BP75-02 Aluminum Double Sliding Door Track

SERIES BP75 SLIDING DOOR TRACK

This sliding door hardware may be used on closets or storage areas and is recommended for residential doors where wood trim will be used. Choose from steel or aluminum track with or without a fascia. Select single or twin wheel hangers for doors weighing up to 60 or 75 lbs. respectively. All sliding door track has V-shaped channel designs to prevent the hanger wheels from jumping off the track. The track also allows the doors to be lifted on and off without loosening hanger screws to ease installation. The track was designed with minimum headroom, only 1-1/4" required between top of door and header.

BP75-02 ALUMINUM DOUBLE SLIDING DOOR TRACK. For 3/4", 1" 1 1/8" and 1 3/8" doors weighing 75 lbs. .050" thick, one piece aluminum in mill finish. Corrosion resistant. Track is 1 1/16" high by 2 1/16" wide.

POCKET DOOR HARDWARE

STANLEY 250# BULK POCKET/SLIDING DOOR HARDWARE

BP150N-41 and BP250N-41 Hanger Assembly

For two by-passing doors 1 3/8" or 1 3/4" thick weighing from 30 to 250 lbs. each.

Single sliding door hardware for doors 1" or more in thickness, up to 250 lbs. each, aluminum track, track is 1 3/16" wide, nylon wheels, 2 7/8" minimum headroom, hangers packaged with screws and wrench. This heavy-duty hardware may be used with one track for single or bi-parting doors or with two tracks for by-passing applications. It is well suited for commercial requirements for non-standard space dividers, large panels and multiple doors. *Note: This is not the same as the old 58 Series.*

See Stanley 125# Bulk Bi-Fold Hardware Section for pricing and description of BP250N-01 Aluminum Single Track. **BP150N-41 AND BP250N-41 HANGER ASSEMBLY.** Four wheel top mounted hangers with snap plate and bolt with adjusting nut. Thermoplastic rollers provide a smooth, quiet operation. BP150N-41 for doors up to 150 lbs. BP250N-41 for doors upto 250 lbs. The BP250N are ball bearing, the BP150N are not. Full 1" vertical adjustment allowable with wrench provided after doors are hung.

SLIDING DOOR LOCKS

STANLEY SLIDING DOOR LOCKS

Modern Design - Passage Lock

Large solid brass faceplate (2 3/8" x 3 3/4" h). Patent pending slide mechanism that locks or unlocks the latch at the touch of a finger (found on locks only). Adjustable for 1 3/8" or 1 3/4" doors without the need for special screws. Coined edges and new screw hole pattern design eliminate bowing of faceplate. Large curved zinc die cast finger pull for easy operation. Available in bright brass (US3) finish. Carded with screws.

RICHARDS-WILCOX HANGERS FOR NO. 31 TRACK

Delrin Trucks only less Aprons

Manually Operated Sliding Doors

1 1/2" to 2 1/4" thick doors weighing up to 400 lbs.

Construction 3120-P2: 2 1/8" Delrin® wheel. The design of the hanger allows for both lateral and vertical adjustment in the field.

Head Clearance: Distance from the top of door to bottom of track: Minimum: 1 1/4", Maximum 2 3/4".

3120.00001 - Pair of truck assemblies with Delrin Wheels (less apron).

Delrin Wheel: Quiet operation. Rated at 400 lb. capacity of pair of trucks. Less wear on track than steel wheels. Exceeded life tests equivalent to 18,000 cycles of operation. Reduces spreading of track.

Single Body Design: Eliminates the need for welding, staking or riveting. Results in lower installed costs.

Pendant Assembly: Versatile for a variety of door applications. Allows easy vertical and lateral adjustment in the field with door in place. Installs with threads oriented up or down to fit all applications.
