## Make Your Bird Fly With Our Hub Caps & Wheelcovers

Your Thunderbird will instantly look better when you use our new wheelcovers. These are highly detailed, accurately reproduced & beautifully rendered. In fact, the center emblem on the '55 & '56 wheelcover is currently being produced on the original Ford dies! Whatever your Bird requires, we have it here at MAC's. See pages 21 & 156.

## To Our Thunderbird Enthusiasts,

Legend has it that long ago, the Quillayute, part of the Native American Chimakoan tribe in the Pacific Northwest, experienced the worst weather they had ever seen. It began with rainstorms, which gave way to hail, sleet, then snow. Hailstones were so large that many among the tribe were killed. Others were forced to move from their villages. The water froze over so the men could not fish. The vegetation that was not already eaten was ruined.

The Chief finally called his people together to ask the Great Spirit for help. After many futile attempts, they saw flashes of light and heard a loud, whirring sound. They looked to the sky and saw a huge bird-like creature coming toward them. Its wingspan was as wide as two war canoes. It circled several times then flew away, taking with it the lightning, thunder, and rain. The Thunderbird—as the tribe called it because of the powerful sound it made—had saved the Quillayute.

It's only fitting, then, that the name Thunderbird is also used for these powerful, classic autos.

In the tradition of that great bird, MAC's has produced what we feel is the most complete catalog of classic Thunderbird parts in the world. Enthusiasts like you will enjoy the more than 8,000 items listed on 264 pages in full color. This year we also have added more than 285 NEW items to the catalog.

**Ordering is extremely easy.** You can use our Web site [www.macsaautoparts.com](http://www.macsaautoparts.com), fax or mail your order using an order form (found on pages 258, 260 & 262 of this catalog), or call 800-777-0948 to speak with one of our dedicated staff members.

Stop in & visit our **new showroom** at 6150 Donner Road in Lockport, New York (minutes from Buffalo), 8 a.m.-5:30 p.m. Monday-Friday or 8 a.m.-12:30 p.m. on Saturday. You can check out some cars, pick up your order, or just say hello.

When it comes to restoring & maintaining your classic Thunderbird, we know you have choices, so we thank you for choosing MAC's: your one stop source for quality parts & accessories for your 1909-1970s Ford & Mercury.

# Here's what our customers are saying about MAC's...

**Without a doubt**, MAC's is the most professional early Ford parts supplier in the industry. I've tried others here on the west coast, but their reaction to me is almost nil, from lousy service to totally ignoring my orders. Thanks again from California to MAC's in New York.

- Gil H.

**Every contact I have** with MAC's has been nothing but prompt, professional & perfect. MAC's was on this job & will be my first (and ... only) choice in the future ... I always recommend MAC's to others.

- Shayne M. Campbell

**I have found your prices** better than eBay parts. You guys get me the order so fast! You are very helpful with my [restoration]. It will be fantastic, thanks to all of you at MAC's.

- John Mannes

## Hog Ring Pliers & Rings

We offer high quality hog rings & pliers, for those who are skilled at installing their own seat covers. However, if you have never done this job before, we recommend that you take our premium seat cover sets to a professional trim installer, for best results. Their many years of experience have taught them countless techniques for getting the proper fit, without unnecessary wrinkles, sags, or other little imperfections. So unless you are experienced at installing reproduction automotive seat covers, check the yellow pages for a professional installer near you.

**Seat Belts** (2 required)

If you haven't already installed seat belts in your classic ride, we highly recommend it. Our universal style seat belts feature a chrome lift latch & are available in 10 colors to match almost any interior. Sold per passenger, each belt includes washers, bolts, nuts & basic instructions on how (but not where) to install. The 60" size is standard, for a little extra breathing room, order the 74" length. Proper installation is at the risk & responsibility of the customer.

**Seatbelt Ordering Instructions:**

The part numbers for each color are located under the color swatch, with corresponding numbers for length (ex: SEATBELT-BLK60, is for the 60" belt, while SEATBELT-BLK74 is for the 74" belt).

## Insulation & Sound Deadener (as required)

### Firewall Insulation

If you are replacing your carpet, now is the best time to install superior firewall insulation. We carry everything you'll need. Our big 48" x 72" sheet is a full 5/16" thick & is rated to R18 (meaning it resists heat up to 700°). It's constructed of jute fiber with a space age reflective foil bonded to both sides. You can put it on the firewall, behind the kick panels or even on the trunk divider. It does the job of blocking intrusive road noise & keeping engine heat in the engine compartment where it belongs.

- ALL Firewall insulation, 48" x 72" x 5/16", cut to fit desired area . . . . . V700770X 32.00

### Sound Deadener by Dynamat®

For years, we have been selling the original Dynamat & can boast hundreds of satisfied customers. We are now proud to offer the next generation of Dynamat sound deadeners: Xtreme. Xtreme is a step up from the original formula & is Dynamat's best product at controlling vibration. It damps 4 times as much as the original Dynamat &, as an added bonus, it weighs 50% less. It is available in conveniently sized 18" x 32" sheets & with peel & stick application; it goes on quickly & easily. Do yourself a favor & order some today!

- ALL  Dynamat® Xtreme, each piece is 18" x 32" (as required) . . . . . DYNAMAT-0433 29.95

### Jute Backing

Ever wonder what that stuff is on the back of your carpet? It's called jute fiber & it provides a cushion underneath your carpet as well as sound insulation. We have it available in 36" x 72" sheets that are 5/16" thick. You cut the size you need for the area you want to put it in.

- ALL Synthetic jute fiber, 36" x 72" x 5/16", cut to fit . . . . . B13000 15.95

### General Trim Adhesive

MAC's recommends the following adhesive for attaching jute padding to metal or plastic.

**USA-5**

**AM/FM Cassette Stereo Radio**

This radio is equipped with all the features of the USA-1, plus 240 (4 x 60) watts of power. You also get 6 more station presets, a CD changer control & metal tape capability.

55-57 B5S-18806-CA5 . . . . 302.95

**IMPORTANT INSTALLATION INFORMATION:**

All stereo equipment on this page requires a 12 volt negative ground. All 1955 stereo equipment installation needs a 6 volt positive ground system. Use of any other ground will destroy the radio. All of these radios are engineered to fit the original dash opening with no cutting, grinding or snipping; in fact, no modifications at all. All brackets, wiring & plugs, mounting hardware, a chrome bezel & original-looking chrome knobs along with installation instructions complete the package. All of our radios carry the manufacturer's 12-month limited warranty.

*Its standard features include:*

- \* 16 bit twin D/A converter
- \* 3 beam laser tracking
- \* 8x oversampling digital filter
- \* Advanced anti-vibration system
- \* Includes 16' of cable & all required mounting accessories

**PLAY CD'S IN YOUR CLASSIC CAR!**

This 10-disc CD/CDR & CD-RW changer fits easily under your seat or in the trunk (11-3/8" wide x 2-7/8" high x 7-5/8" deep). It can be mounted horizontally or vertically. It's a simple one cable hook-up to a USA-5 & the radio controls all of the functions of the CD changer.

This SA-2 model is perfect for the show enthusiast. It allows you to leave the original radio in the dash & still get digital quality sound at the touch of a button. The main receiver is hidden under the seat, or wherever you choose to put it, while the remote controlled LCD screen is flush-mounted or swivel-mounted (optional) out of sight. Being only 3/4" thick allows you to mount it almost anywhere, such as the glove box, ashtray, sun visor or console.

## SECRET AUDIO

The SA-2 (140 watts, with radio frequency remote control) features: AM, FM stereo; 4-way fader; separate bass & treble; seek & scan tuning; flush remote mounted LCD bezel; optional swivel mount for LC control unit; dual RCA pre-out; 12 AM, 18 FM pre-set stations; CD changer (not included) controlled by wireless remote (not included) or remote mounted LCD panel.

### Dual Front Speaker Assemblies

Since you don't want to cut holes in your doors or kick panels for speakers, we have the perfect solution: two speakers mounted to a bracket that will drop into your original dash speaker opening with no modifications at all! These assemblies are pre-wired to "plug-in" instantly to our radios. Want the best possible sound from your original speaker location? Upgrade to our dual voice coil speakers. They have 70% more cone area than our standard speakers & that gets you better bass response & 140-watt power handling capability. Each speaker has dual tweeters for crisp clear highs to make your favorite radio sound like it should. Give us a call & step up to dual voice coil speakers today.

# WHEEL COVERS & HUB CAPS

## Wheelcovers (4 required)

Your Thunderbird will instantly look better when you put our new wheel covers on it. The details are all there: the center emblem on the '55 & '56 full wheel cover has the correct red background with an accurately reproduced, beautifully rendered, Ford crest encased in plastic just like the original. In fact, it's currently being produced on the original Ford dies! The '57 wheel cover has the same attention to detail, as the painted center section is white & the embossments are trimmed in black just like they were in 1957. Both the '55 & '56 hub caps have properly painted backgrounds in red & white, respectively. Whatever your Little Bird requires, we have it here at MAC's.

## Poly Slide Leaf Spring Liners

With all the time & effort you put into restoring your car, don't let something little like a squeak ruin your finished product! Use our Poly Slide Leaf Spring Liners to help fix that problem. A classic car is a beautiful thing, so get rid of that squeak in your spring! Call MAC's & order yours today! You cannot use original spring clips when installing because of the thickness added in each layer.

Designed to fit between spring leaves, they control friction & lessen squeaks. Molded in black with a "lip" to reduce movement & sold in convenient 20' rolls, choose your size & make that call to order yours today!

**How many do I need to order? All engine components listed are sold "each" except:**

**SET** = 1 set does one engine (piston rings, camshaft bearings & main bearings).  
**PAIR** = 1 pair makes one unit (split items, such as connecting rod bearings = order one pair for each connecting rod & valve keepers = order on pair for each valve stem).  
 All other items are sold EACH = count how many your car uses now (pistons, camshafts, cylinder sleeves, etc.).

## ZDDPlus Motor Oil Additive

*Major oil companies have been significantly reducing the level of ZDDP (zinc) in motor oil over the past few years. This vital anti-wear ingredient is necessary in all flat-tappet classic vehicle engines. By adding one bottle of ZDDPlus each time you change your oil, that protection will be maintained, no matter what brand or viscosity motor oil you've been using.*

ALL Oil additive, 4 oz. bottle . . . . . ZDDPLUS 9.95

## Engine Hardware Kit

You carefully painted the engine block, the water pump, the valve covers & now you are going to bolt everything together with hardware that will start to rust almost immediately? All that hard work deserves a reward, so reward yourself with our Engine Hardware Kit. It has every nut, bolt & washer you'll ever need & every bit of it is crafted from rust free stainless steel for good looks today, tomorrow & well into the future.

Kit contains hardware for the oil pan, timing chain cover, water pump, thermostat housing, intake manifold & the valve covers.

### Front Motor Mounts & Rear Transmission Mounts

Can there be a more overworked or more under appreciated part of your T-Bird than the lowly motor or transmission mount? Every time we rev our high-powered Thunderbird engines, the poor mounts are stretched almost to the point of tearing apart. Every little oil leak seems to find its way to the sensitive rubber part of every mount, while exhaust & engine heat combine to cook mounts into an early grave. Yet, these motor & transmission mounts have the vital tasks of keeping our drive trains properly centered & safely anchored under every condition, while also isolating engine vibrations from the chassis & passenger compartment. Have a heart & replace those worn & weakened motor & transmission mounts today!

These motor mounts are the rubber-coated metal parts only. They do not include any mounting hardware.

### Insulation & Sound Deadener (as required)

#### Firewall Insulation

If you are replacing your carpet, now is the best time to install superior firewall insulation. We carry everything you'll need. Our big 48" x 72" sheet is a full 5/16" thick & is rated to R18 (meaning it resists heat up to 700°). It's constructed of jute fiber with a space age reflective foil bonded to both sides. You can put it on the firewall, behind the kick panels or even on the trunk divider. It does the job of blocking intrusive road noise & keeping engine heat in the engine compartment where it belongs.

ALL Firewall insulation, 48" x 72" x 5/16", cut to fit desired area . . . . . V700770X 32.00

#### Sound Deadener by Dynamat®

For years, we have been selling the original Dynamat & can boast hundreds of satisfied customers. We are now proud to offer the next generation of Dynamat sound deadeners: Xtreme. Xtreme is a step up from the original formula & is Dynamat's best product at controlling vibration. It damps 4 times as much as the original Dynamat &, as an added bonus, it weighs 50% less. It is available in conveniently sized 18" x 32" sheets & with peel & stick application; it goes on quickly & easily. Do yourself a favor & order some today!

ALL Dynamat® Xtreme, each piece is 18" x 32" (as required) . . . . . DYNAMAT-0433 29.95

#### Jute Backing

Ever wonder what that stuff is on the back of your carpet? It's called jute fiber & it provides a cushion underneath your carpet as well as sound insulation. We have it available in 36" x 72" sheets that are 5/16" thick. You cut the size you need for the area you want to put it in.

## Which Transmission Do I Have?

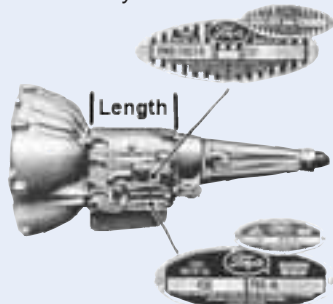

Instead of coming up with two separate transmission names, Ford Motor Company decided to call the two different versions of the Ford-O-Matic the "small case" & the "medium case." If you are lucky enough to still have the tag on your tranny it's simple to figure out which one you have:

The prefix of the engineering number for the small case in 1955 is either PAG or PAK & in 1956 it would be PAP or PAR. The prefix for the medium case in 1955 was PMB, in '56 it was PAW & in '57 it was PBA.

For many of you that tag will be long gone, so let's go to plan "B," actually, plan "B" & plan "C," just to be sure. The "small case" tranny was only used in Ford cars. The "medium case" tranny was able to handle more power & torque & therefore was used in Thunderbirds, Mercurys, police cars & the 1956 Ford station wagon with the 312 engine.

Problem solved ... except that your car is 50 + years old & it might not have the original transmission anymore. On to plan "C": the case was shorter in the "small case" transmission, hence its name. It's 9-7/8" long & in the "medium case" transmission, it's 10-7/32" long. That's great, except you say you're not exactly sure what part of the transmission the case actually is so the length doesn't really help that much. Please refer to our illustration above.

The cooling system is one of the hardest working systems on any vehicle. When you think about the constant heat & pressure of coolant flowing thru hot water jackets, rubber hoses, the water pump itself & the radiator, it's easy to understand how leaks & other failures are so common. Yet when it's working properly, our cooling system is often "out of sight & out of mind." Keep a close eye on the many components of the cooling system on your car & keep your friendly & reliable Ford engine cool & happy!

## Water Wetter

Is your engine running hot? Cool it off with Water Wetter®. Adding one 12 oz. bottle to 12-16 quarts of coolant can drop the operating temperature up to 30°. Not only that, you will also be reducing rust, corrosion & electrolysis in your cooling system. It's modern science for your classic car. Call us & place your order today!

- 56-57 **OS** Heavy duty, 4 row, with transmission oil cooler, for water cooled Ford-O-Matic . . . . . B6S-8005-A 385.95

Want to know an easy way to test a radiator for a leak? Remove it from the car & get an old bicycle tube (large diameter works best). Cut the tube in half, put one end over the upper radiator hose neck & the other end over the low neck. Tighten hose clamps on each end, install the radiator cap & use the valve stem on the tube to pump in air from the air compressor. Then, put the radiator in one of those little baby wading pools. It works great!

## Fuel Stabilizer

The ideal formulation to add to the gas tank when storing vehicles for extended periods. It not only prevents varnish & tank corrosion, it has a no alcohol formula & will not attack rubber lines or diaphragms as many other fuel stabilizers do.

## POWERGEN

Your friends will be fooled. They'll wonder why your headlights don't dim at idle. Tell them you have a secret. Tell them you stuffed an alternator into your generator housing. Tell them you have PowerGen—75 amps at highway speeds but, most importantly, 60 big amps at idle! This is the new way to go – the reliability of an alternator with the classic look of a stock generator. For 12 volt systems.

## Reproduction Starter Cable Brackets & Grommets

Original routing of the starter cable is: from the relay to a bracket on the firewall, then to another bracket on the bell housing, then to the starter. These bracket & grommet sets allow you to duplicate this original routing.

*Have you ever thought about the incredible torque thrust & wear that a typical starter motor must go thru to start an engine? The starter drive unit must thrust the starter gear out to mesh perfectly with the teeth on the ring gear of your flywheel & then the small electric motor must spin over the crankshaft, pushing all those pistons up against compression. It's even worse on high performance or large cubic inch engines. Give your old starter a break. Replace it with a guaranteed top-quality starter motor.*

*The starter relay, or solenoid of Ford electrical systems is usually located right in plain sight, at the top of the passenger side of the engine bay. This makes it very convenient for service work. This also makes it the frequent target of judges & Ford admirers who might tend to look into your engine compartment when you have the hood raised at a car show. Like any starter relay, Ford units work hard over many years of start-up sequences, consequently, many of them have finally worn out & need to be replaced.*

When you consider how many different systems must operate within a distributor, you can easily see why they are so critical to the performance of any internal combustion engine. First, there is the primary ignition circuit, then the secondary ignition circuit, the timing system, the vacuum system, the lubrication system...whew! So many things can go wrong; it is amazing that they work as well as they do! Here at MAC's, we know how important it is for your T-Bird to start, run & perform like a new car. Because we believe that the distributor is such a vital ingredient in the way your engine runs, we offer these top-quality distributor parts. Call today.

Take a good look at your lights, lenses & overall brightness of your lighting system. Old faded lenses & corroded reflectors cause your lights to look dim. The brightness of your light bulbs is generally effected by ground wires & sockets while their brilliance is enhanced by the plastic lenses. Bright & beautiful lights are an asset to any nice car & MAC's has the parts to restore the beauty of your light systems. You will love the restored appearance that new bezels, lenses & gaskets will add to your car. Find all of the parts you need in MAC's comprehensive listings for your Ford. Hint: Always take pictures of your car with the lights on. It will enhance the beauty of your ride.

**Tail Light Lenses** (2 required)

Plastic lenses are another easy fix. Old lenses & gaskets that are unbroken will sometimes be left in place by a restorer, until that person parks next to a similar car with a beautiful brand new reproduction lenses. The old faded & dull lenses look very weak by comparison & dirty, cracked gasket edges look shabby sticking out from behind the lens. One comparative look from the new restorer & at the next show you can be sure that BOTH cars will have new lenses. Put new light bulbs, lenses, gaskets & connectors on your T-Bird & brighten your "outlook!"

## Light Gasket Kits

*If you want to replace all of the gaskets on your car's exterior (which is probably a good idea since they are more than 50 years old), then we have just what you need! We put together these kits to save you money & make it easier for you to get all the gaskets you need. Each kit contains the gaskets for the head lights, parking lights, tail lights, back-up lights & the license plate light.*

Take a good look at the wiring on your collector car. Does it consist of makeshift plugs, mismatched jumper wires & suspicious

looking wads of electrical tape? Many years can take a heavy toll on connectors, leaving them so corroded that little or no current will pass through. MAC's wiring harnesses are made to meet the highest standards, so you can unplug the "bad" & plug in the "good."

We use the correct color wires with correct color tracers so you can refer to an original wiring diagram for proper routing. The plugs are just like the originals, simply plug them in!

## Dash Pads

You look directly at your dash pad every time you slide behind the wheel. If it is cracked, faded or just looks tired & old, we can supply you with a brand new replacement in a variety of factory colors. Made to the highest standards, each one features the correct grain vinyl & has all the factory ribs molded right in, as well as an indent for the speaker grille. A new dash pad might be the last piece you install in your interior restoration & it might be the most important. Do yourself a favor & call today!

The windshield wiper system on any car works pretty hard during its lifetime, unless you live in an arid climate. Even then, sunlight & heat are hard on various components. Over many years wiper motors drag the wipers & related transmission components back & forth across the big windshield in every kind of weather. Snow loads are especially hard on wiper motors. Wiper blades are subject to temperature extremes & excessive wear. Wiper arms lose their spring tension, which allows the blade to skip over the glass, even with fresh rubber refills. Then there is the washer system, with the washer pump, hoses, connectors, brackets, reservoir bag & other components. Keep your vehicle's windshield wiper system in top working order. Call today for all the parts you need.

## Windshield Wiper Motor Conversion Kit

Convert your old vacuum wipers to electric (12 volt systems only!) This conversion kit has been designed & tested for proper operation, with no modifications to be made. The whole assembly bolts on where your old wiper motor mounted. Your old cable-type switch is replaced with an electric two-speed switch, included in the kit. Complete detailed instructions & schematic diagrams included!

**If your '55 has been converted to 12 volts, this kit will work perfectly!**

## Inside Door Handle Shaft Assemblies

If you can move your inside door handle without unlatching the door, the door handle shaft might be the culprit. 50 years of use takes a toll on the splined shaft & once the splines are worn there is no way to repair them. Now we have a complete assembly to replace your worn out original. Give us a call & we'll be happy to send one your way!

## Headlight Door Trim (2 required)

For 1955, the full size Ford had trim on the headlight doors that was exclusive to the Fairlane model. Many T-Bird aficionados love the way it looks & want to add it to their Little Birds. Now anybody can, simply & easily with this new reproduction of the original trim. The details are just right, the chrome plating looks as deep as the ocean & the black painted areas look like they were applied at the factory! If you want to make your Bird a conversation starter, call us today & place an order for our new Headlight Door Trim!

# Our New Building!

We're proud to unveil our newly completed state-of-the-art facility! It's 50,000 square feet of heaven for anyone who truly lives vintage Ford cars & trucks—from Model T's & Model A's to Mustang's & Mercury's.

Visitors will love our huge new showroom, with an abundance of Ford parts & accessories as well as 4 of our own antique & classic cars. Customers will benefit from being able to look a part over closely before making a purchase. They'll also enjoy the rare old Ford items from MAC's extensive private collection.

Our all new, state-of-the-art warehousing system is designed to verify that parts are in stock & easy to pull for prompt filling of orders. This ensures that our customers will receive their orders faster & more accurately than ever before. Our shipping department now has the capacity to ship over 500 packages a day!

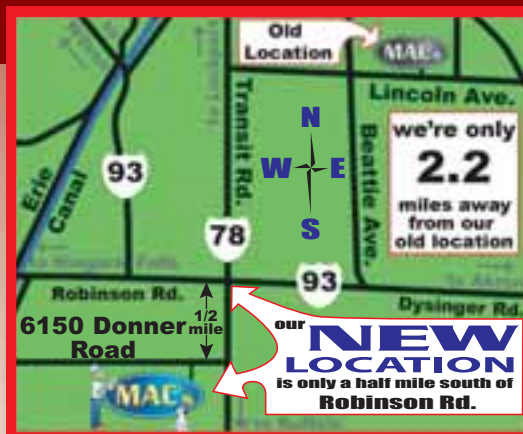

What does this mean to you? Greater product availability & faster shipping. Add to this the same great prices & customer service that MAC's is known for & we're sure to be on the top of your list for Ford Antique & Classic parts.

## Restoration Supplies

We now offer these decal kits for two main reasons. The first reason & probably the most important one to you, is to save you money! The second reason is to make it quick & easy for you to order the proper decals for your engine compartment.

These kits come with all the decals in one package. All you need to know is the year of your T-Bird. They are reproductions of the factory stampings, correct down to the smallest detail.

**Thunderbird Specialty Books**

This 304-page book by Ray Miller tracks the Little Bird into the 1970s. It gives you all the information on the Thunderbird that you will need to correctly restore it to its original glory. It covers each model year by giving all the year's subtle differences & shows you what everything on the car does & how it does it. It even goes as far as showing where decals are located. Also included are the years from 1958-1966 & into the '70s.

"THUNDERBIRD!" is not an amateur's photo album. Neither is it a complex engineering notebook containing, to be sure, the significant changes, but also the trivia of the model years. Rather, it is what it set out to be, an accurate & authoritative study of the characteristics that make for a typical "model year." Future restorers will benefit from its compact, succinct & definitive presentations. It is a book to be enjoyed by the curious, welcomed by the purist & relished by the aficionado. We give to you for your enjoyment . . . ."

55-57 **Thunderbird Performance Portfolio 1955-57** . . . . . BK032AE 22.95

This Brooklands book is 140 pages softbound & has 180 illustrations that evaluate Ford's two-seat sports car with road tests. Front to back, it is full of illustrations of the actual ads that were used to introduce & advertise these beauties. There are road & comparison tests, specifications, performance data, drive reports & consumer analysis.

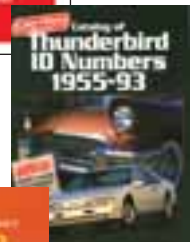

55-70 **1955-1970 Thunderbird Illustrated I.D. Decoder Manual**, softbound, 59 pages, more than 20 illustrations. . . . . BK2DM55 7.95

This small decoder book makes the perfect companion for the auto auction scene. When that special "find" of the auction is available for viewing you can verify the data plate codes & tuck this book in your shirt pocket when you are done.

55-93 **Thunderbird ID Numbers, 1955-93**, softbound, 229 pages, more than 90 black & white photographs, 54 page color section on exterior paint & interior trim . . . . . BK52414 24.95

Compiled by the staff of Cars & Parts magazine, this book determines what the numbers & letters on your data plate stand for. Starting with the VIN number it explains what every digit means & then breaks down all the codes used by Ford. A detailed list of "regular production options" (RPO) is listed for every year from 1955 thru 1993. A special section gives you the lowdown on deciphering date codes & casting numbers.

55-57 **Ford & Thunderbird Body Parts Catalog**, 456 pages of text & technical illustrations for the Thunderbird. . . . . VB53 42.75

## Shop Manuals

The following manuals are the comprehensive sources on all aspects of servicing parts, assemblies & systems of the Ford Thunderbird. Ford Motor Company sent these to Ford dealerships to instruct mechanics how to remove & replace most major components on new Thunderbirds. These are correct reprints of those original shop manuals. Each manual outlines procedures for replacement, adjustment & trouble-shooting, from basic operations like transmissions, brakes & chassis to accessories & instrumentation. No Thunderbird enthusiast or restorer should be without one!

**MAC's is here to help you get ready for long term or winter storage!**  
 Up here in the north, we put our toys away for the winter so they stay looking as good as possible. MAC's can provide you with all the products that will make that as easy as 1-2-3! At the top of the list is Fuel Stabilizer to keep that precious fuel from getting gummy over the winter. Next, keep that battery at full charge with our Accumate Power Charger. Also, if you want to be able to roll your prized possession around without having to get inside it, we now carry Wheel Dollies.

Fuel Stabilizer

The ideal formulation to add to the gas tank when storing vehicles for extended periods. It not only prevents varnish & tank corrosion, it has a no alcohol formula & will not attack rubber lines or diaphragms, as many other fuel stabilizers do. This is the best product on the market & our customers swear by it. Call & order yours today!

ALL One quart bottle, one ounce of this product will keep 3 gallons of fuel fresh for at least 3 years. . . . . RSP101 \* 28.95 quart

AccuMate® Power Charger

Nothing is worse than pulling your car out of storage & finding out your battery is dead. MAC's has a way to keep that from ever happening again, our AccuMate® Power Charger. AccuMate® is an advanced fully automatic battery charger & maintainer for all 6 & 12 volt lead-acid batteries. It will bring your battery up to a full charge & then go into standby mode. If your battery goes below a pre-determined level, the charging process is immediately restarted. Since it operates on normal 110 volt household current & only costs pennies to operate, plug it in & forget about it. From now on, your battery will always be ready.

## ZDDPlus Motor Oil Additive

Major oil companies have been significantly reducing the level of ZDDP (zinc) in motor oil over the past few years. This vital anti-wear ingredient is necessary in all flat-tappet classic vehicle engines. By adding one bottle of ZDDP each time you change your oil, that protection will be maintained, no matter what brand or viscosity motor oil you've been using.

# STOP RUST PERMANENTLY!

These products are designed to work as a complete system. When used together, these products provide a coating that will not only stop rust, but will prevent it from returning.

## Here's How it Works...

### Step 1—Degrease & Clean

Marine Clean™ degreaser/cleaner will remove dirt, grease, wax & other contaminants that could interfere with the restoration. Before you apply ANY rust preventive paint or coating, you MUST remove any oily film or residue!

### Step 2—Neutralize Rust

METAL READY™ provides the best adhesion on any surface including aluminum & shiny polished metal surfaces. While neutralizing rust, it etches metal, creating an ideal anchor pattern for coatings such as POR-15®, while leaving a zinc phosphate film to promote chemical bonding of paint & steel.

### Step 3—Stop Rust Permanently

POR-15® is designed to be coated right onto rusty surfaces. It leaves a beautiful, rock-hard finish that won't crack, chip or peel & stops rust PERMANENTLY! The secret is in its nonporous surface. It doesn't let moisture reach the surface of the painted metal, so no rust can form. POR-15® is also flexible, so it can withstand twisting without cracking, but it has a tougher finish than ordinary paint, so it can survive what no paint can.

**Paint  
Right  
Over  
Rust!**

Auto | Farm | Marine | Industrial | Home

*All POR-15 products are considered hazardous material & can only be shipped by ground /surface within the U.S. because of government regulations.*

### Still Skeptical?

Try one of our **Super Starter Kits** for only \$19.95. They include everything you'll need to test out these incredible products. Each kit contains: One half pint of MARINE CLEAN™, one half pint of METAL-READY™, a 4 oz. can of POR-15®, two wooden handle paint brushes & a pair of special high dexterity surgical latex gloves.

### POR-15 Solvent

No more hard cleanup! This solvent is specially formulated by the makers of the entire POR line to make for easy cleanup or thinning of POR-15®.

**Always wear gloves when working with these products!**

### Topcoats

These topcoats are specially formulated to work with POR-15®. They are non-UV sensitive, highly flexible, nonporous & extremely scratch & chip resistant, just like POR-15®.

**CHASSIS COAT BLACK™** top coat dries to a satiny semi-gloss that is correct for most 1950s & newer car & truck frame & suspension pieces.

**BLACKCOTE™** top coat is the glossy black used on car or truck frame & suspension pieces in the early fifties & before.

**METAL MASK™** top coat is a super tough coating that looks just like bare metal. Now you can protect your steering box, spindle, leaf springs, coil springs, master cylinder & anything that requires a bare metal finish.

### Primer

If you choose to use a non POR topcoat over your POR-15®, it is recommended that you first apply **TIE-COAT PRIMER™**. No need to rough up or de-gloss the POR-15® surface. Apply the TIE-COAT PRIMER™ & you are ready for the paint of your choice.

### Vinyl Protectant

#### Lasts for Months, not Days!

POR-15® has developed a vinyl protectant that outperforms all the rest, **BOSS GLOSS™**. The key to the difference is a greater percentage of solids in this formula. They make it work better & last longer than those popular national brands. You'll only have to use this product once to see the difference.

### Seam Sealer

This is the ultimate filler & seam sealer! **POR-PATCH™** is a highly concentrated paste form of POR-15, available in a tube. It dries hard as a rock, but remarkably remains flexible. Once dry it is totally impervious to fuels & solvents. With its applicator tube & thick consistency, it's perfect for seams & holes. Its incredible formula allows you to bond steel to plastic, wood or concrete!

### High Temperature Topcoats

We carry high-tech coatings that can withstand high temperatures from 1200° to 1400° F. They resist cracking, chipping & peeling & won't burn off. They can be brushed or sprayed on.

#### No Burning or Discoloration

### Steering Wheel Restoration

NODDER-HULAGIRL

### Nodders

MAC's has a great assortment of nodders & toppers. Spice up your next ride or cruise night by adding one of our friends to the interior or exterior of your car.

#### Hula Girl—7½"

This attractive 7-1/2" tall ceramic Hula figure attaches to the dashboard of your car with double-sided foam tape—her hips swaying to the rhythm of the road. She's playing a ukulele & wearing a bright flowing skirt.

**Seatbelts**

If you haven't already installed seat belts in your classic ride, we highly recommend it. Our universal style seat belts feature a chrome lift latch & are available in 10 colors to match almost any interior. Sold per passenger, each belt includes washers, bolts, nuts & basic instructions on how to install. The 60" size is standard, for a little extra breathing room, order the 74" length. These seat belts do not include instructions on where to mount. Proper installation is at the risk & responsibility of the customer.

## Door Trim Panels

Carefully remove all of the bright trim from your original set of door panels & install it on our reproduction panels to finish them off.

### All 1958s & 1959s with Vinyl Seats

1958-1959 door trim panels are Bison grain vinyl & have built-in armrests & embossing on the lower section, as original. The first color listed is the color of the upper part of the door panel, the second color is the lower. The two-digit trim code is shown under "trim" on the patent plate, on the left door hinge pillar.

**OS** All door panels are oversized & require additional shipping charges.

## Rear Armrest Covers

Armrest covers are just about always split & cracked with age, with the grain pattern worn smooth from years of constant contact. Put brand new armrests & covers on your door panels for that brand-new-car look, as well as comfort!

1958 & 59 rear armrest covers are made with Bison grain vinyl, the same as our seat covers.

## Headliners

Perforated vinyl headliners were used from 1958 to 1965. In 1966, Crater (or Moonskin) vinyl was used on cars with a roof console. Cars without the roof console continued to use perforated vinyl headliners.

Think about the last time you cleaned the headliner in a car ... it's the most neglected piece of trim in any vehicle. We have great prices on original type headliners in black, white or bone. Compare & we think you'll see—our headliners are the best value around! Sorry, no instructions are included.

### Insulation & Sound Deadener

If you are replacing your carpet, now is the best time to install superior firewall insulation. We carry everything you'll need. Our big 48" x 72" sheet is a full 5/16" thick & is rated to R18 (meaning it resists heat up to 700°). It's constructed of jute fiber with a space age reflective foil bonded to both sides. You can put it on the firewall, behind the kick panels or even on the trunk divider. It does the job of blocking intrusive road noise & keeping engine heat in the engine compartment where it belongs.

- ALL Firewall insulation, 48" x 72" x 5/16", cut to fit desired area . . . . . V700770X 32.00

For years, we have been selling the original Dynamat & can boast of hundreds of satisfied customers. We are now proud to offer the next generation of Dynamat sound deadeners, Xtreme. Xtreme is a step up from the original formula & is Dynamat's best product at controlling vibration. It damps 4 times as much as the original Dynamat & as an added bonus, it weighs 50% less. It is available in conveniently sized 18" x 32" sheets & with peel & stick application; it goes on quickly & easily. Do yourself a favor & order some today!

### Carpet Sets

All of our carpets are made of top quality materials throughout. Using the finest loop pile that the factory specified they feature serge-bound edges, bonded underlay padding, correct heel & toe pads & a dimmer switch ring. Carpets for 1958 thru 1963 are cut & sewn as original with 1958 thru 1960 a 10-piece set & 1961 thru 1963 an 11-piece set. Beginning in 1964 all of our carpets are molded to the shape of your floor with a separate front & rear piece, just like it was from the factory.

Beginning in 1964, your Thunderbird might have had carpet on the lower part of the door panel. MAC's door carpet sets include the vinyl. We recommended that door & floor carpets be purchased at the same time to assure a good color match.

Why does a convertible top move slowly & weakly as the car gets old? Why doesn't it snap tightly in place anymore? Time & usage wear down the critical components that operate your top, that's why!

Any hydraulic system requires maintenance to keep working properly; especially when the components are subjected to years of weather, use & neglect ... not to mention temperature extremes. Old tops with stiffened vinyl fabric are simply less pliable & resist folding. Corrosion & the degrading of fluids also contribute to the weakening of the system.

The best plan is to replace the hydraulic pump, motor, cylinders & all hoses with brand new top quality replacements from MAC's Antique Auto Parts. You'll love the way your hydraulic system springs to life & quickly raises or lowers your top at the push of a button. While you're working on the mechanics of your convertible top, don't forget the vital detail components, like top arm pads, a new rubber weather-stripping kit & more.

Call the Ford restoration experts at MAC's Antique Auto Parts & let them help you make good decisions about the items you'll need to get that convertible back in "tip-top" shape!

## Convertible Top Relays

All 1961 thru 1966 T-Birds use 8 relays to control the various functions required to raise & lower the top. The 1960 T-Bird used 10 relays! A bad relay will bring the whole process to a grinding halt. We now carry reproduction relays to keep your top in working order. Our "Top Adjustment & Repair Manual" will help you troubleshoot & pinpoint problems – see our **Book Section**.

Convertible Roof Rail Seal Kits

When you wash your T-Bird does water run down the inside of your windows? If that's the case your roof rail seals need to be replaced. Roof rail weatherstripping keeps wind, noise & rain out of your classic car, for a quieter more comfortable experience. Roof rail weatherstripping is located at the roof edge where your side windows roll up for a tight seal. Aged & cracked seals can ruin the appearance of your car.

MAC's carries the finest quality seals made today—from the correctly shaped extrusions, to the permanently bonded corners & pre-installed mounting studs, our seals are the best. Keep the elements where they belong, outside!

## Convertible Top Kits

We are proud to offer the best convertible tops that money can buy! Each is constructed using only premium quality 32-36 oz. vinyl & features a zippered-in clear plastic back window, matching vinyl bow covering, wire-on trim, tips, screws & is available in either white or black. Pads are not included but are available separately. Our tops are covered for 6 years on materials & workmanship\* so your satisfaction is guaranteed!

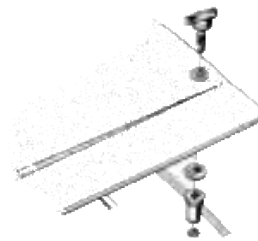

\* Because of the difficulty of installation, the warranty is void if the top is not professionally installed.

You will probably need to replace your top pads when installing your new top. Select from our choices below.

**Heat, friction, dirt & time** are all enemies of your classic car's vital wheel bearings & grease seals. Wheel bearings are a particular problem area in many collector cars, which are often driven less than typical daily transportation vehicles. It is not uncommon for collector cars to sit unmoved for months or even years.

This inactivity allows the rubber grease seals to harden & set. Then, when the car starts being driven again, the seals can fail allowing grit & moisture inside the wheel bearing surfaces. Furthermore, old wheel bearing grease can harden & dry out, thus losing its lubrication qualities. When that happens, you find yourself driving down the road when a wheel bearing starts to groan & grind against the excessive

friction. Inevitably, this happens at the worst possible times. Inspect your wheel bearings carefully. If they exhibit any signs of rust, wear or slight pitting of the rollers, replace them immediately. (Remember to always replace both the inner & outer bearings of one wheel at the same time).

However, if your inspection finds perfectly good wheel bearings, then wipe out all the old grease & replace it with today's super low-friction wheel bearing grease. Work it carefully into both inner & outer wheel bearings, install new grease seals & you're on your way, confident that all is well with your wheel bearings!

Ask an old used car salesman & they will tell you that one of their favorite tricks for determining the condition of any used car is to look at the foot pedal pads. Worn brake pedal or gas pedal pads are quick tip-offs to worn-out cars. By contrast, brand new pedal pads tend to add to the "new car" look of any interior. **Brake Shoe Hold Down Kits**

The springs, clips & other parts that operate your brake shoes are subject to tremendous heat, corrosion & other elements, which tend to weaken them severely. Replace all springs, adjusters & other hardware while you're doing your brake job to ensure proper performance. These easy to use kits include hold down springs, nails, washers & the rubber dust covers.

Kit components are not sold separately.

If your master cylinder is the heart of the brake system, then the wheel cylinders are surely the muscles. They directly convert hydraulic pressure into the mechanical motion that presses the brake shoes against the rotating brake drum surface, stopping the vehicle with a huge amount of friction. If a wheel cylinder freezes up or begins to leak, the entire system ceases to function properly. We have all experienced the frustration of bleeder valves that are stuck, or worse, that break. Be sure your brake system is in tip-top shape with brand new wheel cylinders!

## Remanufactured Power Brake Boosters & Master Cylinder Assemblies

Common problems in classic T-Birds are defective boosters & master cylinders. Bring your Birds stopping power back to the level it was when it was built by installing one of our assemblies, call us today & we will be more than happy to send one your way! MAC's remanufactured power brake boosters & master cylinder assemblies are sold on an exchange basis. Your rebuildable core must be returned in the rebuilder's original package. The core fee will be refunded if an acceptable core is received within 90 days of your purchase date. The Kelsey-Hayes bellows type under dash booster used from 1958-60 is no longer available.

Get your vintage T-Bird driving & handling like it did when it was new, with all new steering & suspension parts. Those old & worn bushings, ball joints, tie rod ends, idler arms & springs have no doubt seen their share of bad weather, bad roads & poor driving conditions.

Do yourself a favor, check your front end components, or have a professional mechanic do it. If you need new inner or outer tie rods give us a call. While you're at it, don't forget the connecting sleeves, we have those too. In fact, **give us a call for all of your needs** ... we are here to help keep you & your car safe, any way that we can. You'll be glad you did!

From 1961 to 1963, Thunderbirds had a small diameter shaft on the frame bracket. It proved to be a weak link, so when a reproduction was being planned it was decided to use the larger diameter shaft for the 1964 model. That shaft, along with the larger bushing, makes this reproduction much stronger than the original.

**Rebuilt Steering Gearboxes**

*It's important that we receive your old rebuildable core before shipping out your rebuilt gearbox. If we do not receive your core before shipping, you will be charged a \$200.00 core fee. Upon receiving your core, we will gladly refund this charge.*

*When sending in your core, please drain it as much as possible & double-wrap it; that is, put it in a bag & seal it with tape, then take that bag & put it in another bag & seal that with tape. Trash bags work very well for this.*

## Remanufactured Power Steering Pumps

The heat & pressure inside of a power steering system can lead to excessive wear & annoying, hard-to-find leaks. We're proud to offer these guaranteed top quality remanufactured power steering pumps for your engine. They look as good as they perform! Call & order today! If your acceptable exchange has not been received prior to shipping, you will be charged a **\$150.00 core fee**.

If your acceptable core is received within 90 days in the rebuilders' original package the core fee will be refunded.

**NOTE: Rear-Mounted Type not used on 1958-1965 Thunderbirds.**

*Few people realize just how much pressure is inside a typical power steering system. But if you have ever seen a power steering hose burst, you know that it can send hot, oily fluid spraying all over everything & if the hood is open, will spray many feet in all directions.*

*Age, heat & corrosive elements all contribute to the weakening of all power steering hoses & fittings. Look closely at the power steering hoses on your classic Ford. If you see age cracks, worn places, rusted fittings, or stiffened areas, replace them with brand new power steering hoses now...before they fail.*

# MOUNTS

## Motor Mounts

Can there be a more overworked or more under appreciated part of your Ford than the lowly motor or transmission mount? Every time we rev our high-powered Ford engines, the poor mounts are stretched almost to the point of tearing apart. Every little oil leak seems to find its way to the sensitive rubber part of every mount, while exhaust & engine heat combine to cook mounts into an early grave. Yet, these motor & transmission mounts have the vital tasks of keeping our drive trains properly centered & safely anchored under every condition, while also isolating engine vibrations from the chassis & passenger compartment. Have a heart & replace those worn & weakened motor & transmission mounts today!

With all of the vibration, stress & pressure, it is a wonder that any timing set can survive within a T-Bird engine short-block assembly. Part of the problem is the fact that the original engine designers must create an engine that will keep everyone happy.

Therefore, they design a timing set with plastic gears & a light-

duty timing chain, so it will be very quiet & rather mellow for folks in their "golden years." On the other hand, these parts must also hold up under performance conditions with younger drivers.

### ZDDPlus Motor Oil Additive

Major oil companies have been significantly reducing the level of ZDDP (zinc) in motor oil over the past few years. This vital anti-wear ingredient is necessary in all flat-tappet classic vehicle engines. By adding one bottle of ZDDP each time you change your oil, that protection will be maintained, no matter what brand or viscosity motor oil you've been using.

ALL **NEW** Oil additive, 4 oz. bottle . . . . ZDDPLUS 9.95

### Oil Pressure Sending Units

Keeping tabs on the vital fluids in your engine is important. Most of the time when the dash gauge doesn't work it's the sending unit that is at fault. Remember to use some teflon tape on the threads when you are replacing the sender, (but be sure not to let the tape extend beyond the threads & interfere with the sensor portion of the sending unit!)

### Solution

Changing your filters regularly will keep your classic running smoother, longer. We carry genuine **Motorcraft** filters as well as the popular Hastings brand for your convenience.

So plan out a Saturday morning with a cup of coffee for you, several quarts of your favorite motor oil, an oil filter, an air filter & even a fuel filter for your car.

You'll be rewarded knowing that the maintenance you do today will help to keep you from doing a much more extensive repair job down the road.

## Oil Filter

Everyone knows the importance of changing your oil regularly in your daily driver. It's important to do the same with your classic car. Nothing benefits an engine more than fresh oil & a new filter free from dirt & sludge. So give us a call, we'll be happy to send you a premium quality filter right away!

- 58-66 All engines, **Motorcraft** . . . . . C1AZ-6731-M 7.95
- 58-66 **NEW** All engines, Hastings, with anti-drain back feature, oil light goes out immediately upon start up . . . . . C1AZ-6731-H 8.95

**Regularly replacing your oil filter is a smart way to keep your classic car running smoothly for years to come.**

## Air Filters

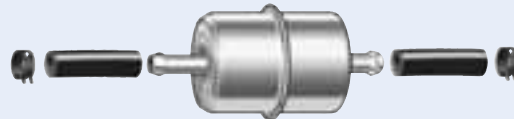

Any engine will run better if it "breathes" better. A quick & easy way to improve the breathing ability of your engine is to replace the air filter. The quick fix for many is to use compressed air to blow the dirt out of the filter. Experts agree that in many cases this only imbeds the dirt deeper into the filter. Call us now—we'll get an air filter out to you as soon as you hang up the phone. Your engine will be happy you did.

The cooling system is one of the hardest working systems on any vehicle. When you think about the constant heat & pressure of coolant flowing thru hot water jackets, rubber hoses, the water pump itself & the radiator, it's easy to understand how leaks & other failures are so common.

Yet when it's working properly, our cooling system is often "out of sight & out of mind." Keep a close eye on the many components of the cooling system on your car & keep your friendly & reliable Ford engine cool & happy!

## Water Temperature Sending Units

Your little water temperature sending unit has the vital job of keeping you informed of how things are going inside the critical water jackets of your engine & is your best tool for avoiding a dangerous overheat condition. Be sure that corrosion & age don't keep your sending unit from functioning properly & make sure that all wiring is properly connected & in good condition. Replace that old unit with a fresh new one, for reliability & general peace of mind.

## Mega Copper Sealant

The solution to those times when a gasket just doesn't seal our gasket in a tube! This is the same type as used in many places on most new cars built today. It replaces cork, rubber or any other type of cut gasket to form a leak-proof seal. Order some today—you'll love the "sealed for good" results. Exceeds O.E.M. standards, resists oil, water, antifreeze mixture, grease & transmission fluid, use it on water pumps, exhaust manifolds, valve covers, timing gear covers, transmission pans, water neck outlets or any place a high performance gasket is needed.

# FAN BELTS

A common fan belt problem occurs when belts jump off of pulleys, especially under hard acceleration. Belts are often ruined this way, being torn or stretched out of shape. Remember that all pulleys must be aligned exactly with each other.

Your belt should look like a perfectly straight line, when you stand back & sight down the front edge of the belt from one pulley to another. If you

notice a slight bend or change of direction in the belt where it passes into the groove of a pulley, it will probably jump off under high RPM's. Align those pulleys as perfectly as possible. You might need to replace a bracket, or use shims on mounting bolts. Whatever it takes, get those pulleys lined up correctly & your fan belts will live longer. Your Ford car will thank you.

**Our low cost belts are perfect for the daily driver. The quantity required is one, unless otherwise stated.**

No one wants to be stranded on the side of the road because of a rusting, leaky fuel tank. Replace your problematic tank with a quality stamped steel gas tank from MAC's. You'll have the peace of mind knowing that your new tank will be trouble-free for years to come. When installing your new gas tank, be sure to replace the sending unit "O" ring

seal (on the following page). Or if you don't want a new tank for your car, try our Gas Tank Sealer (RSP22A). MAC's has been selling this product for years & our customers tell us how great it works. Known for its complete coverage, one can will do the trick, call & order yours today!

## Gas Tanks

**The quality of used gas tanks can vary widely. Don't worry about what you're getting anymore; we now have brand new gas tanks available.**

Constructed of Ni-terne steel for excellent corrosion resistance & long life. All of our tanks have a built-in drain plug. They all include the lock ring & the rubber "O" ring for the sending unit. These new tanks are reasonably priced & ready to ship-call today!

**OS** All gas tanks are over-sized & require additional shipping charges.

**CAUTION:** Gasoline vapors are extremely flammable! Removal of a gas tank involves serious risk of fire or explosion. **NEVER** use a regular incandescent light around gas tanks, as cold liquid gas might burst a hot glass bulb if splashed, resulting in explosion. If you are not certain about how to safely remove your gas tank, take your new gas tank to a professional for installation.

## Gas Tank Sealer

Put a stop to rust, leaks & corrosion permanently. Resistant to all fuels including phase II oxygenated fuels & alcohol. With its ability to bond to metal or fiberglass it can be used in a multitude of applications. Our 1-quart can is enough to treat several tanks.

ALL Gas tank sealer, 1 quart ..... RSP22A \* 23.75 quart

## Fuel Stabilizer

The ideal formulation to add to the gas tank when storing vehicles for extended periods. It not only prevents varnish & tank corrosion, it has a no alcohol formula & will not attack rubber lines or diaphragms as many other fuel stabilizers do.

ALL 1 quart can, 1 oz. of this product will keep 3 gallons of fuel fresh for at least 3 years ..... RSP101 \* 28.95 quart

\* **HAZARDOUS MATERIAL** can only be shipped by ground/surface within the U.S. because of government regulations.

That lock ring or "O" ring seal has probably been on your gas tank for forty plus years. They can be brutal to remove & many times resemble a pretzel when you finally get them out. Plan ahead, if you are replacing the sending unit, order a lock ring at the same time.

## New Fuel Pumps

For reliable performance, put a brand new high quality fuel pump on your Bird. Old fuel pumps often work great ... right up until the moment that they fail from age, wear & deterioration. One day you're happily driving along & then the engine dies. You're not out of gas, yet none is getting to the carburetor. Yep, the ol' fuel pump has bitten the dust. Don't wait, put a brand new fuel pump on your car today!

Carburetor Secondary Diaphragms

Since the 4100 series 4 bbl carburetors are now close to 50 years old, it stands to reason that most have been rebuilt. Sometimes the rebuilder might have used what they had available, correct or not. The "early" style has a steel secondary diaphragm actuator arm & the "late" style has a plastic arm. The "early" style is no longer available, but you can use the "late" style as long as you replace the steel actuator arm with a plastic one. Please take a look at the actuator arm so you know exactly what you need before placing your order.

## Needle & Seat

This new design needle & seat will cure the many ills of a conventional needle & seat. It helps to eliminate "flood over," dirt & rust sticking to the needle & gives a more consistent fuel level. All this adds up to better fuel economy & as an added bonus, it will outlast any currently available needle & seat. It is precision made & the inverted flare seat provides positive sealing & improved fuel control. The needle contains a high quality "fluorocarbon" alcohol resistant rubber disc that rotates in the end of the needle, thus insuring a positive seal every time. Install one in your carb & you'll reap the benefits from day one. Call us today!

## POWERGEN

Your friends will be fooled. They'll wonder why your headlights don't dim at idle. Tell them you have a secret. Tell them you stuffed an alternator into your generator housing. Tell them you have PowerGen—75 amps at highway speeds but, most importantly, 60 big amps at idle! This is the new way to go—get the reliability of an alternator, but the classic look of a stock generator.

## Starter Relays (Solenoid)

The starter relay, or solenoid, of Ford electrical systems is usually located in plain sight at the top of the passenger side of the engine bay. This makes it very convenient for service work. This also makes it the **frequent target of judges & Ford admirers** who tend to look into your engine compartment when you have the hood raised at a car show.

Like any starter relay, Ford units work hard over many years of start-up sequences, consequently, many of them have finally worn out & had to be replaced. Unfortunately, some of them will have been replaced with universal "fits-all" solenoids that do not look right under the hood of any Ford, much less your favorite cruiser!

Worse yet, some of those replacement units are not quality units & might fail at the worst possible time. Our Ford restoration professionals are happy to help you solve the problem, with a brand new reproduction unit with authentic markings & superior components inside. You'll receive a terrific, high-quality starter relay that not only looks **authentic** but will give you years of reliable service.

## Reproduction

For that extra touch of authenticity, one of our reproduction starter relays is as good as it gets. They all feature a finely detailed black case, correct lugs, correctly styled hardware & have the correct markings stamped into the metal bracket on top, just like the originals.

When you consider how many different systems must operate within a distributor, you can easily see why they are so critical to the performance of any internal combustion engine. First, there is the primary ignition circuit, then the secondary ignition circuit, the timing system, the vacuum system, the lubrication system...whew!

So many things can go wrong; it is amazing that they work as well as they do! Here at MAC's, we know how important it is for your classic to start, run & perform like a new car. Because we believe that the distributor is such a vital ingredient in the way your engine runs, we offer these exceptional quality remanufactured distributors.

Our quality control starts with the cores we use for remanufacturing, which ensures that you will receive a quality remanufactured unit when you place your order. Call today.

**Remanufactured Distributors**

This remanufactured distributor is sold on an exchange basis. A \$30.00 core fee will be charged if your acceptable core is not received by shipping date. The core fee will be refunded if an acceptable core is returned within 90 days of purchase date. Your core must be returned in the rebuilder's original package.

The ignition coil is where the high voltage, which fires your spark plugs, is created. A weak spark at the coil will result in weak ignition at the spark plugs, which can result in fouled plugs or other engine performance issues.

Take a look at the coil in your car. Is it very old? Is the metal case dented, damaged, swollen or rusted? What about the bakelite tower at the top? Are there any tiny cracks or chips around the crown? Is there any corrosion inside the tip?

If you answered "yes" to any of the above vital questions, call now & get a brand new ignition coil. MAC's offers a correct-appearing reproduction coil with black body & mustard-colored top for restorers & a Flame Thrower® Petronix coil for high performance Ford lovers who want a little extra spark in their classic car.

Your spark plug wires hang right up there where everyone who looks under your hood will see them & they must carry the high-voltage spark signal from the distributor to the spark plug, without losing any power along the way. That's a pretty tall job!

So how do you keep your spark plug wires looking good & performing perfectly? Install a brand new authentic reproduction spark plug wire set from the Ford restoration experts at MAC's Antique Auto Parts. Complete with original factory-style engineering numbers & logo on the boots, these premium quality wires will look terrific on any classic.

Best of all, they're made from top grade materials under rigid inspection processes & will perform as well as they look.

Plastic lenses are another easy fix. Old lenses & gaskets that are unbroken will sometimes be left in place by a restorer, until that person parks next to a similar car with a beautiful brand new reproduction lenses. The old faded & dull lenses look very weak by comparison & dirty, cracked gasket edges look shabby sticking out from behind the lens. One comparative look from the new restorer & at the next show you can be sure that BOTH cars will have new lenses. Put new light bulbs, lenses, gaskets & connectors on your Bird & brighten your "outlook!"

**Tail Light Lenses** (2 required) \_\_\_\_\_

All lenses will fit for right or left sides.

Take a good look at the wiring on your Thunderbird. Does it consist of makeshift plugs, mismatched jumper wires & suspicious looking wads of electrical tape? Many years can take a heavy toll on connectors, leaving them so corroded that little or no current will pass thru.

MAC's wiring harnesses are made to meet the highest standards, so you can unplug the "bad" & plug in the "good." We use the correct color wires with correct color tracers so you can refer to an original wiring diagram for proper routing. The plugs are just like the originals, simply plug them in!

## Glass Tube Fuses

Back in the day, we all carried "spare" fuses in our glovebox. Nowadays, most stores don't even carry glass tube fuses. Here at MAC's we know you might need them, so we carry them for your convenience. Call us today & place your order so you have spares, "just in case." We suggest you look in your owner's manual for the exact application for each fuse & order accordingly.

# DASH

Does your lighter light? How about that turn signal lever...does it function properly & then cancel itself when the steering wheel is turned? How do those ashtrays look? Hmmm. Do you have to lift up on the shift lever to activate the neutral safety switch?

Never fear, MAC's is here, with lots of switches, bezels, knobs, levers, speedometer parts, grommets & more for your Thunderbird. That big

beautiful Thunderbird dash just sits there, right in front of your face, every time you get behind the wheel.

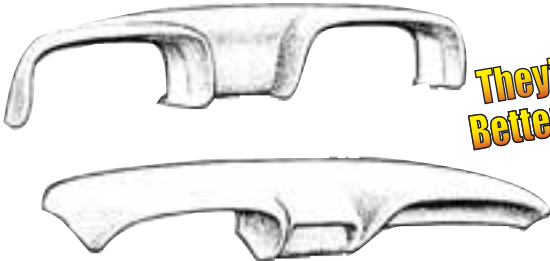

So brighten the look & restore the proper function of the many gauges, switches, knobs & relays in your dash with brand new quality parts & enjoy your time behind the wheel just a little bit more!

## Dash Pads

These dash pads are oversized, which require additional shipping charges & also require an additional handling charge.

**CUSTOMER NOTE:** Radio opening is covered. When cutting radio or speaker opening, avoid removing too much vinyl material. Always leave enough material to tuck under.

## Vinyl Protectant

Keep that dash pad looking brand new for years to come. Protect your new dash pad from harmful UV rays with our Raggtopp™ vinyl protectant. It's so easy to use; just spray it on, wipe it dry & you're done. It is specially formulated to repel dust, dirt & grease, plus it contains no silicones so it's not slippery to the touch when it dries. Packaged in a convenient 16 oz. pump spray bottle.

The windshield wiper system on any car works pretty hard during its lifetime, unless you live in an arid climate. Even then, sunlight & heat are hard on various components. Over many years wiper motors drag the wipers & related transmission components back & forth across the big windshield in every kind of weather. Snow loads are especially hard on wiper motors. Wiper blades are subject to temperature extremes &

excessive wear. Wiper arms lose their spring tension, which allows the blade to skip over the glass, even with fresh rubber refills. Then there is the washer system, with the washer pump, hoses, connectors, brackets, reservoir bag & other components. Keep your vehicle's windshield wiper system in top working order.

### Wiper Motor Kit

Tired of trying to fix that old inefficient vacuum wiper motor? We have the answer—an electric conversion! While it's not "correct" for the show car, it's a much-needed improvement over the factory system. If you have ever been caught in the rain you'll know why we think this 12 volt motor is the set-up to have.

### Wiper Motor Hydraulic Hoses

Beginning in 1963, Ford installed a newly developed hydraulic windshield wiper system on the T-Bird. It used the high pressure of the power steering system to create a variable speed action. Another benefit of this was the "increased pressure" of the blades against the windshield. In the past these hoses were rarely found in good shape, MAC's has taken care of that by offering a beautiful reproduction to eliminate the need for that search, call us to order yours!

*The Ford Motor Company used quality components on their air conditioning systems & many remained functional for many years into the later life of their cars, if they were kept properly charged & maintained. While we all love driving our classic Fords to various car shows & cruise-ins all summer long, there are often days when nice, cold air conditioning makes summer events much more enjoyable. Here at MAC's we have a wide assortment of parts for your factory Ford air conditioning system. Call today!*

### Air Conditioner Compressors

These compressors are aftermarket replacements for the York & Tecumseh O.E.M. factory-installed A/C units, not dealer-installed "hang-on" units. No core exchange is required.

## Air Conditioner Door Vacuum Motor

Ford initially made several different versions of vacuum actuators. The only difference was the length of the arm as each was designed to fit a specific application. Ford created a universal actuator by adding a longer arm that could be cut down when necessary. This one "universal" actuator now can be used on all 1961-66 T-Birds.

The arm is 4-11/16" long with a flat end, it will need to be cut to the proper length.

## Air Conditioner Compressor Support Braces & Spacers

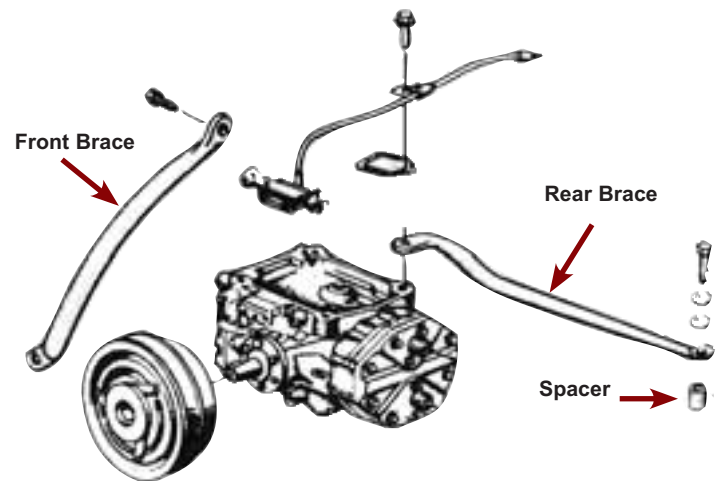

Whenever someone removes a complete air conditioning system from a car the items that always seem to get misplaced are the braces & spacers for the compressor. The problem is that you can't mount the compressor without these & they are unique to '64, '65 & '66.

**NOW THEY HAVE BEEN REPRODUCED!**

The braces all have a durable powder-coated finish so they will look good for years to come.

Nothing says "old" like cracked & shrunken weatherstripping & old rubber parts on your classic ride. Doors don't shut properly, windows don't seal well & rattles abound.

MAC's has a complete listing of the "soft" restoration parts to make your Ford's doors seal up like new again.

## Door Seals

MAC's door seals are made from the finest weather-resistant extruded sponge rubber. The molded ends are heat-bonded, not glued, to the extrusion. Metal inserts are used as original.

1 pair does both doors.

Door seals & inner dog leg seals both need some adhesive to "help" them do their job of blocking wind, water & road noise. We recommend our RSP28 adhesive because it's the best there is!

## Vent Bar Channels

The front of your door glass slides up & down in this channel. When it gets worn your door glass moves back & forth & rattles all day long. Install a new vent bar channel or vent bar channel insert & your ears won't believe the difference! The vent bar channels listed below are the door glass run at the front of the door.

For 1961-63 vent bar channels, see the top of the next column.

The vent bar channel below is a little different; the door glass for 61-63 is curved, we can only install a new glass run in your original curved vent bars. Send your original vent bars to us first & we'll install new linings with a stainless steel bead just like Ford designed it originally.

## Vent Window Seals

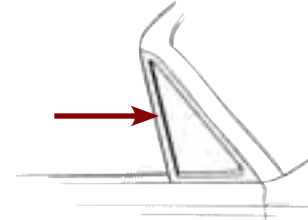

1958-1966 Thunderbird vent window seals are made in 2 pieces. One piece (the "vent window seal") seals the front angled edge across the bottom. A separate piece is made for the vertical back edge of the vent window. Both are listed below. Because they are used quite often, vent window seals are usually so worn that they leak water & air.

Keep water from staining your door panels & stop that annoying whistling at highway speeds by replacing those vent window seals today, you'll be happy you did. To seal the whole vent you will need to purchase both the window seal & the back edge seal listed.

## Moulding Clip

- 64-66 Moulding clip, used on body side mouldings, 17 or 18 per side . . . . . C2DZ-6420842-A 2.95

## Front Fender Peak Mouldings

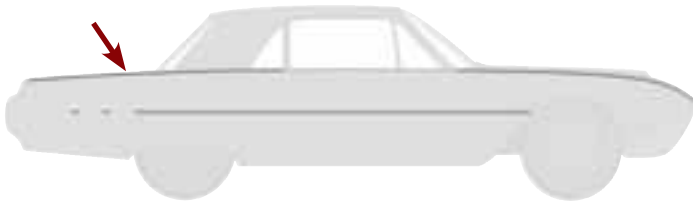

These peak mouldings were a great styling look but they seemed to be easily damaged. Straightening & refinishing them is a costly, time-consuming job better left to professionals. We now have a better solution-our reproduction mouldings! Made from the original stainless steel, they are ready to install. Clips are not included.

# What's Your Favorite CLUB?

## Why Not Make Yours a Thunderbird Owners Club

Even though there are tens of thousands of 1955–66 Bird owners, they all have one thing in common: Love of their automobiles. The classic styling, with its underlying power and heritage, is what makes these cars unique, and the reason onlookers can't help but stare.

No matter how much an owner knows about his vehicle, he can always benefit from the knowledge of other owners. Thunderbird clubs allow the exchange of information between men and women who have a passion for their hobby, and provide an owner the opportunity to see what other owners have done with their cars.

Members of T-Bird clubs are part of a fraternity that is among the best in the world and enjoy helping others who share the same desire to own a piece of motoring history and preserve it well into the 21st Century. It's also a time-saving advantage to get advice from others who have "been there, done that" when it comes to repairs and restoration. Plus, there are many other reasons to become a member.

So why not check out a Thunderbird club in your area or, if you can't find one, look into forming one.

The **International Thunderbird Club** is coming to Lockport, NY (MAC's hometown), August 23–30, 2009, for its 16th annual convention. The ITC has chapters and members throughout the world. If you're interested in joining or forming your own chapter, visit the Web site [www.intl-tbirdclub.com](http://www.intl-tbirdclub.com).

Dear MAC'S,  
 A while ago, we ordered two mirrors from you for the old '57 Ford. We were very pleased with the timely fashion that we received them as well as the quality of the mirrors. Thanks for the dedication.  
 Sincerely, Pat D.

MAC'S:  
 Apparantly you revised the web site today. Even better. The word search capability makes everything so much easier and the pictures help enormously. Your site is way ahead of the pack.  
 C. Gardner

To MAC'S Antique Auto Parts:  
 I received my order promptly as promised this past Friday. I look forward to using MAC'S again. It is refreshing to do business with a company that delivers what it promises. With your help I should have an easy time restoring the 1948 Ford that I have just purchased. Thanks again for your prompt and courteous attention.  
 Larry L.

LETTERS TO **MAC'S**

# Our New Building!

We're proud to unveil our newly completed state-of-the-art facility! It's 50,000 square feet of heaven for anyone who truly lives vintage Ford cars & trucks—from Model T's & Model A's to Mustang's & Mercury's.

RANDY & RICK UNPACKING

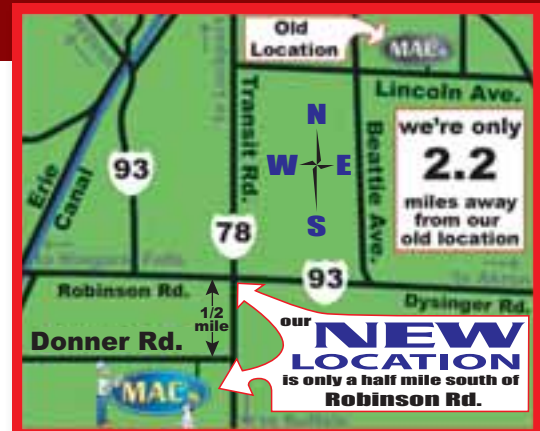

Visitors will love our huge new showroom, with an abundance of Ford parts & accessories as well as 4 of our own antique & classic cars. Customers will benefit from being able to look a part over closely before making a purchase. They'll also enjoy the rare old Ford items from MAC's extensive private collection.

Our all new, state-of-the-art warehousing system is designed to verify that parts are in stock & easy to pull for prompt filling of orders. This ensures that our customers will receive their orders faster & more accurately than ever before. Our shipping department now has the capacity to ship over 500 packages a day!

What does this mean to you? Greater product availability & faster shipping. Add to this the same great prices & customer service that MAC's is known for & we're sure to be on the top of your list for Ford Antique & Classic parts.

THE NEW SHOWROOM

## **Ordering:**

### **Manera de engargar: Pour commander un ordre:**

We will accept orders for parts that are listed in our catalog. Orders should be filled out completely on our regular mail order form, mailed, faxed or phoned in. Fill in all the information requested.

## **Shipping:**

### **Embarque: Pour expédiér L'embarquement:**

Parts can be sent air mail. Also see "Alternate Shipping Information" below.

## **Weight:**

### **Peso: Le poids:**

In general, almost all countries will accept individual packages weighing up to 22 pounds. Many countries will accept packages up to 44 pounds. We will package your order in the required number of containers to meet these requirements.

## **Size:**

### **Dimensiones: La dimension:**

The size limits are determined by the U.S. Postal Service, not the customer's country. In general, the greatest length cannot exceed 42 inches. The total length & girth combined cannot exceed 79 inches.

## **Insurance:**

### **Seguros: L'assurance:**

Air Mail Insurance is available for most countries. Individual countries have different maximum insurance limits. Insurance limits apply to each individual package, not the total order if in more than one package. All packages are automatically insured for the value of the contents where insurance is available.

## **Customs:**

### **Derechos de aduana: Bureaux des douanes:**

Customs forms are required for all packages being sent from the U.S. We will automatically fill out & attach the required forms. The customer is responsible for paying all duties, fees & taxes levied by their country. Values will not be altered on Customs documents.

## **Postage:**

### **Derechos de correo: Frais de poste:**

All postage fees charged by the Postal Service are based on actual weight. As a means of estimating the postage required, we have devised the chart below. These are estimated amounts. Actual postage will be charged. Any shortage will be billed. Any excess will be held as a credit to apply to a future order—we do not give refunds on international orders.

## **Estimated International Postage Charges**

	Air	Air	Air
Up to \$20.00	\$24.00	\$40.01 to \$60.00	\$40.00
\$20.01 to \$30.00	\$32.00	\$60.01 to \$100.00	\$44.00
\$30.01 to \$40.00	\$36.00	Over \$100.00	51%

Be sure to include extra postage for heavy or bulky items.

## **Other Charges:**

### **Derechos adicionales:**

### **Les honoraires supplémentaires:**

In addition to the postage charges above, there are two other charges, which are explained below.

## **Boxing Fee:**

### **Derechos de empaquetar mercancía:**

### **Les honoraires pour l'empaquetage:**

International shipments require special boxing & wrapping, as well as the preparation of customs documents. To simplify things, we have

established a minimum fee of \$3.00 or 5%, whichever is greater. Please add this to the above postage charges. Also include special fees for parts listed in the catalog.

## **Bank Collection Fees:**

### **Derechos de banco:**

### **La collection des honoraires par la banque:**

If your form of payment does not meet the Banking Requirements listed in the Payments Section, our bank will charge a collection fee. This fee is explained in the Payments Section. The fee is the exact amount of the bank collection fee. These fees are normally between \$15.00 & \$30.00.

## **Payments:**

### **Maneras de pagar: Les paiements:**

All payments must be in U.S. dollars. Cash, in the form of U.S. dollars, is sent at the customer's risk. All checks, money orders or drafts must be payable on an U.S. bank & have U.S. Federal Reserve Routing Numbers. These are special numbers used by the U.S. Banking System. If you cannot obtain this type of check from your bank, please include the Bank Collection Fee listed above in the "Other Charges" section. Full payment, including postage & other charges, must be included with your order. There are no open accounts or credit extended.

## **Credit Cards:**

### **Cartas de crédito: Les comptes crédites:**

We accept Visa, MasterCard, American Express, Discover & Diner's Club. Please check to be sure the cost of your order does not exceed your credit card limits. All card charges are computer authorized prior to shipping. Shipment will not be made if authorization cannot be obtained.

## **Address:**

### **Dirección: L'adresse:**

Please be sure you have included your complete address on the order form. It must include everything required for delivery in your country, including your postal code. Anything that will help insure delivery should be included. If you have a telephone, the inclusion of its complete number is required. Also include the name of the nearest international airport.

## **Alternate Shipping Information:**

### **Otras maneras de embarque: L'information relativement à autre expédition:**

Upon special request, small packages will be shipped by Express Mail. Double the shipping rate amounts shown in the Postage Chart if you want your package sent Express Mail. The fee schedule is quite expensive & should be considered only if speed is essential or the ordered items are too big for Air Mail. UPS Air Service is also available; rates vary greatly by destination.

The fee schedule for Air Freight is too complex to provide estimates.

The fee is based on a combination of weight, volume & destination.

We DO NOT ship by Ocean Freight. Crating costs, shipping costs & other problems preclude the offering of this service.

## **Catalog Requests:**

Any request for a catalog not accompanied by an order requires \$5.00 per catalog to cover postage costs. If the catalog is requested with an order, it will be included in the package at no charge.

## MAC's ANTIQUE AUTO PARTS

2008-2009 1955-57 Little Bird & 1958-66 Big Bird Catalog

**GENERAL INFORMATION** – All items in this catalog are good quality new, rebuilt or new old stock (N.O.S.).

**MINIMUM ORDER** – While there is no minimum order, on orders totaling less than \$20.00 in parts prior to shipping & handling, there is a \$2.00 minimum order fee. This minimum order fee attempts to cover some of the costs that we—and all suppliers—incur when processing/handling your lower-dollar order. Even with advancements in direct shipping from the manufacturer or their warehouse, there is still extensive paperwork and follow-up involved.

**ORDERING INSTRUCTIONS** – All orders are shipped by United Parcel Service (UPS). Parcel Post shipping in the U.S. is by request only or to addresses without street addresses. Oversize orders shipped by truck will be shipped Freight Collect. On all orders outside the U.S., please see the International Information (on page 257). UPS weight limit in the U.S. is 150 lbs. Parcel Post weight limit in the U.S. is 70 lbs. C.O.D., MasterCard, Visa, Discover, American Express/Diner's Club and mail orders accepted. C.O.D. orders in U.S. only! C.O.D. ORDERS ARE BY CERTIFIED CHECK, BANK CHECK, OR POSTAL MONEY ORDER ONLY UNLESS PRIOR ARRANGEMENTS ARE MADE. UPS WILL NO LONGER ACCEPT CASH C.O.D. PAYMENTS. On credit card orders, we need your card number and expiration date. NEVER PHONE IN AN ORDER FOR WHICH YOU WILL BE MAILING A CHECK. Any returned check is subject to a \$35.00 fee.

**INTERNATIONAL SHIPPING** – All shipping outside continental U.S. is made by Air Parcel Post. Weight and size limits vary depending on the destination. Express mail and air freight can be used by request if available. Customs forms are required on all shipments, and all customs documents require full declared values. All payments must be payable to a U.S. bank. See International Information (on page 257) for further details. We do not ship by ocean freight.

**PRICES** – All prices in the catalog are subject to change without notice. We try to keep our prices as low as possible and hold price changes to a minimum. Prices given over the phone are current prices at the time of the request and are not to be considered quotes.

**BACK ORDERS** – All items are shipped promptly, **except** where noted "Special Order" or "Exchange Only." We will back order if the item is not in stock but is expected within 21 days. Anything can be back ordered by request. It is the customer's responsibility to keep track of back orders. The shipping charges remain the responsibility of the customer for any duplicated back orders or orders refused because they are no longer needed. If a back order is no longer needed, be sure to cancel it and avoid unnecessary shipping charges. All packages (including back orders) will incur individual shipping charges.

**RETURNED GOODS** – Parts may be returned with a valid reason within 30 days. Please write, call or email us BEFORE returning anything and state your reason for return. On any returned items that are not damaged or defective, a 12% restocking fee might be charged. When returning an item, please be sure to ENCLOSE A COPY OF THE ORIGINAL SALES INVOICE. Returns will not be processed without a copy of the invoice. All returned items must be prepaid. Our liability is limited to the purchased price paid with no liability for consequential damage or losses. For no reason will returns be accepted after one year.

**DAMAGED/MISSING GOODS** – If merchandise was damaged in shipping or parts are missing, immediately notify the carrier and file a claim. DO NOT DISCARD THE SHIPPING CONTAINER OR THE MERCHANDISE. Following this, call or write MAC's for further instructions.

**PAYABLE TO** – Money orders, bank drafts and checks should be made payable to MAC's Antique Auto Parts. U.S. funds only. New York State residents must include proper sales tax applicable to your city or county. We cannot accept international personal checks.

**TOLL FREE PHONE ORDER INSTRUCTIONS** – Before calling, completely fill out the Order Form and have all your order information ready and organized.

**TOLL FREE PHONE & PHONE HOURS** – Toll Free Phone 800-777-0948 (within U.S. and Canada) is personally answered between 8:00 a.m. & 11:00 p.m. Eastern Standard Time Monday through Friday, and 8:00 a.m.–5:00 p.m. Eastern Time on Saturday. After hours, our phone system will take your order for a catalog or parts. There is no charge to you for this call and you can get your parts faster at less cost. The MAC's Fax Line 716-210-1370 is open 24 hours a day. Also, our Website ([www.macsautoparts.com](http://www.macsautoparts.com)) is always available. For local calls and calls from outside the U.S., please call 716-210-1340. BE PREPARED WHEN PHONING IN YOUR ORDER. We need the part number, description, quantity desired and all the needed customer information.

**REFUNDS** – All refunds are issued approximately 7 days after shipping unless items are back ordered, in which case the refund, if any, will be issued approximately 7 days from the processing of the last back ordered item. Checks must be cashed within 6 months. A replacement fee of \$10.00 will apply to all uncashed or lost checks.

**BOXING FEE** – There is a \$2.00 boxing fee added to each order.

**SHIPPING FEES** – These are shown in the chart on the Order Form. They are estimated only, and actual charges will depend upon weight and destination. ALWAYS INCLUDE EXTRA SHIPPING FOR HEAVY OR BULKY ITEMS. Excess amounts will be refunded. See International Information (on page 242) for details on foreign shipping costs.

**NEW YORK STATE SALES TAX** – All parts picked up at our store or delivered in N.Y. State are subject to the N.Y. State Sales Tax regardless of where you live, unless you have a N.Y. Resale # or Exempt # ON FILE at MAC's. Tax is calculated on the total of your order, including boxing and shipping.

**MAILING ADDRESS** – MAC's Antique Auto Parts, P.O. Box 238, Lockport, New York 14095-0238.

**SHIPPING ADDRESS** – MAC's Antique Auto Parts, 6150 Donner Road, Lockport, New York 14094.

**BOXING FEE** – There is a \$2.00 boxing fee added to each order.

**SHIPPING FEES** – These are shown in the chart on the Order Form. They are estimated only, and actual charges will depend upon weight and destination. ALWAYS INCLUDE EXTRA SHIPPING FOR HEAVY OR BULKY ITEMS. Excess amounts will be refunded. See International Information (on page 242) for details on foreign shipping costs.

**NEW YORK STATE SALES TAX** – All parts picked up at our store or delivered in N.Y. State are subject to the N.Y. State Sales Tax regardless of where you live, unless you have a N.Y. Resale # or Exempt # ON FILE at MAC's. Tax is calculated on the total of your order, including boxing and shipping.

## Lower Roof Side Mouldings

1964 roof side mouldings good enough to use have always been hard to find ... until now! These accurate reproductions, along with all of our other chrome mouldings, will shine just like the originals. See page 233.

## Headlight Door Trim

Many T-Bird aficionados love the way the 1955 Fairlane trim looks on the headlight doors & want to add it to their Little Birds. This reproduction of the original trim makes that possible. Call us today & place an order for our new headlight door trim. See page 82.
