# SULTAN FITS

## **SULTAN mattresses are designed to fit – you.**

It doesn't matter what a mattress costs, or even what it's made of, if it doesn't suit you, your needs and the way you sleep.

Each SULTAN mattress has been developed with comfort properties that correspond to different needs. Like how much you weigh, how you sleep, and how warm you feel at night. So it's easy to get the combination that's right for you.

Since your choice is based on your needs, we're pretty sure you'll be happy with the mattress you pick. But sleep on it for a while. If you decide you'd prefer another, bring it back. We'll exchange your mattress once within 90 days of purchase. Because your mattress shouldn't be something you live with, it should be something you love. See the complete 90 day exchange policy on p. 35.

## HOW TO TRY:

- Lie down and relax. Give yourself at least ten minutes on every mattress to get a true feeling for it.
- Start in your usual sleeping position – with a pillow under your head and neck. Move around a bit too. Just like you would at home!
- Back sleeper? Slide a hand under your lower back. Does it slide in very easily? The mattress is too firm. Difficult to slip your hand under? Too soft.
- Side sleepers need a mattress that allow the shoulders to sink into it. If it doesn't, the mattress is too firm.

Foam mattresses

## CONTOURED TO YOU

Lie down. Sink in. Relax in a foam mattress that hugs your body and absorbs your movements, so even if your partner moves around, you won't feel a thing. High-resilient foam is excellent at relieving pressure. Memory foam contours to your body, then resumes its shape, so you're supported no matter what position you sleep in. Since foam combines well with other materials, we've added latex, wool and silk to some of our range for a wide choice of comfort. Most have washable covers too, so you can keep your mattress fresh.

### Complete your comfort:

Latex mattresses

## PRECISE SUPPORT

Latex yields to pressure points – at the shoulders, hips and elbows, for example. This allows you to fully relax. Our most flexible mattresses, latex makes a perfect companion to an adjustable slatted bed base. Similar in benefit to foam, with a lighter, springy feel. Latex cushions movements for undisturbed sleep. A naturally porous material, it also circulates air and draws moisture away. Most SULTAN latex mattresses have removable covers for easy cleaning.

### Complete your comfort:

with a slatted bed base or box spring/mattress base. Latex is flexible, and especially suited to an adjustable slatted bed base. If you'd like, add a washable mattress pad for comfort and convenience.

## Spring mattresses

# PRESSURE RELIEVING

A spring mattress distributes weight evenly to eliminate pressure on any particular part of your body. Since air travels easily through springs, your mattress stays fresh and dry, so you stay comfortable. Spring mattresses can be flipped – so they're extra durable and combined with a mattress base, spring gives a high profile.

### Complete your comfort:

# Slatted bed bases

## HIDDEN SUPPORT

Extra support and a longer mattress life. Slatted bed bases absorb body movements and can provide added springiness. They range in flexibility from basic bases to those with adjustable slats and head and foot sections that lift. They fit into your bed frame, under a foam, latex, or turnable spring mattress. Slatted bases give a streamlined, lower look.

# A SOLID BASE

Create a higher look, and give your mattress support. A mattress on top of a base lets you sleep higher and makes it easier to get out of bed. Our bases absorb shock from body movements, so your mattress lasts longer. Set it in a bed frame or simply attach your choice of legs.

# STAY WARM (OR KEEP COOL)

We can't tell you how warm your comforter should be. That depends on your body and your bedroom. But we can make things simpler once you've decided. All our MYSA comforters have warmth ratings. So it's easier to control your temperature under the covers. Meaning you can skip the thick socks. Or put an end to throwing off your comforter. To see our full range of comforters, and for help choosing yours go to [www.IKEA-USA.com/quiltspillows](http://www.IKEA-USA.com/quiltspillows)

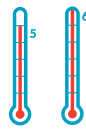

## WARMTH RATE 1 OR 2

Perfect if you feel hot at night, or sleep in a warm room. Comforters with a rating of 1 or 2 are the least warm.

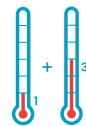

## WARMTH RATE 3 OR 4

A warmth grade of 3 or 4 is good for those who want the feeling of a warm comforter but don't need extra insulation.

## WARMTH RATE 5 OR 6

Our extra warm comforters. Choose a 5 or 6 if you tend to feel chilly. Or like to keep your room cool.

## ALL SEASONS COMFORTERS, WARMTH RATE 1+3

Our all seasons comforters combine one warm, thick comforter and one thinner comforter. They can be snapped together or used separately, for three levels of warmth, and year-round comfort.

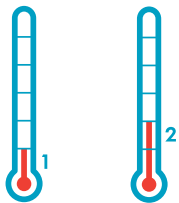

- Synthetic fibers 
- Natural fibers 
- Down and feather 

**MATERIAL** Once you've decided on warmth, there's a wide variety of material combinations to choose from. From easy-care synthetics and natural fibers to 90% goose down. All MYSA comforters can be cleaned by machine washing or dry cleaning, check the care label for details.
