1937 1937 was the first year Chevrolet began to offer 3/4- and one-ton trucks as standard models. Chevrolet also introduced the 216 engines and increased the number of main bearings to four. With the gas tank under the seat, the passenger seat must be removed to fill the tank. The half-ton bed length increased from 72 inches to 77 inches. Other Chevrolet truck changes that year included the truck headlights attached to the radiator shell sides and the treads on the running boards ran the length of board.

1938 The 1938 Chevrolet truck model was much like the 1937 truck. Still, some changes included the gas tank filler extended through the cab wall instead of under the seat and a heavier bumper with a painted streak was added. The pickup used the flat head six-cylinder engine borrowed from Pontiac. This was the last year Chevrolet used the generator cutout.

1939 The 1939 and 1940 Chevrolet trucks had a restyled and reengineered cab and front sheet metal. The new models were the best-looking trucks in Chevrolet Division's history. The Chevy cab was designed for driver comfort and convenience. In 1939 Chevrolet launched its first cab-over-engine truck. This was also the first year Chevrolet used script lettering on the tailgate, and the last year for oval taillights.

1940 Chevrolet continued the new design into the 1940 model year. One of the more obvious differences from the 1939 models was the uppermost grille bar with the large Chevrolet name written in red script letters. Minor changes in the cab included the instrument panel, curved with a rectangular gauge cluster design from the passenger cars. Chevrolet introduced the rectangular taillight that year and the Chevy bed became three inches wider.

1941 The 1941 Chevrolet trucks entire front end was all new. The larger, more impressive truck had an increased wheelbase and more power. Chevy discontinued the stamped name in the tailgate that year. The longer wheelbase enabled the cab area with additional legroom and the seat back was reclined to a more comfortable angle. The headlight assemblies were secured to the fenders.

1942 The 1942 Chevrolet trucks were essentially unchanged from 1941. The government halted all automobile production in early 1942 because of World War II. Chevrolet resumed production of civilian trucks for general sales in August, 1945. The government allowed Chevrolet to build civilian heavy-duty chassis cabs for qualified essential users in both 1944 and 1945 and the half-ton 115-inch wheelbase pickup in 1945 for qualified essential civilian users.

1946 In 1946 Chevrolet brought a full line of light, medium, and heavy-duty trucks to the market. All the trucks that year came complete with chrome trim. The Coupe Pickup was the only prewar model that didn't return. The light-duty engine was the same as the prewar engine. Only minor changes were made to the Chevy models in 1946.

Section 5T: Series Identification Table

Format = Part No., Year, Description, Original Chevrolet Parts Book Group No., Price and Unit of Measure.

1947 1947 was the year of major overall for Chevrolet. The Advanced Design trucks entered production with a multitude of model changes. The new Chevy's had a larger cab, more comfortable seats and driving better vision. The gas tank was moved to under the truck bed that year. The 3" wider bed had nine planks, versus the seven from the year before. The Chevrolet name was stamped into tailgate. The larger windshield and bigger side and rear window glass and optional rear-quarter windows greatly improved safety and driver vision.

1948 Chevrolet only made minor changes to their models this year. The transmission gear shift lever was moved to the steering column from the floor, while the parking brake was changed from a floor mounted lever to a foot actuated pedal.

1949 Still only minor changes were made this year. The gas tank was moved into the cab behind the seat back. The Chevy hood emblem became a chrome-plated steel. This was the last year Chevrolet used the lever action shocks.

1950 In 1950 the 216.5 cubic inch six was tweaked to put out more horsepower. The new modern tubular shocks were introduced this year. The Chevrolet hood side emblem show their name plus 3100 for a 1/2 ton, 3600 on a 3/4 ton and 3800 on a 1 ton.

1951 In 1951 the left-side cowl vent was eliminated and replaced with the door vent windows. The seat adjustment with the metal cable is changed to a rod under the cushion which is run through a rubber grommet and secured to the seat riser frame. In mid-year, the Chevy truck bed changed from nine boards to eight. The maximum speedometer speed was 80 mph.

1952 Push-button door handles were introduced in the 1952 model year. The Chevrolet hub-caps changed from being chrome plated to gray painted steel with black block letters, though the stamping and shape remained the same as prior years. Some say a very few deluxe 1/2 ton pickups still carried the chrome cap. The truck speedometer now shows a maximum speed of 90 mph.

1953 The Chevrolet truck hood emblem is now stainless steel. This was the first year Chevy offered the optional left side mount spare tire on the pickups. 1953 was the last year for wood blocks under the truck bed.

1954 Chevrolet introduced the one-piece windshield, an all-new grille, new parking lights, a new steering wheel and a redesigned dashboard. The new high-pressure 235 cubic inch insert bearing engine on the pickups and 261 cubic inch six-cylinder on large trucks began that year. The Chevy hubcaps had the same shape as before; however, they had only the bowtie emblem. The redesigned bed changed to increase the bed depth with all new bed sides. The optional rear bumper is dropped in the center to make room for the new license plate location.

Undercarriage Spray

Don't let ugly, soiled wheel wells ruin your beautiful detail job! Make them disappear!

Here's the secret. While you're washing your wheels, spray Adams All Purpose Cleaner in your fender wells and give them a good scrubbing with a fender brush. Let the cleaner dwell while you clean the tire and wheel, then give everything a thorough rinsing. If your wheel wells are really nasty looking, scrub them twice. After washing, allow to air dry, blow dry or towel dry.

Once dry, spray a light coating of Adam's Invisible Undercarriage Spray to all areas of the fender well, then work the product in with an old towel. When you're finished, your black fender well liners will have a perfect satin black finish. They literally become invisible and no longer stand out where they can rob your car of its detailed beauty. Works great for engine bays too!!

15T

Sound Deadener-Thermal Protection

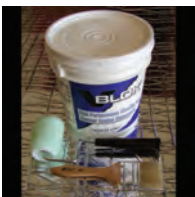

VB-15PRO
Advanced compound well suited for exterior automotive panels such as inside fender wells, wheel arches and underside of the floor pan. Converts structural resonance and vibration into low level heat through friction. When cured, it remains soft which allows it to absorb the impact of road debris. (NOTE: Should

only be applied to exterior surfaces due to prolonged outgassing). 18 Oz. Aerosol can. Covers 4 sq. ft. (8.8-15)\$14.50 EA

DEADENER
The ultimate in noise reduction. Engineered specifically for the interior & exterior side of body panels. 200% decrease in noise & vibration than any .070in. asphalt material. Bonds to metal, fiberglass & wood. Easy to apply (spray gun, roller or brush), non-toxic & water based for easy clean up. Covers 30 sq. ft. (8.8-15)\$82.50 GALLON

HEATSHIELD
Awesome heat reduction in a can! Lightweight, pliable and bonds to virtually any material! Made up of air filled glass beads held in suspension by a high temp latex acrylic binder. Two 15 mil applications yield a thermal value of R-24. Insulate & prevent corrosion with one product. Easy to apply, non-toxic. (8.8-15).....\$95.00 GALLON

SPRAYGUN
Spray gun. Siphon-feed spray gun for DEADENER & HEATSHIELD. (8.8-15).....\$84.75 EA

Old Air -Air Conditioning & Heating System

Complete Universal systems with everything you need to install Heat & Air Conditioning in your vehicle (minus refrigerant). These Hurricane units are designed for efficiency and minimal use of space to allow for stereos, glove boxes, wiper motors, etc. Choose Hurricane unit with Upper, Lower or Side exit fittings (see dimensions below). System includes Sanden 508 Compressor (or equivalent -just let us know compressor location), Mounting Brackets, Condenser (specify location & you'll need to measure your radiator), Receiver/ Drier, Binary Pressure Safety Switch, A/C & Heater Hose, Wire Harness, Clamps, 4 inch Vent Hose Kit, Control Panel w/ Knobs and more. Pick 4 vents (next page) to best suit your dash (some double vents count as 2). Optional items include Electronic Slide Controls (Vertical or Horizontal) in black or aluminum finish, Chrome Drier or Polished Compressor.

Condensers use flat tubes not round creating greater frontal area which equates to improved cooling.

The Heat & Defrost units for these systems mounts directly to your firewall. A/C & Heater lines pass through a custom rubber grommet that fits into the factory blower motor hole (shown below). Take a look at our In-Dash Vent and Switch kit below. These systems are designed for easy installation with custom condenser mounting, aluminum lines and step-by-step instructions. Retains cowl vent and majority of glove box. Has floor Heat and De-Humidified Defrost.

Steering Shaft-Billet (Flaming River)

There are two types of intermediate shaft systems: Splined (3/4-36) or "DD". Either shafting is ideal for your steering system. Splined shafts allow a more precise adjustment. DD can only be phased 180 degrees. The advantage to DD is that it can be cut to any length eliminating the need to premeasure. You will need to choose which shafting you will be using prior to ordering the universal joints, since one side accommodates the shaft. Splined shafts have two inches of spline on each side that can be easily trimmed one inch per side. DD shafts are available in two lengths which can be cut to size.

Billet shafts use a pre-ground alloy steel for strength and cosmetics. Available with electroless nickel plating for corrosion resistance.

Corvette C4 IFS & IRS installation kits for 47-53 Chevy Trucks

Now you can have the ride, superior handling, cornering and braking provided only by the advanced technology built into the Corvette suspension.

Rear kit shown assembled and polished

Front kit shown assembled and polished

STREET ROD HEADQUARTERS now offers quality kits to adapt the late model ('84-'87 and '88-'95) Corvette front and rear independent suspensions to your '47-'55 Chevy truck.

IRS kit shown with optional coil overs

These kits are designed to fit your frame. All brackets are laser cut from cold rolled steel and heli-arc welded for strength and unsurpassed good looks.

These kits utilize Corvette C-4 front and rear suspension components mounted to your frame using the stock Corvette geometry. The real bonus is this system uses the stock Corvette Power Rack and Pinion Steering Unit as designed by GM, eliminating any "bump steer" problems inherent with units from vehicles designed in the '70s with light weight vehicles and economy in mind.

IFS kit shown with optional coil overs

You can have GM sports car handling on your GM manufactured truck. All the Corvette suspension components are manufactured from forged aluminum which allows you to decrease vehicle weight while also maintaining strength and a solid suspension.

Not only will you be amazed at how well your truck rides but how fun it will be to drive with a Corvette front and rear suspension installed. And let's not forget 4-wheel disc brakes designed to mount to your suspension.

Available Aldan Eagle coil over shocks for front or rear allow you to adjust the ride to your liking with 6-position adjustable compression damping and spring rate adjustment also. Rugged construction and combination of oil and gas charging incorporated in each shock are only part of the reason we recommend them with our IFS and IRS kits. Kits come complete with instructions and all hardware.

You'll enjoy the handling and new life brought to your truck with these very affordable suspension kits for years to come.

**Keep your GM all GM
with our custom front and rear subframes
designed to fit your chassis using GM-based components**

No longer do you have to go to the junk yard to buy a Camaro or whatever front chassis section to "clip" your car or truck frame. We have been making custom designed front IFS and rear IRS, standard, or stepped chassis subframes for a few years now, and it has become part of our standard product line. We can design a front or rear-steer subframe for any street rod, classic Chevy, large car or truck. Whether you want air bags, coilovers, we will design an IFS subframe that will be the same width as your chassis rails, have the same wheel base, any track width, any step over the front IFS, engine mounts, rack-and-pinion steering, core support mount or whatever is necessary. Computer generated, mandril-bent, custom steps over the IFS is also an option.

Our standard brake packages with these IFS "clips" are the '70-'81 Camaro 11-inch disc brake (5-on-4 3/4) or the '77-'88 Impala/Caprice 12-inch disc brake (5-on-5). We offer steering linkage kits, stock column adapters to splined U-joints, Flaming River or ididit columns to solve your steering hook-up problems.

The rear chassis subframes can be tubbed, stepped, air bagged or whatever you'd like. To complete your new rear clip, we jig-narrow and straighten Ford rearends and use Dutchman alloy axles any spline, any wheel bolt-pattern, big or small bearings, any flange (GM, Ford or Mopar). We also offer a universal rear 4-link kit with two styles of Panhard bars and a universal transmission crossmember/trans mount kit. Both come extra long so you can cut-to-fit for your chassis needs.

Send us the dimensions for a free estimate. Other options include custom bent 1-inch od front-and-rear sway bars, Wilwood or Baer high performance brakes. Complete rearends or housings are available from Hallbrand, Alston's FAB9, new '58 Ford style housings, Championship style, a used housing from our pile or bring your own! We are a dealer for Air Ride Technologies, Baer Racing Brakes, Wilwood and many other popular street rod and classic Chevy manufacturers.

Bring your ride into the 21st century and have a great handling hot rod with a custom subframe! You'll have rack-and-pinion steering, disc brakes, narrower front track for more turning room under the fender, coilovers or air bags, and it will mate perfectly to the width of your existing frame rails. Most of all you'll have all the adjustability we build into all of our other IFS kits and direct replacement chassis!

**Weld-in Front-Steer IFS
for Cars & Pickups
'33-54 Chevy Cars • '33-59 Chevy PU**

This front-steer, independent front suspension (I.F.S.) is designed for those early cars and trucks that have plenty of space in front of the crossmember for the rack-and-pinion steering. The weld-in kits are available for '33-'54 Chevy cars and '33-'59 Chevy trucks in Stage I or Stage II.

The most complete kit, Stage II, features a 2 X 4 X .188-inch wall box-tube crossmember that holds the D.O.M. 1-inch diameter X .156-inch wall lower tubular A-arms and 7/8-inch diameter X .156-inch wall upper tubular control A-arms. Steering is provided by a Flaming River manual rack-and-pinion, while two '70-'81 GM Camaro spindles, ball joints, 11-inch rotors, and calipers give you stock over-the-counter GM parts available most everywhere! With a two-position lower mount and a three-position upper mount, the Hal Corp. aluminum, adjustable coilover-shocks will give the stance you like best!

Our popular Stage I kit (designed to use the Stage II components) features everything in the Stage II kit except the spindles, balljoints, rotors, calipers, and rack.

Your options (can be substituted at an additional cost) include a '83-'89 T-Bird power rack, chrome A-arms, 12-inch diameter rotors, bolt-pattern changes, front sub-frames, anti-sway bars, and different tread-widths are available.

We offer stance adjustability like no one else!

All of our IFS kits with either air bags, ShockWave™ units or coilovers have an adjustable upper A-arm tower-mount that gives you about 3-inches of adjustment up-and-down. All of our lower A-arms have a two position lower mount for coilovers or ShockWave™ Air Ride systems. At the rear of our chassis, you'll find a three-position mount for either coilovers or shocks. Combine this with the adjustability of our Hal coilovers and you'll have 3-4-inches of stance adjustment up front and the same at the rear with any of our IFS kits, chassis clips, or direct replacement chassis!

The basis for all our IFS kits

You'll notice there is one thing in common about all our IFS kits, and that's the use of the stock GM '70-'81 Camaro front spindle. We've really chosen this spindle for the benefit of our customers. Let me point out why we like these front-steer spindles so much! They offer either an 11 or 12-inch GM brake package with 2-15/16-inch diameter caliper pistons, vented rotors on the same balljoints using either the 11- or 12-inch spindle. These very popular balljoints were used by GM on their mid-sized cars from '73-'88, and on '77-'88 Caprice/Impala (12-inch disc brakes, most with 5-on-5 bolt pattern) and the '70-'81 Camaro with 11-inch brakes (5-on-4 3/4 pattern).

So what does this mean to you? The brake options using these spindles are better than anything else over the counter! We use very common, easy-to-find parts at the junk yard or over-the-counter at any parts house! With our product line, you can have either 11- or 12-inch (Delco caliper) disc brakes without having to change a thing! This caliper applies much more pressure on the rotor than later down-sized versions!

This also means to our customers on a budget that buying our economical Stage I kits lets you save about \$800 (over the complete Stage II)! Every kit is available in a Stage I form! The Stage I allows you to provide spindles, rotors, calipers, balljoints, and rack from a donor car or directly over the counter from any parts house in the USA or Canada! All of our IFS kits are alignable at any frontend shop or GM dealer!

Heatshield & Noise Barrier Kits

STOP NOISE, STOP HEAT. Selecting noise/ heat reduction products can be very confusing. We have made this an easier process by creating 3 different levels of kits: **Ultimate, Basic & Acousti-Shield**

Ultimate Noise Barrier Kit

Ultimate Noise Barrier Kit includes:

- One vibration damping sheet (VDAMP-2)
- Four acoustic sound floor barrier sheets (VBLOK-VB4.5)
- One gallon of sprayable sound deadener (DEADENER)
- Complete instructions for all items in kit.
- Option: One gallon of sprayable HEATSHIELD (details of individual components below)

Ultimate Noise Barrier Kit without HEATSHIELD	
13209	\$620.00 EA
Ultimate Noise Barrier Kit with HEATSHIELD	
13209-1	\$725.00 EA

Basic Noise Barrier Kit

Basic Noise Barrier Kit includes:

- Two thermal acoustic blankets (Insulator 12)
- One gallon sprayable sound deadener (DEADENER)
- Spray-on adhesive material & specialty seam tape
- Complete instructions.
- Option: One gallon of sprayable HEATSHIELD (details of individual components below)

Basic Noise Barrier Kit without HEATSHIELD	
13211	\$212.00 EA
Basic Noise Barrier Kit with HEATSHIELD	
13211-1	\$317.00 EA

Individual Heatshield & Noise Barrier Components

Vibration Damping Sheet. Moldable, odorless & lightweight mineral filled vinyl copolymer formulated to handle the extremes of aircraft and automotive vibration & noise control. 40% lighter than asphalt damping materials. Can handle continuous temps to 250 degrees. Paintable and can be applied to wood, fiberglass, sheet-metal and plastic panels. 2 sizes of thickness available. Each sheet= 37" x 54" (covers 14 sq. ft.)

Individual sheet. Thickness=.042".	
VBDAMP-2	\$70.00 EA
HEAVY DUTY individual sheets. Thickness=.075"	
VBDAMP-2HD	\$100.00 EA

BARRIER VBLOCK-VB3

Multi-layered composite material, which provides a shock absorbing, noise penetration barrier and thermal insulation. The isolation layer is constructed of a closed cell reinforced neoprene which decouples the floating lead septum from the vibrating source structure (floorboards etc.) creating a floating wall, which is one of the most effective noise penetration barrier materials.

SMALL 49" x 36" individual sheets. (12 sq. ft.) Thickness=.25"	
VBLOK-VB3.5	\$180.00 EA

THERMAL INSULATOR VBLOK-INS12

Thermo-Acoustic Blanket guards against the intrusion of heat, sound, vibration and airflow. Consisting of an all natural cotton fiber layer with surface layers of foil, it provides up to 50% greater R-value than other reflective insulation materials.

4' x 6'. Covers 24 sq. ft.	
VBLOK-INS12	60.00 EA

Sprayable sound **DEADENER** is a high performance air curing damping compound designed specifically for the interior & exterior side of body panels. Easy to apply (can also be brushed or rolled on), non-toxic & water based. 1 gallon.

DEADENER	\$84.00 EA
-----------------------	------------

HEATSHIELD is lightweight, pliable and bonds to virtually any material! Made up of air filled glass beads held in suspension by a high temp latex acrylic binder. Currently used in the US space shuttle program. Two 15 mil applications yield a thermal value of R-24. Insulate & prevent corrosion with one product. Easy to apply (spray, brush or roll on) and non-toxic. 1 gallon at 15-mil thick will cover approximately 50-60 square feet.

HEATSHIELD	\$100.00 EA
-------------------------	-------------

1 quart, external mix, siphon-feed spray gun. Use to apply HEATSHIELD/ DEADENER.

SPRAYGUN	\$100.00 EA
-----------------------	-------------

BARRIER VBLOCK-VB4

A composite material with a flexible, loaded vinyl mass barrier and a foam decoupling layer which reduces road noise by impeding the passage of soundwaves and acting as an airspace and spring. Its flexible nature prevents the composite from taking on vibrations from supporting structures, resulting in superior transmission loss over a broad frequency range.

SMALL 54" x 37" individual sheets (14 sq. ft.) Thickness=.25"	
VBLOK-VB4.5	\$138.00 EA

WEB SPRAY ADHESIVE

12 oz. can. Ideal for acoustic panel installation.

Accousti-Shield Kits

FULL KIT INCLUDES: FULLY ILLUSTRATED INSTRUCTIONS FOR A PAINLESS, TWO-HOUR INSTALLATION. STAGE 1: PRE-SIZED SOUND DAMPER PADS. The first stage consists of pre-trimmed, self adhesive, Sound Damper Pads. Bonded to strategically located trouble spots on the floor pan and roof of the vehicle to control body panel vibration and noise. These spots are mapped and labeled in detailed instructions which are included in each kit. STAGE 2: PRE-TRIMMED HEAT ABSORBER/BARRIER PANELS, SPRAY ADHESIVES AND SEALING TAPE. The second stage uses a high-tech absorbing, barrier material bonded to the body panels. Will deaden sound and insulate the vehicle from radiant heat penetration. Each absorber panel is cut to the correct shape and contour for your vehicle and is mapped and labeled with detailed instructions. Individual components available for most kits (components shown below in gray).

Turn Your Chevy Truck into "Quiet Riding Comfort"

Stage 1
Sound Damper Pads

The first stage consists of pre-trimmed, self-adhesive, Sound Damper Pads, bonded to strategically located trouble spots on the floor pan and roof of the vehicle to control body panel vibration and noise. These spots are mapped and labeled in detailed instructions which are included in the kit.

Stage 2
Heat Absorber/Barrier Panels

The second stage uses a high-tech absorber/barrier material, bonded to the body panels, to both sound deaden and insulate the vehicle from radiant heat penetration from the engine and road. Each absorber panel is cut to the correct shape and contour and is mapped and labeled in the detailed instructions.

Kits Include:

- Stage 1 Pre-Sized Sound Damper Pads
- Stage 2 Pre-Trimmed Heat Absorber / Barrier Panels, Spray Adhesive and Sealing Tape
- Complete Illustrated Installation Instruction

**PRETRIMMED,
MODEL SPECIFIC**

THESE PANELS ARE MADE TO FIT A SPECIFIC MODEL TRUCK WITH NO TRIMMING.

THE OUTSIDE DIMENSIONS OF ALL UNIVERSAL PANELS ARE 44" WIDE X 32" HIGH. THE DESIGN MAY BLEED OFF ONE OR MORE SIDES AND CAN BE TRIMMED WITHOUT HARMING THE DESIGN. OR, AS SHOWN IN THE CHART ON THE RIGHT, DESIGNS MAY BE 23", 30" OR 36" WIDE. YOU CHOOSE THE DESIGN WIDTH THAT ALLOWS YOU TO TRIM THE OVERALL PANEL TO SIZE WITHOUT CUTTING INTO THE DESIGN. THE DIFFERENCE BETWEEN THE DESIGN WIDTH AND 44" IS THE SPACE THAT YOUR TRIM MUST FALL WITHIN TO PRESERVE THE DESIGN.

DOOR PANELS COME IN TWO TYPES. PRETRIMMED-MODEL SPECIFIC AND UNIVERSAL. ALL PANELS ARE MADE OF .125 THICK ABS PLASTIC. THEY CAN BE GLUED, SCREWED, FOAMED, CARVED OR LAYERED. PLUS THEY ARE WATERPROOF. ABS GLUE IS USED TO PATCH OR FILL MISTAKES, MAKE CUSTOM TREATMENTS OR TO ADD MATERIAL WHERE IT'S NEEDED.

THESE PANELS COME BARE WITH THE DESIGNS MOLDED IN SO YOU CAN COVER WITH YOUR MATERIAL OR CHOOSE FROM OUR VAST SELECTION OF MATERIAL AVAILABLE. NO SEWING IS REQUIRED. FABRIC IS GLUED DOWN USING SPRAY ADHESIVE SPECIFIC TO THIS APPLICATION.

DOOR PANELS COME IN SETS OF 2, LEFT AND RIGHT. FOR 4-DOOR APPLICATIONS ORDER 2 SETS OF PANELS. SEVERAL PANEL STYLES CAN BE USED AS DOUBLE SETS FOR 4-DOORS. JUST REVERSE 2ND SET FOR A FLOW-THRU DESIGN.

Headliner -Molded ABS Plastic

These are ABS Plastic with a medium embossed leather grain texture. This material is easily formed with heat and duplicates the original look and texture exactly. ABS plastic is very tough, yet flexible, and does not show scratches or scuffs. It can be easily dyed with a flat vinyl plastic spray paint.

All of our patterns are based on out-of-vehicle originals. With few exceptions, truck headliners were black or brown when they came from the factory during the early years. ABS plastic can be easily dyed with a flat, vinyl plastic spray paint. The panels also can be covered with cloth or acoustic material.

1947-53 New Radio

Small size, big features! Original looking unit with current day audio technology. Fits stock dash radio opening without modifications. Shallow 3¼ inch case depth allows room for dash components such as electric wipers, air conditioning, etc. 4 x 45 watts RMS output, allows up to 180 watts of audio power. Original style AM dial scale in foreground with FM dial scale in background. Analog controls look and feel like the original radio. All audio controls are easily accessible: Volume, bass, treble, balance, fader and tuner from original looking controls. CD or XM (satellite) inputs included. LED dial lights which never need replacing. Digitally tuned AM/FM/Stereo front end provides stable, high quality reception with 10 station presets (5 AM, 5 FM). 40 year memory retention (presets, etc) with power disconnected. Inputs for CD.

Maximum power = 180 watts RMS (45 watts x 4 speakers).

Dimensions: 9in. W x 3.25in. H x 4.6in. D.

½" dia. shafts on controls for mounting (same size and thread as original shafts).

ADD COLOR AND STYLE TO YOUR TRUCK BED WITH EXOTIC AND DOMESTIC BED WOODS!!

- Kiln Dried and Stabilized, Properly Milled, Sanded, and Ready to Finish.
- Sets are milled to order using only kiln dried "better than cabinet grade" lumber to assure you receive only the highest quality product. All pieces are 3/4" thick, grooved and trimmed to length. Sanded using a multiple-step process providing a uniform and extremely smooth surface, ready to finish right out of the box (does not come stained or with final finish).
- Boards individually numbered for ease of installation and chosen & matched based on color, character and grain.
- Grooves available to fit both OEM and custom-style bed strips at no extra charge.
- Custom widths & lengths are available to meet your specific requirements. Professional packaging to minimize potential damage during shipping. Many other types of woods available.

Bed Lids

Standard Features and Benefits

- Resin filled composite honeycomb give a durable, long lasting construction.
- Built in stainless steel cross bar hinge is laminated into the truck lid giving our hinge system strength and durability.
- 2 double stage locking system for extra security.
- Dual heavy duty gas struts are mounted to assist in opening & closing the lid.
- Double weather seal helps protect cargo from the elements.
- Neoprene inside trim seal helps protect bed rail from excessive wear and tear.
- Nylon pull strap to assist in closing.

Their classic lids are made out of composite fiberglass to last the test of time just like your classic truck.

- Reduces wind drag and saves fuel.
- Easy to install or remove.
- Proven, tight fit.
- Black, white or primered finish.

***OPTION: Under the lid charcoal carpeting tops the interior of our Traditional Lids giving it a plush look and feel.**

Tailgate - Custom

Stock tailgates have exposed hinges that leak rusty water, chains that damage expensive paint and unsightly, poorly designed latches. These custom tailgates are manufactured from 16 gauge, satin coated steel. Hidden hinges concealed into the rear cross member. Hidden latch assemblies actuated by 2 small knobs on the inside of the tailgate. Nylon latch bolts and stainless steel strikers assure smooth, quiet and rust free operation. Mounts to Pro's Pick Custom Beds as well as Stock Beds to add a clean custom look to your original bed.

TAILGATEPROW		Smooth, clean finish. Fits pro's pick and other stock beds.

Stock tailgates are "beautiful", they hold the classic look that is near and dear to all enthusiasts. They also carry those tailgate chains that ruin our \$10,000 paint jobs.

When Pros Pick designed this kit they felt the criteria had to be:

- *Anyone could handle the installation.*
- *The tailgate had to slam shut.*
- *No rattles allowed as you drive down the road.*
- *None of the materials used could ever rust.*
- *It had to have check straps that could not damage the paint.*
- *You could install it on a painted bed without damaging the paint job.*
- *It had to look cool, yet be compatible with the vintage look of the truck.*
- *A touch of the release buttons on each side allow the gate to open.*

Shop Manuals on CD

All CDs contain the factory service or shop manual and any applicable supplement. The factory manual is essential. It includes coverage on all mechanical and electrical systems. This is where you find specifications, wiring diagrams, diagnostic procedures, troubleshooting, installation and removal, and covers all systems.

CDs contain the body service manual as well. In some cases, the body information is included in the service manual.

Parts books are included on most CDs; check content information for specifics.
