bear® Archery. Exotic hardwoods have been utilized to create a special edition bow. This 60in. hunter comes complete with a crowned shelf, Bear Hair Rest, inlaid compass and characteristic latches that make this distinctive recurve so legendary.

A favorite accessory of Fred's, the TakeDown Supreme comes equipped with the classic inlaid compass.

TAKEDOWN SUPREME B RISER

 AFT2096150 – RH 50
 AFT2096155 – RH 55
 AFT2096160 – RH 60

SUPER KODIAK SUPREME

This classically designed 60in. hunter is enhanced by its exotic hardwood construction. The laminated hardwood riser with decorative shims flows into the wood core limbs and tips, reinforced by fiberglass overlay. If the exotic look belies the functionality of this recurve, then be reassured by the original, Bear-designed brass medallion. FastFlight string included.

AFT2020445 – RH 45
 AFT2020450 – RH 50
 AFT2020455 – RH 55
 AFT2020460 – RH 60

CHEYENNE

Admire a Cheyenne for the perfect sweep of multiple fiberglass laminates and its hard-rock maple core. With its radiused grip, smoothly crowned arrow shelf and FastFlight string, the 55in. Cheyenne launches your arrows without a kick and without stacking.

TRADITIONAL BOWS

HAND-CRAFTED LEGENDARY PERFORMANCE

– SHANE SMITH, Team Primos®

KODIAK MAGNUM

Magnum indeed! Named for the rugged island and monster bear that Fred shot on the ground at just 10 yards, the 52in. Kodiak Magnum will live up to its billing...and then some! Expect a quick launch for your arrow and minimum after-shock from this beautifully designed recurve.

BYRON FERGUSON SIGNATURE PATRIOT

Byron Ferguson's reflex/deflex design gives the 64in. Patriot exceptional longbow speed with just the right amount of velvety "thunk" in the shooter's hand when an arrow is released. It weighs less than a pound-and-a-half and Byron inspects and signs each bow in gold on the face of the black laminated fiberglass limb.

Shoot a flying 12-inch disc target from the back of a moving Chevy pickup. Shoot an aspirin out of the air. This bow is named for the world's most accurate, "Master of the Longbow" – Byron Ferguson.

- AFT2036155 – RH 55
- AFT2036160 – RH 60

MONTANA LONGBOW

Our 64in. Montana Longbow is quick and smooth. Its graceful limbs are faced and backed with black fiberglass overlays. The limb tips are reinforced for a strong draw. The arrow shelf is crowned and cut on center. FastFlight strings and a soft leather grip are standard.

TRADITIONAL BOWS

HAND-CRAFTED LEGENDARY PERFORMANCE

SUPER KODIAK

This magnificent 60in. recurve features a crowned, cut-past-center arrow shelf with Bear Hair mat and leather side plate. Matched gray and brown hardwood laminates give the Super Kodiak one terribly sweet look. Fred used this recurve to take tigers, lions, Cape buffalo and polar bears. Now with FastFlight string!

AFT2020250 – LH 50
AFT2020255 – LH 55

SUPERMAG 48

In the right hands, this 48in. bow is a killer. Like Fred's, the hard-rock maple handle is crowned in the center and covered with soft Bear Hair for excellent arrow flight. The SuperMag's fiberglass limb tip reinforcements let you get the most out of the FastFlight string.

AFT2034255 – LH 55

GRIZZLY

The Grizzly recurve bow is finished in satin gloss to protect the bow and provide a shield to minimize dampness and abrasion. A dependable Dacron® string makes the 58in. Grizzly a tough, economical "working man's bow." The classic Grizzly design has not changed in 50 years. Includes cut-past-center shelf covered in Bear Hair.

AFT2086255 – LH 55

KODIAK CUB

The 48in. Kodiak Cub is patiently handcrafted from select hardwood laminates and then surfaced with black fiberglass for supple strength. Its only purpose is to build the confidence of youngsters and short-draw shooters who are learning archery fundamentals the right way. The Cub is hand sanded and finished in satin with a Dacron® bowstring.
