# GUIDED READING COLLECTIONS

## GUIDED READING BOOKS AND COLLECTIONS

According to Irene Fountas and Gay Sue Pinnell, guided reading is an instructional setting that enables you (the teacher) to work with a small group of students to help them learn effective strategies for processing text with understanding. The purpose of guided reading is to meet the varying instructional needs of all the students in your class, enabling them to greatly expand their reading powers. Guided reading is a teaching approach that is designed to help individual students learn how to process a variety of increasingly challenging texts with understanding and fluency. Guided reading occurs in a small-group setting because the small group allows for interactions among readers that benefit them all. The teacher selects and introduces texts to readers, sometimes supports them while reading the text, engages the readers in discussion, and performs a mini-lesson after the reading. Sometimes after reading a text, the teacher extends the meaning of the text through writing, text analysis, or another learning activity. The lesson may also include work with words based on the specific needs of the small group.

BMI supports the guided reading program. We have added the guided reading level to all applicable books on the master order form. We also have prepackaged reading collections by guided reading level. Our Guided Reading catalog is available on our website at [www.bmionline.com/catalogs.asp](http://www.bmionline.com/catalogs.asp)
