While there are many products shown in this catalog, we also have access to many additional specialty products offered by the manufacturers we represent.

If you cannot find what you need in the catalog or on the web site, just call and we will be happy to identify the item and get it for you.

Thank you for your support and business over the years – we look forward to serving you for many years to come!

***Great products and excellent service
for 50 plus years!***

Founded by two previous CertainTeed Roofing salesmen, J&L Building Materials was created in 1958 with a goal of providing superior service and products in the Philadelphia area. Over the past 50 years that idea has blossomed into a seven-location company that distributes roofing, siding, windows, doors, kitchens, decking, insulation and many other products for the professional builder, remodeler, and installer. The company’s continued success has been attributed to excellent customer service combined with having one of the strongest product offerings for building professionals.

RESIDENTIAL ROOFING

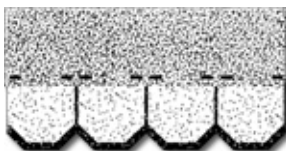

J & L BUILDING MATERIALS, INC. .
EVERYTHING A CONTRACTOR NEEDS FOR ANY SIZE PROJECT.

ASPHALT SHINGLES

CERTAINEED DESIGNER SHINGLES

- 30-year limited, transferable warranty
- 5-year SureStart™ protection
- U.L. certified to meet ASTM D3462
- Algae-resistant (AR) in some areas

CERTAINTEED HIP AND RIDGE ACCESSORIES

SHANGLE® RIDGE™ ACCESSORY

- For use with Grand Manor Shangle®, Carriage House Shangle™ and Centennial Slate™
- 12" x 18" with 8" exposure
- Covers 10 lineal feet per box
- Two full layers for extra protection and depth
- Algae resistant
- Matches all Grand Manor, Carriage House and Centennial Slate colors Pre-cut for easy installation, with a centering notch for a no-miss side-to-side alignment

SHADOW RIDGE™

- For use with Landmark TL, Landmark Series, Independence, Classic Horizon, New Horizon, Hearthstead and Patriot AR
- English - 12" x 12", with 5" exposure, covers 30 lineal feet per bundle
- covers 45 lineal feet per bundle
- Easy to separate into individual pieces by folding along pre-cut lines
- Can be double-coursed to accent rooflines and enhance overall appearance
- Size and color availability can vary by region

CEDAR CREST

- Transforms any roof from ordinary to beautiful!
- Cedar Crest features blended, consistent colors and an upgraded medium profile with two full layers of premium materials and an overlay for a striking dimensional appearance that coordinates seamlessly with Landmark™, Landmark™ Plus, Landmark™ Premium, Landmark™ TL, Presidential Shake™, Presidential Shake™ TL, Presidential Shake™ IR, Highland Slate™, and Highland Slate™ IR shingles
- Raised Profile – The thicker, richer appearance accentuates the roof lines making for a more attractive finished look.
- Multi Layer Design – Provides extra protection at critical stress points on the roof.
- Weight/Bundle: 53 lbs.
- Dimension (overall): 12" x 36"
- Separated into individual pieces: 12" x 12"
- Weather Exposure: 8"
- Coverage/Bundle: 20 linear feet
- Impact Resistant version is available in select colors

CERTAINTEED STARTER SHINGLES

SWIFTSTART

- Swiftstart metric starter shingle is designed specifically for use with CertainTeed Landmark Series shingles. Rather than cutting expensive field shingles to use as starters, you can save time and money by starting with Swiftstart.
- Reduced installation time, so jobs are finished faster
- Required for use to obtain enhanced warranties
- Code-compliant, meets min. 2" headlap requirement for metric shingles--many competing products do not
- Each 18-piece bundle covers 116 linear ft.
- Precision sealant for proper sealing at the eaves
- Works with all metric shingles that are similar to Landmark

CertainTeed 

PRESIDENTIAL STARTER

- Required for Presidential Shake™ TL and Presidential Shake™
- 13-1/4" x 40"
- Covers 36 lineal feet per bundle (when applied in required double layer)
- Must be applied in two overlapping layers
- Ensures factory-straight eave edge
- Assures Class A fire rating
- Saves time and money by avoiding the use of expensive field shingles
- Available in all Presidential TL and Presidential Shake colors

HIGH-PERFORMANCE STARTER

- For use with Grand Manor Shangle® and Hatteras®
- 10" x 36"
- 34 pieces per bundle
- Covers 102 lineal feet per bundle
- Ensures factory straight eave edge and proper sealant at eaves
- Dual sealant strip for 110 MPH wind warranty
- Saves time and money by avoiding the use of expensive field shingles
- Only approved installation alternative to using Grand Manor or Hatteras shingles themselves

EDGE VENT- AIR VENT INC.

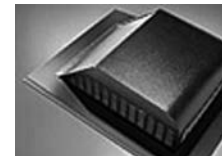

PRODUCT	DESCRIPTION	SIZE	NET FREE AREA
THE EDGE™ VENT	11.4" wide Shingle-over intake vent	4'	9 sq. in. per ft.

The Edge Vent provides proper intake ventilation for homes with little or no overhang. It's a roof-top installed, shingle-over intake vent design. It can be used to supplement existing soffit or under-eave vents as well. The Edge Vent provides 9 square inches of net free area per linear foot to balance with ShingleVent® II ridge vents and other Air Vent exhaust vents. Roof-top installation keeps the roofer on the roof. Internal ventilating baffles and filter provide weather protection. Constructed of same material as industry-trusted ShingleVent II ridge vents. Each 4-ft piece has integrated end plugs on each end. Radius design allows for increased airflow. 3/4" low profile. Minimum roof pitch: 3/12. Setting tabs on bottom underside assist with installation. Key component of The Balanced System® for Attic Ventilation.

ATAS ACCEL ROOFING PRODUCTS

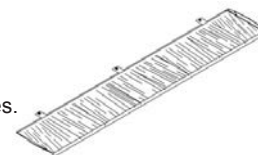

ADVANTA

- 29ga Steel
- A steep slope, non-structural shingle.
- An alternative to traditional asphalt shingle.
- Coverage Width: 12"
- Coverage Length: 36"
- Choice of 8 standard, and 6 designer colors (Americana Series), with KYNAR 500® or HYLAR 5000® finish

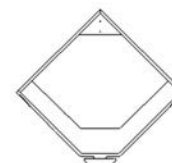

PERMASHAKE™

- .032 Aluminum, 29ga Steel
- A steep slope, non-structural shingle.
- Simulates the look of wood grained shingles.
- Width: 10"
- Length: 60"

CASTLETOP®

- .028 Zinc, .032 Aluminum, 16oz Copper
- Steep slope, non-structural shingle.
- Diamond shaped metal shingle.
- Size of the shingle is 15-3/4" x 15-3/4".
- Actual exposure is 13-1/2" x 13-1/2".

BERMUDA PANEL RUMBA SHAKE

- .032 Aluminum, 16oz Copper, 24ga 55% Al/Zn coated steel with clear acrylic coating, 24ga Galvanized Steel
- A steep slope, non-structural shingle.
- A Bermuda style roof panel.
- Width: 9"
- Length: 2'-0" minimum, 12'-0" standard, or 20'-0" maximum
- Choice of 29 standard colors, with KYNAR 500® or HYLAR 5000® finish.
- Special offerings: anodized Aluminum, clear or bronze, and 16 oz. Copper

STANDING SEAM SHINGLE

- 16oz Copper, 29ga Steel
- A steep slope, non-structural shingle.
- Antique style standing seam.
- Width: 16"
- Length: 36" or 60"

Trim pieces include: eave trim, gable trim, J channels, fascia, hip and ridge caps and valley trims. (Call for details)

FOLLANSBEE METAL ROOFING

TCS II

- Type 304 (Non-Magnetic) dead soft stainless steel covered on both sides with the new ZT ALLOY (50% tin, 50% zinc) to a thickness of 20 microns.
- Sizes: Sheets - widths 20, 24, and 36 inches. Lengths 96 and 120 inches. Special sizes available up to 36 by 144 inches. 50 foot rolls in widths of 20, 24, and 36 inches. Also available in all widths are 2000# to 4000# mill coils.
- Gauges: 24, 26, and 28 plus coating. Only 36" wide available in 24 gauge.
- Weight: 28 gauge - .67# per sq. foot; 26 gauge - .77# per sq. foot; 24 gauge - 1.02# per sq. foot (Note: All weights are theoretical, and could vary.)

TERNE II

- Prime base sheet of drawing-quality carbon steel, coated both sides with ZT ALLOY (50% Tin/ 50% Zinc).
- 50-Foot rolls, widths 10, 12, 14, 20, 24 and 28 inch. Also roller leveled, cut to length sheets up to 28 x 144 inches for maximum flatness. Also available in widths of 20", 24", and 28" in 2000 to 4000 lb. mill coils.
- Gauges: IC-30Ga., IX-28Ga., available in Architectural Roofing Grade.
- Weight: IC - .51 lbs. per sq. foot; IX - .61 lbs. per sq. foot - (Note: All weights are theoretical, and could vary.)

SBS & APP MODIFIED

MODIFIED BITUMEN- CERTAINTEED

**FLINTLASTIC® GMS™
SBS MODIFIED BITUMEN ROLL ROOFING
PRODUCTS**

8 Colors Match Landmark (steep slope shingles) -,SBS Modified Bitumen products constructed with a high performance non-woven polyester support mat, 4 mm. and 4.3 mm.

- Size: 39-3/8" X 34'2"
- Coverage*: One square
- Approximate Weight: 100 lbs./per roll (.89 lbs./sq.ft.)
- Top Surface: Mineral Granule
- Back Surface: Light Sand Finish, release agent

**FLINTLASTIC® GTA™
APP MODIFIED BITUMEN ROLL ROOFING
PRODUCTS**

- 8 Colors Match Landmark (steep slope shingles) - an APP Modified Bitumen with a high performance non-woven polyester mat, 4.2 mm.
- Size: 39-3/8" X 33' 3"
- Coverage*: One square
- Approximate Weight: 105 lbs./per roll (.96 lbs./sq. ft.)
- Top Surface: Mineral Granule
- Back Surface: Polyethylene Torchable Film

**FLINTLASTIC® STA™
APP MODIFIED BITUMEN ROLL ROOFING
PRODUCTS**

- An APP Modified Bitumen smooth surfaced product constructed with a high performance non-woven polyester mat, 4 mm. & 5 mm.
- Size: 39 3/8" X 33'3"
- (Flashing sizes 1911/16" and 913/16" are available)
- Coverage*: One square
- Approximate Weight: 90 lbs./per roll (.83 lbs./sq.ft.)
- Top Surface: Smooth-Talc finish
- Back Surface: Polyethylene Torchable Film

**SPECIALTY BASE & MID PLY MATERIALS
CERTAINTEED**

BLACK DIAMOND™ BASE SHEET

- Self Adhering, Modified Bitumen Coated, Fiber Glass Base Sheet or Vapor Retarder
- Non-oxidized (Flux) asphalt, blended with a compatible elastomeric styrene-butadiene-styrene polymer and selected inert fillers.
- Support Mat: Wet process fiber glass mat.
- Surfacing: Fine black mineral particles.
- Approx Weight: 75 lbs./per roll.
- Dimensions: 36" x 75' (225 square feet).
- Coverage: Two Squares.
- Thickness: 1.4mm (56 mils).
- Tensile: @ 73°F MD 45 lbs./in. XD 35 lbs./in.
- H2O Absorption: 0.1%
- Dimensional Stability: MD 0.1% XD 0.1%

**SELF-ADHERING MATERIALS
CERTAINTEED**

FLINTLASTIC® SA

Self-Adhering SBS Modified Bitumen Mid Ply and Cap Sheet and SBS Modified Bitumen Base Sheet for SA Roof Systems.

	Flintlastic SA Base	Flintlastic SA Mid Ply	Flintlastic SA Cap Sheet
Roll Dimensions	66'6" x 39-3/8"	33'11" x 39-3/8"	33'11" x 39-3/8"

Weight	84 lbs	68 lbs	97 lbs
Coverage	2 Sq	1 Sq	1 Sq

FLINTFLASH™ SA

SELF-ADHERING SBS MODIFIED BITUMEN, PRE-CUT FLASHING FOR SA ROOF SYSTEMS.

- Roll Dimensions: 33'11" x 9-3/4" (or 19-5/8")
- Thickness: 3.0 mm
- Weight: 17 lbs (or 34 lbs)
- Coverage: 1/4 Square (or 1/2 Square)
- Top Surface: Permanent Film
- Bottom Surface: Removable Release Film
- Reinforcement: Polyester/Fiberglass Scrim Combination Mat

BUILT-UP ROOFING (BUR)- CERTAINTEED

FLINTGLAS® PLY SHEET TYPE IV

- Fiber Glass Type IV Roofing Felt
- Support Mat: Wet process fiber glass mat.
- Surfacing: Release agent.
- Approximate Product Weight: 38 lbs./per roll.
- Dimensions: 36" x 180' (540 square feet).
- Coverage: Five Squares.
- Tensile: MD/XD 50/46.

GLASBASE™ BASE SHEET

- Asphalt Coated, Fiber Glass Base Sheet
- Support Mat: Wet process fiber glass mat
- Surfacing: Mineral release agent
- Product Weight: 75 lbs. per roll
- Dimensions: 36" x 108' (324 square feet)
- Coverage: Three Squares
- Tensile Strength: (lb./in.) MD/XD = 69/50

ALL WEATHER/EMPIRE™ BASE SHEET

- Asphalt Coated Organic Base Sheet
- Support Mat: Organic Base Mat.
- Surfacing: Mineral release agent.
- Approximate Product Weight: 86 lbs./per roll.
- Dimensions: 36" X 72' (216 square feet).
- Coverage: Two squares.
- Thickness: 0.07 in.
- Tensile: @ 73°F MD 85 XD 35.
- Tear: @73°F MD 2700 XD 2800.

COATINGS & ADHESIVES

ROOF COATINGS- HENRY

208® WET PATCH® ROOF CEMENT

- Repair leaks on WET surfaces
- Adheres even under water
- All purpose—also suitable for dry surfaces
- Spreads easily in cold weather
- Seal around chimneys, vents, skylights, flashings
- Heavy-bodied, smooth-spreading
- Meets or exceeds all requirements of ASTM Specification D-4586, Type I except for high-temperature sag.

280DC WHITE ROOF COATING TITLE 24

- Premium, water-based acrylic latex coating. It reduces surface temperature and penetration of the sun's rays to the roof surface, which helps reduce roof and interior temperatures as well as energy costs. When properly applied, it is highly resistant to disbonding, chalking, mildew, fungi, and discoloration.
- Reflects up to 88% of sun's heat and U.V.; prolongs roof life
- Meets California Commission Title 24, LEED requirements and is UL Classified A and B and Fire Rated, Miami-Dade County, NOA 04-1027.01, Cool Roof Rating Council (CRRC) and ASTM D-6083-05
- Offers 10-year warranty
- Coverage: On smooth surfaces – approx. 2 - 3 gallons per 100 sq. ft. depending on porosity and roughness of surface

552 ELASTIC ROOF SEALER

- Trowel-grade for use on WET or DRY surfaces
- Especially suited for emergency repairs during inclement weather
- All temperature—use in hot or cold conditions
- Sticks to all wet surfaces, even under water
- Repairs leaks in metal, shingles, concrete, flashings, gutters, and around chimneys, downspouts, and eaves
- ASTM D2822 Type I Class I

553 MBA® ELASTOMERIC MODIFIED BITUMEN ADHESIVE

- An asbestos free, fibrated, rubberized adhesive, designed specifically for adhering SBS modified bitumen and asphalt coated membranes
- Exhibits excellent low temperature flexibility
- Lap strength adhesion properties far exceed the minimum requirements of ASTM D3019
- Eliminates the hazard of hot kettle fires and torch applications, as well as hot asphalt fumes and odors
- Does not require red label solvent identification
- Not for use over solvent-sensitive insulation, with modified bitumen products having polyethylene backing, or with APP modified products
- Apply with brush, squeegee, or sprayer
- ASTM D3019 Type III
- NOT FOR USE IN VOC RESTRICTED AREAS
- Coverage: 1.5 gallons/square

554 MBA® ELASTOMERIC MODIFIED BITUMEN FLASHING CEMENT

- Ideal for dampproofing above and below grade, exterior concrete and masonry walls and foundations
- Provides a durable, weather-resistant film
- Also used for the protection of metal and smooth-surfaced composition roofs
- Can also be used to coat gutters and flashings
- Coverage: 1.5 – 2 gallons/square

794 PREMIUM FOUNDATION COATING – BRUSH GRADE

- A multi-purpose, ready to use, fibrated solvent-based asphaltic foundation coating
- For below-grade dampproofing of walls and foundations
- Provides continuous, vapor-resistance film
- Excellent bond to clean, cured concrete
- Protects metal surfaces against corrosion
- Flexible and crack resistance under normal expansion or contraction
- Made from selected asphalts, non-asbestos fibers, mineral stabilizers and petroleum solvents
- Asbestos Free
- Complies with ASTM D4479, Type I
- Coverage: 2 – 3 gallons/square

HE869 - ELASTOMERIC ALUM RF CTG

- A premium, asbestos free, highly reflective roof coating
- An excellent top surfacing for new or weathered asphalt surfaces, smooth modified bitumen membranes, and metal roofs
- Outstanding strength and elastic properties
- Extends roof life
- Reduces roof surface temperatures and interior building temperatures
- Ideal for BUR, SBS, and APP modified roofs
- Coverage: 1.5 gallons/square

ALSO AVAILABLE PRO GRADE:

- 441 FIBER ROOF COATING
- 331 COLD PROCESS ROOF CEMENT
- 812 ALUMINUM ROOF COATING
- 842 PREMIUM ALUMINUM ROOF COATING

EPDM

EPDM ROOFING SYSTEM- VERSIGARD

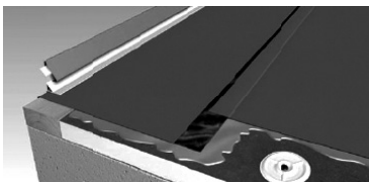

VERSIGARD BALLASTED ROOFING SYSTEM

Ballasted designs incorporate a loose-laid insulation and membrane and the use of ballast or pavers as securement.

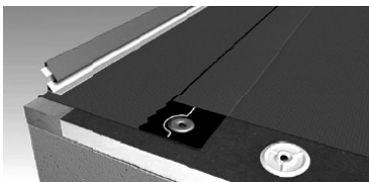

VERSIGARD FULLY-ADHERED ROOFING SYSTEM

Fully-Adhered Systems require mechanical or adhesive attachment of the insulation and bonding of the membrane to the insulation.

VERSIGARD MECHANICALLY-ATTACHED ROOFING SYSTEM

Mechanically-Attached Systems require mechanical attachment of the insulation to the deck and mechanical attachment of the membrane within the seam area.

VERSIGARD EPDM MEMBRANES

- Cured non-reinforced or reinforced EPDM (Ethylene, Propylene, Diene Terpolymer) compounded elastomer.
- Non-Reinforced EPDM membrane is available in (black) or (white-on-black). White-on-black membrane must be installed with the white surface facing up. Reinforced EPDM is available in (black) only.
- VersiGard No-Dust (black) EPDM Membrane (mica dust has been removed during manufacturing) is available for sheets maximum 10' (3 m) wide. Refer to applicable "Installation" sections for installation procedures.

NON-REINFORCED EPDM MEMBRANE

- VersiGard (black) .045" (1.1 mm) or .060" (1.5 mm) thick non-reinforced EPDM membrane - maximum 50' (15.24 m) wide, maximum 100' (30.49 m) long (.045" thick membrane is also available in 200' lengths) which meets ASTM D4637 and ANSI/RMA IPR-1.
- VersiGard (white-on-black) .060" thick non-reinforced EPDM membrane - maximum 10' (3.05 m) wide, maximum 100' long which meets ASTM D4637 and ANSI/RMA RP-5.

REINFORCED EPDM MEMBRANE (BLACK ONLY)

VersiGard (black) .045" and .060" thick reinforced EPDM membrane - 4-1/2' (1.37 m), 7' (2.1 m) or 10' wide, maximum 100' long; 10' wide .045" thick membrane is also available in lengths of 200' (60.98 m). Reinforced with polyester fabric which meets ASTM D4637 and ANSI/RMA IPR-2.

INSULATION

- Versico ISO is recommended for use with all of Versico's VersiGard Roofing Systems and is required in a Versico Total Systems Warranty.
- Standard board size is 4' x 8' with a thickness range from 1" to 4" and is also available in tapered form.
- Versico Polyisocyanurate Insulation is UL and/or FM approved as a system component in certain roofing assemblies.
- Versico ISO is a polyisocyanurate insulation with foam core insulation boards faced on both sides with a medium weight fiber-reinforced felt. This dimensionally stable, durable insulation offers maximum thermal efficiency.

VERSICO ROOFING SYSTEM WARRANTIES

- 5-, 10- and 15-year Membrane Warranties are available. Also, 10-, 15- and 20-year Total Roofing System Warranties are available. Standard wind speed coverage is 55-MPH. Additional wind speed warranties are available.
- A warranted system is installed by an authorized Versico Roofing Contractor. A completed warranted system is inspected by a trained Versico Field Service Representative to ensure conformance with Versico specifications.

TPO

TPO ROOFING SYSTEM - VERSIFLEECE

VERSIFLEECE TPO ROOFING SYSTEM

Versico continues to be your single source for single-ply roofing by offering VersiFleece TPO membranes. Ideal for re-roofing or new construction, VersiFleece TPO incorporates reinforced TPO membrane laminated to a 55-mil, non-woven polyester fleece backing. This fully adhered system can be installed using either Aqua Base or DASH adhesive. The membrane is available in 100- and 115-mil total thicknesses.

Versico also offers VersiFleece AC (Asphalt Compatible) TPO for use in Cold Applied and Hot Mopped Roofing Systems. Versico's AC non-woven fleece is specifically designed to resist asphalt saturation and staining. The VersiFleece AC is available in 120- and 135-mil total thickness.

VERSIFLEECE ADVANTAGES

Toughness and Durability

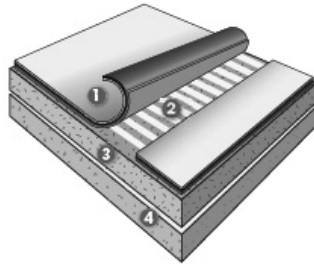

- Fleece backing provides thicker membrane
- (100-mil up to 135-mil)
- Greater puncture resistance than modified bitumen
- Contains OctaGuard XT™ weathering package
- Greater wind uplift resistance•

Environmental Benefits

- ENERGY STAR® qualified (white and tan) and CRRC approved
- Fully adhered system uses VOC- and solvent-free adhesives
- Membrane formulation contains no chlorinated ingredients or plasticizers

VERSICO TOTAL SYSTEM WARRANTIES

10-, 15- and 20-year Total System Warranties

TYPICAL DASH APPLICATION

1. VersiWeld® VersiFleece TPO Membrane
2. DASH Adhesive
3. Acceptable Insulation
4. Approved Roof Deck

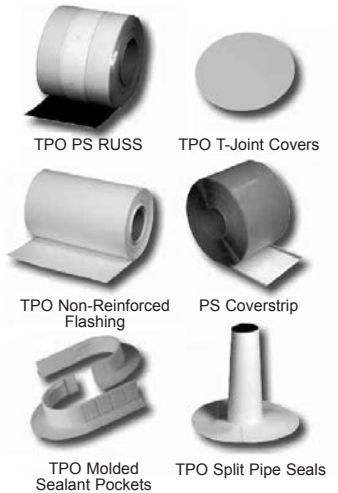

TYPICAL AQUA BASE APPLICATION

1. VersiWeld VersiFleece TPO Membrane
2. Aqua Base 120 Bonding Adhesive
3. Acceptable Insulation
4. Structural Deck

TPO ACCESSORIES

CERTIFIED FABRICATED ACCESSORIES (CFA)

The most critical and time-consuming portion of VersiFleece TPO roofing installation is made easier and faster with VersiFleece TPO fabricated accessories. The accessories provide exceptional durability and weatherability with the added benefit of being heat weldable. VersiFleece TPO Accessories greatly reduce job time, in turn, reducing labor time. All VersiFleece TPO accessories carry the Certified Fabricated Accessory Seal of approval meaning they adhere to the most stringent quality tolerances required to be included in a Versico warranted roof system.

OCTAGUARD XT™ WEATHERING PACKAGE

OCTAGUARD XT WEATHERING PACKAGE

All VersiFleece TPO membranes feature OctaGuard XT, a time-tested weathering package that is comprised of eight performance-enhancing ingredients with three heat-stabilizing antioxidants, three UV light stabilizers and organic and inorganic UV absorbers that help protect Versico's TPO membranes and dramatically improve their ability to resist deterioration due to the effects of weather.

Versico's TPO outperformed all tested competitive products in accelerated heat-aging tests conducted by an independent laboratory.

Combining Versico's state-of-the-art TPO formulation and OctaGuard XT means:

- A smoother top surface
 - Increased resistance to dirt, debris, mildew and bacteria build-up
 - Cleaner, more reflective membrane throughout the life of your roof
- Industry-leading reflectivity warranty

INSULATION & HOUSEWRAPS

HUNTER

J & L BUILDING MATERIALS, INC. .
EVERYTHING A CONTRACTOR NEEDS FOR ANY SIZE PROJECT.

ROOF INSULATION

FIBERBOARD – CONTINENTAL MATERIALS

COMMERCIAL ROOF FIBERBOARD

is manufactured to a uniform density using cellulosic wood fibers with additives to improve strength and moisture resistance. Each panel is surface treated with black sealer to promote adherence of the roofing membrane and reduce adhesive or bitumen strike-in.

Dimensions

- 1" thick: 4x8, 4x4 Standard sizes: 2x4 available (High Density)
- ½" thick: 4x8, 4x4 Standard sizes: (Regular Density or High Density) High Density (Type II, Grade 2) available coated 6 sides

ENERGY SMART POLYISO – HUNTER

H-SHIELD FLAT POLYISO H U N T E R

FEATURES AND BENEFITS

- Manufactured with NexGen Chemistry™ - Zero ODP, CFC Free, EPA Compliant.
- Approved for direct application to steel decks.
- Approved under all major roof covering systems – BUR, Modified and Single Ply.

PANEL CHARACTERISTICS

- Available in 4' x 4' (1220mm x 1220mm) and 4' x 8' (1220mm x 2440mm) panels in thickness of 1" (25mm) to 4.0" (102mm)
- Available in two grades of compressive strengths per ASTM C1289-03, Type II, Class 1, Grade 2 (20 psi), Grade 3 (25 psi).

APPLICATIONS

- Constructions requiring FM Class 1 and UL Class A ratings
- Single-Ply Roof Systems (Ballasted, Mechanically Attached, Fully Adhered)
- Modified Bitumen Systems Built-Up Roofing: Asphalt and Coal Tar (call for pricing and availability)

ENERGY SMART POLYISO -DUPONT TYVEK

TYVEK™ STUCCOWRAP

- Designed for EIFS & Stucco
- Engineered Texture Channels Moisture Down and Out of the Wall
- Does Not Wick Moisture Like Felt
- Reduces Susceptibility to Cracking
- 5 ft. x 200 ft. per roll

DUPONT™ STRAIGHTFLASH

- Jambs and heads of rectangular windows
- Dimensions: 4-inch width x 150 feet

DUPONT™ FLEXWRAP™

- A moldable flashing material made with Tyvek®, an elastic material, a polyolefin film, and a highly adhesive butyl sealant.
- Applications Round top or custom shaped window / 3-D sill protection / Wall interruptions: i.e. dryer vents, hose bibs
- Dimensions: 7- or 9-inch width x 75 feet

TYVEK™ TAPE

- Special high-contact tape creates a seamless, protective envelope for the wall system
- 2 in. x 55 yds.

TYVEK® HOMEWRAP®

- Air resistance to help prevent the flow of air through wall cavities and reduce drafts.
- Moisture resistance to help protect the wall cavity from water that gets behind the cladding.
- Moisture vapor permeability to promote drying of wall systems.
- Durability to withstand the rigors of the construction site and to continue performing once construction is completed.

HOME SLICKER STONE & STUCCO - BENJAMIN OBDYKE

MORTAIRVENT®

- Mortairvent® is a two-ply mortar deflection and ventilation system that has been specifically designed for use with manufactured stone, stucco, EIFS and brick.
- Allows moisture to escape quickly before it damages the sidewall materials
- Defends the wall assembly from mold and mildew
- Preserves the structure of the plywood sheathing
- Creates a ventilation cavity between the vapor barrier and exterior wall
- Fabric blocks mortar droppings from seeping into this newly formed cavity
- Combination of drainage and ventilation allows interior walls to remain dry
- Width of Mortairvent: 39"
- Width of Fabric: 43"
- Length: 61.5'
- Coverage: 200 sq ft
- Thickness: .25"

SEALANTS

SEALANTS - NPC

#900 SOLAR SEAL

- Based on terpolymer elastomer technology, offers an alternative to silicone & urethane chemistry
- Maximum joint & sealant width is 3/4"
- Maximum sealant depth is 1/2"
- Minimum application depth is 3/8"
- Shelf life: 1 Year @ 75° F
- Substrate temperature range: 10/125°F
- Service temperature range: -40/300°F

SEALANTS - OSI

OSI® QUAD® VOC WINDOW, DOOR & SIDING SEALANT

Composed of elastomeric polymers and high quality resins. This product offers superior adhesion characteristics and unmatched elasticity found in high performance sealants. It yields a tough, rubbery seal which resists outdoor weather-related elements like water, oxygen, ozone, heat and UV light. The formula skins over in a short time to resist dust and dirt. QUAD goes on smoothly and has easy cut off without stringing and no tooling required.

Recommended for

Specially designed for sealing around window, doors, fiber cement siding, vinyl siding, roofing and gutters. It bonds without a primer to most common substrates like cedar, fiber cement, vinyl, composite trim, fiberglass, aluminum, masonry and concrete.

- Low VOC formulation meets stringent State and Federal VOC requirements
- Available in over 300 colors to match the most popular siding products
- Permanently flexible, will not crack or split even in extreme temperatures
- Water-resistant, all-weather application, sticks to wet surfaces, no water washout
- No tooling required, sealant will self-tool into a concave shape
- Resists dust and dirt pickup
- Paintable with oil or latex-based paints
- Excellent UV resistance; Will not crack or yellow
- 10.2 fl oz (301ml) cartridge features a Break-A-Way Seal

SEALANTS - GEOCEL

2315LRF® LEAK REPAIR-FIBERED BRUSHABLE SEALANT

- Stops leaks immediately and permanently
- Adheres to EPDM, TPO, Metal, BUR, and SPF roofing
- Works in wet and icy conditions
- 30-year limited warranty
- Fibered for strength
- Applies at any temperature

2300® CONSTRUCTION TRIPOLYMER SEALANT

- CARB VOC compliant
- Adheres to wet or oily surfaces
- Stays flexible - will not crack
- Superior ultraviolet resistance
- Applies in any temperature
- Paintable - contains no silicone
- 50-year service life
- Available in crystal clear, colors, and specially designed metal roof colors. For a listing of popular metal roofing manufacturers that we match, use the drop down menu below
- Excellent adhesion to most building materials including painted (Kynar®) metal

SIDING AND ACCESSORIES

J & L BUILDING MATERIALS, INC.
EVERYTHING A CONTRACTOR NEEDS FOR ANY SIZE PROJECT.

CERTAINTEED VINYL SIDING AND TRIMS

CertainTeed  For beautiful, natural-looking vinyl siding that is virtually maintenance-free, turn to CertainTeed. We offer a wide variety of siding styles, some reminiscent of cedar shake, others of traditional clapboard in a striking array of 31 colors to match any taste or architectural style. And our sidings are engineered to perform even in harsh conditions.

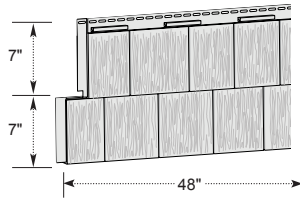

CEDAR IMPRESSIONS- CERTAINTEED

Molded from real cedar shingles, Cedar Impressions® offers the most natural looking cedar shingle sidings available without the heavy maintenance of wood.

- Made with patented TrueTexture™ technology
- Locks and laps similarly to standard vinyl siding
- Virtually maintenance free - never needs painting
- Lifetime Limited Warranty

**APEX
 FIBERGLASS**

ULTREX SIDING SYSTEM – APEX

APEX is an innovative new siding system that improves upon virtually every single critical area of siding and trim performance and aesthetics. APEX is made with Ultrex®, a patented pultruded fiberglass pioneered by Marvin®, that through a proprietary manufacturing process has been incorporated with an integrated acrylic finish. This unique process provides APEX siding with its unmatched strength, high moisture and impact resistance, and bold, rich colors that resist fading and don't require painting. The sum of which gives your home a truly distinctive look and enduring beauty.

- A built-in water management system to reduce rot and mold
- A durable finish, four times thicker than paint, that's integrated into the substrate
- Resists fading, chalking, warping and chipping
- Performs in extreme temperatures from 30 below zero to 350 above
- Three times lighter than fiber cement for ease in installation
- Integrated siding and trim options for a complete system
- Available in 4" and 7" lap siding
- Panels are 16'

HARDIE FIBER CEMENT

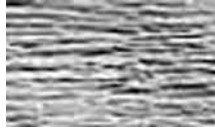

COLORPLUS® FIBER CEMENT — HARDIE

For the ultimate in performance with HardieZone™ products, add ColorPlus® Technology. This proprietary process involves applying consistent, multiple coats of paint that was created especially for the demands climate places on a home's exterior. The end result is a beautiful consistent finish that lasts up to 2x's longer. For HZ5™ board environments, this baked-on coating offers maximum durability and resistance to prolonged exposure to freezing climate and moisture contact, eliminating weather delays and labor costs associated with field-applied paint.

- Our finish warranty guarantees your color will not crack, chip or peel for 15 years.
- Over 41 quality checks are made throughout our proprietary manufacturing process to ensure the quality of the substrate, the texture and the finish. No other manufacturer can match our demanding quality standards.
- Considering the alternatives? Compare the benefits of James Hardie Siding Products with ColorPlus® Technology to field applied paint options, especially on larger buildings

HARDIEPLANK® LAP SIDING

HardiePlank® Lap Siding is the most popular brand of siding in America and can be found on over 4 million homes. With its strength, beauty and durability, HardiePlank® siding enhances and protects homes in all kinds of climates.

HARDIESHINGLE® SIDING

HardieShingle® siding has the same warm, authentic look as cedar shingles, yet it resists rotting, cracking and splitting. It's beautiful as a primary siding or as a complement to other styles of James Hardie® siding. Our shingle siding panels come in a variety of decorative edges, and expedite installation in larger areas.

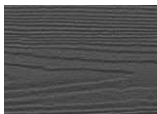

HARDIEPANEL® VERTICAL SIDING

For applications that call for vertical siding, HardiePanel® vertical siding is equal to our lap siding in value and long-lasting performance. Because of its structural strength, HardiePanel siding may be used as a shear panel. When combined with HardieTrim® planks, it can also help you achieve a board-and-batten look.

HARDIETRIM® BOARDS

Our fiber cement trim and fascia add the finishing touch to a beautiful, lasting James Hardie home. They provide unmatched durability in corners, columns, windows, rakes and friezes.

HARDIESOFFIT® PANELS

James Hardie pre-cut soffit panels eliminate the need for separate box or strip vents and minimize the need for cutting. HardieSoffit® panels are available vented or non-vented, in a range of pre-cut sizes.

WEATHER BARRIER

HardieWrap™ weather barrier is an innovative, higher performing weather barrier made by James Hardie, maker of America's #1 brand of siding. HardieWrap weather barrier provides a balance of water resistance and breathability, allowing moisture (water vapor) from inside your home to escape so the area within the wall stays dry.

HardieWrap weather barrier is a premium, non-woven, water-resistive barrier. It contains a unique MicroTech™ Coating that enables higher performance:

- Protects your home from water damage
- Allows your home to breathe, helping prevent the conditions for mildew
- Reduces energy loss to save you money

ARTISAN LAP

Artisan Lap is the only architectural grade exterior design product that couples stunning beauty with superior structural integrity. Displaying custom artistry in every exquisite detail, Artisan Lap allows you to implement a distinct element of style to the home, satisfying your aspiration for architectural excellence.

- Distinctively deep shadow lines for premium aesthetics
- Patented DuraTech™ technology provides a product with structural integrity
- Artisan Lap boards are beveled on the back to lie flat against the wall ensuring stability
- Unique tongue and groove feature allows end joints to fit tightly together for precise fit and finish
- Can easily be nailed with the same 2-1/4 inch siding nails used by other James Hardie® products
- Available in 12 foot lengths in varying widths - 5-1/4", 7-1/4" and 8 1/4" ± 4", 6" and 7" exposures for several aesthetic options
- Low maintenance for lasting beauty
- Available in smooth and texture surface* and arrives ready to paint
- 5/8" thick but light weight for ease of handling
- Resistant to damage from fire, water, insects and harsh weather
- Backed by a 30-year limited warranty instilling greater confidence in a quality product
- Durable, non-combustible and the need for less paint all contribute to Artisan's role in building green

CERTAINTEED FIBER CEMENT

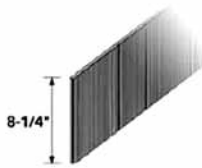

CertainTeed WeatherBoards™ Siding features the most authentic wood grain in the industry, so you can enjoy the lasting features and handsome appearance of wood without all the upkeep. But the real difference between CertainTeed WeatherBoards™ and similar products is actually in the material. It's stronger. Built to take on the elements and then some.

- Deeper, more authentic wood grain
- A complete system of siding, decorative shapes, soffit and trim
- A variety of textures, profiles and colors to match virtually any design style
- Consistent quality and excellent dimensional stability
- Class 1 (A) Fire Rating
- Impervious to wood-boring insects
- Resists damaging effects of salt spray and UV rays
- Will not rot
- Higher interlaminar bond strength means superior freeze/thaw protection
- FiberTect® Sealant/Primer protects against damaging moisture
- Resists everyday bumps and harmful impacts
- 50-year limited transferable warranty (see actual warranty for details and conditions)

7/16" FIBERCEMENT TRIM – CERTAINTEED

WeatherBoards FiberCement trim is easy to work with and install wherever trim is required for a “finished” look — on top of functional trim, at corners, window and door casings, fascia and other decorative elements. It is ideal for covering wood, pressure-treated wood, composites and other materials. Trim can also be matched exactly to the siding, or painted in coordinating or contrasting colors.

WeatherBoards Trim widths: 3-1/2", 5-1/2", 7-1/4", 9-1/4", 11-1/4"; all trim is 7/16" thick.

CEDAR SIDING AND TRIM

CLEAR CEDAR SIDING GRADES

Clear bevel siding is graded for smooth face use with the exception of Rustic which is graded for saw textured use only.

CLEAR V.G. HEART

This is the highest bevel siding grade. All Clear V.G. Heart grade is sawn vertical grain (edge grain) and is kiln dried. Pieces have a smooth face of decay-resistant heartwood and are free from growth characteristics that affect appearance or performance. Pieces have excellent dimensional stability and hold finishes exceptionally well.

Available solid wood or finger-joined.

A CLEAR

This is a fine appearance grade that allows only slightly more growth characteristics than Clear Heart. Pieces are of mixed grain. These mixed grain (vertical and flat) pieces are graded from the surfaced face.

Available solid wood or finger-joined.

RUSTIC

Rustic grade bevel siding is recommended for use as sidewall covering where the distinctive charm of a rustic saw textured appearance is desired. This grade allows limited characteristics that do not detract from serviceability.

Available solid wood or finger-joined.

KNOTTY CEDAR SIDING GRADES

SELECT KNOTTY

Knots and other natural features define the visual character of knotty sidings. In Select Knotty grade, knots are sound and tight. Available rough or dressed, kiln-dried or unseasoned and smooth or saw textured. Some companies may supply this grade with knots glued on the reverse face.

QUALITY KNOTTY

In this grade, natural growth characteristics are not limited as stringently as in Select Knotty. Cross cutting may be required on some pieces to yield tight knotted siding.

CEDAR SHINGLE PANEL – SHAKERTOWN®

CRAFTSMAN CEDAR SHINGLE PANEL

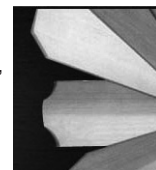

The Shakertown® Craftsman 1-Course Cedar Shingle Panel is manufactured using only the finest Western Red Cedar vertical-grain heartwood, the new Shakertown Craftsman Panel features a full plywood back, a thick 3/8" shingle

butt and overlocking end-joints for a seamless appearance. Shakertown Craftsman Panels go up 6 times faster than individual shingles and can be installed with a pneumatic nailer. The blind/concealed nailing creates a true, traditional shingle appearance. The panels are 8' long and available in an exposure size of 7", 4-1/2" and 14" (14" exposure product is face nailed). Shakertown Craftsman Panels are constructed with a classic keyway joint or tight contemporary joint between shingles. The panels are available with an even-butt or staggered-butt line to match any home style.

FANCY CUTS SHINGLE

Set your imagination loose with Fancy Cuts. For the perfect accent to a bay window, front entry or gable end. Different shapes can be combined for endless possibilities, giving you the chance to develop your own signature look. Each Fancy Cuts shingle is 100% clear, 100% edge grain Western Red Cedar. Natural variations in color and grain give each shingle its own unique look. All Fancy Cuts are precision cut and sanded. Buy individual Fancy Cuts shingles to mix-and-match patterns or create an original design. Fancy Cuts are packaged 96 pieces to the carton. One carton covers 25 sq. ft. when shingles are installed at the 7-1/2" exposure recommended for exteriors. For interior accents, a carton of Fancy Cuts covers 33 square feet when applied with a 10" exposure. Eight patterns are also available on a custom order basis in convenient 8-foot panels with 5" exposure. It's never been easier or more convenient to have the hand-crafted appearance of Fancy Cuts.

CEDAR SIDING SHINGLES STRIPS AND PANELS

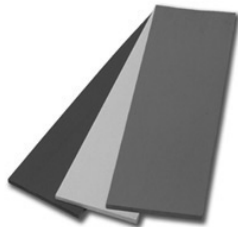

EASTERN WHITE CEDAR SIDING SHINGLES

When it comes to siding a house, nothing compares to eastern white cedar. It is warm, beautiful, and has proven reliable for over a century. White cedar shingles have great insulating features against cold and noise. It is also very durable and very little maintenance. It contains natural preservatives which protect it from rot and insects. Unlike other species that contain tannins, eastern white cedar can be stained just about every colour imaginable, from palest to darkest. We are the most important manufacturer of white cedar shingles in North America. At maibec, we have spent the last four decades improving the way white cedar shingles are made. Today, they are engineered to be so durable, you just might consider them high tech. Maibec offers you a 50-year warranty against wood decay, a 15-year warranty on two coats of solid stain (extendable up to 30 years) and a 5-year warranty on labor. No warranty is offered on semi-transparent stain, clear solution or bleaching oil.

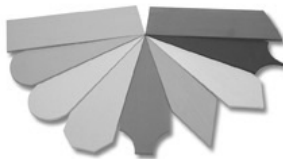

INDIVIDUAL SHINGLES – THE CLASSIC

The shingles are resquared and rebuffed for a beautiful natural finish that doesn't require additional on-site trimming.

VICTORIAN SHINGLES – THE TIMELESS STYLE

Whether you want a decorative look, or need to break up large sided areas, maibec offers you top quality shingles in an array of classic Victorian choices.

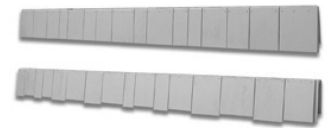

CEDAR STRIP

Pre-assembled Strip – Reduces Installation Time by up to 80%. maibec's cedar strips are engineered to be a more efficient way of installing shingles, without compromising the look or traditional integrity of the home. The systematic design guarantees alignment of keyway spacing over three successive courses, so shingles go up fast and look great. The strip is a solution to consider for big projects.

CEDAR PANEL

Pre-assembled Panel - Reduces Installation Time by up to 60%. Perfect for big projects, maibec's cedar panels are fabricated with shingles fastened to a plywood backer consisting of a layer of perforated asphalt felt and a moisture-eliminating rainscreen. Each panel is stapled front and back, then glued for maximum stability and durability. Available in-line and staggered

PRE-ASSEMBLED CORNER

Corners are the ideal finish with cedar panels

NANTUCKET™ FAMILY OF PRODUCTS

When nothing but the most beautiful will do, choose maibec's Nantucket family of shingles — a premium shingle with no defects. Every shingle has a velvet finish, perfect for our William E. Poole Series of traditional colors, or choose any color you can imagine with our exclusive TrueMatch® process. Available in individual shingles, Victorian Style and pre-assembled Cedar Strips, our Nantucket shingles are truly the best money can buy.

KENNEBUNK™ FAMILY OF PRODUCTS

Maibec's Kennebunk family of shingles are designed to combine great appearance and affordability in a select grade of shingle. There are no visible defects on the exposed face, though you may find some knots or natural characteristics on the shingle. Kennebunk shingles can be TrueMatch® stained any color for a completely customized and individual look, and are available in individual shingles or pre-assembled Cedar Strips.

BAR HARBOR™ FAMILY OF PRODUCTS

For time-honored, rustic beauty, maibec® offers its Bar Harbor shingles. These are shingles with plenty of character. Any visible sound knots or slight color variations will simply become part of the overall charm and beauty of the home. As with all maibec® white cedar, Bar Harbor shingles can be factory coated with TrueMatch® 100 or TrueMatch® 200 to create any look you choose.

SHUTTERS AND ACCESSORIES-ATLANTIC PREMIUM SHUTTERS

ARCHITECTURAL COLLECTION

The Architectural Collection is based on over fifteen years of composite shutter experience. Our goal is to provide the most beautiful and best performing shutters. Our guarantee to you is that all Architectural Collection Shutters will withstand the effects of time.

Warranty: Limited lifetime on structure and finish.

CLASSIC COLLECTION

The Classic Collection was developed and designed over five years ago around a modern, solid core composite material. These traditionally styled shutters use the latest technology, are maintenance free and can be installed as either operable or fixed shutters. They are offered in the most common styles with selected options and provide an added level of distinction to any home.

Warranty: Ten-year structural component warranty against, cracking, splitting, rotting and excessive warping. Ten-year factory paint finish warranty against peeling or flaking.

HARDWARE

Shutters are mounted with historically correct operable hardware. Unlike "fixed mounted" shutters, this hardware sets the shutter off from the house and allows the shutter to be closed within the window frame. This adds dimension and an elegant accent to your home. This hardware is forged from 300 series stainless steel and has a matte black powder coated finish. Bahama style shutters are mounted with aluminum hardware.

MOUNT BLOCKS

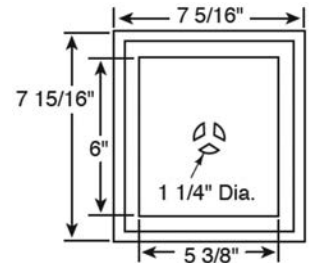

ORIGINAL MOUNTMASTER®

Locking positions: .75, 1.00, 1.25
 Provides level and waterproof surface for all exterior accessories.

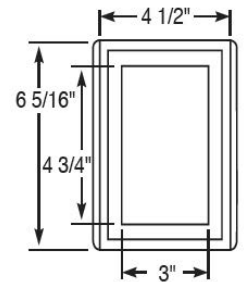

SLIM LINE

Locking positions: .50, .75
 Provides level and waterproof surface for all exterior accessories.

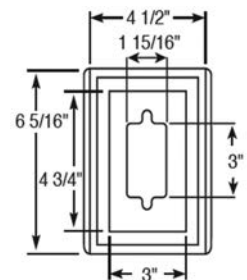

MINI

Locking positions: .50, .85
 Provides level and waterproof surface for all exterior accessories.

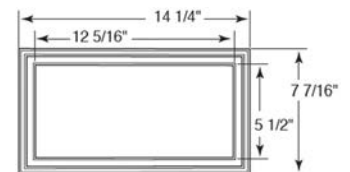

MINI-MOUNT PRE-CUT

Locking positions: .50, .85
 Provides level and waterproof surface for all exterior accessories.

RECESSED JUMBO

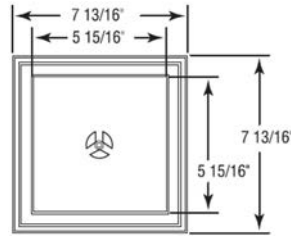

Locking positions: .625, .875
 Provides level and waterproof surface for all exterior accessories.

MOUNT BLOCKS- CONT.

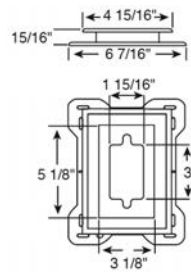

RECESSED SQUARE

Locking positions: .625, .875
Provides level and waterproof surface for all exterior accessories.

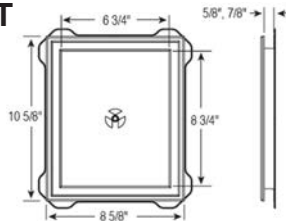

RECESSED MINI

Locking positions: .75, 1.00, 1.25
Provides level and waterproof surface for all exterior accessories.

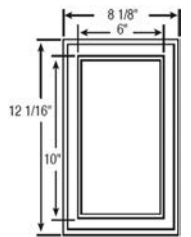

LARGE RECESSED MOUNT

Locking positions: .625, .875
Provides level and waterproof surface for all exterior accessories.

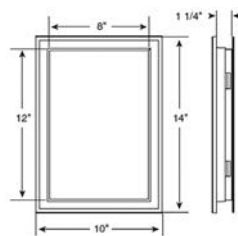

JUMBO MOUNT

Locking positions: .75, 1.00, 1.25
Provides level and waterproof surface for all exterior accessories.

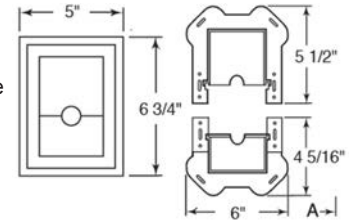

SUPER JUMBO MOUNT

Locking positions: .75, 1.00, 1.25
For larger coach lamps and smaller electrical and water meters. Provides level and waterproof surface for all exterior accessories.

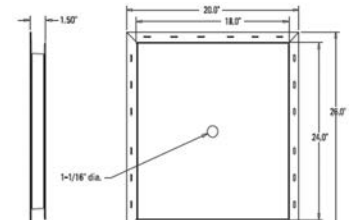

SPLIT BLOCK MINI

Locking positions: .75, 1.00, 1.25
Provides level and waterproof surface for all exterior accessories.

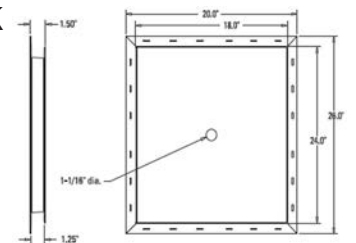

METER BLOCK

For meters and extra large fixtures.
Provides level and waterproof surface for all exterior accessories, built in J-Channel

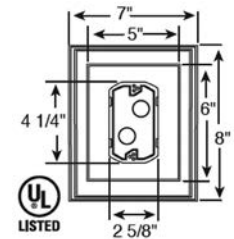

JUMBO METER BLOCK

For larger sized meters, mounts flush, built-in J-Channel. Easy to install. Screw or nail onto any surface.

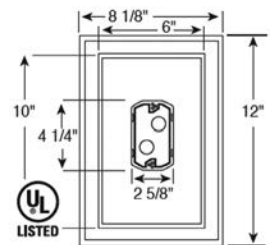

ELECTRICAL BLOCK

Locking positions: .75, 1.00, 1.25
Electrical mounting block with UL listed 18 cu. in. outlet box. Provides level and waterproof surface for all exterior accessories.

JUMBO ELECTRICAL BLOCK - CENTERED

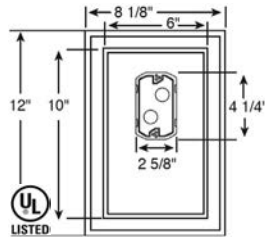

Locking positions: .75, 1.00, 1.25
Electrical mounting block with UL listed 18 cu. in. outlet box. Provides level and waterproof surface for all exterior accessories.

MOUNT BLOCKS- CONT.

JUMBO ELECTRICAL BLOCK – OFFSET

Locking positions: .75, 1.00, 1.25
Electrical mounting block with UL listed 18 cu. in. outlet box. Provides level and waterproof surface for all exterior accessories.

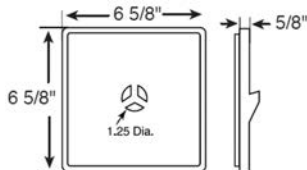

SUPER JUMBO ELECTRICAL BLOCK

Locking positions: .75, 1.00, 1.25
For larger coach lamps and smaller electrical and water meters. Provides level and waterproof surface for all exterior accessories.

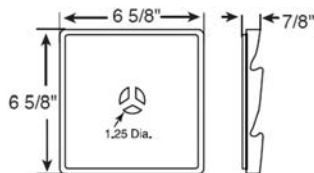

SURFACEMASTER® SURFACE BLOCK DUTCH LAP

For installing fixtures, after the siding is up. Provides level and waterproof surface for all exterior accessories.

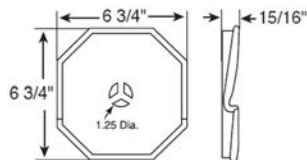

SURFACEMASTER® SURFACE BLOCK TRIPLE 3"

For installing fixtures, after the siding is up. Provides level and waterproof surface for all exterior accessories.

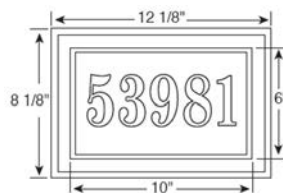

SURFACEMASTER® SURFACE BLOCK 4"-10"

For installing fixtures, after the siding is up. Provides level and waterproof surface for all exterior accessories.

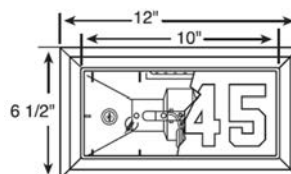

HOUSE ADDRESS KIT

Locking positions: .75, 1.00, 1.25
Includes 3 sets of 3" numbers 0-9 and letters A,B,C,D; black or white depending on block color. Accommodates 5 numbers/letters. Provides level and waterproof surface for all exterior accessories.

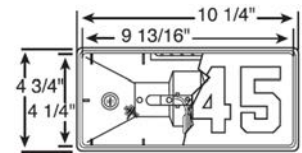

GLO-MASTER® SIDING INTEGRATED

Locking positions: .75, 1.00, 1.25
Includes 3 sets of 3" numbers 0-9; black or white; accommodates 5 numbers. Low voltage fixture for house addresses and more.

GLO-MASTER® FLUSH MOUNT

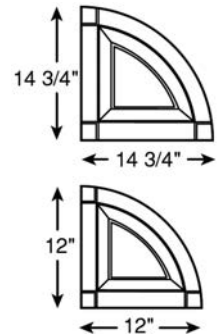

Locking positions: .75, 1.00, 1.25
Includes 3 sets of 3" numbers 0-9; black or white; accommodates 5 numbers. Low voltage fixture for house addresses and more.

CUSTOM PVC TRIM & MILLWORK – INTEX

INTEX Millwork Solutions specializes in the design and fabrication of custom PVC trim and millwork. Architects and builders rely on INTEX's strengths in both traditional workmanship and engineering technology to craft intricately detailed, high-quality millwork for distinctive homes and buildings.

The company has also innovated a line of fabricated, ready-to-install PVC window and door surrounds, and offers standard PVC millwork lengths and decorative accessories.

Finely crafted decorative trim, moldings and millwork add a distinctive finishing touch to the finest homes. But, with wood, that finishing touch will eventually need to be maintained. INTEX PVC boards look, feel and install like wood. But PVC offers durability that far surpasses wood or other materials.

Custom Millwork

From Imagination to Creation... INTEX enables limitless interior and exterior millwork design options. From intricate details to innovative finishing touches, INTEX PVC millwork is created using advanced CAD design technologies, state-of-the-art fabrication equipment and hand-crafted techniques once reserved only for wood.

Our millwork is produced to precise design specifications, fabricated to order, packaged securely so that product arrives damage free – ready for installation.

Window & Door Surrounds

INTEX window and door surrounds are available in standard sizes to match windows from today's most popular manufacturers, including Andersen and others. Our surrounds can be ordered fully assembled or as a kit for assembly on-site.

Just let us know if you want your surrounds with or without a head and sill, and if you prefer 3/4 or 1 inch thickness, with or without siding J channel.

Post Wraps

With INTEX post wraps, it's easy to turn ordinary posts into beautiful design elements. Hide a wood post or metal column. Create a perfect match to original square craftsman-type porch columns.

Post wraps are available in standard 6, 8, 10 and 12-inch widths and 4, 8, 10 and 12-foot heights, complete with mounting brackets, caps, base trim, PVC adhesive and everything needed to finish install.

Make 4 x 4 posts look like 10 x 10 posts or use INTEX post wraps to accent your project and match other trim work.

Applied around existing structural members or used in a stand-alone, non-structural application, INTEX post wraps are easy to install.

Need a custom design? We'll create it. installation. From Imagination to Creation...

Linear Trim

INTEX linear trim captures the traditional beauty of classic exterior millwork – without the eventual deterioration of wood. For intricate Victorian styles or more subtle designs, INTEX 100 percent PVC lengths are the perfect addition to your project.

Standard products include crown moldings with dentil, water table and beaded trim board. Custom requests are easily accommodated.

From intricate details to innovative finishing touches, INTEX PVC millwork is created using advanced CAD design technologies, state-of-the-art fabrication equipment and hand-crafted techniques once reserved only for wood.

Brackets, Panels & More

Traditionally renovating a historic home used to be challenging due to custom woodworking which would rot with time. Now INTEX has a solution with custom PVC millwork. Brackets, panels, trellis, porch heads or anything that can be imagined can be created to exact specifications.

HAND RAIL

CertainTeed 

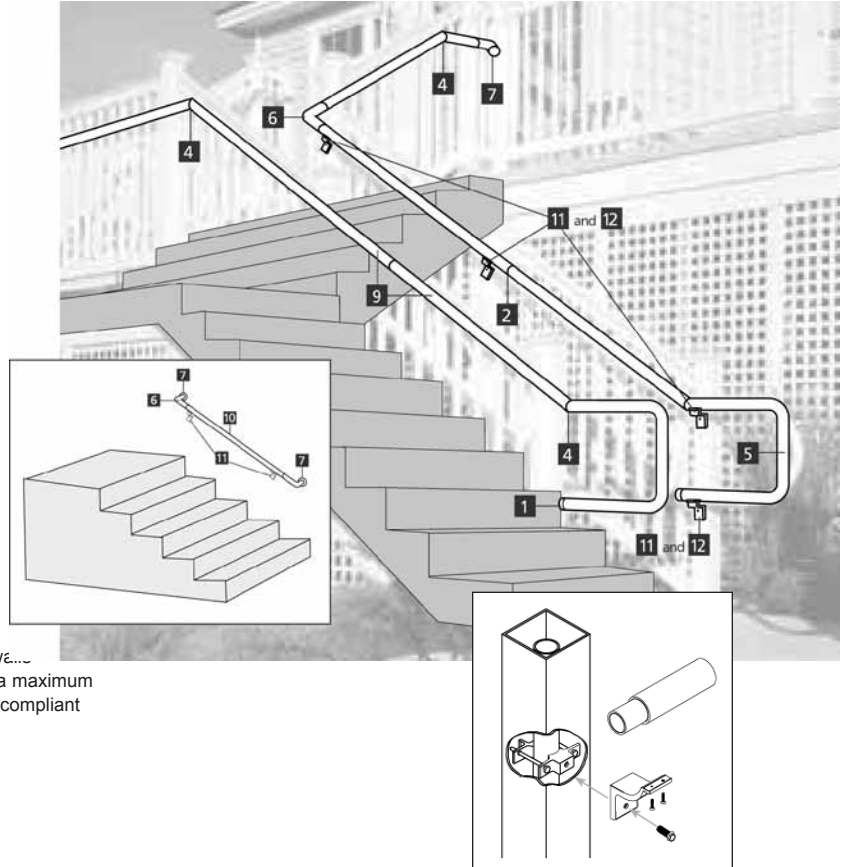

EverNew®

VINYL HANDRAIL COMPONENT SYSTEM

- Complies with ADA (Americans with Disabilities Act) requirements for grippable hand rails
- 1-1/2" diameter gripping area
- Continuous hand rail runs
- Safe for stair and ramp applications
- Aluminum reinforced construction reduces bowing and provides enduring strength
- Functional finishing touches: post and wall returns, end caps, return loops and a convenient straight joiner
- Unique adjustable internal joiner accommodates any transition – 0° to 90° bends
- Installs easily on site with no preformed fittings
- Ideal for use with EverNew railing systems
- Virtually maintenance free
- Lifetime limited warranty
- EZ Set bracket kit available for attachment to routed system

Components

- 1-1/2" diameter vinyl end cap
- Straight aluminum joiner
- Straight wall return (includes vinyl trim)
- Adjustable aluminum internal joiner
- 1-1/2" OD ADA 180° return loop
- 1-1/2" OD - 90° corner - includes two 3" aluminum joiners
- 1-1/2" OD - 90° wall return - includes 3" aluminum joiner
- 1-1/2" OD x 80" vinyl hand rail with aluminum insert
- 1-1/2" OD x 104" vinyl hand rail with aluminum insert
- 1-1/2" OD x 120" vinyl hand rail with aluminum insert
- Hand rail bracket assembly
- Hand rail EZ Post attach kit

Note: Hand rail depicted is not free standing and must be anchored to wall or guardrail using hand rail bracket assembly (E74028/E74029). Space a maximum of 6' on center and as close as possible to both sides of any joint. (ADA compliant at 6 foot spans)

11 and 12

CertainTeed 

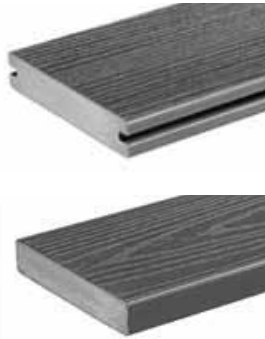

COMPOSITE DECKING

COMPOSITE PLANK – TIMBERTECH

TIMBERTECH XLM DECKING

Engineered to provide unparalleled scratch and stain resistance for the ultimate in low-maintenance, carefree living

- No special tools required for cutting, no sledgehammer or pre-drilling required
- Maximum mildew resistance
- Available in 12', 16' and 20' lengths
- Two surface choices: Vertigrain™ or Flat Grain
- Grooved and solid planks available in SandRidge, RiverRock and Mountain Cedar

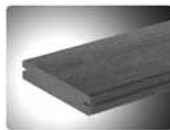

EARTHWOOD EVOLUTIONS™

It's all about innovation. Earthwood Evolutions takes scratch, stain and fade resistance to an entirely new level with warm, natural hardwood style and authentic, variegated color and graining. Capped with a fully protected poly shell that features TimberTech's exclusive HydrLock™ technology, the plank is practically impervious to the elements and everyday accidents endured by most decks. Earthwood Evolutions' 25-year Fade and Stain Warranty gives total peace of mind.

- Colors: Pacific Rosewood, Pacific Teak, Pacific Walnut
- Hardwood aesthetics with evolutionary performance
- Fully protective poly cap engineered to resist fading, scratches and stains
- Proprietary composite core
- Variegated color and Vertigrain™ surface that won't trap dirt or dust
- No visible screws when installed with CONCEALoc® hidden fasteners
- Color-matched screws when installed with TOPLoc™
- Spans a maximum of 16" on-center
- Available in Grooved 12', 16' and 20' lengths
- Available in Solid 16' and 20' lengths
- 25-year Fade and Stain Warranty

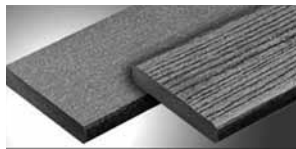

Solid Plank

Grooved Plank

TWINFINISH® CLASSIC AND NEW SQUARE EDGE

- Two surface textures – brushed and wood-grain
- Installs like traditional wood planks
- Highest quality material in the industry
- Will not sag like other alternative decking
- Spans 16" on center
- Available in 12', 16' and 20' lengths
- Available in Cedar, Grey and Redwood
- All colors available in grooved and solid plank

RAILING & ACCESSORIES – TIMBERTECH

BUILDERRAIL™ SYSTEM

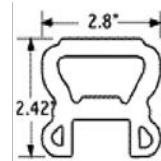

TimberTech's BuilderRail combines the rich look of black balusters with composite rails. The maintenance-free black metal balusters are galvanized and powder coated.

- Available in Cedar, Grey and Redwood
- BuilderRail steel balusters are stronger than aluminum balusters
- Easy installation – requires only a saw, drill and bit
- Sold in kits for added value and ease of ordering (Standard kits: 6' and 8' length in 36" rail height. Stair kits: 8' length in 36" rail height).
- Composite railing covered by a 25-year limited residential warranty; metal balusters covered by a 10-year limited residential warranty. Available in Cedar, Grey, Redwood

ORNAMENTAL RAILING WITH SQUARE BALUSTERS

- Available in Cedar, Grey and Redwood
- Ornamental Railing Kit - 6' and 8'
- Ornamental Spindle Kit - 6' and 8'
- Solid Square Baluster Kit - 6' and 8'
- Installation Guide Included
- Fasteners and Pre-drilled Rails Included

ORNAMENTAL RAILING ACCESSORIES & TRIM

- Post Cover - 4' and 12'
- Post Caps - Flat Top, Stainless Steel Pyramid Top and Copper Pyramid Top
- 12' Solid Baluster
- Post Skirt

CONCEALOC HIDDEN FASTENERS

- Built-in spacing tab provides uniform 1/8" gapping
- Quick and easy installation from the top of the deck
- Long lasting stainless steel construction — 25-year warranty
- Coated brown to reduce visibility

RADIANCE RAIL™ SYSTEM

- Kits available in 6' and 8' sections in 36" rail height
- Sturdy, structural design does not rattle or squeak
- No exposed hardware provides a smooth finish
- Simple installation
- Post cap and post skirts highlight the lines of the post
- White, black and XLM colors

Colonial Spindle

Square Baluster

RAILING & ACCESSORIES – TIMBERTECH

RADIANCE RAIL® EXPRESS

It's all about speed. Proven quality. Affordable price. RadianceRail Express provides a high-quality capped wood composite railing system made from the same material as RadianceRail – and is available at a best-in-class value. RadianceRail Express combines proven durability with quick, intuitive installation.

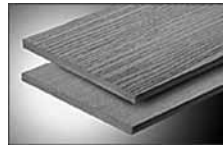

- Colors: Coastal White
- Available in 36" and 42" heights
- Rail packs come in 6' or 8' sections that are pre-routed and include top rail, bottom rail and mounting hardware – Baluster packs come in 36" or 42" square profiles
- Routed baluster receiver for ease of installation – passing all code requirements
- Post covers are 4" x 4" and available in 39" and 8' sections
- Exposed color-matched mounting hardware and clean and simple post, cover, caps and skirts
- System can be installed at 45 degrees without unsightly overhangs on the post cover
- 25-year limited warranty for residential applications
- RadianceRail Express is compatible with DeckLites, TimberTech's deck lighting system
- For hidden fastening, the post sleeve, cover and skirt can be used with the RadianceRail system
- Solid profile

ACCESSORIES AND TRIM – TIMBERTECH

TWIN FASCIA BOARD

- Cedar, Grey and Redwood have a brushed finish on one side and TimberTech's VertiGrain finish on the other
- Whitesand color has one smooth side and one ribbed surface
- Available in 10" and 12" wide 12' lengths
- Available in TimberTech Cedar, Grey, Redwood and Whitesand

TWINRISER™

- Designed to trim your TimberTech deck and give it that finishing touch
- Cedar, Grey and Redwood have a VertiGrain surface on one side and a Brushed surface on the other
- Tropical Rosewood, Tropical Teak and Tropical Walnut have VertiGrain surface on one side, serrated surface on the other
- Can also be used as a fascia board for a 2" x 8" rim joist
- Actual dimensions 9/16" x 7-1/4"

PVC DECKING

AZEK DECKING – PROCELL TECHNOLOGY

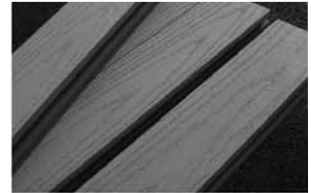

AZEK DECK SYSTEMS*

- Solid core PVC technology provides superior stain resistance
 - Colorfast solutions from Americhem® for longer lasting, vibrant colors
 - Advanced UV inhibitors to prevent thermal breakdown and provide cooler surface temperatures
 - Embossed wood grain texture gives the classic look of stained wood
 - Insect and termite resistant
 - Environmentally friendly, contains no harmful chemicals
 - Stocked in Clay, Slate Grey, and Brownstone.
 - Boards available in 12', 16', 20'
- *Call for availability and current pricing

AZEK PORCH*

There's no doubt, any home's entryway takes a beating from foot traffic and weather. Now there's a durable, easy to clean solution, AZEK Porch, with the same quality and performance of AZEK Deck, both made with Procell™ technology.

AZEK Porch planks provide a low-maintenance surface that resists stains, moisture, mold/mildew, scuffs, scratching, fading ...and unlike materials containing polyethylene and wood fiber, AZEK Porch can be used in covered or uncovered areas.

Available in Brownstone and Slate Gray, our tongue and groove 1 x 4 planks install easily with traditional wood working tools.

*Call for availability and current pricing

RAILING & ACCESSORIES – AZEK

AZEK RAIL

AZEK® Rail offers the beauty and feel of real wood coupled with the high durability and low maintenance you expect from AZEK products. With three versatile styles and popular color selections, it is now easier than ever to find the perfect railing system to complement your deck or porch project.

AZEK Premier Rail is a classic Victorian style railing available in four popular colors and two new colors for 2010.

Colors include:

- White
- Brownstone (complements AZEK Deck)
- Clay (complements AZEK Deck)
- Slate Gray (complements AZEK Deck)
- Black - *NEW for 2010!*
- Kona - *NEW for 2010!*

AZEK Trademark Rail, a versatile Colonial style available in White, works well with any housing style.

AZEK Reserve Rail, available in White, is a generously sized railing offering a luxurious look and feel.

TREATED LUMBER

PROSELECT™ TREATED WOOD*

ProSelect treated wood with micronized copper offers more options for painting and staining in a product that is more sensitive to the environment. This advance in the product category is a reflection of both a growing consumer concern for the environment and a marked preference from do-it-yourselfers and contractors for more color options, greater visual appeal and impact.

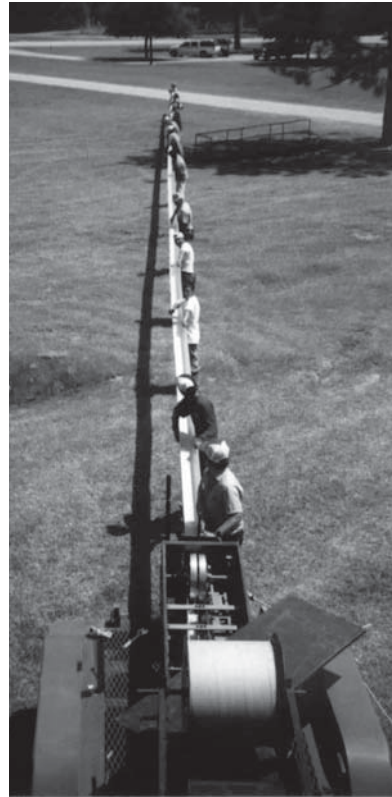

- **Less Corrosive:** ProSelect is approved for aluminum contact.
- **Better Ability to Hold Paint and Stain:** ProSelect's process promotes greater adherence from a wide range of stains and paints to be used, creating more design options for both building and landscaping projects.
- **Lighter "Natural" Color:** Unlike the unsightly greenish-brown color of most treated lumber, ProSelect micronized treated wood has a lighter, natural hue.
- **Environmentally Friendlier:** Our process contains 30% less copper than many commonly used treatments for pressure treated wood.

WINDOWS AND DOORS

WINDOWS & DOORS

WINDOWS - MARVIN MTO

THE MARVIN FAMILY OF WINDOWS

MARVIN

Marvin Windows and Doors is a premier manufacturer of made-to-order wood windows. Marvin's low-maintenance, clad-wood products feature an extruded aluminum exterior and commercial-grade paint that resists fading and chalking.

The company's Made for you® philosophy enables Marvin to offer the industry's most extensive selection of shapes, styles, sizes and options, including custom divided lites, clad casings, specialty woods and designer door hardware.

ULTIMATE DOUBLE HUNG WINDOWS

- 4 9/16" (116 mm) jambs
- All-wood Brick Mould Casing (wood units)
- 8° sill bevel
- Bare wood interior
- Satin Taupe sash lock
- Low E II with argon insulating glass
- Design pressure rating of 50
- Extruded aluminum clad exterior (clad only)
- Full screen
- Vinyl nailing fin (clad units)
- One-handed tilt-in operation for easy cleaning
- **New in 2012** – taller sizes and better performance

ULTIMATE CASEMENT

- New construction or remodeling.
- Revolutionary wash mode allows access to both sides of the glass from indoors.
- One-lite Low E II with argon insulating glass
- Satin Taupe folding handle
- Satin Taupe sash lock
- Bare wood interior
- Extruded aluminum clad exterior (clad units)
- 4 9/16" jambs
- Many mull configurations are AAMA450 certified.
- This product is CE certified

BOW WINDOW

Any number of Ultimate Double Hung or Ultimate Casement windows are joined together to create a gently curved Bow window.

- A Bow window is a lovely way to open any room and capture a view.
- Curved, laminated seat and head boards are available for a perfect finish

ULTIMATE CASEMENT IN-SASH POLYGON

Standard Features

- One-lite Low E II with argon insulating glass
- All wood Brick Mould Casing (wood units)
- 4 9/16" (116 mm) jambs
- Vinyl nailing fin (clad units)
- Bare wood interior

DOORS - MARVIN MTO

SLIDING PATIO DOOR

A Sliding Patio Door is an ideal solution for adding light to a room while making the most of a limited space.

- The door features 3" (76mm) stiles and rails and an elegant harp-shaped handle.
- The large glass surface maximizes the view contemporary look.
- The two-point locking system offers more security than locks from other door manufacturers.
- Two sliding screen options available.
- New four-panel OXXO configuration

ULTIMATE SLIDING FRENCH DOOR

The Ultimate Sliding French Door delivers the elegance of a French door in a space-saving sliding version.

- It features extra-wide stiles and tall bottom rails for a traditional look.
- Options include a multi-point or three-point locking system and two screen door choices.

WINDOWS

WINDOWS - MARVIN INTEGRITY

INTEGRITY FROM MARVIN

Integrity Windows and Doors is the world's largest manufacturer of windows and doors made with Ultrex® – a highly-durable, virtually maintenance free state-of-the-art pultruded fiberglass material that outperforms vinyl and roll-form aluminum.

New for 2012 – adding to the versatility of the Ultrex series, you can now custom order Wood Ultrex windows in 1/64" increments.

AWNING AND CASEMENT

- Integral corner key keeps window units square through delivery, installation and years in a home. Plus, we inject adhesive sealant to create corner joints that stay sealed and square.
- Interior wood is pre-treated and ready for stain or paint.
- Reliable hardware prevents swinging or sagging and allows easy ventilation and cleaning.

BAY AND BOW

- Int 30° or 45° bays are a dramatic addition to any project, adding dimension and light to a room.
- Choose from convenient factory mulling or order one of our mulling kits.
- The curve of a bow gently extends the sensation of living space without adding square footage. For maximum air circulation, choose four or five operating casements.
- Wood head and seat boards are crafted and factory applied to insure a perfect fit.
- Available in bare wood or white interior finish.

DOUBLE HUNG

- Both sash tilt and remove for easy cleaning. Just open the sash slightly, pull the latches in, and tilt the sash into the room. To remove, a small twist pops the sash out of the framework and it's just as easy to reinstall.
- Sash of different sizes in one unit, commonly called cottage style, are available, with all the tilting and performance features of a regular Integrity Double Hung.
- You can match our double hungs with picture windows, other double hungs, transoms, polygons or round tops to create almost any assembly you want. Both factory mulling and field mulling kits are offered. And as with all operating Integrity windows and door

GLIDER

- Almond Frost or White sash lock hardware seals weatherstripping against the frame as well as offering security.
- Fixed sash is tightly sealed to prevent air or water infiltration.
- Our remarkable tilt latch makes removal and reinstallation of the operating sash easy.
- Triple-sash units replicate the broad view of a picture window assembly, with two operating sash that are easy to remove and clean.

POLYGON

- Maximum rough opening of 49 square feet with a maximum side of 9 feet.
- Even though we're offering unique sizing on our polygons, they exceed performance requirements and qualify for the ENERGY STAR rating.
- Standard jambs are 4-9/16"

ROUND TOP

- An integral Ultrex nailing fin actually extends from the cladding, making these round tops exceedingly stable and extremely weather tight.
- Fins available in full-perimeter, radius only, or can be excluded altogether.
- Installation brackets must be specified when installing a round top in a masonry opening.
- Molded exterior is shaped to complement the entire Integrity line.
- Multiple assemblies are a simple way to add presence and value to a home. And our round tops are the logical choice to take a room to a new level.

NEW CONSTRUCTION WINDOWS – PARADIGM

All Paradigm products are now available in 24 standard colors or your own custom color.

CRAFTEC

- Tilt-in sash for easy cleaning
- Stainless steel balance system for fingertip operation
- Triple weather stripping for maximum insulation value
- Builder-friendly – Builders rave about how our windows handle on the job site and are secure knowing our lifetime warranty is the best in the industry.
- Energy Star Approved – All Paradigm windows exceed Energy Star specifications, ensuring you maximum energy efficiency

VERSATEC

- Full interlock at meeting rail reduces air infiltration
- Standard full screen allows for maximum ventilation
- Star Brite glazing system exceeds Energy Star specifications
- Fusion-Welded Technology: Our fully welded frame and sash result in a durable and sleek finished product.
- Glazing System: Our Star Brite glazing system combines Cardinal Low E2-172® glass with a 3/4" multi-layer warm edge Truseal DuraSeal™ spacer system that will help reduce heating and cooling costs.

UNITEC

- Fusion-welded frame and sash provide maximum structural ratings
- Bottom sash tilts in for easy cleaning
- Economical alternative with superior performance
- Grid System – A wide choice of grid options are available to complement your home design
- Utility- Unitec gives you the ability to meet the diverse needs of a variety of projects.
- Sight Lines – Our slim line design will allow you to maximize the sunlight coming into your home.

REPLACEMENT WINDOWS- PARADIGM

TAPESTRY

- Standard StarBrite glazing exceeds Energy Star specifications
- Both sashes tilt in for easy cleaning
- Easy to operate locking screen or optional full screen for maximum ventilation
- Easy Opening – All sashes tilt in for easy cleaning and operate effortlessly with our stainless steel balance systems.
- Custom Sizes – All windows manufactured on the 1/16" width and height to fit virtually any opening.

SOCIETY

- Stainless steel balance system for fingertip operation
- Multi-chamber sash and frame provide maximum structural integrity
- Advanced engineered design helps reduce outside noise
- Air Infiltration – Triple weatherstrip design and interlock at the meeting rail will provide the lowest air infiltration possible.
- Sill Design – Our uniquely designed sill provides optimum drainage and positive seal.
- Glazing System- Includes standard 3/4" clear insulated glass.

TRADITIONS

- Bottom sash tilts in for easy cleaning
- Low profile sash locks provide clean, sleek look
- Units can be mulled together for maximum design options
- Strength – Fixed top sash provides long-term durability and strength.
- Versatility – All windows can be mulled to maximize your wall space.

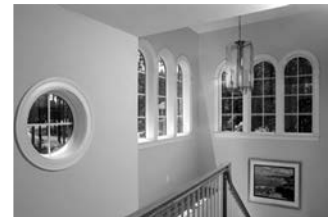

NEW CONSTRUCTION & REPLACEMENT WINDOWS – PARADIGM

- Precision rollers for smooth operation
- Full interlock at meeting rail
- Full screen standard
- Sliding Window – Our unique Gliding Roller System makes this sliding window easy to operate with the touch of a finger.
- Picture Window – Each of our picture windows can incorporate our single divided lite grid design for a traditional look.

PATIO DOOR

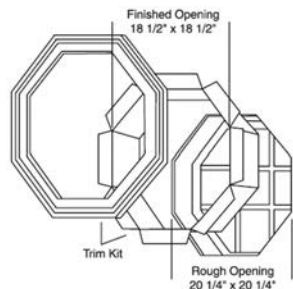

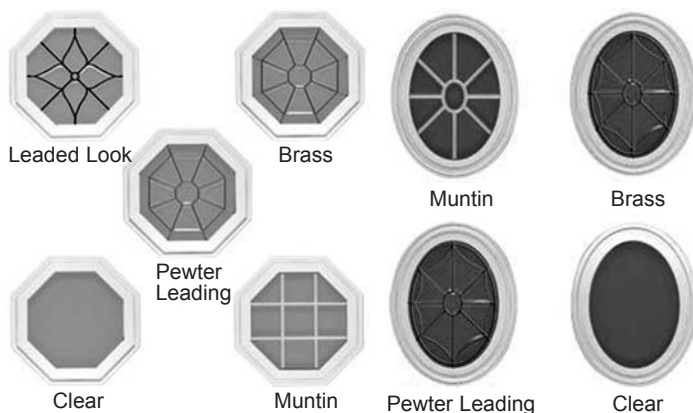

- 0.090 vinyl wall thickness fully welded panels and frames
- 1" thick, Low E2 Argon filled insulated glass
- Dual tandem heavy duty panel rollers
- Sliding screens with adjustable rollers top and bottom

OVAL AND OCTAGON DECORATIVE WINDOWS

OVAL & OCTAGON DECORATIVE WINDOWS

Window installs easily with Lock-On Trim Ring. Trim Ring simplifies siding trim- out around window. Optional Interior Trim Kit available. Assembles in minutes with no complex curves or miters to cut; accommodates wall thickness up to 6-3/4" with no exposed nails. Glazing Specifications: 5/8" insulating glass unit consisting of two lites of .125" double strength tempered glass on the interior and exterior. The cavity is air filled with 3/8" swiggle strip spacer and wet or butyl glazed. 10 year limited warranty on glass seal.

NEW CONSTRUCTION & REPLACEMENT WINDOWS – WEATHERSHIELD

WEATHER SHIELD

Our signature Weather Shield line boasts the industry's most comprehensive collection of all-wood or aluminum-clad wood windows. An unwavering attention to detail results in extruded aluminum cladding that's tougher than thinner roll form exteriors. An integrated nailing fin makes installation easy. And a vast array of shapes, sizes, options and upgrades offers the design flexibility to make nearly anything you'll imagine possible for your home.

- Frame and sash are fully fusion welded for structural strength and
- Clad or wood exterior
- Many standard sizes
- 55 colors
- Custom capability
- 3 grid styles – removable, SDL, GBG (flat & contour)
- Many glass options
- 8 wood interior species
- Primed interior
- Many casing options

CUSTOM SHIELD

Custom Shield wood windows put beauty, energy-efficiency and flexibility into any remodeling project. Windows feature a frame-within-a-frame design that fits most existing window openings and won't disturb the existing trim. Available in a broad range of sizes, styles and options.

- Frame and sash are fully fusion welded for structural strength and
- Replacement windows – true 3-1/4" jamb
- Same interior & exterior options as Weather Shield
- Available in 12 window/door styles
- 8 wood interior species
- Zo-E Glass is standard
- 3 grid styles – removable, SDL, GBG (contoured only)
- Can be ordered in 1/8" increments

PROSHIELD

Enjoy the convenience of low-maintenance vinyl and the uncompromising beauty of natural wood you'll find in our ProShield line of vinyl-clad wood windows. We extrude our own vinyl to produce colors that are formulated for consistency, and we proudly mill the wood ourselves to help ensure only the best quality. With an abundance of sizes, shapes, styles and options, ProShield windows offer the design flexibility you'll want for your home.

- High quality but price point between wood and vinyl
- Windows and doors come in nominal sizes like vinyl
- Many standard sizes & custom sizes available
- Exterior is vinyl clad and interiors are wood
- 3 grid styles - removable, SDL, GBG
- Interior – Pine, Ash, Maple, and pre finished white
- Exterior – White, Tan, and Cameo
- Glass – standard is Insulated

NEW CONSTRUCTION WINDOWS – VIWINCO

Our newest product line results from decades of window manufacturing knowledge plus a deep understanding of today's construction methods and homeowner expectations. There's simply no substitute for experience, and after making literally millions of windows, we know these windows will surpass your expectations. When you choose Viwinco New Construction windows and doors for your project, you can rest assured you're installing windows of unparalleled durability, beauty, and value.

VIWINCO S-SERIES SINGLE-HUNG & DOUBLE-HUNG

- 15/16" insulating glass units with Solarban® 60 Low-E, double-strength glass, a low-conductance spacer, and argon gasfill are standard and contribute to excellent thermal performance
- 3/4" stainless steel, constant force balance system offers smooth sash travel and holds sashes in place when open.
- 1-3/8" high weather-stripped sill dam fights drafts and water infiltration.
- 1-1/4" integral, pre-punched nailing fin contributes to a trouble-free installation. • Can be custom sized for replacement applications.
- Single-hung and Double-hung styles both have a 2-sash design for a uniform aesthetic.

BUILDERS CHOICE: SINGLE-HUNG & DOUBLE-HUNG

- 3/4" insulating glass units with Solarban® 60 Low-E, single-strength glass, a low-conductance spacer, and argon gas fill are standard and contribute to excellent thermal performance.
- 1/2" stainless steel, constant force balance system offers smooth sash travel and holds sashes in place when open.
- 1" high weather-stripped sill dam fights drafts and water infiltration.
- Extruded full screens are standard on double-hung and 1/2 screen on single-hung
- 1-1/4" integral, pre-punched nailing fin contributes to a trouble-free installation.
- Standard sizes only.

OCEANVIEW® NEW CONSTRUCTION

OceanView® windows are certified impact-resistant preventing wind and debris from entering the house, lifting up the roof and pushing walls outward. Available in Single-Hung and Double-Hung, Casement and Awning, Slider, Geometric, Patio Doors, and Picture Window.

- OceanView® comes standard with 15/16" double-strength laminated glass, Solarban® 60 Low-E tempered double strength glass, low-conductance spacer, and argon gas filled.
- 3/4" stainless steel, constant force balance system offers smooth sash travel and holds sashes in place when open.
- 1-3/8" high weather-stripped sill dam fights drafts and water infiltration.
- 1-1/4" integral, pre-punched nailing fin for a trouble-free installation.
- Standard sizes only available for replacement OceanView® window.
- Tilt-n-Lock hardware comes standard.

REPLACEMENT WINDOWS – VIWINCO

EDGEMONT: DOUBLE-HUNG

- 3/4" insulating glass units with Solarban® 60 Low-E, single strength glass, a low-conductance spacer, and argon gas fill are standard and contribute to excellent thermal performance.
- 1/2" stainless steel, constant force balance system offers smooth sash travel and holds sashes in place when open.
- 1-1/8" high weather-stripped sill dam fights drafts and water infiltration.
- 3/8" leg flanges can be cut down to fit slightly irregular rough openings.
- Matching Slider and Picture windows available.

CAMBRIDGE™ SINGLE- & DOUBLE-HUNG

- 15/16" insulating glass units with Solarban 60® Low-E, double-strength glass, a low-conductance spacer and argon gas fill are standard and contribute to excellent thermal performance.
- Single-hung and Double-hung styles match – the fixed upper sash on the single-hung is the only difference between the two.
- 3/4" stainless steel, constant force balance system offers smooth sash travel and holds sashes in place when open. • Matching Slider and Picture windows available.
- Tilt-n-Lock hardware comes standard.
- Viwinco glass breakage warranty is included with no additional charge.

OCEANVIEW® REPLACEMENT

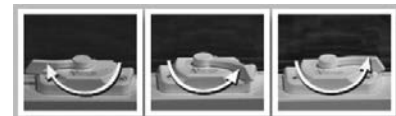

OceanView® windows are certified impact-resistant preventing wind and debris from entering the house, lifting up the roof and pushing walls outward. Available in Single-Hung and Double-Hung, Casement and Awning, Slider, Geometric, Patio Doors, and Picture Window.

- OceanView® comes standard with 15/16" double-strength laminated glass, Solarban® 60 Low-E tempered double strength glass, low-conductance spacer, and argon gas filled.
- 3/4" stainless steel, constant force balance system offers smooth sash travel and holds sashes in place when open.
- 1-3/8" high weather-stripped sill dam fights drafts and water infiltration.
- 1-1/4" integral, pre-punched nailing fin for a trouble-free installation.
- Can be custom sized with nailing flange or without nailing flange.
- Tilt-n-Lock hardware comes standard.
- Custom sizes.

TILT-N-LOCK HARDWARE

The cam-lock has three positions – locked, unlocked and tilt-release. Each step functions smoothly with a positive stop.

S-SERIES COMPLEMENTARY PRODUCTS – VIWINCO

Add personality to your home design with Viwinco Complementary Styles – Picture Windows, Sliders, Bay & Bows, Geometric, Casements, and Patio Doors. All complementary styles are manufactured in-house and have a **one week lead time**. All complementary products are available for both New Construction and Replacement installations.

PICTURE WINDOWS

- 15/16" insulating glass units with Solarban® 60 Low-E, double-strength glass, a low-conductance spacer, and argon gas fill are standard and contribute to excellent thermal performance.
- Available in large sizes and can be mulled together for dramatic openings.
- Beveled exterior creates the look of traditional craftsmanship.
- Available to be mulled to other products.

SLIDERS

- 15/16" insulating glass units with Solarban® 60 Low-E, double-strength glass, a low-conductance spacer, and argon gas fill are standard and contribute to excellent thermal performance.
- Operable sashes lift out for easy cleaning convenience.
- Slider window styles are supplied with deluxe extruded screen frames only.

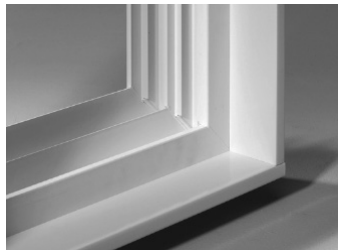

BAY & BOWS

- Each unit includes tie rods that connect the headboard to the seatboard to provide stability and strength.
- Birch head and seatboard come standard, can be painted or stained to match your decor. Oak veneer head and seatboard are available.
- 10-mil vinyl covers the exterior of the unit so there is no need to finish the bottom.
- Chain suspension system attaches directly to the frame of the house to assure a sound installation.
- Styles are available with double-hung, picture, and casement windows.

VINYL EXTENSION JAMBS

To make installation easier and cleaner vinyl extension jambs can be factory applied.

GEOMETRICS

- 15/16" insulating glass units with Solarban® 60 Low-E, double-strength glass, a low-conductance spacer, and argon gas fill are standard and contribute to excellent thermal performance.
- Choose From Extended Arch Eyebrow, Circle, Half-Round, Quarter-Round, Gothic, Half-Gothic, Octagon, Oval, Half-Oval, Elliptical, Or Even Custom Shapes to Add Personality To Your Home.
- Custom bent interior casing or exterior AZEK® Trim are available to complete your installation.

CASEMENT & AWNINGS

- 15/16" insulating glass units with Solarban® 60 Low-E, double-strength glass, a low-conductance spacer, and argon gas fill are standard and contribute to excellent thermal performance
- Heavy duty operator with folding handle and dual arm system provides a smooth sweep, reliable alignment and positive locking.
- Specially designed hinges allow the sash to pivot a full 90-degrees for easy cleaning.
- Multipoint lock adds security and assures a snug sash closure. • Sturdy extruded full screens are standard.

PATIO DOORS

- 1" double pane tempered insulated glass unit with Solarban® 60 glass, a low-conductance spacer and argon gas fill is standard.
- Two sets of adjustable, heavy-duty, galvanized steel door rollers provide a smooth glide. • Stainless steel roller track cap adds years of function to the door. • Heavy-duty, multi-chambered vinyl head and jamb profiles contribute to thermal efficiency.
- Vinyl Sill is standard on 2-and 3-panel patio door, Aluminum sill is optional.
- 2-panel & 3-panel patio door must have an aluminum sill in order to meet DP50
- 4-panel patio doors will come standard with Aluminum sill (does not meet DP50)
- 1-1/4" integral, pre-punched nailing fin for a trouble-free installation.
- Weep slots and sloped threshold direct moisture outside the door.
- Screen track keeps screen in place to block insects better.

SKYLIGHTS

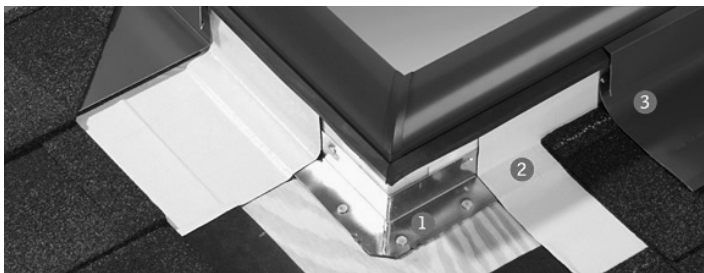

NEW! THE NO LEAK SKYLIGHT

The VELUX deck mounted product family is now designated The No Leak Skylight. It carries the new 10-year installation warranty plus 20 years on glass, 10 years on product, and five years on blinds and controls. Features include 3 layers of water protection – advanced LoE3 glass for better energy efficiency, higher visible light transmittance, and improved solar heat gain performance – money-saving pre-finished white frames and sashes – pre-mounted brackets for quick installation of sunscreen blinds – lower roof profile with an updated curved architectural design – and a neutral gray color to blend with most roof materials and colors.

3 LAYERS OF WATER PROTECTION

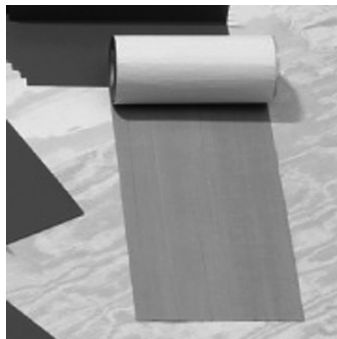

Now with the new deck seal technology.

1. Introducing a third layer of water protection. The pre-attached deck

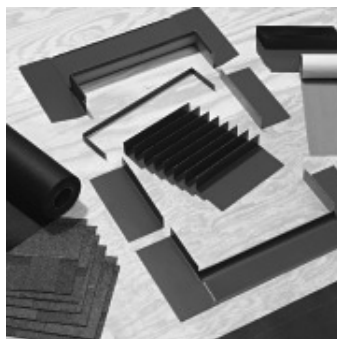

seal on all deck mounted skylights provides a seal between the frame and roof deck for a leak-proof installation.

2. Adhesive underlayment for secondary water protection against the harshest weather conditions.

3. Engineered flashing for easy installation and primary water protection.

SKYLIGHTS – VELUX

VELUX skylights are designed for overhead, out-of-reach applications or for in-reach applications that do not require egress emergency escape capabilities. They come in a wide range of sizes and features with a full assortment of blinds

ELECTRIC VENTING SKYLIGHTS

Skylights that open at the touch of a button.

MANUAL VENTING SKYLIGHTS

Skylights that operate with manual controls.

FIXED SKYLIGHTS

Skylights that provide an outside view, but no fresh air.

- Simple Installation
- Energy Efficient Glass Options For Added Safety And Energy Efficiency
- Sunscreening Options For Optimal Light Control
- Flashing Options For A Weathertight Installation
- Installation Slope from 0° to 60°
- Quality Construction
- Streamlined Exterior
- Wide Range of Sizes
- Easy Skylight Replacement Option

ROOF WINDOWS – VELUX

VELUX Roof Windows are designed for in-reach applications that require egress emergency escape capabilities. Examples include above-garage bonus rooms, lofts, and finished attic spaces.

BALCONY ROOF WINDOW

The GDL CABRIO roof window opens to create a roof balcony.

TOP HINGED ROOF WINDOW

The GPL roof window opens to provide maximum ventilation.

- Simple Installation
- Energy Efficient Glass Options
- Sunscreening Options
- Flashing Options
- Installation Slope from 35.25° and 53°
- Quality Construction
- Streamlined Exterior
- Wide Range of Sizes
- Easy Skylight Replacement Option

SUN TUNNEL SKYLIGHTS – VELUX

VELUX SUN TUNNEL skylights are ideal for smaller rooms such as closets, hallways, laundry rooms and second baths. You can now add natural light to places you thought were impossible.

TMR (rigid/pitched)

A highly reflective rigid tunnel and pitched flashing provides the brightest light.

TGR (rigid/low profile)

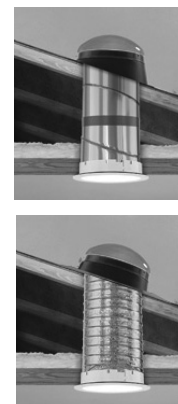

Highly reflective rigid tunnel and low profile flashing blend and provide brighter light.

TMF(flexible/pitched)

Pitched flashing a flexible tunnel gather light and make installation even easier.

TGF (flexible/low profile)

Low profile flashing and flexible tunnel blend into roof and make easy.

VELUX®

DOORS

DOORS- INTEGRITY

SLIDING FRENCH DOOR

- The exterior of our sliding French door is made of Ultrex,® a pultruded fiberglass material that vastly outperforms and outlasts vinyl and painted wood. It is virtually maintenance free.
- Sliding French doors are delivered with factory-assembled frames and pre-hung panels for faster, easier installation.
- An elegant, wide bottom rail provides a traditional French profile.
- Traditionally styled, ergonomically designed handles are available in Almond Frost, White and Brass, as well as Satin Nickel and Oil Rubbed Bronze
- This sliding French door features a dual-point lock for added security and a tighter fit against the jamb, which means a better seal against the elements.
- The easy glide roller track combined with dual ball-bearing rollers provide smooth, easy operation.
- The door features a top hung screen that won't get hung up on dirt or debris.

INSWING FRENCH DOOR

- An oak sill liner can be painted or stained to match the solid wood interior.
- Our adjustable hinges mean that as a home settles and shifts over time, our Inswing doors will still open and close easily in the frame. All that's needed is a quick twist with a standard screwdriver.
- Our multi-point locking system seals the door in four locations: head, sill, deadbolt and keyed cylinder latch – to add structural stability as well as security.
- Our secondary panel on the Inswing French Door is handle-activated.
- Our top-hung screen for two-panel doors won't get locked up on dirt or pebbles in a sill track. Also available is a jamb-hinged screen which requires minimal operational force; it's available for jamb-hinged and single-panel configurations.

SLIDING PATIO DOOR

- For durability and beauty, we finished the sill with an enduring oak liner.
- Our top-hung screen won't get locked up on dirt or pebbles in a sill track – one more reason you can install an Integrity door, then forget about it.
- The strength and durability of Ultrex where you need it most: on the sill, standing up to traffic and weather.
- Traditionally-designed interior handle in Almond Frost, White and Brass.

ENTRY DOORS- MASONITE

STA-TRU™ HD PREFINISHED STEEL ENTRY DOORS

- Prefinished White Surface* (no initial finishing required on door panel)
- Sta-Tru® HD features wider stiles (Wood-Edge only)
- Wood lockblocks on all configurations
- High-definition panel profile
- Wide design selection, including the new 1-Panel Arch and 2-Panel Camber Top
- 6' 8", 7' 0" and 8' 0" heights (8' 0" features standard panel profile)
- Fire doors available (20- and 90-minute)
- Available with Steel-Edge or Wood-Edge construction
- 24-Gauge, galvanized, prefinished steel facings
- Door panel features a limited 20-year warranty. The Sta-Tru® HD finish features a limited 5-year warranty.

MASONITE HD HIGH-DEFINITION STEEL ENTRY DOORS

- Primed White Surface (finishing required)
- High-definition panel profile
- Wide design selection, including the new 1-Panel Arch and 2-Panel Camber Top
- 6' 8", 7' 0" and 8' 0" heights (8' 0" features standard panel profile)
- Fire doors available (20- and 90-minute)
- Available with Steel-Edge or Wood-Edge construction
- 24-Gauge, galvanized, primed steel facings

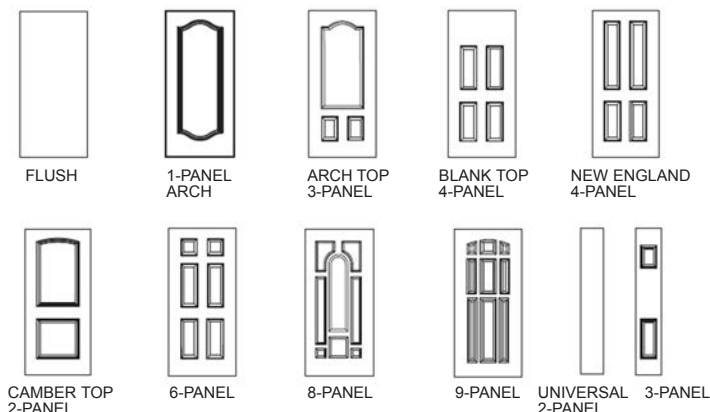

MASONITE UTILITY STEEL DOORS

- Primed Surface (finishing required)
- Standard panel profile
- Limited design selection
- 6' 8" height only
- Wood-Edge construction only
- 26-Gauge, galvanized, primed steel facings

MASONITE STEEL DOOR LINE

MASONITE® WOOD-EDGE FLUSH-GLAZED STEEL DOORS

- Combination of 24-gauge steel facings, a wood thermal break and a high performance polyurethane core provide brighter rooms, energy efficiency and solid construction.
- **SUPERIOR AESTHETICS** – The flush-glazed feature provides a much cleaner appearance than a traditional glass insert. The glazing bead is flush with the surface of the door and does not have screw holes.
- **STILE & RAIL FACING CONSTRUCTION** – All doors feature an authentic stile and rail facing construction – replicating the appearance of a real wood door without all the maintenance.
- **WIDER VIEWING AREA** – Masonite Flush-Glazed Doors brighten up any room with up to 20% more viewing area – standard and wide glass inserts are available.
- **DURABLE & ENERGY EFFICIENT** – All Masonite Flush-Glazed Steel Doors are manufactured with 24-gauge steel facings and polyurethane foam cores – maximizing strength, durability and

- Finish/trim nailers
- Brad nailers
- Framing nailers
- Roofing nailers
- Cedar nailers
- Siding nailers
- Masonry nailers
- Metal connector nailers
- Staplers
- Finish staplers
- Sand blast pot

COMPACTION EQUIPMENT

- Rammers
- Plate tampers
- Rammax roller 33"

CONCRETE & MASONRY

- 48" bull float w/6"ft handle
- 8" tile saw
- 10" tile saw w/stand
- 12", 14", 18" walk behind floor saws
- 14" portable gas cutoff saw
- Core drill rig w. vacuum base
- Core drill (hand held) 4" capacity
- Concrete vibrators
- Concrete vibratory screed, gas powered
- Concrete mixer electric 3 cubic ft
- Concrete mixer 6 cu. ft.
- Mortar mixer 6 cu. ft.
- Concrete floor grinder electric 2 head
- Concrete chain saws
- Concrete planer
- 14" block saw

CLEANING EQUIPMENT

- 3000psi pressure washer cold
- 2000psi pressure washer cold
- Wet/ dry vacuum
- 20" surface cleaner

FLOOR CARE

- 20" floor sweeper
- Floor sander 8" drum
- Flood edger 7" edger
- 17" floor sander/polisher
- Linoleum roller 100 pounds
- Floor stripper electric
- U-Sand floor sanders

GENERATORS

- 2500 watt
- 3600 watt
- 6000 watt
- 9700 watt
- 180 amp welder generator w/ lead

HEATERS/ FANS/ BLOWERS

- Dehumidifier
- Carpet dryer
- Gas ventilation fan
- 150,000 btu kerosene heater
- 150,000 btu propane heater
- 75,000 to 200,000 btu propane heater radiant
- 42" floor fan
- 30" floor fan

LIFTS

- Towable bucket lift 36' working
- Scissor lift, towable 24' working
- Scissor lift, Genie 1930 25' working
- 1 Man 24' manual lift

LADDERS/ PLANKS

- 12' fiberglass step
- 14' fiberglass step
- 16' fiberglass step
- 24' fiberglass extension
- 28' fiberglass extension
- 32' fiberglass extension
- 40' fiberglass extension
- 60' fiberglass extension
- 10' – 17' aluminum expandable plank
- 14" x 24' aluminum stage plank 500 lb. cap.
- 14" x 20' aluminum stage plank 500 lb. cap.
- 14" x 12' aluminum stage plank 500 lb. cap.

LANDSCAPE EQUIPMENT

- Harley rake
- Brush cutter
- Post hole digger 1 man w/ 6 to 12" augers
- Leaf blower 8 hp
- Sod cutter 18" 5.5hp Honda
- Roto-tiller
- Walk behind sweeper
- Bed scrapers
- Aerator 25.5" core plug type
- Comber/de-thatcher 18" w/catcher
- 6" – 36" posthole diggers
- Pole chainsaw

MANUAL TOOLS & EQUIPMENT

- 10' Tapco Pro 14 brake
- 10' Tapco Black Max commercial brake
- .27 caliber powder actuated gun
- Line striper
- Suction cup for glass panels
- Seamer (single & double lock standing seam)
- Asbestos siding cutter
- Trak-It tools
- Power seamer

MATERIAL HANDLING EQUIPMENT

- Chain puller 1-1/2 ton by 15' pull
- Appliance dolly
- Pallet jack 5500#
- Hydraulic jacks 22.5 ton
- Screw jacks 20 ton
- Hand truck
- Panel lift drywall jack
- Johnson bar
- Binders
- Sumner material lift
- 27' power ladder gas
- Material lift 16' & 20' w/ 750 pound cap
- Forklift truck 5000 lb. cap.
- Roust-a-bout

POWER TOOLS

- Drywall screwgun
- Muro deck screw gun
- Shear 12 ga. Electric
- Reciprocating sawzall
- 10" circular saw
- 10" compound miter saw
- 1/2" drill
- 1/2" Tek/ driver
- 1/2" right angle drill
- Impact wrench
- Toe kick 12"
- Magnetic drill press
- Hole hawg
- Dustless drywall sander
- Jamb saw 6-1/2"
- Tamper plate 8 x 8
- 60# electric breakers
- Demo hammer
- 1 3/4" roto hammers
- 1 1/2" roto hammers
- 1" roto hammers
- 1/2" hammer drills
- Extension cords

- Carbide drill bits
- Cement siding shears

PUMPS

- 3/4" submersible pumps
- 2' submersible pumps
- 1" centrifugal 2 cycle pumps
- 2" trash pumps
- 3" trash pumps
- 3" diaphragm pump

SAFETY EQUIPMENT

- Barricades w/ flashers
- 28" traffic cones
- Slow/ stop paddles

SURVEYING EQUIPMENT

- Transit w/ tripod
- Builders level w/ tripod
- Story pole
- Rotary lasers
- Exterior laser level pkgs
- Subsite locators

SCAFFOLD

- 24' alum-a-pole/ jack/ bench/ br
- 6' alum-a-pole
- 12' alum-a-pole
- Safe- t-net
- 6' baker roller platform scaffold
- 5x5x7 section scaffold
- 5x6x7 section scaffold
- Scaffold outriggers
- Scaffold leveling legs
- Scaffold wheels 8"
- Scaffold planks 7" x 19"

TRENCHING

- Bobcat MT52 trencher on tracks
- Vibratory cable plow (ditch witch)
- 30" x 4" trencher

SOIL EQUIPMENT

- Trailer 10,000 lb. 14' tandem lift
- John Deere skid loaders
- Backhoe attachment for skid steer
- -Auger attachment for skid steer
- -Augers in 12", 24", 36"
- John Deere mini-excavator
- Bobcat MT52 loader
- -Trencher attachment for Bobcat
- -Auger attachment for Bobcat

ALUMINUM POLES & PLANKS

SCAFFOLDING

ALUM-A-POLES

Alum-A-Poles are made from a special structural aluminum that is permanently mated to a Saf-T-Grip rubber. Alum-A-Poles can be quickly spliced and used to a 50' maximum shoulder working height (which meets OSHA requirements). This is the first variation in height since the inception of OSHA. The Alum-A-Joint has 3 separate safety stops. Alum-A-Poles can be used for different height needs and uncoupled quickly for convenient storage.

- Lifetime Warranty.
- Industrial rubber permanently mated to structural aluminum.
- Lab tested to 5,000 lbs
- 6, 12, 18 and 24 foot lengths.

OTHER PRODUCTS BY ALUM-A-POLE

- (call for pricing and availability)
- Alum-A-Brace
- Alum-A-Joint
- Pro-Jack & Pro-Bench
- Alum-A-Scaff
- Simm's Saf-T-Net/Sign
- Alum-A-Pole Scaffolding System
- Alum-A-Scaff Legs
- End Rail System

LADDERS

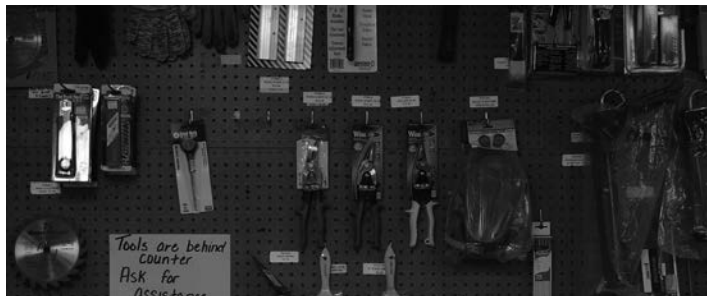

CALL FOR LATEST MODEL AND PRICING

- Stepladders
- Extension Ladders
- Scaffolds & Work Platforms
- Attic Stairways
